Papst's Pointer Mason's King.

AT THE TRAPS.

The Golden Gate Gun Club regular monthly shoot is the card at Ingleside to-morrow for blue rock shooters.

The Capital City Blue Rock Club shoot originally billed at Sacramento for the 10th inst., was postponed and will take place to-morrow.

The Rising Sun Gun Club held its first shoot of the season May 3rd and some fair scores were made. The boys, of course, were out of practice, but after a little further practice they expect to make better records. The scores at 20 targets were as follows: C. Meyer 9, C. Rohwer 12, A. Huhs 12, C. King 12, C. Groves 10, E. Feudner 14, W. Peterson 16, At 5 targets—C. Meyer 2, C. Rohwer 2, A. Huhs 3, C. King 4, C. Groves 1, E. Feudner 2, W. Peterson 4.

There was a good attendance at the Clovis Gun Club traps recently, and the shooters enjoyed a good afternoon's sport. Following are the scores made:

First event—Regular weekly shoot, 30 targets, known traps, unknown angles, Rutledge 19, Ruthnick 14, Nichols 20, McMurtry 16, H. Atkinson 17, Fraler 17, Clay 20, Birge 18, Hollensen 19, Mitchell 18, Clifford 16, Carr 17.

Second event—Miss and out, McMurtry won with 8 straight.

Third event, 10 targets, unknown traps, unknown angles, Clay 7, Nichols 5, McMurtry 6, H. Atkinson 8, Rutledge 6, Carr 7, C. Atkinson 3, Hollensen 5, Clifford 8, Fraler 8.

The following scores were made out of a possible 25 at the Colton Gun Club shoot April 27th: D. Gallehue 12, H. E. Fouch 14, Harry Herrick 9, Ben Allnutt 9, Louis aughan 9, W. Souther 20, W. T. J. Reeves 9, Jack Tedford 12, A. Vaughan 18, D. H. Coe 18, Will Malone 14, Charles Felton 18, C. L. Hunt 8.

Twenty-two shooters were present at Nelson Park, Woodland, on May 3rd. R. Cassell, Springer and Sachs were the principal winners.

Nellie Bennett Stuart, Colorado's champion lady trap shooter was in Reno two weeks ago and has been an honored guest of the Riserside Gun Club during her stay. Lillian Bennett is her maiden name, and she is best known by that title throughout the country. She is married. Her husband is W. A. Stuart, representative of a big cement plant, and he is traveling through the West selling his company's produce. Mr. Stuart was with his wife in Reno this week.

Mrs. Stuart took part in an exhibition match at Moano Springs in which she won a wager of a wine supper for all the members of the club for Tom Pickett, who made the bet with his brother Sam.

Mrs. Stuart won the match, breaking 22 out of a possible 25, in the face of a heavy wind. James May was second with 20 birds. There were three other matches. The scores in each in their order were as follows:

Sam Pickett 23, Shad Le Deaux 20, Mrs. Stuart 18, Mrs. Stuart 20, Tom Pickett 18, James May 15, Dr. Cunningham 19, Mrs. Stuart 18, Shad Le Deux 15.

There will be another contest to-morrow at which time another match will be held between Mrs. Stuart and Tom Pickett.

Moved to envy by the crack shooting of Mrs. Nellie Bennett Stuart at Moana Springs, a number of Reno ladies have become enthusiasts in the sport and under the tutelage of Jimmy Clark will form a class one day in each week to receive instruction in the art of shooting blue rocks.

Mr. Clark states that he would arrange for instruction some day next week, probably Wednesday, and that after proficiency is attained by the ladies, they will be given an opportunity to contest among themselves at the regular Sunday shoots.

A. B. Douglas, shooting from scratch, won the handicap medal match of the Los Angeles Revolver and Rifle Club May 3rd with a score of .87 in three

strings of thirty team shots each.

At the business meeting of the club it was decided to join the National Rifle Association and ten of the members became affiliated with the United States Revolver Association. It was decided to obtain as many telegraphic matches with eastern clubs as possible.

The annual election of officers resulted as follows: J. E. Holcomb, president; C. W. Linder, first vice-president; W. A. Wright, second vice-president; E. C. Crossman, secretary; W. E. Smith, treasurer; I. C. Douglas, assistant secretary; W. S. McFarland, range master.

Why is the Great Western Power Company sending out public announcement that no fishing permits will be granted this season on the company's property in the Big Meadows?

The answer, locally, is that the company desires to make Big Meadows a great tourist resort, and that to accomplish this it must possess the property now under the individual ownership of people who profit largely each summer from tourists and who if the tourists failed to come a season or so would be more inclined to sell to the company than they seem to be now.

Contrary to general belief, the Great Western Power Company does not own all of Big Meadows. It owns only along the eastern branch of the river and the Bunnell and Pratt properties. All the lands along the streams in the western part of the valley are under individual ownership, and although the Western Power Company may refuse permits for fishing on its possessions, there yet remains many good trout streams that may be used. Doubtless many will go to Big Meadow again this season.

Deputy County Clerk Denker of Santa Clara County, made his final report last week for the current fiscal year to the State Treasurer of hunting licenses sold in that county. The total amount received from this source is \$3,805, of which \$50 is for two licenses sold to aliens at \$25 each. The remainder is for licenses sold to citizen residents of the county and State. This shows that there are 3,755 persons in the county who take interest enough in field sports to pay one dollar each year for the privilege. Of the \$10 license, required by citizens of other States, none were sold.

The sales by quarters were as follows: Quarter ended September 30, 1907, \$2,873; quarter ended December 31, 1907, \$992; quarter ended March 31, 1908, \$79. During the present quarter, which will not end until the last day of June, but \$1 has been received, and nothing more is expected, as the close season is now on.

One minute after midnight, May 1st, according to Game and Fish Warden Welch parties were fishing along the streams of the county for trout.

He said that on Soquel creek at five o'clock on the morning of the 1st he counted fourteen in the space of a few hundred feet.

George Hickey, brakeman on the Boulder Creek branch, on his early down trip counted twenty-two between Felton Junction and the Powder Mill dam.

Many went up the coast and the San Lorenzo near town was lined with fishermen. Mr. Welch reports many people from San Francisco and San Jose, who came to try their luck in the Santa Cruz trout streams.

Fifty-six fishermen were held up by Game Warden Hill on the Uvas and Llagas creeks, on the 1st. But one violator of the law in regard to taking undersized fish was found, a small boy, who, when the matter was explained to him, promised to return the little fish to the water in the future.

TROUTING HINTS.

Gentle angler, accompany me down a swift stream and I will give you a few facts on trout fishing. During the month of May, trout improve greatly in condition, moving in water about the heads of pools where flies are numerous.

Of all places where the angler is likely to find trout, at any season, the meeting of two streams is best; there, in a quiet water between and on either side of the strong runs, feeding trout are sure to be lying, watching to seize whatever the stream brings in the way of food. Such places should always be fished with great care.

Trout often congregate about the sides, because aquatic insects upon which they feed are there most numerous. They choose a feeding place below some large stone, or where the river runs beneath the bank. Such places are always sure to hold a good trout.

When a trout takes the fly, it shuts its mouth, and if the angler is exceedingly quick, he is almost sure to bring the hook in contact with its closed jaws. If time is given them they very quickly expel it from their mouth with considerable force, because they at once find it to be a counterfeit.

If a big fish is hooked a heavy strain should be kept on it continuously. This prevents it from moving its gills, and suffocation ensues. This takes place much sooner when the trout is drawn down a strong flow of water; if the fish is allowed to run up stream, as it always endeavors to do, it gains renewed vigor.

Keep the end fly always in sight, because you are then better prepared for a rise; to that end, choose a fly that is a distinct light or dark color. It has slate-gray wings, black hackle and tail, with silver body, tied on a No. 12 or 10 hook.

Remember that the dropper, or upper fly, should act as a teaser, by being kept continuously alighting on the surface. This is done by a slight move of the tip, making the fly fall.

The fishing is best from the time the sun is well up to shortly after midday. Natural flies get on the water after the mist rises, from 7 to 9 a. m. From 1 till 5 p. m. the fishing is poor, take a rest till the sun is low, then fish till dark.

On cold, sunny days fish the warm side of the stream. It is there that the flies congregate. Where food is, trout go. Before you enter the stream place the cast of flies at the edges nearest to you, without the trout seeing the rod, then afterwards throw the flies partly up, and across, taking care that the line is always straight from the tip, not belled in a curve. It is much better to cast frequently.

Toward dusk put on larger flies. Trout cannot see so well then, and are much less likely to detect the artificial nature of the lure.

When you strike a fish, be quick, but gentle. As a general rule, strike a salmon more slowly than a trout, a trout than a bass, a lake fish than a river one, and a large fish than a smaller one.

Never be in a hurry, especially when you see a large fish rise. Take your time, as he will his, and the result will not disappoint you.

In playing a big, gamey trout, do so as much as possible by wading, and walking. Never let out a long line if you can avoid it. A short line is more easily handled, and the fish under better control.

Never try to get your fish to the surface till he is quite spent. He may break the hold, if not heavy enough to break your tackle.

Don't run after the fish when the line is reeled in to the gut cast, stand still, and with the rod draw the fish toward the net, which should be held in the right hand, and placed well beneath the nose of the fish, then, with an upward sweep, lift it out, and carry the fish ashore to unhook.

It sometimes happens that large fish are hooked by the body or the tail. In such a case, reel in slowly but firmly, whether he wants it or not. Don't give him a chance to play or run up stream. It also happens that sometimes a "double" is hooked, and such needs, first of all, patience till the pair are so situated that you can net them close together. Fortunately for the angler, they always seem to be inclined to swim the same way. If they don't, fine gut would soon part.

Remember, that a short, stiff seven-foot rod is best for worm fishing. It enables you to get through brushy places, and to plant the bait in the right spot. Have the gut only three feet long, because oftentimes you only need that length to place a worm in other wise difficult places. Use a bright, red worm, a "wriggler," not a dead one. Have the rod and yourself at all times invisible to the quarry. In this lies the secret of a full creel.

Use small, sharp hooks. Be always alert. Never wade muddy streams that will disturb sticks and leaves to float down and so scare the trout.

It is poor fishing to use a split shot to sink the worm, because trout are accustomed to see worms travel naturally with the current. If the worm moves slower, or sinks to the bottom, trout are suspicious. The case is different where trout lie deep in still water of lakes or rivers. The natural worm drops to the bottom. In fishing exposed water from the bank, kneel down, cast sideways, so that the trout cannot see the rod.

MEDITERRANEAN TUNA.

Herbert St. Aubyn Earlscliffe of Santa Barbara, a well known member of the Tuna Club, and a skilled all around sea angler, is at present going around the world on a fishing trip and for pleasure, and, in Tunis, he found large and interesting tunny fisheries, and writes about them entertainingly to a fellow angler in Pasadena and anglers in general all over the country will read with interest what he says about this sport with the world's great game fish. Mr. Earlscliffe writes from Muslapha, Algiers under December 31, 1907.

Tunis, tunny, tuna, sounds reasonable don't it? I mean the connection. Anyhow I started to investigate during a recent pleasure trip through Sicily and over to Malta and Tunis, and if any of our tuna enthusiasts are interested in the results, here they are: To begin with, tunny fishing over here is not a sport, it is an industry, and has been since "the memory of man runneth not to the contrary," and of such magnitude and importance that not long ago a governmental commission was appointed to investigate and report on the advisability of its being taken over and made a government monopoly. Under such circumstances one would suppose that everything knowable about these fish would be "on tap," yet I find the opposite is the case and that information is scarce and often contradictory. What I give below, has been gathered on the spot, from sources that should be authentic, and has been confirmed several times.

First in importance to the Catalina fisherman is the fact that the tunny and the tuna are one and the same (a sort of horse mackerel) as can readily be seen in the illustrations. It is stated that in Sicilian waters the fish sometimes reach a thousand pounds in weight. Think of that Mr. "Lighttackleman," but last year the largest taken weighed but 650 pounds, and was presented as an offering to the shrine of St. Sebastian, the patron saint of Sicilian fishermen. The fish usually enter the Straits of Gibraltar in April,

and are soon after seen off the Balearic Islands and towards the first of May reach Sicily. It is then called the "tunny of arrival" and here the main school seems to split into three. One going south to the Tunisian coast and thence to the Adriatic and a few as far as the Bosphorus. Another branch school apparently the largest, follows the northerly coast of Sicily, on through the Straits of Messina as far as Syracuse, while the third branch strikes north to Sardinia. As at Catalina their arrival is irregular, in some years early, some late, and some years not at all. Often they are preceded and followed for a fortnight by young fish from 20 to 50 pounds. After July they practically disappear, except for occasional specimens that seem to remain the year around. From July to October they are taken in much smaller numbers off the coast of Spain and they are then called the "tunny of return," but where they originally come from, or finally go to, is answered in the rather large terms South Atlantic and North Atlantic. Nor can I get positive information as to why the fish follow such fixed lines, whether to spawn or no, or where the fry are reared. (None are ever taken apparently.) Or whether it is that they only follow the vast shoals of sardelles "palamita" and "sgamirro" on which they feed (instead of the flying fish as at Catalina.)

It is impossible to convince the Sicilians that the tunny can be taken with rod and reel, and indeed it does not appear to ever have been done there though heavy hand lines are sometimes used. The native, aside from his constitutional dislike for labor, is too much interested in it as a bread and butter proposition to think of the sport, and even among the officers of the British garrison at Malta, the idea seems unknown, or at least undemonstrated, and there is a profitable field for some of our tackle manufacturers to go there and teach them the trick.

When the tunny are expected, nets are put out, watchmen stationed, boats and canneries made ready. A general fiesta is held, and invocations and bribes offered the saints to bring a good season. Motor boats or launches have not been introduced yet. The nets are enormous affairs, some costing as much as \$10,000 being miles in length and of varying depth, from fifteen to fifty feet. They are placed at strategic points along the coast and serve to guide the fish into the corral net or "camera di morte" as it is called. Strange to say the tunny always turns to the left when meeting these obstructions, and this trait has given rise to the curious idea that it is blind in one eye. At any rate the openings in the nets are arranged on this principle, and men in a small boat watch to see when a sufficient number have entered, then the entrances are closed and the large boats draw up and haul in the net, spearing, clubbing and gaffing the huge fish who churn the water and drench the men with the bloody spray, as can be imagined by looking at the illustration. Of course the corral net has a bottom and is very strong, to resist not only the tunny, but also the sharks and swordfish that occasionally enter with them. After the slaughter is complete, the nets are replaced and the loaded boats (200 fish are often taken at a haul) go to the canneries on shore, where the tunny is speedily cut up and cooked and canned and afterwards shipped all over the world. Large capital is invested in the industry, the value of the nets alone running into the millions of francs, and one concern, the Florios, are said to clear two million francs in a good season at their plant near Trapani.

For anyone wishing to enjoy the sport of taking the tunny with rod and reel—a la Catalina I offer the following suggestions: Make Palermo your headquarters. It is a delightful place and in May is at its best. Mr. Ragusa, the proprietor of the principal hotel is a pleasant contrast to most European landlords in that he takes a personal interest in his guests instead of leaving them to the "conclerge." He is also a naturalist and collector of reptiles. Mr. H. Pernull, the genial tourist agent there, is another whose acquaintance should be cultivated. He is an archaeologist and author in his leisure moments, and is thoroughly familiar with his Sicily and its people. Between these two the visitor will have no trouble in securing the best boats and boatmen, information, letters of introduction, permits, etc. Of course a complete tackle outfit should be taken along as nothing of the kind can be procured in Sicily or Europe either I dare say. As the fish often run to such great size there would necessarily be a lot of smashed tackle, hence my advice to take plenty—a triplicate outfit at least. Palermo can be reached easily from Naples by boat or train, the former being but a night's passage and if moonlight, will never be forgotten.

It will be a great disappointment to me if I am unable to be on hand next May to try to be the first to take a "button tuna" in those waters. Great glory awaits the man who first demonstrates the possibility besides grand sport, and should I fail, my hope is that some other member of the original Tuna Club may turn the trick, and so shed additional lustre on this, the parent organization.

BIG GAME AT SEA.

All out of doors is the realm of Dr. Charles Frederick Holder, Pasadena's noted author. But the deep sea is his special province where he is "monarch of all he surveys." He is passionately fond of deep-sea fishing and is an adept at it. His monumental work in behalf of elevating the sport in Southern California waters is generally recognized among fishermen and has its influence on both coasts.

Dr. Holder, in his latest book, traverses a realm he dearly loves and with which he is thoroughly familiar. The reader of "Big Game at Sea" must needs be im-

pressed with the refreshing enthusiasm and the graphic style which marks the recital of actual experiences and observations of the author. And the reader is no less impressed with the fact that the author knows exactly what he is writing about.

Dr. Holder has a style rarely attained by nature writers. There is a piquancy and vigor in every line. This latest work is full of action from preface to "finis." Much of it is thrilling, all of it is of absorbing interest even to those who have never fished in the sea.

The work is beautifully printed in large type on thick paper. There are 352 pages, twenty-three chapters and about forty-five excellent illustrations. The following from the author's preface, gives an idea of the origin and scope of the work:

"These stories are mainly the author's experiences with big game at sea in many waters. Fifty years ago graining the big ray or devil-fish was the sport of sports along the Carolinas, and it is being revived by men who like a dash of spice with their pastimes. The big ray is now taken nearly every season on the Gulf Coast of Florida, and at Aransas Pass, where an extraordinary contest took place in 1906; a ray swimming off with fourteen boats before it was killed. Yet the 'Giant Ray Club,' suggested last year, to be composed of men who have taken the big fish, produced less than a dozen men who had accomplished the feat, though doubtless a more extended canvass would develop others. The various rod catches here-in described illustrate the work accomplished by the Tuna and other clubs for a higher standard of sport, as on the Pacific slope. At Santa Catalina, especially, game fishes up to 100 pounds are now taken with what is known as a number nine-thread line; the tip of the rod not less than five feet long and weighing not over six ounces, while the members of the Tuna Club have for years taken all their great record fishes on twenty-one-thread lines; the idea being to give all the large fishes the advantage and reduce the catch to the limit of actual size. In the nine years' history of the Tuna Club but sixty-five men have landed, single-handed, with a sixteen-ounce rod and not over twenty-four-thread line, leaping tunas of 100 pounds in weight. In that time, with a big hand-line, it would have been possible to kill thousands of these fishes. These chapters then, may be considered in a sense a plea for light tackle for all the big game of the sea, as illustrated by the methods of the Tuna and other clubs of Southern California, where the nine-thread line and six-ounce tip for all game up to 100 pounds is now the slogan."

There is one chapter in this work, "The Biography of the Man-Eater," which is a classic for simplicity and elegance of diction and for thrilling eloquence, as well as intimate understanding of the dreadful denizen of the deep sea which is described. Of this chapter Dr. Holder says in his preface:

"The chapter is, of course, imaginary as a whole, but is based on the author's observations and capture of sharks of various kinds, and all the individual incidents in the recital are based on actual happenings. In other words, the story is a composite, and the not impossible life history of one of the huge white sharks, which attain a length of twenty or thirty feet, and roam the warm waters of tropical and sub-tropical seas. I might add that I have taken, not once, but many times, nearly every shark in American waters, in the Atlantic, Gulf of Mexico, and Pacific; have watched them in all ages and conditions, and the article is the result of many observations; hence is not what really happens to one shark, but what might happen to any lusty man-eater.

The titles of the chapters of the work will give a fair idea of the range of the book:

"Trailing the Sea Bat;" "Diving for Turtles;" "Ten-Armed Game;" "The Amber Jacks;" "The Biography of a Man-Eater;" "An Ocean Swashbuckler;" "The Taking of Big Game Fishes;" "A Tiger of the Sea;" "Big Sharks as Game;" "The High Leapers;" "Fishing in Southern California;" "Wing Shots at Sea;" "A Leaper of the Kuroshio;" "The Man Behind the Angler;" "The Duel;" "Adventures with the Biggest Bass;" "The Silver King;" "The Madness of Fishes;" "Barracuda;" "A Sea-Going Crocodile;" "Queer Game;" "Off the Sierra Santa Cruz;" "A New Game Fish."

There is a vast amount of information in this work for those who are interested in deep-sea fishing. In fact, it is a veritable *vaude mecum* on the subject. But its interest is not confined to the comparatively few who have inclination and opportunity to fish in the sea. The book is of general interest. It will be read with absorbed attention by the landlubber who never saw the sea and who never fished except with a pin hook in the meadow brook.

The descriptions of fishes are so vivid they deserve a permanent place in literature. Indeed, this would be an admirable book for supplementary reading in schools.

The following information is taken from Dr. Holder's book:

"The big game fishes of the world are comparatively few in numbers. Some of them are as follows: The tarpon, record rod catch, 223 pounds, by Dr. Howe, of Mexico, attaining a weight of 300 pounds; black sea bass, California, 700 pounds, record catch by Mr. L. G. Murphy, 436 pounds; leaping tuna, 1,000 pounds, record catch by Colonel C. P. Morehouse, 251 pounds; the jewfish, of Florida or Texas, 800 pounds; the Bahamaian barracuda, 100 pounds or more; black grouper, 600 pounds; the white sea bass, California Gulf region, 100 pounds yellow-fin tuna and others not so well known."

THE BURRO.

Stories of the Patient Little Animal That Has Led America's Procession.

In a narrow, squalid and dirty alley, lined with abode houses and debouching into San Francisco street, in the quaint old city of Santa Fe, is one of the world's most curious market places. This is the "burro market"—the loafing place of all the gloomy, brigandish-looking Mexicans of North Central New Mexico, and the place in which some scores of burros are fed every day. These are driven to Santa Fe loaded with wood cut in the surrounding mountains. At this strange market place one can often buy a burro for as little as \$1.25—but he will need to take care if he wants the pack of bones to hold together until nightfall. The Mexican is as shrewd in a deal as a Jew or a gypsy, and anyone unfamiliar with his "ways that are dark and tricks that are vain" will do well to keep away from Burro alley, if on business bent.

The burros that may be seen in this quaintest corner of the quaintest city in America hail from every hamlet within a radius of twenty-five miles of Santa Fe. They carry almost every stick of the tens of thousands of cords of wood that cook the food and warm the houses of the inhabitants. The prosperous wood dealer usually owns three of these little animals. If he lives far from the town he makes it a point to have his burden bearers loaded and ready to start by midnight, timing himself to get into Santa Fe by 8 or 9 o'clock in the morning. Each animal carries a load that sells at from thirty-five to fifty cents, so, if the owner of three of them realize \$1.50 he counts himself on the high road to fortune. Having sold his wood, he takes his animals to the free corral in Burro alley, and puts in the remainder of the day loafing, rolling cigarettes, dicking with gringos in the hope of selling one of his animals for as much as the three are worth.

However, the burro does much more than carry wood. He is the nearest approach to a street car that Santa Fe and many another city of the great southwest can boast of. He takes the place of automobiles, riding horses and every other mode of conveyance. He is the universal burden bearer, without which the exploration, settlement and final conquest of the whole west would have been indefinitely postponed. For 400 years he, relic of a primitive age, has led the van of progress on the American hemisphere. He is the empire builder that has planted the standards of civilization in the heart of the southwestern deserts in mountain fastnesses, in regions remote and difficult of access. He made the paths that are now followed by railroads, wagon roads and the streets of thriving cities.

Carrying wood and water, machinery and mine supplies, merchandise and people, and almost everything else under the sun, to places that neither the locomotive, nor the automobile, nor the horse, nor the mule can reach, is the task of this long-eared friend of man. To-day some thousands of these over-worked, underfed and wholly unappreciated little creatures are toiling over the sand and sage of the Mojave and Colorado deserts. What the camel is to the deserts of the Orient, the burro is to the deserts of the southwest. It can live longer without water and can scent it farther than any other beast of burden, except the camel. For this reason it is the companion of the prospector when he ventures into the inhospitable sinks of Death Valley or the untraveled fastnesses of the mountains. For this reason, too, it has fallen to the lot of the burro to lead the way to those amazing gold fields that now lure men by tens of thousands to the alkaline waters of Nevada. Goldfield, Tonopah, Bullfrog, Manhattan, Searchlight and a score more new mining camps in the southwest never could have come into existence but for the aid of this uncomplaining burden bearer, whose very name has been a by-word and a reproach ever since Balaam's precocious ass turned aside from the way in which its master wished it to go, and opened its wide mouth in an unwelcome bray that echoed over the hills of Asia Minor.

By whatever title it is called—whether burro, ass, donkey, Colorado mocking bird, Rocky mountain canary, or Southwestern nightingale, this little animal has led the procession in America ever since Columbus set foot on this hemisphere. The Spaniards brought it over before they attempted the conquest. It carried the accouterments of Cortez to the capital of the Montezumas. It was at Balboa's elbow when he discovered the Pacific. It journeyed with De Soto when he caught the first glimpse of the Mississippi, and with Ponce de Leon when he sought the fountain of youth. Pizarro took it with him to the capital of the Incas; and history tells us that 3,000 donkeys were engaged for years in transporting the treasures of Peru across the Isthmus of Panama. With Alvarado it trudged the mountain trails through Central America, and with Coronado it traversed Arizona, New Mexico and the plains of Kansas in search of the mythical golden city of Quivira. It was the sole helper of the padres when they planted their chain of missions up the valley of the Rio Grande, and built the walls of the Alamo and San Xavier del Bac. Upon its assistance the Franciscan fathers relied, and were not disappointed, when they reared their stately missions in California.

Here is a single instance out of a thousand that might be cited, showing the worth of the unhonored and unsung burro. Some years ago two prospectors, Patterson and Kelley by name, started across the

great Mojave desert, taking along a burro to carry their supplies. In passing from oasis to oasis they lost their way, and before long their supply of water was exhausted. Soon the intense heat and intolerable thirst drove Patterson insane and he fled shrieking across the desert. Kelley picketed the burro and started in pursuit of his partner, following for several miles before he gave up the chase as hopeless. Returning to the starting point, he was dismayed to find that his burro had broken loose and was leisurely making its way across the waste of sand. Of course, he followed, but was so weak and exhausted that he could not catch up. Darkness came and he lost sight of the burro entirely, but was still able to make out its tracks, and stumbled ahead almost without hope. Finally, looking ahead he saw the form of the burro silhouetted against the sky. Apparently it was waiting for the approach of its master. As he drew near it turned and trotted quickly down a gentle slope. Following, Kelley was led straight to a spring of pure water. Is it any wonder that as soon as he had moistened his throat and lips and laved his parched skin he threw his arms around the astonished donkey and kissed it? It had led him in a straight line for a distance of ten miles to the nearest water. He returned to search for his companion, Patterson, but found only his dead body.

One of the world's most famous mines is the Bunker Hill and Sullivan, in the Coeur d'Alene range of Idaho. Title to an important interest in this great property hinged upon the ownership of a donkey, which Judge Norman H. Buck of the Idaho supreme court, with wisdom truly Solomonic, decided judicially was one of the discoverers of the mine. N. S. Kellogg was grub staked by Edward Cooper and O. O. Peck of Spokane. When he returned from his first prospecting expedition with a pocket full of ore Peck pronounced the ore valueless and declared the partnership off, on the ground that Kellogg didn't know gold when he saw it. Philip O'Rourke of Denver had a look at the same specimens and they looked good to him. Consequently O'Rourke and Kellogg were grub staked by Jacob Goetz and Henry Baer and started out for the place where Kellogg's first specimens had been found.

They hadn't made many miles when they found a burro. It belonged to Peck, Kelley's ex-partner, but the pair didn't know that, and proceeded to confiscate the animal. It served them faithful for thirty days, during which time the Bunker Hill and Sullivan claims were located. It wasn't very long until it was demonstrated that the discovery was one of the most sensational in mining history. Then some one told Peck that the old burro he had turned out to forage for itself had been a member of the prospecting party, and he brought suit for an interest in the claims. The case attracted widespread attention and inspired tens of thousands of newspaper jokes. It was brought to a close by the decision of the supreme court of Idaho that the mine was discovered by Peck's jackass, Phil O'Rourke and N. S. Kellogg, and that as owner of the jackass Peck was entitled to one-third interest in the Bunker Hill claim and one-fourth interest in the Sullivan claim. Peck died last July one of the richest men of Spokane as a result of having his supernuated burro pressed into service by the two prospectors.

About fifteen years ago, N. C. Creede made his lucky strike in the Holy Moses mine, that started the camp of Creede in Colorado. Prospectors by the hundred flocked to the district, but for months not another promising prospect was uncovered, and it appeared as if Creede was destined to remain a one-mine camp. Then Julius Haas and Theodore Henninger blew in, with three burros carrying their outfits. One day the burros broke loose and ran away with Henninger in hot pursuit. He caught them on Bachelor mountain and then sat down to cool off. The ledge upon which he was sitting attracted his attention and investigation proved that the burros had led him straight to one of the greatest silver mines ever known. It was the "Last Chance," which has paid millions in dividends.

Instances like this might be multiplied indefinitely, were it necessary to prove that when it comes to locating gold mines the head of an ass is often better than the brain of a captain of industry.

On the very summit of Pike's Peak is a tiny grave with an inscription that has drawn tears by the bucketful from gullible tourists. The inscription is this: "Sacred to the memory of Baby Orin O'Keefe, eaten by mountain rats, 1876." Probably that represents the most successful hoax ever perpetrated upon the American people.

Tom Davis, son of the first mayor of Manitou, owned a pet burro, which he called "Baby." About eleven years ago he harkened to the prayer of a tired tourist (the Cog Wheel railroad not being in operation) and hired out the burro to make the trip to the top of the peak. The journey up was made in safety, but the altitude was too great for "Baby's" tender heart, and the little creature lay down and died.

The tourist walked to the bottom of the Peak, hunted up Tom, told his tale of woe, paid for the burro and departed. Tom was tender-hearted and laboriously climbed to the summit, where he excavated a grave and buried his pet. Then his love of a joke got the better of his grief. He procured a board and some paint and inscribed thereon the words: "Sacred to the Memory of Baby O'Keefe." The joke was supposed to be on Sergeant O'Keefe, United States weather observer at the summit of the peak, and an old bachelor who hardly knew what a real baby was.

But the army of tourists came along and began ask-

ing questions. To these Davis explained that the little daughter of the weather observer had been killed and eaten by mountain rats. The story "took," and the tourists wanted photographs. Davis supplied the demand, dividing the profits with O'Keefe, who entered into the spirit of the affair so far as to flood eastern newspapers with stories of the tragedy. No one questioned the truth of the tale, and the pair made a good thing. Finally O'Keefe's superior officers began investigating and found that the whole thing was a hoax. He was disciplined and narrowly escaped dismissal from the service. But the sale of photos was never discontinued and the neatly painted board is there to this day to awaken the sympathies of the traveling public. A new board was placed there last summer, giving the wholly false date 1876, and the imaginary name Orin. Davis died in January, in Goldfield, where he had made a good-sized fortune from the start made selling photographs of his pet donkey's grave.

FOLLOWING THE FASHION.

(The American Sportsman.)

Recently a quite prominent breeder, who has been engaged in the breeding of trotters and pacers for many years, called our attention to the breeding of some fifteen brood mares that he was using in the harem with good success.

The inquiry propounded in connection with the request to examine their breeding was, whether or not since many of them were not fashionably bred, he ought to dispose of them and restock with mares that were more in keeping with the prevailing fashion of the times. The mares referred to were well bred, and were excellent representatives of families that have done their part in aiding to make the trotter and pacer popular. Many of them were backed up by producing blood, but their families have not been conspicuous for a few years past. It might be added that this breeder has always enjoyed his share of success, having no complaints to make about his business. We have often wondered whether or not many breeders have not, at times, felt the same way. The remark is often heard with reference to the breeding of some horse that the breeding is good but not fashionable.

In breeding trotters, the best should always be the most fashionable, which they perhaps are, but the conditions that led the above breeder to make this inquiry was not a question of quality, but one of mere fashion. The mares owned by him have quality, but their breeding is not, at the present time, fashionable. The fashion referred to as fashionable, are those families that perhaps last year made the greatest showing, were the most talked about, and perhaps commanded the largest prices of the year. We do not believe that it would be advisable for breeders to continually keep changing their mares in order to simply be in fashion. If one will look into the history of the past it will disclose the fact that in previous years, there are a few families that have been more or less fashionable each year. It may be that they have been over shadowed one year, only to come back with even greater brilliancy the next year. It may be that they were over shadowed for more than a single season, but were always more or less conspicuous each year in making turf history. Such families as these do not go out of fashion, and no such question as propounded above concerns their owners. It is not difficult to select such families and we believe that more uniform success will come from their use for breeding purposes.

In our judgment it was not less conspicuous blood of the brood mares that led the above breeder to make his inquiry, but the one fact that he could not avoid in connection with his breeding operations that if he failed at all, that the stallion which he had kept at the head of his stud, did not, nor had he come up to his own or the public's estimate of a successful sire. It is strange how breeders will year after year retain at the head of their studs, stallions that have been tried and found wanting. It should be the intention of every stallion owner, that after the stallion selected has been given an opportunity and he fails to meet the requirements, he should be changed for another. Such stallions should be given a fair opportunity, all the facts in connection with their careers carefully weighed, and if they are then failures, they should be discarded. It has been proven time and again that it does not pay to use them in the stud. Breeders very often hold on to some stallion that is fashionably bred, but a failure, for the only reason that he is in fashion. Again, they are led to retain a stallion who has a fast record, and maybe was conspicuous as a race horse long after it has been proven that he is a failure in the stud. Such reasons as indicated should warp the judgment of the wise owner, who should realize that the supreme test, after all for a trotting or pacing stallion, is his ability to sire speed. When he fails to do this, he is worthless as a sire. Of course, he will still have some commercial value, for there are those that will patronize him, but this is not a good reason why he should be retained.

To the above inquirer we would recommend that a majority of his mares be retained, but that he either purchases or patronizes a stallion who is fashionable and who has demonstrated his ability to sire speed. The more successful the stallion, the better. The results cannot help but be pleasing and the mares will be given a better opportunity to demonstrate whether or not they are producers. The results we are sure will be much more satisfactory in the end.

THE FARM

SECRETS OF BREAKING COLTS.

It requires patience and judgment to prevent the ruin of a colt in the first month's handling. On many large farms where the owners trust the ordinary laborer to break and work the colts, numbers of them are made vicious and balky by rough and ignorant handling.

It is no unusual sight to see a well-bred, high-strung colt, "taken up" to be broken in his third year, who never even had a halter on him. The process is to get the "hands" together at the stable, hustle the colt into a corner, throw a noose over his head and drag him near enough to get a blind bridle on him.

By this time he is sweating like a bull from fear. Next comes the harnessing or "gearing up." Collar, harness and traces are put on him by hands who are only used to working their counterpart, the mule or scrub horse.

Should the colt cut up much, which he usually does, one or two kicks in his belly and several jerks on his tender mouth will be the next lesson. Then he is dragged, led, backed or pushed to the off wheel of a wagon, to the furrow side of a plow, or the off side of a harrow, as the case may be.

His two companions are probably old horses who have gained wisdom and experience with increasing years, and look on with mild indifference while the youngster held by a couple of strong men, and hitched up by a third, trembles and snorts in impotent rage.

Tied back, reined up tight and with a heavy outside line in the hands of some ignorant half-grown boy—he begins his real life on the farm as a bread producer.

By the second day, if the weather is warm and the work heavy, his mouth will be sore at the corners, his shoulders galled, and if working on a plow or harrow, his legs around the hocks will be pretty well cleared of hair by the chafing of the iron in the traces. He will, in two weeks, have lost a hundred pounds of flesh and it will take several months of rest to get him in good shape again.

Of course this is one of the many extreme cases, but this system of breaking colts ruins many of the best horses every year and will continue to do so as long as this rough way of handling them continues in practice.

In spite of the thousands of men who are driving horses all over the country and to every kind of known vehicle and farm implement, comparatively few understand the gentleness and firmness combined necessary to break a young animal.

New collars should be examined every day until they are found to fit the horse's neck perfectly. A fat horse often shrinks in the first few days' work sufficiently to make the collar fit him badly and produce serious injury.

A colt's mouth can easily be ruined by a careless man in the first week of breaking. The greatest care should be observed in using the proper bits. Never jerk a horse, young or old.

Always hitch up a young colt with a rapid walker. Fast walking is, like other gaits, acquired.—James M. Bell.

Sheep-raising in New South Wales reached its zenith in the year 1891, when over 60,000,000 were shorn. The ranges were probably overstocked at that time, but subsequent years of drouth decimated the flocks in New South Wales, as in other parts of Australia. In 1891 it was estimated that the sheep population of Australia and Tasmania was nearly 106,500,000. In 1902 it had fallen to a little over 54,000,000, or a loss in eleven years of nearly 52,500,000 sheep. It is difficult to say how long it will take the colony to recover. Lambing is always poor after severe drouth, and between increase of mutton-eating population, export and other factors, it must be a long time.

CALIFORNIA STATE FAIR, 1908

SACRAMENTO

August 29, 31, September 1, 2, 3, 4 and 5

Additional Guaranteed Stakes for Harness Races

ENTRIES TO CLOSE MONDAY, JUNE 1, '08

—PROGRAMME—

2-2:12 CLASS PACING	SATURDAY, AUGUST 29th.	\$800
4-2:10 CLASS TROTting	MONDAY, AUGUST 31st.	\$1000
6-2:17 CLASS TROTting	TUESDAY, SEPTEMBER 1st.	\$800
7-2:15 CLASS PACING	WEDNESDAY, SEPTEMBER 2nd.	\$700
8-2:24 CLASS, FOUR-YEAR-OLD TROTting	THURSDAY, SEPTEMBER 3rd.	\$500
10-2:14 CLASS TROTting		\$800

Entries close Monday, June 1, 1908.

Entrance on above stakes due as follows: Two per cent due June 1, 1908; one per cent additional if not declared out on or before July 1, 1908, and two per cent additional if not declared out on or before August 1, 1908. Five per cent additional from winners.

Horses to be named with entries.

Nominators have the right of entering two horses from the same stable in any race, by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting.

Address all communications to the Secretary.

B. F. RUSH, President.

J. A. FILCHER, Secretary, Sacramento, Cal.

State Agricultural Society.

Stanford Stake of 1910

Trotting Stake for Foals of 1907

To be trotted at the California State Fair of 1910. Entries to close June 1, 1908, with J. A. Filcher, Secretary, at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination. June 1, 1908; \$5 November 1, 1908; \$10 June 1, 1909; \$10 June 1, 1910, and \$20 on the tenth day before the first day of the State Fair of 1910; \$300 added by the Society. Mile heats, three in five to harness.

The stakes and added money to be divided 50, 25, 15, and 10 per cent. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2-3 per cent to the winner, and 33 1-3 per cent to the second horse. A horse distancing the field will be entitled to first money only. In no case will a horse be entitled to more than one money.

A horse not winning a heat in the first three shall not start in the fourth heat, unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize, according to their rank in the summary at the close of their last heat.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will ENHANCE THE VALUE OF HIS COLT in case he desires to sell.

Your colt entered in the Occident Stake for 1910 is eligible for entry in this stake.

Remember the date of closing is June 1, 1908.

J. A. FILCHER, Secretary.

The Next Big Sale

Of trotters and pacers will be held at Chase's Pavilion, 478 Valencia St., San Francisco, on Monday evening, July 27th. Write to us about consignments. Good horses will sell well.

Ellis' Improved
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

READVILLE GRAND CIRCUIT MEETING

August 24-28, 1908.

\$93,300 IN PURSES

Entries in all classes close on Saturday, May 16

EARLY CLOSING PURSES:

Class No. 1—The Blue Hill, 2:30 Class, Trotting. \$4,500, divided: \$1,050 to first, \$300 to second, \$150 to third, each race.
 Class No. 2—The Massachusetts, 2:14 Class, Trotting. \$9,000, divided: \$2,100 to first, \$600 to 2nd, \$300 to third, each race.
 Class No. 3—The Ponkapoag, 2:11 Class, Trotting. \$3,000, divided: \$700 to first, \$200 to second, \$100 to third, each race.
 Class No. 4—The Readville, 2:12 Class, Pacing. \$3,000, divided: \$700 to first, \$200 to second, \$100 to third, each race.
 Class No. 5—The Norfolk, 2:08 Class, Pacing. \$3,000 divided: \$700 to first, \$200 to second, \$100 to third, each race.

ALL THE ABOVE CLASSES WILL BE EVENTS OF THREE RACES OF ONE MILE.

Class No. 6--The American Trotting Derby, a handicap dash race

OPEN TO ALL TROTTERS, in which the slowest horse will go a distance of one mile and one-quarter and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse will be handicapped slower than up to a mile in 2:15

Purse, \$50,000

To be trotted at Readville, August 25, '08.

THE PURSE WILL BE DIVIDED:

First Horse Will Receive	\$30,000	Fourth Horse Will Receive	\$2500
Second Horse Will Receive	10,000	Fifth Horse Will Receive	1500
Third Horse Will Receive	5000	Sixth Horse Will Receive	1000

The Entrance Fee will be One Per Cent of the Purse, with nothing from Winner,

payable in installments as follows: \$100, May 16, when entries close and horses must be named; \$100, June 15; \$100, July 15; and \$200, August 22. These fees are for each horse named. The Association reserves the right to reduce this entrance fee by cancelling the second and third forfeits, either or both, or reducing their amount. Nominators will not be held for forfeits falling due after they have declared an entry out in writing. More than one horse from the same stable may start.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all trotters from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on August 18.

THE HANDICAPPING

will be done by three experts, who will be selected for their fitness and ability in this line. They will meet at Readville on August 18, when the horses will be classified according to the knowledge of their ability on that date in possession of the handicappers.

RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

If more horses should appear for the race than can safely, or in fairness to all competitors be started, the Association will divide them into divisions, by lot, the horses in each of such divisions, will race for a right to start for the purse, the first eight to finish in each division earning that right; all horses racing in both preliminary and final races will start from their handicap rating. It is a part of this agreement that the directors of the Association shall be sole judge of this condition. Should these elimination contests by any chance become necessary they may be contested on Monday, August 24.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in his rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

All entries, requests for information, etc., to be made to the Secretary.

JOHN M. JOHNSON,

President.

C. M. JEWETT,

Secretary, Readville, Mass.

The management believes thoroughly in the success of this race and that it will be enthusiastically supported by the horse world. It will do all in its power to make it a success and is ready to risk and sacrifice much to that end. We do not assume that any one would desire to see the Association bankrupted by giving this race if the support received is not worthy of the purse, hence the right is reserved to declare it off if it fails to fill to the satisfaction of the directors.

CONDITIONS OF ALL CLASSES EXCEPT THE HANDICAP

In all classes horses must be named at the time of the closing of entries. Hobbles will not be barred. The entrance fees will be five per cent of the purse, and in addition five per cent of the winnings of all horses will be deducted.

More than one horse, if trained in the same stable, may be entered in a class, and one per cent of purse additional will be charged for each horse so named; but only one horse in the same ownership will be allowed to start. Any horse of a plural entry which may be separated from the stable from which they were named will be eligible to start by paying a sum in addition to that already paid on the horse, which will equal the full five per cent entrance fee.

The rules of the National Trotting Association (of which this Association is a member) will govern; also member of American Trotting Association. Right reserved to reject any entry. Racing will begin at 2:30 p. m.

The positions of contending horses will be drawn for the first race of every event, but in the second they will start as they finished in the first, and in the third as they finished in the second.

Forfeits will be due in amounts and on dates as follows:

	May 16	June 15	July 15	August 15
Class No. 1	25	45	70	85
Class No. 2	75	100	125	150
Classes Nos. 3, 4 and 5	15	25	50	60

Nominators will not be held liable for forfeits falling due after they have declared out in writing.

The American Horse Breeder Futurities—\$7000 for three-year-old Trotters, \$1000 for three-year-old pacers and \$2000 for two-year-old Trotters—will be raced at this meeting.

BRISTLES.

Do not let the breeding sows get too fat.

Separate the brood sows as soon as they begin to get heavy.

Never use a scrub sire. His pigs will always be scrubber than he is himself.

Keep a careful record of the date of breeding. This will be a guide in feeding and care.

Keep a record of the number of pigs in each litter. It doesn't pay to rely on memory in these things.

Look well to it that the mother hogs have the driest, most comfortable quarters possible. This often tells the story of the little rooters she is able to bring to market for you.

Always select the young sows from the most prolific old ones.

A nice, full-bred hog gives the farmer who takes care of it a great deal more pleasure than one that has nothing attractive about it.

Early pigs are more profitable if the appliances are right for good care.

It does not pay to breed for early pigs and then lose them all on account of improper handling.

If a sow has fever at farrowing time and eats her pigs, it is your own fault, not hers.

Keep her active, give her a laxative diet, no corn, and plenty of pure, clean water to drink, and there will be no trouble.

To watch the various consignments of beef cattle change hands at the stock yards is an interesting study. The lots which show the greatest uniformity are those which change hands most quickly and probably most satisfactorily. As the buyer approaches a car lot in one of the numerous pens, he is there with his wits all about him. He will be looking for the good qualities of the bunch but far harder for the bad ones. It is ten chances to one that his first bid will be based upon the character of the worst steer in the lot and the business for the seller is to secure advances on the superior character of the best ones. In a badly mixed lot, the buyer will be particularly careful not to outbid its worst possibilities and both buyer and seller are more sure of their ground with an even, uniform lot of cattle, which can be designated with safety as some particular grade or range of grades. A factor which the careful buyer never loses sight of is the amount of food which cattle have recently eaten in making a purchase. Animals which have come considerable distances and are very much emptied out are always far better killers than those which have been recently heavily fed and watered. The buyer can give a pretty shrewd estimate of this stuffing process and can tell pretty closely the exact weight of an animal before it is driven onto the scales.

THE BEST LINIMENT

"SAVE-THE-HORSE"
SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

CHAS. TAYLOR & CO., Broomecorn Brokers.

ARTHUR, ILL.

Troy Chemical Co., Binghamton, N. Y.—

Gentlemen: Your Save-the-Horse Spavin Cure was recommended to me by Mr. W. M. Checkley, now postmaster of Mattoon, Ill., for curb, and after using the medicine as per directions in 3 weeks the lameness and enlargement had completely disappeared and has never returned, and that was five years ago. Since that time I have used the Save-the-Horse on a badly strained leg which threatened to result in a bog spavin and thoroughpin with a complete cure.

I am driving a little road mare to-day which I cured of a bone spavin which had refused to yield to Etniodide of Mercury and Cantharides and a rigid firing with a red hot No. eight wire.

Yours truly,

CHAS. TAYLOR.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

\$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

THE COST OF BUILDING A CREAMERY.

During the past few years there have been built in the United States several thousand creameries, many of which have been successful from the start, while others have failed after a few months' operation, and some were never even started.

An investigation of the creamery business in several States by the United States Department of Agriculture has shown that the cause of many of the failures was due to lack of a sufficient number of cows, which should not be less than 400, and that others failed because of improper organization, in the case of co-operative creameries, and excessive cost of building and equipment. Many creameries have cost about twice their actual worth, and were not of the type suited to the locality in which they were built.

The cost of a building about 28 by 48 feet will vary from \$800 to \$1,400, dependent upon the locality, the construction, and the cost of material and labor. Such a building usually consists of a main work room, engine and boiler room (including space for refrigerator machine), coal room, refrigerator, storeroom and office.

Machinery for a hand-separator plant, consisting of 15-horsepower boiler, 10-horsepower engine, combination churn with a capacity of 600 pounds of butter, and other necessary

apparatus, will cost approximately \$1,200. Machinery for a whole-milk plant will cost about \$1,850. This equipment will handle from 1,000 to 1,200 pounds of butter per day. If a refrigerating machine is included the cost will be from \$600 to \$1,000 more.

The total cost of a creamery would therefore vary from \$2,000 for a simple hand-separator plant without artificial refrigeration, where labor and material are cheap, to \$4,250 for a whole-milk plant including artificial refrigeration and a higher cost of labor and material.

The Department of Agriculture is prepared to furnish information for the proper organization of creameries and cheese factories, and upon request will supply plan of organization, list of machinery, and plan for creamery. Correspondence should be addressed to the Dairy Division, United States Department of Agriculture, Washington, D. C.

Clean out the droppings of the poultry yard every day and keep in a dry place until ready for use.

In orchards, poultry destroy insect pests and keep the trees in good condition.

Fumigate the hen-house as often as may be needed to keep the premises spotlessly clean.

The ducks' drinking trough should have slats nailed across the top to prevent them from getting in it and making the water filthy.

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12¼, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18¼, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12¼, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**
Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

KING DINGEE

is by the greatest son of McKinney—the magnificent Zombro. His dam is by Diablo and his granddam has 2 in the 2:15 list. He is a grand individual and trotted a mile last year as a 4-year-old in 2:22.

Season of 1908 AT **Santa Rosa, Cal.**

Steel Safe Deposit Boxes for Rent

In vaults that successfully withstood the fire of April, 1906. Trunks, Silverware and Packages Containing Valuables taken on storage in fire and burglar-proof steel vaults.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like burch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all burches it is unequaled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. **W. B. Eddy & Co., Whitehall, N. Y.**

Bonny McKinney 41383

Son of
McKinney 2:11 $\frac{1}{4}$
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03 $\frac{1}{4}$
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13 $\frac{1}{2}$ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 $\frac{1}{4}$, trial 2:05 $\frac{1}{2}$, Dam Rita B. by Boodle Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alcyone 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal. Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

The Blood That Produced LOU DILLON 1:58 $\frac{1}{2}$ and SWEET MARIE 2:02

GRECO B. 43129

Black colt, foaled 1900. Sire McKinney 2:11 $\frac{1}{4}$, sire of Sweet Marie 2:02, 17 in 2:10 list, world's champion sire of speed. Dam Aileen 2:26 $\frac{1}{4}$ (dam of Movitz 2:20 $\frac{1}{2}$, Sister 2:20 and Greco 2:32, trial 2:30) by Anteeo 2:16 $\frac{1}{4}$, sire of dams of Directum Kelly 2:08 $\frac{1}{4}$, Grey Gem 2:06 $\frac{1}{2}$, W. Wood 2:07, etc. Grandam Lou Milton (dam of LOU DILLON 1:58 $\frac{1}{2}$, Redwood 2:21 $\frac{1}{2}$, etc. Greco B. is a handsome young stallion and a splendid representative of the McKinney family. His oldest colts are 3 years old, only two have been trained and they show 2:20 speed at the trot.

Will make the Season of 1908 at the State Fair Grounds, Sacramento

Fee: \$40. For particulars call or address

JOHN QUINN,

3710 Cypress, Ave., Sacramento, Cal.

NEAREST MCKINNEY 40698

Brown horse, 5 years old, stands about 16 hands high, sired by McKinney 2:11 $\frac{1}{4}$, the greatest living sire of 2:10 speed, sire of Coney 2:02, Sweet Marie 2:02, China Maid 2:05 $\frac{1}{4}$, Zolock 2:05 $\frac{1}{4}$, Pou Bet 2:07 and 12 others in 2:10 list.

First dam Maud J. C. by Nearest 2:22 $\frac{1}{2}$, the first eight-year-old horse to get one below 2:10, sire of Alone 2:09 $\frac{1}{4}$, Just It (3) 2:19 $\frac{1}{4}$, High Fly (2) 2:24 $\frac{1}{2}$, and brother to John A. McKerron 2:04 $\frac{1}{2}$, the fastest trotting stallion of the Wilkes tribe.

Second dam Fanny Menlo, dam of Cladius 2:13 $\frac{1}{4}$, by Menlo 2:21, by Nutwood 2:18 $\frac{1}{4}$, greatest broodmare sire in the world.
Third dam Nellie Anteeo by Anteeo 2:16 $\frac{1}{4}$, sire of Antezella 2:10 $\frac{1}{2}$, Angelina 2:11 $\frac{1}{4}$ and 52 others, dams of Sonoma Girl 2:05 $\frac{1}{4}$, W. Wood 2:07, Directum Kelley (4) 2:08 $\frac{1}{4}$, 24 others in the 2:30 list, and grandsire of Tuna 2:03 $\frac{1}{2}$ and Brilliant Girl 2:08 $\frac{1}{4}$.

Fourth dam Fanny Patchen, dam of California Nutwood 15119, sire of Maud C. 2:15, Annie C. 2:23 $\frac{1}{4}$ and dams of Georgie B. 2:12 $\frac{1}{4}$, Irvington Boy 2:17 $\frac{1}{4}$, Central Girl 2:22 $\frac{1}{4}$, and L. E. C. 2:29 $\frac{1}{4}$, by George M. Patchen Jr. 2:27.

This is the only stallion living or dead that carries the five great crosses—Nutwood 2:18 $\frac{1}{4}$, Guy Wilkes 2:15 $\frac{1}{4}$, Director 2:17, Electioneer and McKinney 2:11 $\frac{1}{4}$.

Will Make the Season of 1908 at San Jose.

E. S. TRAIN, Salinas, Cal.

General Watts 2:06¼, World's Champion three-year-old stallion by

"AXWORTHY" (3) 2:15 1/2

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal. The Empire City Farms, Cuba, N. Y.

TRAINING DISTEMPER...

Ever hear of this? Yes, of course you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and \$1 a bottle; \$5 and \$10 a dozen. Sold by all good druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Indiana.

LIMONERO Reg. No. 33389

3-Year-Old Race Rec. 2:15 $\frac{3}{4}$

Winner of \$5000 Stake at Lexington for 3-y-o

Sired by Piedmont 2:17 $\frac{1}{2}$ (sire of 26 in 2:30 list); dam Lula neer (great brood mare) by Electioneer 125; second dam Lula 2:15 (winner of 56 heats in better than 2:30) by Norman 25, etc., etc. Bay stallion, 16 hands, weighs 1150 lbs. Perfect trotting action. Splendid individual in every respect.

DIRECHO

Standard Bred.
Public Trial 2:15

Sired by Direct 2:05 $\frac{1}{2}$ (sire of Directly 2:02 $\frac{1}{2}$, Direct Hal 2:04 $\frac{1}{2}$, Bonnie Direct 2:05 $\frac{1}{2}$ and 9 others in 2:10 list); dam May N. by the Great McKinney 2:11 $\frac{1}{2}$ (world's champion sire of speed); second dam Bell. by the great brood mare sire Echo 462, etc., etc.

Fee: \$25 for the Season, Either Horse.

Cash or approved note. Usual return privilege.

Vassar

Race Rec. 2:07. A great Individual
Reg. No. 12042. and Proven Sire.

Sired by Vatican 2:29 $\frac{1}{4}$. He by Belmont 64. First dam Nell, dam of 12 in the list, 4 with race records better than 2:10, etc., etc.

Will stand at **TOURNAMENT PARK, PASADENA**

Fee, \$50.

For particulars address

G. C. STANFORD, Manager, Pasadena, Cal.

Athasham

Race Rec. 2:09 $\frac{1}{4}$.
Reg. No. 45026.

A Game Race
Horse in the Stud

Bay stallion, stands 15.3, weighs 1150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{1}{2}$, Athasham 2:09 $\frac{1}{4}$, Sue 2:12, Listerine 2:13 $\frac{1}{2}$ and 8 others in 2:30); dam, the great brood mare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{2}$, winner of 3-year-old trotting division Breeders Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 $\frac{1}{2}$ (sire of dams of Geo. G. 2:05 $\frac{1}{2}$, etc.). Athasham has a great future before him as a sire. He is bred right and Made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal.**, for a **Fee of \$50**, with usual return privilege.

For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner, R. R. 1, Fresno, Cal.**

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11 $\frac{1}{2}$, the greatest sire of extreme speed living. Dam Helena 2:11 $\frac{1}{2}$, dam of Wild Nutting 2:11 $\frac{1}{2}$, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04 $\frac{1}{2}$; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinnies. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam, being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

CHESNUT TOM 43488

Race Record 2:17 $\frac{1}{4}$. Trial 2:14.

Sired by Nutwood Wilkes 2:16 $\frac{1}{2}$ (sire of John A. McKern 2:04 $\frac{1}{2}$, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKern 2:04 $\frac{1}{2}$); granddam Lida W. 2:18 $\frac{1}{2}$ by Nutwood 600. Chestnut Tom won the 24-trot at Salinas, 1906, in three straight heats.

Season of 1908 at

STOCKTON, Cal.

Terms: \$30

Address, the owner.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the

BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride. From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivalled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

W. G. HOWARD, Manager,

Hotel Belvedere,

Belvedere, California.

SACRAMENTO

August 29, 31, September 1, 2, 3, 4 and 5

Additional Guaranteed Stakes for Harness Races

ENTRIES TO CLOSE MONDAY, JUNE 1, '08

PROGRAMME

SATURDAY, AUGUST 29th.

2-2:12 CLASS PACING - \$800

MONDAY, AUGUST 31st.

4-2:10 CLASS TROTting - \$1000

TUESDAY, SEPTEMBER 1st.

6-2:17 CLASS TROTting - \$800

WEDNESDAY, SEPTEMBER 2nd.

7-2:15 CLASS PACING - \$700

8-2:24 CLASS, FOUR-YEAR-OLD TROTting - 500

THURSDAY, SEPTEMBER 3rd.

10-2:14 CLASS TROTting - \$800

Entries close Monday, June 1, 1908.

Entrance on above stakes due as follows: Two per cent due June 1, 1908; one per cent additional if not declared out on or before July 1, 1908, and two per cent additional if not declared out on or before August 1, 1908. Five per cent additional from winners.

Horses to be named with entries.

Nominators have the right of entering two horses from the same stable in any race, by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of the meeting.

Address all communications to the Secretary.

B. F. RUSH, President.

J. A. FILCHER, Secretary, Sacramento, Cal.

State Agricultural Society.

Stanford Stake of 1910

Trotting Stake for Foals of 1907

To be trotted at the California State Fair of 1910. Entries to close June 1, 1908, with J. A. Filcher, Secretary, at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1908; \$5 November 1, 1908; \$10 June 1, 1909; \$10 June 1, 1910, and \$20 on the tenth day before the first day of the State Fair of 1910; \$300 added by the Society. Mile heats, three in five to harness.

The stakes and added money to be divided 50, 25, 15, and 10 per cent. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2-3 per cent to the winner, and 33 1-3 per cent to the second horse. A horse distancing the field will be entitled to first money only. In no case will a horse be entitled to more than one money.

A horse not winning a heat in the first three shall not start in the fourth heat, unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will ENHANCE THE VALUE OF HIS COLT in case he desires to sell.

Your colt entered in the Occident Stake for 1910 is eligible for entry in this stake.

Remember the date of closing is June 1, 1908.

J. A. FILCHER, Secretary.

THE MOST STRENUOUS OBJECTIONS to the handicap system of harness racing seem to come from the owners of the fastest horses—the very ones the system is supposed to benefit the most. Under the present system of racing there are very few classes for trotters whose records are 2:08 or better, or pacers that have entered the 2:05 list, and it was thought the handicap would be hailed with delight by owners whose horses would thus be given an opportunity to start for big purses and maintain instead of losing their earning capacity when taking fast records. It seems, however, that many owners of fast horses think they have no chance in a race where the slower horses are sent off in the lead, fearing that those handicapped the most will never be able to get through even though they have the speed. Another objection by these same owners is that green horses possessing great speed, such as Sonoma Girl and Highball were last year known to possess prior to their first starts, would have too great an advantage over horses like Major Delmar and Sweet Marie, whose champion records are considered unbeatable even by themselves, yet will put them at the very top of the handicap. So far as absolutely green horses are concerned, that is a feature of racing which has been and always will be one of its chief attractions and most fascinating features. If any owner can keep his horse under cover so that the public and the handicappers have no knowledge of his speed, he will be entitled to start him at scratch and there should be no rule that will bar him. But the very term handicap presupposes the fact that the speed of every horse starting in the race will be more or less known. Every horseman in California who read the papers knew last year long before her first race that Inferlotta was phenomenally fast, and had her very first race been a handicap she would not have started at scratch as it was generally known that she paced a mile in 2:06½ at Los Angeles in the spring. It was the same with Copo de Oro and other green pacers. Sir John S., the unbeaten pacer of last year, suffered no handicap by being compelled to start against Kelly Briggs 2:08, Miss Idaho 2:09¼, John R. Con-

way 2:09 and others whose records were faster than his at the close of the previous season, as he was known to possess more speed than any of them had ever shown. Whenever owners refuse to start against horses that have faster records, or that have a reputation for greater speed than that possessed by their own, all racing will cease as it will be impossible to get enough entries to fill any decent purse. The objection that the slow horses in a handicap will block the track so that the faster ones will not be able to get through is too trivial to need much notice. In Austria, France, Russia, Australia and New Zealand there are handicap races at every meeting and there has never been any trouble caused by the slow horses lining up and blockading the course. At this writing no news has been received from Readville as to the number of entries received for the \$50,000 handicap, but the probability is that many horses with very fast records have been named in the race, and we hope it has filled well as it surely deserved a big list.

THE DEATH OF TODD 2:14¾ was announced on Tuesday last by telegraph. It will be remembered that Mr. William Bradley of New York, paid \$30,000 for this horse at the Old Glory sale last November and sent him to Raritan, New Jersey, to head the fine breeding farm he has established there under the name of Ardmaer Farm. Todd's fee was placed at \$200 and many of the best mares in the country were being booked to him. Todd was a brown stallion, foaled 1889 and was bred by the late J. Malcolm Forbes of Boston. Todd carried the blood of three of the greatest stallions that ever stood for service in California, although he was not bred here. The horses referred to are Electioneer, Nutwood and Director. He was sired by Bingen 2:06¾, a son of May King, he by Electioneer. Todd's dam was the great brood mare Fanella 2:13, dam of Sadie Mac 2:06¾, by the champion California bred trotter Arion 2:07¾ whose two-year-old record of 2:10¼ to high wheels has never been approached by any two-year-old since the bike sulky was invented. The second dam of Todd was Directress 2:19 by Director, third dam Aloha by A. W. Richmond, and fourth dam by Crichton, thoroughbred. Todd was a fast colt trotter and showed a 2:20 gait as a two-year-old, and trotted a full mile in 2:21. He made his record as a five-year-old under adverse circumstances. As a sire he was a phenomenon. His stud season began practically in 1903 when he made his first season in Kentucky. He proved a great sire of futurity winners, no less than five rich colt stakes being won by his get. Among his list of fast performers are Cochatto (3) 2:11½, winner of Hartford Futurity; Douglas (3) 2:12¼, winner of Hartford Futurity; Kentucky Todd (2) 2:14¾, (3) 2:08¾, winner of Kentucky Futurity, Stock Farm Futurity and Western Horseman Futurity. At the close of last year Todd had eight trotters in the list. When sold at auction last November he already had about thirty mares booked to him in 1908 at \$200 each. His death is not only a severe loss to the breeding community, but especially severe to the gentleman who was game enough to pay \$30,000 for him for breeding purposes. Had the horse not died however, he would have paid for himself in two years more.

THE CRUSADE AGAINST RACE BETTING which is sweeping over the country would never have been started had it not been for bookmaking and its attendant evils. In the days when buying a pool on a horse was only considered an incident of a great sport, there was not heard this outcry against race track gambling, but with the advent of the bookmaker and the tout, the dope sheet and the continuous meeting, the racing game has become so obnoxious to respectable people that there is open revolt against it in nearly every State in the Union. If our legislators would only forsake cheap politics for a time and devote a little attention to this question they would ascertain that betting is difficult to abolish in any country, but it can be regulated. In France, Austria, Russia and Australia, betting on horse races is regulated by the government, the meetings are limited to a few days each year, and the betting confined to the pari mutuel machines, or totalisators as they are termed in Australia. As high as 12 per cent of the money that passes through these machines is deducted from the total in some countries, this tax being divided between charities and a fund for the encouragement of horse breeding, after expenses are

taken out. By this plan the professional gambler and his necessary adjunct, the tout, are done away with, and racing takes on the form of a more respectable sport than it does in this country. The professional gambler has ruined every sport in which he has been permitted to make himself conspicuous, and he has made a worse mess of horse racing in America than anything else he has ever engaged in. Abolish the bookmaker and the great outcry against race track gambling will cease.

SECRETARY BEN BENJAMIN advertises six additional purses in this issue for Oakland's Banner Meeting, to be held in August. Entries are to close June 9th, and there should be a big list. Secretary Benjamin has adopted the modern plan of three heats, every heat a race for these events, and has provided so far as possible for all classes not entered in the stakes which closed earlier. The 2:09 class trotters and the 2:05 class pacers are each given purses of \$1050, the 2:11 class trotters \$900, the 2:30 class trotters and 2:10 class pacers \$750, and the two-year-old trotters \$600. These purses should draw all the best horses in training in California. There will probably be no running races at this meeting, and the betting will if possible be all done through the medium of mutuals and auction pools. Mr. Benjamin is making every effort to have the meeting one of the best ever held in the State and proposes to do everything possible to make it pleasant for horsemen who race and all others who attend this meeting. A successful meeting this year will mean a meeting every year at Oakland. It is Mr. Benjamin's intention to announce very shortly a futurity purse for three-year-olds that will have more liberal conditions than any futurity ever offered on this Coast. See the advertisement in this issue.

IF YOU ARE INTERESTED in fine cattle, your attention is called to the advertisement of a sale of high-grade Shorthorn cattle to be held on the Humboldt Ranch, one mile east of Suisun, on the 17th of June. Rush & Pierce will sell eighty head from the celebrated Humboldt herd of Shorthorns at that time and place, and it is not a clearance, but is a dispersal sale, as Messrs. Rush and Pierce are about to dissolve partnership, and all their stock must be sold during the next few months. Some of the choicest cattle in California will go under the hammer at this sale, which offers a splendid opportunity for farmers who desire to get the best of pedigreed stock for their farms, to buy them at their own price. Suisun is easily reached by rail from all points, and on the day of the sale carriages will be at the depot to convey visitors to and from the farm. Auctioneer Geo. P. Bellows of Marysville, Missouri, will wield the gavel on that day.

TEXAS REPORTS A SHORTAGE in the supply of horses, and farmers are having difficulty in getting animals to do their work. A few years ago it was thought the supply of Texas horses would always keep ahead of the demand, but low prices caused less breeding and the shortage is now being felt most by those who could have prevented it.

In a recent edition of a stock journal we note that a company of Idaho farmers recently paid \$10,000 for a draft stallion. We hope that this report is not correct for if it is these farmers have been beaten out of from seven to nine thousand dollars. There has never been a draft stallion bred in or imported into the United States that was worth even one-half of \$10,000 to the farmers anywhere in the country. Even the great breeding farms of this country seldom pay in excess of \$5,000 for a stallion to breed to their pure bred mares, and a stallion to breed to unregistered mares in the hands of farmers should never cost in excess of \$3,000. If these Idaho farmers did actually agree to pay \$10,000 for a stallion the sooner they take the bankruptcy law and have a guardian appointed the better. A portion of this company may have subscribed for shares at the rate of \$1000 per share, but we would venture the assertion that a good portion of the company received their shares for nothing. Any farmer who could be gulled into a game of this kind should relinquish farming at once and move to the city and take up the practice of law or some other easy vocation.

In purchasing draft stallions, \$1,800 in cash will buy at the barns as good horses as are now being peddled through the country at \$3,500 or \$4,000. If you buy from a salesman who has organized a company, \$2,500 should get the best of horses.

In purchasing horses on the company basis it is always well to incorporate the company and give to the salesman the note of the incorporated company; this plan may relieve you of the necessity of selling your furniture in order to meet the payments on the notes.—Northwest Farmer.

NOTES AND NEWS

North Pacific entries close Monday.

It is the best circuit ever advertised on the Pacific Coast.

Don't fail to enter your horses and be in line to get some of the money.

Sir John S. 2:04½ is again in training after quite a heavy stud season.

A competent trainer desires a position. See his advertisement in this issue.

Secretary Ben Benjamin announces six additional purses for the Oakland meeting.

Santa Rosa, Vallejo, Woodland, Marysville and Chico should give meetings this summer.

Don't forget that the Stanford Stake for foals of last year, to be trotted in 1910, will close June 1st.

The skeleton of the famous pacer Brown Hal 2:12½ is being prepared for presentation to the Tennessee Historical Society.

It is considered probable that the Pacific Coast Trotting Horse Breeders' Association will hold its meeting at Salinas this year.

Sutherland and Chadbourne, the Pleasanton trainers, have four Searchlights in their string that are a good advertisement for their sire.

If you own a pacer whose record is so fast there is no class for him, enter him in the Pacific Breeders' handicap advertised in this issue.

The new track at Auburn is finished and is one of the best half-mile courses in the State. The grounds will be ready for races within a week or two.

The program of the Central California Circuit is expected to be ready for publication next week, when dates of meeting and closing of entries will be given.

The phenomenally fast pacer Highfly is offered for sale. He is six years old, sound, and can win in the races where he is entered this year. See advertisement.

A four-year-old trotting stallion with speed, sired by a son of McKinney and out of a mare by Sable Wilkes is offered for sale by an advertiser. See advertisement in this issue.

Sherlock Holmes 2:06, Bonnie Steinway 2:06¾, Copa de Oro 2:07¾, and Phoenix, better known as "The Pig," will not be raced on this coast this year but will try for money on the Grand Circuit.

There was a race for a small purse on the Hoy track at Winters on Tuesday, the 12th inst., between Dr. J. H. Haile's colt and F. W. Herold's bay mare. The race was a mile dash and was won by the colt in 3:02.

Mr. Harkey of Gridley, came down to Pleasanton this week with the dam of Deviletta 2:10½ which is to be bred to The Limit, son of Searchlight and Bertha. Deviletta has already been bred to Aerolite 2:11¾.

A bay colt, three years old, full brother to Alfred D. 2:12¾ being by Longworth son of Sidney, out of Ferndale Bell, by Judge Salisbury, son of Nutwood, is offered for sale by Mrs. A. C. Dietz of Oakland. See advertisement.

Nogi 2:17 and Della Derby 2:11 will meet in the 2:17 trots this year. The former won the Occident, Stanford and Breeders' Futurity last year, and the latter won the Occident and Breeders' Futurity of the year previous.

The four early closing purses offered by the Michigan State fair for their meeting, all filled and many high-class horses are entered. With the Grand Circuit and State fair meetings Detroit will be the scene of two big meetings this year.

Thomas M. 2:12½ the McKinney gelding that Joe Cuicello raced over east a couple of seasons ago, is now in Henry Delaney's string and looks like a good prospect for a winner in the 2:10 and other classes in which he has been entered.

A match which is creating much interest among members of the San Francisco Driving Club has been arranged between Charles Lecari's Charley J. and Al Hoffman's Kitty D. The race is for \$500 a side and is to be decided over the Pleasanton track next month. Both pacers have been sent to Pleasanton to be trained for the event. The winner will probably get a record around 2:10, as both horses are very speedy.

The 2:12 pace, 2:10 trot, 2:17 trot, 2:15 pace, 2:14 trot, and the four-year-old trot, 2:24 class, for which good big money purses are offered by the California State Agricultural Society, will all close for entry June 1st. Read the advertisement.

From Sacramento we learn that Howard Kerr is the proud possessor of a baby filly by Prince McKinney, dam by Zombro. It is a seal brown, few white hairs in forehead and a very little white on off hind foot, a real McKinney in build and looks.

The great pacing mare The Broncho 2:00¾ on May 10th foaled a nice bay colt by the pacing stallion Willie Benton 2:06¾, at Charley Dean's farm, Palestine, Ill. The Broncho will not be bred again, but will be put in training again and will return to the turf in 1909.

Easter Bells, the full sister to Sir John S. 2:04½ has again returned to the trotting gait after having worked several fast miles at the pace early in the year. She is entered in the slow pacing classes on the California Circuit but will probably not start in them.

Princess W., the black mare by George Washington out of Urania by Kentucky Prince that won her race in the matinee at the Stadium last Saturday, trotting the third heat at a rate of speed better than 2:15 is entered in the \$2,000 trots at the Breeders' meeting, and the State Fair.

The list of entries for the big \$50,000 handicap is being anxiously awaited by every person that ever thought he could pick a winner in a trotting race. If it fills, there will be more figuring done on it than any race ever held in this country, and a "winter book" on it could do a big business.

The 2:10 trot, with Athasham 2:09¾, Thomas M. 2:12½, Lucretia 2:14½, Era 2:11¾, Berta Mac 2:13¾, R. Ambush 2:11¾, North Star 2:11¾, Adam G. 2:11¾ and Fresno Girl 2:10½ as entries and all as probable starters, should be one of the best contests on the California Circuit this year.

Mr. C. A. Durfee, who paid \$235 for a three-year-old filly by Dexter Prince out of a McKinney mare at the recent sale of Aptos Farm horses, has an idea that he has a trotter. The filly is a McKinney in look, level headed and good gaited, and shows some natural speed. Jack Groom has her in his string at Alameda.

The book of James W. Marshall's stallion Aerolite is more than full and no more mares can be taken. That this young pacer will be one of the greatest sires of speed in the United States is the general opinion among horsemen in California, and that he will himself pace very close to two minutes next year is also believed.

Custer 2:05¼ by Sidney Dillon, was not taken east this year by Ed. Hall. The fast chestnut gelding was converted to the trot last winter and has been a mile in 2:14, with a half in 1:04, but Hall did not think he had had enough experience at his new gait to race fast. He will be out again in 1909 if he improves as he is expected to.

E. T. Binder of Riverside writes: "Worth While 40,448 is doing fine for the little work he has had. I started him in the San Bernardino matinee—his first race, and he was second in both heats in 2:32 and 2:27. He was timed the third quarter by Dr. Ramsey in 34½ seconds. Mr. G. W. Bonnell, his driver, says he will trot in 2:15 or better this fall." Worth While is by Allerton 2:09¼ out of Eoka 2:16¾ by Sphinx.

Remember that after the California State Fair closes this year, there will be a regular hegira to Salem, Oregon, where the big \$5,000 stakes and many other good races are to be decided. If your horses are not entered through the North Pacific Circuit, you will be kicking yourself every time you read a summary of the races. Entries close Monday next, the 25th.

Cal. Rodriguez has located at the Santa Rosa track with a string of horses owned by Mr. C. H. Wideman of Gonzales. The full brothers, Joe Robin 2:19½ and Fred W. 2:14¾, pacers by Robin, are in the string, besides a four-year-old mare by Dexter Prince and a three-year-old colt by Cassian.

The Hynes Driving Club of Downey, Cal., has just expended \$500 in improving its half-mile track and will hold several matinees during the summer. The club permits no gambling of any kind nor races for money at its meetings, clean sport and the development of harness horses being the only objects of the organization.

A picture of Mr. Frank J. Kilpatrick's stallion Washington McKinney adorns the title page of the New York Trotter and Pacer of last week, and is accompanied by a lengthy article on California horses by William G. Layng. While the picture of the horse is a fine one, it nor any other picture of him we have ever seen, does this magnificent stallion full justice, as he is one of the very handsomest horses living.

Red Blossom 2:27¾, a good going trotting mare by Nushagak, out of Redflower by Alfred 2:25, has been sold by the Woodland Stock Farm to Mr. L. B. Daniels of Chico. Red Blossom took her record as a three-year-old. She is now five and will be put in training at once and raced at the Sacramento Valley matinees.

Mr. J. V. Galindo has given his four-year-old pacer by Comet Wilkes, dam by Abbottsford Jr. the name of Patery, in honor of the well known expert horse-shoer by that name whose shop is on 11th street in Oakland. The colt is developing into a very fast sidewheeler, and while he will not start in any of the regular events this year in all probability, he looks to have speed enough to meet the best of the green ones next season. Patery is in Charles Walker's string at Pleasanton.

I. B. Dalziel, the well known and popular veterinary dentist of this city, left last week for a three months' trip through the east, and will visit among other places his old home, near Bangor, Maine. Mr. Dalziel is prominent in harness horse affairs here on the coast, being an active member of the Park Amateur Driving Club, and also of the Pacific Coast Trotting Horse Breeders' Association. This will be his first visit to his old home after an absence of 22 years. We hope he may have a pleasant trip and a safe return.

Justo, the three-year-old trotter that comprises the entire string which Ed. Hall has taken east to race this year for J. C. Adams of Phoenix, Arizona, is bred much like Henry Helman's young stallion Alconda Jay, as he is by Jay Bird out of a mare by Baron Wilkes. Justo was second to The Leading Lady at Columbus last year in 2:16½ and 2:16¾, and finished pretty well up in the great two-year-old race at Lexington won by Trampfast in 2:12¾ and 2:16¾, beating Binvolto, Oro Lambert and The Leading Lady in that race. Justo is sound and all right every way and should get some of the three-year-old money this year.

A version of laying up heats was put into practice last year during the progress of a matinee race, says the Horseman. An amateur driver that had read in the "hoss" papers about trainers laying up heats had, by a mighty effort, won the second heat of the race, and when the next heat was called he didn't answer to the vigorous ring of the starter's bell. The field was finally sent away without him, and one of his friends went to the stall and found him taking things quite easy. He was asked why he didn't come out for the third heat, to which he coolly replied that he had decided to lay up the third heat as the old hoss was a little tired.

The French mutual machine method of betting has scored a success at the running meeting now in progress at Louisville, says Western Horseman, and managers of other running tracks, notably of those at Latonia and Baltimore, seeing the handwriting on the wall, are going to establish them as the only means of speculation. The Kentucky Racing Commission, it is reported, will endorse the machines and insist that they be used exclusively on the running tracks in that State. Managers of trotting tracks would do well to study the effect of the machines on the racing situation. It is claimed that they do away with many of the evils that have brought about unfriendly legislation.

The picture on our front page this week is of the chestnut pacing gelding Friday 2:11¾, recently purchased by Mr. S. C. Kimball of Hanford, who also owns Miss Idaho 2:09¾. Friday is a handsome fellow and can race right around his record and go many heats at that speed. He is by the pacer Monroe S. 17180, a stallion whose dam carried more of the blood of Williamson's Belmont than any horse we ever heard of as she was by Bell Alta a son of Belmont, out of a mare by Langford, another son of Belmont, and her grandam was by Belmont himself. Monroe S. had a pacing record of 2:20. Friday was bred by Sam Hoy of Winters, and is out of a mare by Easter W., son of Guy Wilkes, second dam by Norfolk, thoroughbred.

Mr. J. R. Fronefield left last Tuesday on the Oregon Express for Fort Klamath in charge of the thoroughbred stallion The Mighty by Prince Royal, a horse that President Harriman of the Southern Pacific Railroad, is sending to the Klamath country to improve the horse stock of that section. Mr. Harriman owns a good deal of property around Klamath Lake, having a beautiful country seat there, and as the majority of the horses owned thereabouts are Indian ponies and scrub stock, has accepted the offer of President Williams of the California Jockey Club Breeding Bureau to take The Mighty to Klamath, provide for his keep and breed him free of charge. The Mighty is a well proportioned horse of good size, and was a fast race horse. He was a frequent winner, beating such horses as Kenilworth, Andrew B. Cook, Misty's Pride, Romain, Deutchland and others. He ran a half in 49½ seconds, five furlongs in 1:01¼ over a very heavy track, six furlongs in 1:13 1-5, and a mile and a sixteenth in 1:47. He was bred and raced by Garnet Ferguson. The Mighty should certainly improve the scrub stock of the mountain country where he will be located. Mr. Fronefield expects to be absent about ten days on the trip.

The San Diego Matinee and Driving Club will hold a meeting at Coronado track, July 4th. \$600 is offered for 2:16 class pacers, and \$600 for 2:12 class trotters. Entrance five per cent and five per cent from money winners. See advertisement on page 13.

William Helman, father of Henry, George and W. C. Helman, the well known horsemen, died at his home near Santa Rosa on Sunday, May 10th, aged 76 years. He had been a resident of Sonoma County since 1875, and was highly respected.

Aristo 2:08¾ by Nushagak is being entered in the big stakes for his class all through the Grand Circuit. He is said to be in fine shape and going perfectly sound. If nothing happens him look out for a new record for him before the end of the season.

Charlie Belden 2:08¾, driven by his new owner W. M. Jermyn of New York, won his first start of the year at the opening meeting of the Road Drivers' Association at New York, May 13th. He won in straight heats, the fastest in 1:06½ and won very easily.

Lord Lovelace is the only horse either trotter or pacer, to have been bred, raised, trained and raced to a record of 2:10 in Oregon. After being three days and nights in a car, he was taken out and immediately started in a race at North Yakima last year and forced Sherlock Holmes to pace in 2:06 to beat him.

Mr. J. W. Zibbell came up from Fresno this week with the trotting mare Lady Seymour by Seymour Wilkes, that he purchased last winter at Sonoma for Mr. George Estabrook of Denver. Lady Seymour was shipped to Denver on Monday in the car with J. M. Stokes' string of thoroughbreds which are on their way east. The mare was in fine order, showing that Mr. Zibbell had given her good care during the time she has been in his stables at Fresno, and that she will give a good account of herself this year is pretty certain as she is a nice going trotter.

Have you seen the latest catalogue issued by the McMurray Sulky Company of Marion, Ohio? If not you have not seen the very finest specimen of printing and embossing sent out by any firm this year. The cover is dark gray, has a reproduction in black and white of the face of a timing watch stopped at 2:04¼ the hands showing the last quarter was in a shade less than 30 seconds, and also the picture of William O., "the horse in the case" with Geers up. The background of this unique illustration is a most beautifully embossed scene of a race track and grand stand with four horses in view. While the cover of this elegant catalogue is a work of art, the inside pages are also much out of the ordinary, containing cuts of all the McMurray vehicles with full descriptions of each, and many testimonials from those who have used them. If you are interested in sulkies or speed vehicles of any kind, we suggest that you write The McMurray Sulky Company, Marion, Ohio, and request that one of these new catalogues be sent to your address.

DEATH OF WILL DURFEE'S REGALO.

News reaches us just before going to press that the fast green trotter Regalo, matinee record 2:09, by Osito 2:13½, owned by W. G. Durfee of Los Angeles, and entered by him all through the Grand Circuit races this year, died at Los Angeles last Tuesday. Regalo had been ill for some time, and Mr. Durfee put off starting for the East for a few days in the hopes that the horse might get well enough to be taken along. Regalo was beyond all question one of the greatest green trotters seen in California for a long time, and had he lived his mark would have doubtless been 2:05 or better before the end of this year. He was not a large horse, but his way of going was such, and his brush so great, that he would have been a dangerous horse in any field of trotters, including the best that will be raced this year. Last year, while racing his horses at Woodland, Mr. Durfee received word from Los Angeles of the severe illness of Zomont, a Zombro trotter that had worked a mile in 2:09¼ for him, and the horse died the following week. To lose two such green trotters as Zomont and Regalo within a year is mighty hard luck, and we hope Mr. Durfee will not experience any more of this sort. He will leave for the East on Thursday next with the other horses in his string.

AEROLITE'S BOOK IN FULL.

Dixon, Solano County, Cal.,

May 30th, 1908.

Breeder and Sportsman.—I want to thank you for the picture of Aerolite which you had on the front page of your paper last week. It is the first good one I have ever seen printed of him.

I also want to thank you for the service you have rendered in filling his book to a first-class lot of mares.

Please make mention that Aerolite's book is more than full and there will be no more mares taken. Also, I desire to thank those who have patronized him.

Your friend

J. W. MARSHALL.

Subscribe for The Breeder and Sportsman.

BIG MATINEE AT SACRAMENTO.

There will be matinee racing at Agricultural Park, Sacramento, on Decoration Day, the 30th of the present month, that will be worth a good long trip to see. The Stockton Driving Club is sending ten of its best horses, the Chico Driving Club will send eight, and the Sacramento Driving Club will enter its speediest to compete for the blue ribbons and cups that will be awarded the winners.

There will be four regular events and a special—the latter made especially for the fastest horses owned by the club members. In this race the rule against hoppers is to be suspended and the pacers Kelly Briggs and Cranky Thorne will start against the Grand Circuit trotter Wild Bell 2:08¾. The program, as announced by Mr. I. Christie, president of the Sacramento club, is as follows:

Special—Kelley Briggs, F. E. Wright, Sacramento; Wild Bell, Frank Rukstaller, Sacramento; Cranky Thorne, C. Helm, Stockton.

Class A—Lady Bird, Mr. Pearce, Sacramento; Briarwood, I. Christie, Sacramento; Blanch T., Charles Silva, Sacramento; Instructor, Ray Dittus, Sacramento; Gilt Edge Dick, G. F. Willie, Stockton; Harold B., L. B. Daniels, Chico; Chestnut Tom, G. T. Algeo, Stockton; Penrose, Albert Elkus, Sacramento; brown gelding, Paul Sims, Sacramento.

Class B—Katy B., George Shane, Sacramento; Frank C., Frank Colm, Chico; Chappo, G. T. Donovan, Stockton; Ramus, Ed Lavin, Stockton; Prince A., Stockton; Judge, Thomas Coulter, Sacramento; Major McKinney, C. Metz, Sacramento; Lady Irene, J. Jones, Stockton.

Class C—Lulu Mac, H. A. Butters, Chico; Nocha, L. B. Daniels, Chico; Roy L., Dan Lieginger, Stockton; Gladys Moor, L. B. Daniels, Chico; Presto, Mr. Hunt, Sacramento; Flyaway, Frank Silva, Sacramento; Sutter Girl, G. A. Powell, Sacramento.

Class D—Billy George, George Nice, Sacramento; Rector, J. O. Sims, Chico; Geraldine G., J. Grigsby, Stockton; Babe, A. L. Archambeaults, Stockton; Derby Mac, C. Fagam, Stockton; McRey, F. A. Murray, Stockton; Faibio, W. A. Sayres, Sacramento; Anheuser, Carl Seaman, Sacramento.

Sacramento News.

All Style by Stam B. who his owner Dana Perkins recently refused \$2,000 for is stepping quarters in 34 seconds and will make the winner of Breeders' Futurity of 1908 step to beat him.

Silver Hunter by Zombro, who has been turned out for a year will be raced again this season. He is working fine and should trot fast.

Capt. Gorges by Marvin Wilkes who raced last year in the Breeders' meeting at Santa Rosa will be out again this year. He will race here in the Matinee, May 30th.

The Judge by Rey Direct, recently sold by Chase & Company, is now in the hands of John Quinn and will be raced in the matinee. If everything goes well he may be raced in the late races this season.

Kelly Briggs 2:08, and Wild Bell 2:08 are entered in the same race here in the matinee. With Cranky Thorne the pride of Stockton against them this should prove an interesting race. They have allowed Kelly Briggs the hoppers.

After the stud season Greco B. will be put in condition and probably raced in some of the late races.

Hymettus 2:08½, the champion three-year-old gelding of the world is turned out and will not be raced this year. He will be laid over a year and barring accidents should pace in 2:00 minutes next year.

Major McKinley by Stam B. owned by Mr. C. Metz, trotted a nice mile Sunday in 2:37, last quarter in 37 seconds.

Lady Bird by Bay Bird, was driven out to the track Sunday unhooked from the buggy and paced an easy mile in 2:37 for her owner Mr. E. V. Pierce. With a few months training she could pace a mile close to 2:15.

Katy B. by Stam B. trotted an easy mile Sunday for her owner Mr. George Shane, in 2:28.

S. U. Mitchell is training a full brother to Hymettus 2:08½ by Zombro and he acts like a champion.

The only colt in this part of the country by Prince McKinney was foaled by Howard Kerr's mare Zwilka by Zombro May 11th. It is a filly.

Instructor paced a nice mile Sunday in 2:29, last quarter in 35 seconds.

MAY HOLD COUNTY FAIR.

Santa Rosa, May 19.—One of the propositions which is receiving considerable attention at the present time by members of the local Chamber of Commerce is the holding of a county fair in this city this fall. Several years ago a fair was held here and there remains in the bank a fund of some \$1500 which belongs to the Agricultural Association, and this, with a public subscription which it is proposed to raise, would afford sufficient for the holding of the exhibit in connection with a race meeting. The fact that Lou Dillon 1:58½, Sonoma Girl 2:05¼ and Charley Belden 2:08¾, three of the greatest trotters on eastern tracks in recent years were bred and raised near Santa Rosa would make a race meeting here a particularly apt adjunct to a county fair.

FINE SPORT AT STOCKTON.

The second race matinee of the San Joaquin Valley Driving Club held last Sunday afternoon at the Stockton track was a big success. The officers of the day were: Presiding Officer, President Sherwood, Clerk of the Course, Frank Lieginger; Judges, John Galway, David Young and L. J. Wagner; Timers, W. H. Parker and William Nevin; Marshal, F. H. Johnson. George H. Harrison started the running race and David Young started the harness race.

The results:

First race; running, half-mile dash—
G. Nevin's b. g. Hush (owner).....1
D. Greening's c. m. Samar (owner).....2
F. Murphy's b. m. Bess (Brown).....3
Time: 50 seconds.

Second race; trotting—
A. L. Archambeault's ch. m. Babe (owner).....1 1
John Grigsby's s. m. Genevieve G. (Algeo).....2 2
W. J. Miller's b. m. Ellen M. (owner).....3 3
F. A. Murray's b. h. McRey.....w. d.
Time: 2:49¼, 3:04.

Third race; pacing—
Ed. Lavin's blk. h. Ramus (owner).....1 2 1
J. Foley's blk. h. Del Neph (owner).....2 1 2
D. Lieginger's br. h. Roy L. (owner).....3 3 wd
Time: 2:42, 2:40, 2:39.

Fourth race; mixed—
A. B. Sherwood's s. g. Prince, pacer (Algeo)....1 1
Dr. Button's b. g. Billy, trotter (owner).....2 2
Charles Fagan's Derby Mc, trotter.....w. d.
Time: 2:36, 2:38½.

Fifth race; pacing—
Frank Donovan's br. g. Chappo (owner).....1 1
G. F. Wille's b. g. Gilt Edge Dick (Leiginger)....2 2
G. Perano's blk. h. Alto Jr. (owner).....3 3
Time: 2:36, 2:26.

WILL RACE AT VALLEJO.

The San Francisco Driving Club will hold races at Vallejo, May 30th and 31st. Four races will be on the card each day, one of which will be for Solano county horses.

This club has some of the fastest horses in the State and keen contests and good sport can be expected. The entries for the six races for club members are as follows:

Free-for-all Trot—Charles Becker's Walter Wilkes, F. Gommel's Verona; G. Lindauer's Homeway.

Free-for-all Pace—G. Kitto's Deroll, A. Schofield's Harry Hurst, G. Nutting's Byron Lacey, A. H. Schofield's Albert S.

2:15 Pace—A. Schlotter's Dynamite, D. Roberts' Eden Vale, T. Corcoran's Lady Falrose, James O'Kane's King V.

2:18 Pace and Trot—Charles Becker's Charley B., R. P. Giovannoni's Golden Buck, William O'Kane's Babe, H. Boyle's Margaret B., F. Burton's Nico.

2:20 Pace and Trot—Dan Siebert's Ed Ray, M. M. Donnelly's Lucky Dillon, Fred Clotere's Monk, J. Campodocino's Lucero, Charles Becker's Sycamore.

2:25 Class—J. Cooney's Larkin W., J. V. Galindo's Hunky Dory, J. Butler's Lady Cupid, Nick Lawlor's Volma, S. Benson's Babe Boswell, John Danz's Belle, W. Rice's Hickman Girl.

FAST WORK AT WOODLAND.

Breeder and Sportsman: I recently bought a filly of Mr. Coil that was sired by Iran Alto 2:12¼. She is now two years old. Was taken up to break on January 22d, and on the 12th of this month I drove her a mile in 2:32½. She is a trotter. I never knew of one to beat this.

The driving club here will be a go I guess. We have 43 members so far and want fifty.

Woodland track is kept in good shape and some of the boys turn a good one loose for a quarter once in a while. I saw Mr. Rodman drive a trotter a quarter in 31¼ seconds the other day. Charles Spencer and Det Bigelow have some that can step about there or perhaps a little better.

I drove Palo King a mile in 2:18½, which is pretty fair.

Mr. Hunter is doing well with his handsome saddle stallion.

Mr. Hashagen is moving his horse Kinney Rose along a little. He is a good one, and his Nutwood Wilkes mare looks like the real thing and he says she is. She is out of the great mare Liska, the dam of Lisenjero 2:08¼.

Yours truly,

H. H. HOGOBOOM.

THE VERY LATEST.

The new aluminum lined wood rim used by the Houghton Sulky Company of Marion, Ohio, exclusively on their sulkies and training cart is certainly a revolution in the rim business. Mr. Geers says he thinks it is a great improvement over the old style wood rim with an unprotected glued joint, and it certainly is. The rim used by the Houghton people has been thoroughly tested and is not found wanting. It is very strong indeed, that heretofore a man would take chances, not only on the race, but on his life on an unprotected glued joint in a wood rim. In foreign countries this rim has been used by thousands and it gives the very best of satisfaction. The tire can be cemented securely and the special round edge of the aluminum lining makes it far less liable to rim cutting.

The new thirty-two page catalogue issued by the Houghton Sulky Company of Marion, Ohio, would be mailed to any one interested and will explain thoroughly this new feature.

CHICO'S NEW RACE TRACK.

Enterprising Butte County Citizens Have an Up-to-Date Fair Grounds.

Thirty-one years ago the 19th of this month, Budd Doble drove the great mare Goldsmith Maid to victory over Rarus in three straight heats at Chico, California, the time of the three heats being recorded as 2:19½, 2:14½ and 2:17. For many years this record was written over the gate leading into the old fair grounds track, and until the Diamond Match Company that great corporation which owns thousands of acres of timber land in the Sierras east of Chico, purchased the property and erected thereon one of the greatest factories in the world, the words "Goldsmith Maid 2:14½, 1877," were read by everyone who passed the famous mile oval, where the great mare by Alexander's Abdullah when twenty years old, trotted within a half second of her record made three years previous at Boston, Massachusetts. Even after the Diamond Match Company purchased the grounds the old sign was permitted to remain, was there last year, and for ought we know still remains to instruct the passer by that the greatest money winning trotter in the world's history had trotted the Chico track with her flying feet. For many years after the Chico track was one of the most popular in the State, but during the years when the district fairs were dropped from the list of enterprises financially assisted by the State, the old grounds were neglected and in 1900 the last meeting was held there. The race winners at that meeting were Santa Anita Star, El Moro and McBriar among the trotters, and Queen R., Doc Wilkes Goshen Jim and Kelly Briggs among the pacers.

With the passing of the historic old track the interest in harness racing died out to a great extent, but the spark of racing fire is hard to kill, and last year there were so many good young horses being handled in Butte County that an effort was made to raise money enough to build a new track. After a few of the leading horsemen of that section had held several informal gatherings and talked the matter over, a meeting was called and the Chico Driving Association was incorporated with a capital of \$50,000, subscribed by the merchants of the town and the farmers residing in that vicinity. The name could well have been the Butte County Association as nearly every stock raiser and farmer seemed to be interested and ready to put his name down for something.

The officers selected were Wendall Miller, president; Col. Park Henshaw, vice-president; William J. O'Connor, secretary, and the following directors: L. H. McIntosh, J. G. Wannop, J. R. Adler, F. Cohn, L. B. Daniels, G. F. Parks, J. A. Bennett, William Pearly, Park Henshaw, Wendall Miller and W. J. O'Connor.

The association has purchased sixty acres of excellent land, about two miles from Chico, and will soon complete one of the best racing plants in the west. The track is a regulation mile course, with both stretches eighty feet wide, the turns in proportion and well thrown up. The track now looks to be much such footing as the famous Agricultural Park track at Los Angeles, said to be one of the finest, fastest and safest trotting tracks in the world, and we think it will be equally as fast. The track is neatly fenced both on the rail and the outside, while an eight foot fence encloses the entire ground, giving the whole property a genuine fair ground appearance.

The stables are built in sections of fifteen 12 x 12 box stalls, each section with a shed the entire length. A first class water plant has been constructed and is in operation, with high tower and tanks, lead pipes and faucets, all conveniently arranged and the water raised by a five-horse power engine through a centrifugal pump.

A grand stand with a seating capacity of 3,000 is in course of erection, and everything promises to be complete and ready for a grand opening on July 2nd, 3rd and 4th, when the Driving clubs of Woodland, Sacramento, Stockton and Marysville are expected to send their best trotters and pacers to compete against those of the Chico club for blue ribbons and silver cups. This event will be fully announced and advertised later, and is expected to draw one of the greatest crowds ever gathered in this section and prove that the new track is both fast and safe.

The Northern Electric Railway touches one side of this new track, and the Butte County Railway runs along the other, both lines having promised to put on extra service whenever needed, and thus an enormous crowd can be easily handled.

Twenty-five horses are now stabled and in training here. Among the best in L. B. Daniels' string is a sorrel gelding by Kinney Lou 2:07¾ that has been a mile in 2:19 and a quarter in 32 seconds.

A three-year-old trotting filly by a son of Altamont is very promising, and another three-year-old that can trot a forty shot after but a month's handling is a filly by Moormont out of a mare by Pancoast.

There is a filly by Moormont out of a mare by Boydell that is entirely green, but is learning to step fast with very little education.

Rector, a brown gelding by Clarence Wilkes out of a mare by Clay, son of Electioneer, is now in Daniels' stable after being out of training for two years. He was worked a mile in 2:19 two years ago, and is now receiving a careful preparation, getting a lot of miles around 2:30.

The next is Lou Mack, a full sister to Fitz Lee 2:13¾, being by Arthur Wilkes out of Lady Merrill by Tilton Almont. This mare has a lot of speed and will surely make a fast race mare.

A real good trotter in this stable is Frankie C., a sorrel gelding that can step a mile in 2:16 right now, and a quarter in 33 seconds over a track that is not quite at its best.

A trotter that may prove to be the star of the stable is a handsome mare called Nocha by Nushagak out of a mare by Dexter Prince. She is good gaited, wants to trot all the way, has been a mile in 2:33 and a quarter in 36 seconds, with only a month's work.

Another that shows nearly as well at the trot is a grand looker by Moormont out of a mare by Nazote.

A big sorrel gelding by Dr. Hicks, sire of Edwin S. 2:08, can brush very fast at the pace, and as he will go all the way as soon as he is ready, looks like a good prospect.

A three-year-old pacer by McArthur out of a mare by Moses S., and Gladys Moor a good going trotter by Moormont out of Gladys B., dam of Lita 2:13¾, complete this string. This last mare is a good gaited trotter that has worked a mile in 2:40, and a quarter in 37½ seconds with very little handling.

The stallion Moormont is looking fine and is one of the best patronized trotting stallions in the State. Barney Simpson has a string of seven, and his handsome, fast and well bred stallion Arner 2:17¾ is getting a lot of good mares. His black filly by Arner out of a mare by Direct showed to be about ready when she worked three heats over the new track around 2:30, pacing the last quarter of the last mile in 31½ seconds.

A nice acting green trotter in this stable is a black mare by Kinney Lou 2:07¾ out of Jane Stanford by Nephew.

Another good green trotter is a mare by Kinney Lou out of the pacing mare Belle 2:11, grandam of Bolivar 2:00¾. This one will get to the races and give an account of herself.

A trotter by L. W. Russell and another by Dick Russell, son of Diablo, are learning the way from Barney, but the pride of his stable is a fancy turned filly two years old by Arner, out of a full sister to Welcome 2:10½ and Wayland W. 2:12½. This filly will be pointed for next year's futurities, as she now shows to be of stake calibre.

FRONEFIELD.

DOINGS AT THE SALINAS OVAL.

A short visit to the Monterey horse center brought me face to face with that genial and successful horseman, Mr. Charles Whitehead, and from him I gleaned the following:

North Star 2:11¼ is going nicely in his work, is big and strong and apparently much better than he ever was in his life. The fastest mile he has been driving this season is 2:16, but he has lots of speed, having trotted an eighth in 14¾ seconds.

Della Derby 2:17 has rounded out wonderfully in the last year and looks strong and rugged and ready to face the starter right now. She has been in a mile in 2:14¼ and back in 2:14½ and seemed to like it, as the last quarter of the last mile was in 31 seconds.

Another wearer of past and candidate for future honors is Ray O'Light 2:13½, that fast two-year-old of last season, and a worthy son of a great sire. He is developing in size as his work progresses. He has been a mile in 2:15 and back in 2:16 with the last half in 1:05.

Salva is a nice five-year-old mare by Dictatus Medium, dam Aunt Sally by Benton Boy. She is taking to her work like a winner and worked a mile in 2:18 and back in 2:16¼, last quarter in 31½ seconds. This mare is entered in the green pacing events at the Breeders' meeting, also at Oakland and Sacramento.

Another nice moving five-year-old is Red Robin by Robin. He is a trotter and is owned by Paul Bianchi. His fastest mile to date was in 2:22½ with the last half in 1:09½.

Elaine, a mare also sired by Robin, that took a mark of 2:22 last year, has been a mile in 2:19½ and is very promising. She is five years old.

Mr. Whitehead has also several two-year-olds, some of which are stepping along at a 2:20 gait. There are about fifteen head in his string, all told.

Mr. William Coombs has several in training here, among them Albert Direda, which promised so much last season but went lame. He is now four years old and moving along in good style. He has been a mile in 2:13¾ and they'll all have to go some to head him after the word is given. He is sired by that highly finished member of the Direct family, Robert Direct.

Mr. Williams has ten or twelve head in his string and they are all working satisfactorily. The track is in good condition and hopes are entertained that a good meeting of harness racing will be held here this season. Salinas has always held successful meetings and there is no excuse whatever for being out of the circuit this year. The meetings in the past have always left a good surplus in the hands of the promoters, and with so many good horses at the track and a fair chance of their winning a good share of the money, it is to be hoped that a move will be made at once to encourage home industry and promote the general welfare. A. K. KERR.

Reports from New York say that James Farley, the "strike breaker," has retained the services of M. E. McHenry for the coming season. Mr. Farley owns the Ohio bred pacer Judex 2:06¼ and several others and at the last New York sale he bought last year's half-mile track sensation, Locust Jack 2:11.

PARK AMATEUR DRIVING CLUB.

Seven Good Contests With Princess W. as the Star Trotter of the Afternoon.

The Stadium at Golden Gate Park was a popular place last Saturday afternoon as, in addition to the matinee races of the Park Amateur Driving Club, there was a regular carnival of sport in the infield, the chief feature of which was a tug-of-war between teams from the army and navy. There must have been three or four thousand people out to see the athletic contests, but the counter attraction did not prevent a thousand or more standing on the track for several hours to witness the racing for ribbons between horses owned and driven by members of the club.

The day was beautiful, a slight breeze making it very pleasant for the spectators, but probably delayed the horses a little in the stretch, where they had to face it. There was no really sensational racing during the day, every race but the Class A trot being decided in straight heats.

The program opened with the race for Class D trotters. There were four starters, but George D. Mackay's Quill won two heats very handsily, with Mr. Kilpatrick's Belle of Washington second, Mr. Stock's Director B. third and Mr. Bannan's Ginger fourth.

There were but two entries for the second race, which was for Class A pacers, and of these Victor Platte did not show up, so Mr. Hoffman decided to send the other entry, Mary K., by Zombro, for a fast mile. In the first trial she went to the half in 1:08 but made a break on the back stretch and was not driven the third quarter, but Hoffman let her down the last quarter and she stepped it in 32 seconds, making the mile in 2:20. On the second trial the little mare went without a skip and made the mile in 2:13½, a new record for the track. Mary K. looks like a 2:10 pacer on a mile track.

The best race of the day was the Class A trot, in which Mr. Kilpatrick's Princess W., by George Washington, Mr. Hoffman's Major Cook by Chas. Derby and Mr. Ahler's Telephone by Direct were the starters. The first heat went to Telephone, one of the handsomest horses owned in the club, Princess W. making one or two breaks in the heat, and Major Cook, not in condition for fast racing, being very short of work, a poor third. In the second heat Mr. Kilpatrick handled Princess W. in a masterly manner, keeping the nervous mare level all the way, and she won handsily, repeating this in the third and final heat, which was the fastest heat of the afternoon, being trotted in 1:41, better than a 2:15 gait.

Thomas Bannan won the Class B pace with Jim Chase, defeating Ringrose and Zulu rather easily.

In the Class C trot there were three starters. Dan Hoffman drove E. Stewart's new purchase, Peter Pan by L. W. Russell. Mr. Kilpatrick was up behind a grand looking big bay by his stallion Washington McKinney, and Mr. Clayburgh drove his favorite Charles II. Peter Pan had the foot of the trio and won in straight order. His handsome appearance and action were the subject of much favorable comment.

M. W. Herzog's old mare, Lady Nell, took the Class B trot in her usual style, her fastest heat 1:43¾.

In the Class E trot Mr. R. Cousani won with his horse Presto, the second heat being very slow on account of all three of the contestants making bad breaks. The summaries:

Class D Trotters—
Quill (George D. Mackay)..... 1 1
Belle of Washington (F. J. Kilpatrick)..... 2 2
Director B. (E. Stock)..... 3 3
Ginger (T. F. Bannan)..... 4 4
Time—1:56, 1:53.

Class A Pacers—Walkover—One mile.
Mary K. (D. E. Hoffman)..... Won
Time—2:13¾.

Class A Trotters—
Princess W. (F. J. Kilpatrick)..... 2 1 1
Telephone (H. C. Ahlers)..... 1 2 2
Major Cook (D. E. Hoffman)..... 3 3 dr
Time—1:44, 1:43, 1:41.

Class C Trotters—
Peter Pan (D. E. Hoffman)..... 1 1
Roy McKinney (F. J. Kilpatrick)..... 3 2
Charles II. (A. P. Clayburgh)..... 2 3
Time—1:50, 1:46.

Class B Pacers—
Jim Chase (T. F. Bannan)..... 1 1
Zulu (Captain W. Olsen)..... 3 2
Ringrose (H. M. Ladd)..... 2 3
Time—1:47, 1:44.

Class B Trotters—
Lady Nell (M. W. Herzog)..... 1 1
Lady Washington (T. F. Bannan)..... 2 2
Laddie G. (G. R. Gay)..... 3 3
Time—1:50, 1:43¾.

Class E Trotters—
Presto (R. Cousani)..... 1 1
McKinney Belle (F. J. Kilpatrick)..... 2 3
Red Velvet (J. W. Smedley)..... 3 2
Time—1:48½, 2:06¾.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal.

Drink Jackson's Napa Soda.

UNDEVELOPED SIRES AND DAMS.

A reader of the Breeder and Sportsman contributes the following:

Much recently has been written on undeveloped blood in trotters with low records. It is interesting to note that the late C. J. Hamlin, one of the most successful as well as most brainy of men that engaged in breeding and developing trotters, long ago expressed the opinion that racing campaigns sap the vitality of a stallion and make him less desirable as a stock horse. In one of his yearly catalogues of stallions and brood mares he said:

"All breeders are more or less rivals, each being anxious to excel, and this being the case, I feel privileged to say a few words about claims put forward by owners of other stallions, especially those stallions with fast records. I combat the theory that stallions with low records are of the highest value for breeding purposes. I contend that the fastest and gamest performers are not likely to come from them. The hard work of the track causes a waste of vital force so much needed in perfect stock getting."

Concerning the theory that sires with low records should necessarily beget fast performers, he wrote:

"For the good of the trotting community as well as for those breeding with the hope of getting a trotter, I think it time that the bubbles, so full of deceptive ideas, should be pricked."

Mr. John Bradburn, former superintendent of C. J. Hamlin's Village Farm, writes in his most excellent book, "Breeding and Developing the Trotter":

"Mr. Hamlin did not consider it necessary to race a mare in order to make a successful brood mare. He thought nothing of stopping us working our best fillies and ordering them to be placed in the harem. For that reason most of Village Farm's fastest performers were stallions or geldings. On many an occasion have Village Farm trainers been actually sickened when prospective 2:10 trotters were taken from their strings to be placed in the brood mare ranks."

At that time Mr. Hamlin owned Mambrino King and Chimes, two stallions without records, although later Chimes took a record of 2:30 $\frac{1}{4}$. The two stallions having the fastest records at that day were Phallas 2:13 $\frac{3}{4}$ and Jerome Eddy 2:16 $\frac{1}{2}$. Both Phallas and Jerome Eddy had been having the pick of the best mares with liberal patronage, and wishing to prove his theory correct, Mr. Hamlin issued the following challenge:

"I will trot this coming season, heats best two in three, under rules of the National Trotting Association, over any good mile track, four of the get of Mambrino King (an undeveloped stallion), all foaled in 1885, bred, raised, developed and owned at Village Farm, against any four of the same age, bred, raised, developed and owned by the owner of any stallion having a record of 2:22 or better, the said four to have been sired after the stallion had obtained his fastest record. I will make each of the four races for from \$100 to \$1,000 dollars a side."

Mr. Hamlin's challenge was not accepted by any of the owners of developed stallions. It is unnecessary to state that as compared to developed sires the two Village Farm stallions, without records at that time, made good through the performances of their progeny, while the two fastest stallions of that day, Phallas and Jerome Eddy, did not do as well in siring a large number of very fast performers.

HAVE INVADED THE ENGLISH MARKET.

A cable dispatch of last week brought the news to America that the Tichenor-Grand Company has secured a long lease on the extensive and well known Top Yard property in Cricklewood Lane, London, almost adjoining the training quarters where Alfred G. Vanderbilt is fitting his American coach horses for the coming season on the Brighton road. The establishment covers two and a quarter acres and provides stable accommodations for more than two hundred horses, together with a large covered driving ring and, in short, all the appointments of a first class training and sales stable. Mr. Tichenor cabled "Good as Chicago," meaning that the new London branch is as well equipped as the company's plant in the West, which easily surpasses anything in the United States in the line of training quarters for carriage and saddle horses.

It is the purpose of the Tichenor-Grand Company to keep two hundred horses or more in their new London stables and to make the English branch a distributing point for Continental European trade. Following up the more than favorable impression made by the trotting bred carriage horses exhibited by Alfred G. Vanderbilt and C. W. Watson at the International Horse Show in London last year, Mr. Tichenor and his associates intend to introduce the American type of harness horse abroad, believing there is a great future in this branch of the trade. The move is thus one of vast importance to American horse breeding interests, aside from its significance as marking the first concern in the horse market to maintain English and American establishments. It is expected that large shipments of fine horses will be made from England to the United States as well as from here to London, the cost of transportation being less than from New York to Chicago and there being no import duty on registered stallions and mares of the recognized breeds.

HIGH HEADED TROTTING HORSES.

A correspondent of the Chicago Horseman, who has been an interested reader of the many articles printed during recent years, in which breeders have been advised to breed more for the coach or carriage conformation, makes the following comments, which are surely worth thinking about:

"We are trying to breed high headed horses. The first question that occurs to me as a horse breeder, is, why should we try to breed heads and necks for purposes of show, merely, without stopping to consider whether or not the horse will be improved or injured as a speed animal, if he has a high head and fashionable neck."

"For my part I am thoroughly convinced that the set of the head and neck of a horse that fashion has decreed to be the proper thing amounts to a deformity in a trotting horse."

"I do not believe that the fashionable head and neck will interfere with the action of a three-minute horse. But after that rate of speed is passed the shoulders do not have sufficient play where the head is carried naturally high. It is not that the head itself interferes, but rather that the set of the fashionable head depends upon the way in which the neck is joined to the body at the shoulders. The neck formation at the base throws the head up and also keeps the neck up when the head is joined. That peculiar kind of neck formation which is responsible for the high, stylish head, interferes with extreme speed. The Morgan type of horses have this style of neck and high head that is counted beautiful. And as a matter of fact it is pleasing to look upon. It is all right in the Morgan type of horse, which is called upon to go only a ten-mile an hour gait on the road. The neck does not interfere with this rate of speed, and we all know that the good little Morgans are hardy and enduring roadsters. But they cannot step at a racing pace. When they extend themselves they have that peculiar stylish neck formation to contend with, and that interferes with a fast pace."

"It is true we have had many descendants of old Justin Morgan which could trot fast, and were in fact famous race horses of great beauty. But they were for the most part lacking in that peculiar neck formation which has become fashionable in the show ring. The descendants of these old Morgan race horses have very heavy necks, and some of them have the arch which we admire in the show horse."

"Occasionally we see a high headed trotter which races well. Perhaps they would race better if their necks were set on their shoulders differently. For the most part, however, our race horses have lean necks, and race best when neck and head is fully outstretched. This gives the shoulders more freedom."

"We sometimes wish that we could put these fashionable heads and necks on our trotting horses, just to give them a little gayer appearance. But we do not succeed very well in breeding into our horses this fashionable head and neck. When we have a little success in this line we are almost certain to lose speed. For my part, I am willing to let the showmen fix and maintain the kind of head and neck formation they admire. But such a type of head and neck is not suited to the speed harness horse."

CHICAGO HORSE REVIEWINGS.

The Russians who purchased Cresceus 2:02 $\frac{1}{4}$ have also made offers to Mr. Savage for Directum 2:05 $\frac{1}{4}$ and Arion 2:07 $\frac{1}{4}$.

J. M. Herbert of Denver, Colo., has sent three pacers to Dick McMahan to be trained and raced this season. They are Catherine Direct, a three-year-old pacing filly by Direct 2:05 $\frac{1}{2}$; Ding Pointer, by Star Pointer 1:59 $\frac{1}{4}$, and Helen Gould 2:14 $\frac{1}{2}$.

Kate Dillon 2:24 $\frac{1}{4}$, pacing, in Charley Dean's stable at Palatine, Ill., is one of the handsomest mares in training. She is out of Roblet, p. 2:12 (dam of Bonale, p. 33, 2:09 $\frac{1}{4}$), by Robin; grandam Eveline (dam of Ole 2:10 $\frac{1}{4}$ and grandam of Sonoma Girl 2:05 $\frac{1}{4}$), by Nutwood 2:13 $\frac{1}{4}$.

Ed Hall reached the Libertyville, Ill., track last Sunday, from Phoenix, Ariz., with Justo, the fast three-year-old futurity candidate, owned by Mrs. J. C. Adams, that raced so well as a two-year-old last season, being second in the Review Futurity in 2:16 $\frac{1}{2}$, 2:16 $\frac{1}{4}$. The colt is in grand condition.

A visitor who witnessed the workouts at Memphis last week reports some pretty lively work on the part of Mr. Geers' horses. Prince A. Rundel, entered in the Chamber of Commerce stake, paced in 2:12; Empire Hal 2:12 $\frac{1}{4}$, a candidate for the same race, also pacing in 2:12; John A. 2:03 $\frac{1}{4}$, Straight Advice 2:05 $\frac{1}{4}$ and Baron Grattan 2:03 $\frac{1}{4}$ have worked in 2:14, while the trotters Royal, by Boreal 2:15 $\frac{1}{4}$, and Teasel 2:14 $\frac{1}{4}$, stepped in 2:14 $\frac{1}{4}$ in company. Highball 2:06 $\frac{1}{4}$ has been a mile in 2:13.

Thousands of horses are needed for ranching and railroad work in Western Canada, according to John C. Thompson of Saskatoon, who is now in the Eastern provinces, where he intends buying several hundred heavy draft horses for grading work on the Grand Trunk Pacific line. Owing to the prohibitive duty imposed on horses imported across the line, it is impossible to secure a supply from the American side, where animals could be bought cheap and shipped at small cost to points most in need of them. Settlers coming into the country are permitted to bring their own horses, but this small supply does not materially improve the situation.

EXERCISE FOR STALLIONS.

J. Buckingham of Janesville, Ohio, writes as follows in the Western Horseman:

Experience is the great teacher. Here are some things that each breeder should know. As I travel over the country each year I hear of many stallions that are impotent, or nearly so. I have owned stallions since April, 1853, and they always had plenty exercise and all were sure foal getters.

In 1854 and 1855 I lived nine miles down the river on a good road, and business called me to the city each week day. I owned at that time a fine, large, bay stallion by Brown's Bellfounder, out of a mare nearly thoroughbred. I drove this stallion to the city four days each week, from March 15th to July 1st, generally in a spring sulky, but if rainy in a buggy.

During those two spring seasons he served 100 mares and got eighty-seven living foals, and of these eighty-one were colts and six were fillies, and all bays but one, and that was a gray, out of a blind gray mare.

In 1866 S. D. Bruce wrote, asking me to take his stallion, Daniel Prophet, a fine thoroughbred race horse, on shares. My answer was, "Send him along," and he came. I advertised him in the horse papers and by circulars around among my friends.

During the next few weeks I had many letters from friends saying "that the horse was no good, was impotent," "that the previous year he had served fifty-five mares and got but three with foal, and I had better save time and money" and return him to his owner.

That set me to thinking pretty hard, and I then remembered that Lord George Bentick of England, bought the great race horse Venison for a mere trifle, as he was so uncertain as a foal getter that the breeders refused to send any mares to him.

But Lord George Bentick advertised that he would stand Venison at 72 guineas (\$360) a mare and would pay 75 guineas (\$375) to each owner of a mare that missed. Breeders laughed and joked, but sent him seventy-four mares to breed to Venison, and seventy-one got with foal.

He simply made him a success by giving him plenty of exercise each day. So I had Daniel the Prophet each week day walked a mile, then jogged two miles, then galloped a mile and a half and then a half mile as fast as he could run. He got this exercise on a good half-mile race track. He served forty-seven mares between April 1st and July 15th and got forty-four foals.

The next year he passed into other hands and was well advertised as a successful sire the previous year but his new owner put him in a box stall, some 12 by 30 feet, and, walking around there and shown to horsemen by leading him out into the street was all the exercise he got. While many mares were bred to him, not one in ten got with foal. All for want of exercise. Plenty of good exercise each day is what all stallions need.

THE SPLIT LOG DRAG.

The United States Department of Agriculture has just published Farmer's Bulletin No. 321, describing how to make and use the split log and King drag on earth roads. This bulletin is one of the best which has been issued upon the subject and a copy of the same should be in the hands of every county commissioner and person interested in good roads. The bulletin shows how to make and use the drag, and is well illustrated. It also points out some of the reasons why the drag has not been more generally accepted as one of the very best road machines. Unfortunately too many bulletins and circulars have been sent throughout the country, wherein the information was such as to be absolutely misleading. In many cases the bulletins failed to even recognize the principles of the construction, and in even more cases failed to indicate the proper time for using the instrument. The bulletin can be obtained free of cost by addressing Director L. W. Page, Office of Public Roads, Washington, D. C.

LOUISIANA'S GOVERNOR WANTS BETTING STOPPED.

Baton Rouge, La., May 18.—Race track gambling to be suppressed absolutely and local option combined with high license to regulate the liquor traffic were two of the more urgent recommendations of Governor Sanders' inaugural message to the legislature today. Of race track gambling the message said:

"The manner and mode of conducting race tracks in and around New Orleans and the flagrant gambling carried on at the tracks has deservedly aroused the moral sense of the people against it. I earnestly urge the general assembly to enact legislation prohibiting and penalizing gambling on horse racing."

Norval, whose second dam was a daughter of the running bred horse Todhunter's Sir Wallace, now outranks any other son of Electioneer as a progenitor of standard speed in the first and second generations, having 259 to his credit. Chimes comes next with 233 to his credit, and Chimes' dam, Beautiful Bells, was by a horse whose dam was a thoroughbred, Anteeo 2:16 $\frac{1}{2}$ is third in this list of Electioneer's sons with 177 standard performers in the first and second generation and his second dam was a thoroughbred mare.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The Golden Gate Gun Club regular monthly shoot at Ingleside, Sunday, May 17th, drew an attendance of 24 shooters, this number being quite up to the average attendance at the weekly regular club shoots on the grounds. The fact that the fishing season is on and the allurements of the trout streams, a strong counter attraction with a number of shooters, will account for the absence of some of the veterans. Another inducement for the absentees is the numerous out of town shoots being held these days. As it was, there was a strong show of new recruits at the club shoot last Sunday.

Otto Feudner and Mark Iverson were high guns in the Du Pont trophy race, each breaking 23 out of 25. The usual club race at 100 targets was cut down to 50 birds. The high scores were: Feudner 43 in the champion class, Iverson 43 in the first class, Haas 41 in the second class. Valencia broke 39 in the third class.

Feudner and Price were high with 13 each in the shoot at doubles, 10 pairs.

Strong gusts of wind handicapped a number of good shots and also cut down the general average of scores. After the regular program a number of the shooters left the grounds to participate in a live bird shoot at South San Francisco. The scores were:

Du Pont trophy race, 25 targets—20 yards: Feudner 23, Reed 19, Price 16. 18 yards: Iverson 23, Hoelle 16. 16 yards: Ashlin 20, Price 19, Haas 17, Wood 17. 14 yards: Biller 18, Leek 13, Valencia 12.

Club race; \$50 purse added, 50 targets—Champion class: Feudner 43, Reed 42, Forster 39, Prior 37.

First Class: Iverson 43, Houtp 41, Klevesahl 39, Murdock 38, Hoelle 33.

Second Class: Haas 41, Wood 38, Ashlin 37, Patrick 37, Price 36, Ashcroft 35, Robinson 30, Thomas 29.

Third Class: Valencia 39, Leek 29, Dollin 25, Biller 23, Noonan 23, Sinkey 21, Miss Meyer 15.

Twenty targets, 10 double rises—Feudner 13, Price 13, Hoelle 12, Ashcroft 12, Reed 11, Leek 11, Valencia 10, Klevesahl 9, Wood 7, Sinkey 6, Houtp 6, Rollin 5.

The Carnation Gun Club, a newly organized club composed mainly of South San Francisco sportsmen held the initial club shoot, Sunday, May 17th, at both live birds and blue rocks. Most of the members are trap shooting novices, all however, enthusiastic devotees of the gun. George Sylvester and Jos Pisani were the managers and that means everything went off in apple-pie order. An excellent barbecue luncheon materially helped all present to pass a most enjoyable day. Time was when the South San Francisco shoots in the old days was the rendezvous of all the local and visiting sportsmen. The easiest way to find out who was there was by tolling off the few absentees. This seemed to have been a U. M. C. clean-up, for, with one exception only, the shooters all used U. M. C. shells and mostly Selby loads.

The first race had 19 men on the platform in a 10 target race: H. W. Snipper, J. Sullivan and J. Burns were high guns. The second event was at 12 live birds, 25 guns on the firing line. The last seven entries had but 11 birds to shoot at—the supply of pigeons ran short, the entry was larger than was anticipated. Most of the shooters were new men at the live bird traps, on quail, snipe and ducks "they are there" however. P. Finocchio and Moulton grassed straight, five men were in the eleven hole.

In the third event at 15 blue rocks, 31 shooters participated, there was a reinforcement from Ingleside. Hip Justins, Joe Pisani and Billy Price landed on the 13 line.

A gusty west wind bothered the shooters and cut down results materially. The scores were:

First event, 10 targets—	
G. Sylvester	1 1 1 0 1 0 0 1 1 1—7
J. Sullivan	1 1 1 0 1 1 0 1 1 1—8
Howard	0 0 0 1 0 0 0 0 1 0—2
A. Rose	0 0 0 1 0 0 0 0 0 0—1
A. Shave	1 1 0 1 1 1 0 0 1 7

J. Burns	1 1 0 1 1 1 1 1 1 1 1 0 0 1—12

The Loomis Blue Rock Club, another new trap shooting club comprised of Placer county and vicinity sportsmen, held the first club blue rock shoot last Sunday. Secretary Chester Scroggs writes us: "Enclosed please find the scores of the initial shoot of the Loomis Blue Rock Club, which will show some excellent averages for men who have never shot at the traps before. This statement, of course, does not include that "new world's champion" Frank Newbert, of Sacramento, who came up looking for a little easy picking. In order to properly celebrate the opening of the new club, a monster blue jay shoot was held in the morning resulting in the destruction of several hundred jays and an equal number of jack rabbits. The Loomis Club will pull off a big shoot next Sunday. All shot gun enthusiasts will be welcomed."

First event, 10 targets—

Walters	1 1 1 1 1 0 1 1 1 1—9
C. Dolce	1 1 1 1 1 1 0 1 0—8
De Shields	1 0 1 1 1 1 1 0—8
C. Dolce	0 0 1 0 0 1 0 0 0—2
Orsilini	0 0 0 0 0 0 0 0 0—0
Blemer	1 1 1 1 0 0 1 1 0—7
Orsilini	1 0 0 1 0 0 0 0 0—2
Dunn	0 0 1 1 0 1 0 0 0—3

Walters	1 0 1 1 1 1 1 1 1 0 1 0 0 0 1 0 1—14
F. Newbert	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1—18
Blemer	1 0 1 1 1 1 1 1 1 0 0 1 1 1 1 1 1—14
C. Dolce	1 1 0 1 0 0 1 0 0 0 1 0 0 0 1 1 0 1—10
W. Pendleton	0 0 0 0 1 0 0 0 0 1 0 0 0 1 0 0 0 0—3
J. Laird	0 1 1 1 0 0 1 0 0 1 1 1 0 1 0 0 1 0—10
Dunn	0 1 1 0 0 1 0 1 0 0 0 1 0 1 1 1 1—11
Gordon	0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 1 1—13

The Vallejo Gun Club held a practice shoot Sunday, May 10th, at the grounds just above the Three Mile House, in which twenty members participated. Although a high wind was blowing, some good scores were made in the regular events at 20 birds. J. V. O'Hara was high gun with 19 breaks of 20 shot at and in the trophy event at 25 birds W. L. King was high with 17 breaks out of 25.

The club is making arrangements for a big merchandise shoot on Sunday, May 31st, besides numerous merchandise prizes, teams from Napa, San Francisco, Suisun and Santa Rosa will compete for a trophy.

The Martinez Gun Club held a regular shoot at the grounds at Bay View Park last Sunday. The following is the score at 20 targets: G. E. Searcy 116, Joe Mayo 8, George McDonald 115, M. W. Joost 4, A. E. Blum 9, C. E. Daley 13, T. Joost 7, Walter Morgan 15, F. A. Hodapp 13, J. W. McClell 12, Ray Standish 13, L. N. Buttner 13, Fred Stewart 7, A. N. Sullenger 15, W. F. Booth 16, Howard Veale 13, Frank Baker 12.

The Pajaro Valley Railroad Company have added more attractions to their Alisal Park, near Salinas, by laying out shooting grounds for the accommodation of patrons of the park who wish to indulge in trap-shooting. An ideal location has been selected in a grove of oaks. There are numerous benches and tables provided for the comfort and convenience of shooters. The local wing shots are arranging to migrate in a body to these grounds next Sunday, where they will hold a big shootfest, as well as enjoy themselves picnicking, dancing and other recreations. Most of the shooters will take their families, and it is needless to say the sportsmen will enjoy themselves to the limit.

Fishing at Klamath Hot Springs was just a trifle backward last week. Cold weather and late rains were conditions unfavorable to a number of anglers who have for years past spent weeks or more at this famous fishing resort. Al. M. Cummings, Mrs. Cummings, Miss Ross, W. F. Hillegass, H. Copeland, F. Carroll, M. Osborne and Mrs. Osborne were at the Springs last week. Catches of fish were made daily, Hillegass on one day caught 10 fine fish from the river that scaled over 16 pounds. Few fish were taken with spoon or fly, the killing lure was the helgramite. As soon as the weather moderates and the salmon flies make their appearance the fishing will be unexcelled. Not only in the reaches of the Klamath river are there many big rainbows, but the nearby creeks and streams, Shovel creek for one, are temptingly promising for the lucky angler who will visit that locality in the near future.

It is understood that some time during this month thousands of young trout will be sent out from the Nevada State and government hatcheries and planted in many Nevada streams.

Every year young fish are planted in the streams in the western part of the State, but for some reason or other none are ever placed in the Humboldt, Nevada's largest and longest river.

The Truckee river is always kept well stocked with young trout, but the Humboldt is the most neglected stream in the State. Years ago a lot of black bass fry were placed in the Humboldt, but since that time nothing has been done in the way of keeping the stream stocked.

A party composed of James Maynard Jr., William Howard, Ed. Bosqui, Jack Karney and "Black Jack" Lemmer started yesterday for the Big Meadow country for a two weeks' trip. They will stage about 45 miles above Prattville where there is grand fishing and plenty of trout. Ed Schultz and Pete McRae will be the chefs.

It is reported that the Fish Commission's new car for the transportation of live fish and fry will be placed in commission this summer, perhaps in a month or so.

HUNGARIAN PARTRIDGES IN CALIFORNIA.

A report from Santa Monica gives rather an encouraging outlook for the success of the experiment of introducing the Hungarian black partridge in this State. The birds were first liberated in Southern California and since then have been placed in other believed favorable locations:

Within five years the new crop of the imported Hungarian partridges will be ripe for the gun of the sportsman, if the present behavior of the recently liberated game birds is an indication, so states the writer. From all over the State, wherever a "plant" of the partridges has been made, reports are that the birds have become accustomed to their new surroundings, that they are taking the food the countryside offers, and that they are pairing off. In the northern portion of the State they have even begun to nest, a certain proof of their ability to thrive and increase under the climatic conditions prevailing in California.

The Hungarian partridges liberated by the State Fish Commissioners nearest to Los Angeles are domiciled on the hills and fields of the Malibu ranch, in the Santa Monica mountains. Deputy State Game and Fish Commissioner H. I. Pritchard of Santa Monica took charge of the ten pair when they arrived from San Francisco April 16th, kept them cooped up on the Malibu for two weeks to study their habits and behavior, and then allowed them to shift for themselves. They have been at liberty for more than ten days, but they are still under observation, and a close watch will be kept over them until they have increased sufficiently to place them on an equal footing with their native cousins, the mountain, valley and desert quail of California.

There are no true quail on the American continent. The game birds commonly called quail belong to the partridge family, and this family is represented in California by three species, the valley quail, the mountain quail, the largest and most beautiful of the indigenous varieties, and the dusky Gambel or desert quail. Attempts to introduce the Eastern bob white into California have not been successful. (Save in a few sections, near Concord, Contra Costa county, where they thrived well several years ago, but were finally exterminated by pot and market hunters.—Ed.) The lack of moisture during the long, dry summer prevented their increase, and the attempts to breed them have been given up. When the new hunting license placed adequate funds for game protection and propagation in the hands of the State Fish Commission, C. A. Vogelsang, the Chief Deputy, looked about for new game birds to add to the decreasing native stock, and his attention was called to the Hungarian partridge by successful attempts to raise them on the Del Paso Ranch near Sacramento.

After thorough investigation 2,000 of the birds were ordered from Europe and liberated throughout the State in January. A second shipment of an equal number was lost when the steamer carrying them from Hamburg caught fire on the high seas, a thousand birds replacing them in March. The Hungarian partridge is larger than its native relatives, exceeding in size even the California mountain quail. It is a strong flyer, lies well to the dogs and flies off rapidly in a straight line when flushed. Unlike the native valley quail, it refuses to run on the ground, but trusts to its wings rather than to its feet. In many respects its habits are similar to those of the bob white.

While it can and does exist in brush and chaparral it prefers the cultivated fields, following the settler rather than disappearing before the advance of the fields, thus giving the dogs a better opportunity to work. It feeds on all kinds of grain, seeds of weeds and flowers and will even vary its diet with insects when grain or seeds are scarce. After the first days or the open season the native valley quail leaves the fields, becomes gun shy and takes refuge in the dense brush, making it difficult for the hunter to locate them. The Hungarian partridge stays in the fields and trusts to its strong wings for safety.

It is a prolific breeder, a pair usually hatching out from ten to fifteen eggs. The nesting season is in March and April and the young birds are strong on the wing and full grown by October. The meat of the birds is white and has a delicious flavor, untainted by the bitterness so often found in the meat of the ruffed grouse of the East.

The Hungarian partridge is non-migratory. It stays in the neighborhood where it has been hatched unless the number of coveys becomes so large that some of them are forced to seek food in adjacent territory. Its coloring, light brown, with dark spots on the wings, and the lighter grayish shade on the breast, protects it well on the stubble field.

If the stringent laws for the protection of imported game are rigidly enforced—and the State Commission will see to it that violators of the law get the limit—the 3,000 birds five years hence should have increased to 100,000, counting only four chicks to each pair and taking no account of second broods by the old birds.

Dryden Garnett of Willows, Colusa County, who is an enthusiast over the breeding of the pretty Mongolian pheasants, is quoted as stating that twenty out of the thirty birds that had been turned loose on his farm were nesting and that the female lays two settings of eggs and the male sits on one of the nests full of eggs. These nests are along the creek, and when Dryden calls his chickens for the purpose of feeding them every pheasant within sound of his voice comes to eat with the chickens, and the male pheasant is a fighter, for all the roosters take a back track when the old cock pheasant comes in sight.

Hawks do not seem to have much use for the Mongolian pheasant, and the coyote or wildcats are unable to catch them, even at night.

There is every evidence that these game birds will be very plentiful in the foothills inside of five years if they are allowed to increase.

A correspondent at Alta, Placer county, writes: There seems to be a greater scarcity of quail this season than there has been for the past few years, during which time they have steadily decreased, owing to the ravages made upon them by the bluejays. Unless something is done to exterminate the jays it will not be long before the quail will become extinct.

We are inclined to believe that the writer has an erroneous impression regarding the alleged depredations of the bluejay. Study of the habits of this bird and scientific research by the Biological Survey of the U. S. Department of Agriculture have disproven the charge that the bird destroys either the young or the eggs of quail. We have heard many persons make the positive assertion that the bluejay was guilty as above charged, but have yet to meet the man who has made the charge on other than hearsay evidence.

"The meadow lark, one of the most melodious of California song birds, states the Sacramento Bee, seems in danger of extinction, and is already becoming rare in most parts of the State. The bird is protected by law, but many farmers have a mistaken idea that it is harmful, and so encourage its destruction.

The United States Department of Agriculture, which has made a careful study of the meadow lark, is authority for the statement that it is "almost wholly beneficial," instead of being an injury to crops. Of hundreds of larks examined, animal food was found to constitute 73 per cent of the contents of the stomach. This animal food consisted chiefly of insects. The same authority says that more than half the food of the bird consists of insects harmful to the farmer, and its vegetable food is composed either of "noxious weeds or waste grain."

Unfortunately for the lark, it is good to eat, which is one of the chief reasons for the fact that it is disappearing. The law against its destruction should be enforced."

There was a time when the meadow lark was accused by 75 per cent. of the farmers of being a decided pest and uprooter of young wheat. It was positively declared that the bird would pull up young wheat and feed on the milk sap. After a while it was found out, on investigation and not by biased observation from a distance, that instead of "milk sap" the birds were feeding upon and destroying thousands of cutworms. At that, some of the "old hardshells" are willing to swear that the meadow lark is the farmer's enemy.

Reports from the Fish Commission are to the effect that the preparatory work of introducing game birds from other sections is progressing favorably and that in the next few months the Commission will have a large number of birds to liberate in different sections of California. The men who are operating in Mexico, securing wild turkeys to liberate in this State are meeting with success so far. Quite a large number of turkeys have been trapped and are being held preparatory to shipment. A considerable number of eggs have been secured and are being hatched by incubators. This part of the work is in the nature of an experiment and it is yet too early to report results as to its success. Those turkeys that have been liberated in different sections of the State have been closely watched and protected as far as possible by the wardens.

One experiment that could be made with some degree of certainty in favorable results, is the liberation of tame turkey hens with wild turkey cocks. The tame fowls are almost identical in every respect with the wild birds. It has been proved successfully that they will mate and rear young. The second generation turn out, under proper conditions of habitat and food, to be indistinguishable from the wild birds, being virtually wild turkeys with all their characteristics and habits. There is one favorable feature about this suggestion, and that is, it would be far easier to secure domestic turkey hens and to handle them, that it is to capture, transport and look after the wild hens. If the transplanting of wild turkeys from Mexico, and this bird is identical with the American wild turkey, is going to be successful in this state, given, that a sufficient number of wild turkey gobblers are trapped, the liberation of tame hens of the proper variety with them will go far towards bringing about the early success of the experiment.

A hunting and fishing club is being formed in Monterey and Pacific Grove. Fifteen acres have been leased at the end of the San Francisco ranch, just the other side of the Petresco Mountains, 25 miles southeast from Monterey, and camping grounds arranged for, on which are two cabins conveniently arranged for club quarters. The club membership has been limited to 30, the membership fee to be \$5. Among those already interested to the extent of identifying themselves with the proposed organization are Sherman Woolf and W. H. Varlen of Pacific Grove, Harry Kilpatrick, Chester Hare, Harold Selby, Charles Fadden, Clef Cummings, Paul Price and William Hughes of Monterey.

DOINGS IN DOGDOM.

J. I. Sparrow's Bull Terrier bitch Silkwood Molly whelped May 10th, nine puppies (8 dogs) to Croydon Czar. This litter is an even, strong, all-white lot.

Miss Gertrude Sparrow's Boston Ascot Sara whelped two dog puppies to Raineer Dick, May 10th.

The protest filed with the Bench Show Committee against the award of the Dr. H. L. Tevis' Bull Terrier Breeders' cup to J. I. Sparrow at the Frisco show last month has been overruled by the club officials. The three wins of Mr. Sparrow were conceded by the majority of the Bull Terrier fancy. In 1905 Ch Meg Merrilies II was the dam of the winning puppy. Meg was bred by Mr. Sparrow. In 1907, at the Chutes show, Ch. Silkwood Ben Ali was the winning puppy. Both sire and dam, Croydon Czar and Silkwood Peggy were owned by Sparrow. At the Frisco show last month, the winning puppy, Toughy was also out of Silkwood Peggy. The A. K. C. rule as to what constitutes a breeder, is, that the owner or lessee of the bitch at the time of whelping is the breeder of the litter.

Hilo Kennels recently had a very acceptable addition in the shape of a strong, handsome, all-white litter of eight Bull Terrier puppies out of Englewood Blossom, erstwhile W. C. Bogen's winning bitch on the Coast circuit. The sire is Chester Valley Captain a son of Ch Queensbury Bo'swain.

Mr. Medcalf's fancy is not confined entirely to the white 'uns. He is the owner of some Airedales that have already aroused much interest on the part of fanciers of the "all round dog." Six or eight of the dogs are as well known on the country roads of the island, as their owner is on Hilo 'Change during business hours. Clonmel Monarch, Master Briar, New King and other stars of the Airedale galaxy are represented in the Hilo Kennels by some of their best progeny.

Napa will probably hold a show this fall instead of next month as originally planned. Mr. A. B. Spreckels has generously donated a \$100 cup for this show and other substantial cups and prizes will follow.

Mr. J. G. Ackleman of Reno, sent recently, a tri-color Collie bitch by Ch Squire of Tyton ex Southport Dalia to Valverde Kennels to be served by Ch Southport Student.

The absence of Ch Meg Merrilies II from the ring at Portland was due to an injured toe, she was run over by a wagon and put out of commission for showing.

Valverde Kennels sold Valverde Prim, first puppies at Fresno to Mrs. H. P. Rosenberg. Mr. O. J. Albee purchased Valverde Mona. Both Collies are by Ch. Anfield Model ex Gladys May.

In connection with the report of Dr. Hart on "Rabies," on another page, we give the following press dispatch taken from a daily paper this week:

Like a man in a condemned cell awaiting execution on the morrow, William H. Marsh, a well-known resident of Brooklyn, lay last night (May 19th) in his home expecting death from hydrophobia. He had been told last Monday at the Pasteur Institute, where he went for remedy, that it was too late to save him and that the limit of his life was three days at the latest, with a probability that he would not live that long.

Marsh, who was a manufacturer of water meters and owned a large estate, went home, put his affairs in order, and prepared for death.

To-day the end came. Marsh, who had taken a full medical course years ago, diagnosed the progress of the disease in his system and told the doctors when the convulsions produced by the rabies got very bad to give him opiates. His final agony was lightened by the merciful coma which these produced. A message of advice from as far away as San Francisco reached the Marsh home, but death was inevitable.

Marsh, who was about 57 years old, was infected not by being bitten, but by having his hand licked by a Bull Terrier which he treated kindly. The virus penetrated, it is supposed, through a scratch or abrasion of the skin.

Since the advent of Miss Jennie A. Crocker in Coast doggy affairs, the proprietor of Wonderland Kennels has become extremely popular with the Coast fancy. The young lady is recognized as a sterling sports-woman, an enthusiastic supporter of shows and a potent factor for the improvement of the Boston Terrier on the Coast. Wonderland Kennels' success has been merited and is backed by the endorsement of fanciers and breeders generally. Miss Crocker who is at present in England was presented at court in Buckingham Palace on the evening of May 15th by Mrs. Whitelaw Reid, wife of the American Ambassador. The affair was a most brilliant one, there was a large attendance, especially in the diplomatic circles, and unusual splendor was given the function through the presence of the Dewar of Nepal and a large Indian suite, whose robes were a perfect blaze of diamonds. Their majesties and the officials all wore Indian orders and decorations.

A lamprey eel was caught two weeks ago in the Feather river just below the bridge at Marysville. The fish was 22 inches in length and is, it is claimed, the first ever taken in the river.

HYDROPHOBIA SAID TO BE INCREASING.

A recent report by Dr. George H. Hart, to the U. S. Department of Agriculture, Bureau of Animal Industry, "Rabies and Its Increasing Prevalence," conveys a warning that rabies, or hydrophobia, is apparently on the increase in the United States, despite the efforts of scientific treatment and research for its eradication or cure.

While authenticated cases of rabies on the Pacific Slope have been comparatively rare, it can be safely assumed that such immunity may not always prevail in a hitherto almost uninfected zone—providing conditions favorable for the introduction to and spreading of the disease on the Coast may ensue.

Rabies has seriously attracted the attention of the authorities of several states within the past year or two, and, in one or two states, laws have been enacted that in the minds of fanciers seem to be exceedingly harsh. It is illegal, or was two years ago, to own Great Danes in Massachusetts, for instance, and muzzling edicts were as plentiful throughout the municipalities of many Eastern States as leaves in the fall. At present the Chicago Health Department is enforcing a muzzle law similar to that prevalent in Germany. Berlin and other large cities of Germany muzzled dogs for many years—there has not been a recorded case of rabies in Germany since 1889. In England a quarantine and muzzle law is in force.

During the last year there was over 100 deaths from hydrophobia in the United States. The Federal Bureau recommends muzzling as a preventative. In this respect the medical experts attack the assumption that it is necessarily cruel to muzzle a dog. Persons who object to the safety device on that ground are invited to the more important consideration of "the anxiety, mental terror, and suffering of several thousand human beings in our country and the actual death of one hundred to three hundred yearly—not to mention the suffering and death of countless dumb brutes."

Although rabies has probably existed in this section of the country (Washington, D. C.) for an indefinite period of time, the attention of the medical and veterinary professions was not called to it until 1892, when a resident of the District died of the disease and the diagnosis was confirmed by rabbit inoculations at the Bureau of Animal Industry. Following this case the Bureau, in conjunction with the local veterinarians, made a more careful examination of the dogs in the District, with the result that 11 cases were found during 1893. In 1895 a second human death occurred, and as a result of this the Pathological Division of the Bureau, in co-operation with the District health office, started a routine examination of all cases of suspected rabies in and about the District of Columbia. This work has been continued up to the present time, and the following number of cases have been diagnosed:

1895, 4 dogs, 2 foxes; 1896, 5 dogs; 1897, 2 dogs, 1 cow; 1898, 7 dogs; 1899, January to June, 4 cases. For the fiscal year ending June 30th: 1900, 45 dogs, 4 cows, 1 cat, 1 horse; 1901, 15 dogs, 1 cat; 1902, 19 dogs, 3 cows, 1 horse, 1 hog, 1 woman; 1903, 28 dogs, 5 cows, 3 wolves, 1 fox, 1 horse; 1904, 19 dogs, 2 cows, 1 hog; 1905, 20 dogs, 1 cow; 1906, 15 dogs, 1 cow; 1907, 25 dogs, 1 sheep, 1 cat.

For the six months ending December 31, 1907, 19 dogs, 1 cow, 4 dingoes.

For the calendar year ending December 31, 1907, 37 dogs, 1 cow, 4 dingoes, 1 sheep, 1 cat.

While some of the above recorded cases have been forwarded to this laboratory from far distant parts of the country, at least 75 per cent of them have been from Washington and its immediate vicinity.

The last human death from rabies in the District was that of a colored woman in 1902, a pathological report of which can be found in the Twentieth Annual Report of the Bureau of Animal Industry (1903). In 1906, of the 16 cases received only 6 came from within the District; and it was thought that the careful quarantining or destruction of all animals bitten by rabid dogs, which had been conducted by the health department, was proving efficient in checking the advance of the disease. However, from January 1st to December 31st, 1907, 44 positive cases have been examined in this laboratory. Of this number 33 were from the District or the immediately surrounding country. These 33 animals have, to our knowledge, bitten 16 persons, 46 dogs, 2 horses, and 2 cows. It therefore seems that the preventive measure at present being taken are entirely inadequate to cope with the disease, and its frequency during the last ten months has been alarming. The same condition of affairs unfortunately exists in many other cities of our country.

National Prevalence of the Disease.—From the foregoing facts it may well be inferred that rabies is one of the most important infectious diseases among domestic animals in the District. Since 1903 positive cases have also been forwarded to this laboratory for examination from Virginia, Maryland, Indian Territory, Indiana, North Carolina, South Carolina, West Virginia, Georgia, New Jersey, Maine, and Wisconsin.

In the State of Pennsylvania rabies has existed for years, and in 1905 Dr. C. J. Marshall reported in the "Proceedings of the American Veterinary Medical Association" that it was spreading more than in former years. In 1906 hardly a county was free from the disease, and, besides the cases in dogs, 47 cattle, 14 hogs, and 157 sheep died of the disease. An epidemic occurred in Chester County, Pa., in the past summer (1907) which necessitated the destruction of 154 dogs, 25 cows, and 10 horses.

During 1906 a severe outbreak occurred in Waterbury, Conn., 175 dogs being destroyed, and several persons bitten by rabid animals were obliged to take the Pasteur treatment. At Torrington, Conn., 7 dairy cows on one farm died of the disease. It also appeared in several other counties of the State.

In the autumn of 1905 and spring of 1906 a very severe outbreak of the disease occurred in Jacksonville, Fla., and was reported by Dr. J. G. Hill; 1,200 dogs were destroyed, and of 12 persons bitten by rabid animals 3 died of hydrophobia. The disease became so alarming that on August 1, 1906, a muzzling law was put into effect, which was very successful in stopping its ravages.

In Indiana Dr. J. H. Roberts reported that rabies was prevalent in the State and gave the State veterinarian more trouble than any other one infectious disease. The State secretaries of the American Veterinary Medical Association from Mississippi, New York, and New Jersey reported the existence of the disease in their respective States during 1906. The Chicago Pasteur Institute since its foundation in 1890 has applied the preventive treatment to persons bitten by rabid animals from nearly every State west of the Mississippi River.

In Norfolk, Va., the disease has prevailed extensively during the past five years and many human beings have been bitten, one large hound having severely bitten 9 persons before he was finally destroyed. In Charleston, W. Va., the disease is very common at present, one veterinarian writing to this laboratory that 12 cows and 40 dogs affected with the disease had recently come under his observation.

The State live stock sanitary board of Minnesota, at St. Paul, is now making routine examinations for rabies, and a considerable number of cases are being found.

It will thus be seen that rabies is all too prevalent throughout our country. It is constantly spreading and causing increased financial loss, human suffering, and death year by year. There is abundant evidence to warrant the statement that not a single State is free from the disease.

Importance of the Disease.—From an economic standpoint the losses from rabies are difficult to ascertain. While a great many cases have been included in the foregoing reports, it is well known that many isolated cases of the disease are never covered by health reports. The actual money loss, while considerable, is not nearly as great as that from many of the major infectious diseases of animals.

It is not from its financial side, however, that rabies deserves so much attention from sanitarians. There is no disease in the entire realm of medicine the suffering from which is any greater than from hydrophobia. The dread with which the people speak of the malady and the awful agony suffered by those who undergo the course of the disease render it of such importance that health authorities should use every means at their disposal to secure its eradication. The great anxiety occasioned yearly in several thousand persons who are bitten by rabid or supposedly rabid animals is intense. The cost of the Pasteur treatment is also to be considered and materially enhances the economic importance of the disease.

During the past year the 33 positive cases received in this one laboratory from the District of Columbia and vicinity were animals which had inflicted bites on 16 people, 46 dogs, 2 horses, and 2 cows. Eleven cases were also received from more distant parts of the country, and these animals bit 20 people, 1 horse, and many sheep. In connection with these cases, 36 people have, therefore, been subjected to the worry, anxiety, and actual danger resulting from the bite of a rabid animal, and have been required to take the Pasteur treatment. This does not include the financial loss connected with the necessary destruction of valuable dogs and other domestic animals which have been either infected or exposed to infection. Other laboratories in various parts of the country could probably show equally if not more impressive statistics in regard to the importance which rabies is assuming at the present time.

Popular Fallacies Concerning the Disease.—In the category of infectious diseases rabies stands at the head of those about which the ideas of the general public are most at variance with the actual facts. It is commonly believed that a person bitten by a dog in perfect health is liable to become affected with hydrophobia should the dog develop rabies at any subsequent period, however long afterwards. Consequently believers in this theory are particularly anxious to have the dog killed at once before he has had an opportunity to go mad. Nothing could be more fallacious and at variance with our knowledge of all infectious diseases, and the killing of the dog should always be discouraged.

Until recently it was considered that the dog's saliva became virulent only three days before the appearance of symptoms of rabies. According to some recent experiments by Nicolas it has been found that the saliva may become virulent six or even eight days before the symptoms develop. Therefore in case the animal remains healthy for ten days after it has bitten the person or animal, no danger need be apprehended from that bite even though the dog develop rabies within the next few weeks.

Madstone.—The curative value of the madstone is still devoutly believed in by a great many people in certain sections of the country. Within the last few years a madstone was forwarded to the Department, the owner stating that it had prevented several cases of rabies and he was anxious for it to be tried by the

Bureau. Some of these madstones, properly called hair balls, are obtained from the stomachs of various wild and domestic animals. They are in some cases composed of matted hair which the animal has licked from its body and swallowed; but in the majority of cases they consist of masses of vegetable fiber, such as the awns of clover and beards of grain, which have gradually collected over a considerable period of time and are formed into a spherical shape by the contraction of the gastric walls. Gallstones, intestinal calculi, and in fact any porous stones may be used as madstones.

After a person has been bitten the madstone is applied to the wound, and it is believed that the longer it adheres the more sure it is of preventing the disease. Whether it will stick or not depends entirely on the amount of hemorrhage or discharge from the wound. Where this is profuse the blood infiltrates the meshes of the madstone, soon coagulates or dries, and tends to hold it in place, and it adheres for a considerable time under such circumstances. In these cases the virus is supposed to be removed and the treatment is heralded a success. On the other hand, where the wound is small and the discharge slight there is nothing to hold the stone in place and it immediately falls off. Certain of these madstones have been held in families for three or four generations and are guarded as carefully as any heirloom. Cases have been known where people have made long journeys and paid large sums of money to have a madstone applied. Its specific value against rabies is no greater than that of a piece of blotting paper applied in the same manner. The application of madstones gives the unenlightened public a false sense of security, and their use should be discouraged by all possible means.

Rabid Dogs and Water.—It is commonly believed that mad dogs will not go near water, and in case such an animal is seen to ford a creek or lake it is taken as proof that he did not have rabies. This fear of water is a symptom usually marked in human cases, but is never present in the dog at any stage of the disease. Animals in the early stages when running about the country will cross bodies of water without the slightest fear. Even after the throat becomes completely paralyzed the animal will often constantly attempt to drink water from a pail or bucket if placed within its reach, but, owing to the paralysis of the throat muscles, swallowing is impossible.

Dog Days.—The idea is prevalent with many people that dogs are particularly liable to go mad during the so-called "dog days," which extend from the first of July to the middle of August. These days are called "dog days" because they cover the period of time when the dog star Sirius is above the horizon with the sun; they have no connection with the dog. On account of the clemency of the weather dogs probably travel about during this season more than in winter, and hence are slightly more liable to infection. Statistics, however, as well as our own experience about this section of the country, show that the disease is present throughout the year, and seasons have very little if any influence.

Color of the Animal's Mouth.—It frequently occurs after a person is bitten by a dog that some friend will immediately look into the mouth of the animal. In case the mucous membrane is black, he will at once conclude that the bite is dangerous, even though the dog appears perfectly normal; but, if the mouth happens to be red, he thinks there is no danger from the bite. This is entirely erroneous. The black color is due to a normal deposit of pigment in the mucous membrane of the mouth. It is present in a certain percentage of all dogs and has no connection with rabies. In this paragraph the writer is not referring to the so-called "black tongue" of dogs in the South, which is the vernacular name for dumb rabies, resulting from the swollen, darkened appearance of the tongue following its extrusion from paralysis of the lower jaw. This will be referred to in the section on symptoms.

Lyssophobia.—Many educated men, including some physicians, claim that all cases of hydrophobia in the human family are the result of wrought-up nervous excitement due to fear on the part of the patient. While at times these symptoms, termed lyssophobia, do occur in neurotic individuals who have been bitten by healthy dogs, they are always hysterical in nature, cause no organic lesions, and universally terminate in recovery. Thus lyssophobia is entirely distinct from the real disease, which is universally fatal to the human being.

Spontaneous Rabies.—In many instances the origin of an outbreak is difficult to trace. This has given rise to the opinion that the disease may appear in the dog spontaneously, that is an intrinsic part of his being which may crop out at any time under various extraneous conditions. This is as impossible as it would be for typhoid fever, tuberculosis, or any other infectious disease to develop spontaneously. Rabies is an infectious disease and can be produced only by inoculation with the specific virus which causes it. This specific virus is present in the saliva of animals affected with the disease and is transmitted to other animals and persons by the saliva on the teeth of such animals.

(To be Concluded).

Mrs. D. Easedale of Vallejo, recently sold Silkwood Maud (Silkwood Chader Wild—Silkwood Peggy) to a Boston fancier. Maud won first puppies at the Frisco show.

INFLUENCE OF REMOTE ANCESTORS.

We have a fashion of reckoning the force of ancestral blood pretty much as we would calculate percentages in a chemical or other mixture. We are given to figuring percentages. The horse which strains to George Wilkes once has such or such a percentage of that blood, according as that sire shows in the pedigree as a near or remote ancestor. If a horse goes to that source twice or three times through different lines his percentage of such blood is figured accordingly; and so with all other horses. We are given to fixing the amount of good or poor ancestral blood in our horses by the scientific method of arithmetic.

Having determined the percentage of good ancestral blood we have in our horse, we are likely to hold that our horse has in him the desirable ancestral qualities to square with the ancestral blood we determined he had, by the infallible rules of arithmetic.

By this rule we profess, on the one hand, to preserve good ancestral qualities and breed out those that are undesirable. We go as little as possible to the undesirable blood and double up the blood of the ancestor of quality.

It is well for the breeder to understand he can not determine how much of the quality of a particular ancestor he has in his horse by the law of percentages. Qualities, good and bad, do not come down the line of descent in that way. The laws and the operations of heredity make it possible for a horse with one-sixteenth of the blood of some particular ancestor to have more of that ancestor's qualities than a horse with one-eighth or one-quarter of that blood. And that horse will hand down those ancestral qualities with a greater certainty than some other horse with more of this ancestral blood, as shown by the rule of percentages. And, in fact, a horse with a very small percentage of the blood of a particular ancestor, may have the qualities of that ancestor so well fixed that he will be more prepotent in those qualities than the ancestor from which he inherited them ever was.

Take, for example, the single character of color. The gray horse which goes back in an unbroken color line through a half dozen generations of gray sires, will be more prepotent in that single quality of color than a bay horse of similar blood, which goes to the gray ancestral source twice, through a line of bay horses, or horses of mixed color. His prepotency, in respect to the ancestral character, would not thus be measurable by the amount of ancestral blood figured in the double as against the single cross. The question of which horse had the most of this ancestral character would be determined by the fact through which line of descent this character was handed down with the greatest force. Coming down through a continuous single line of gray horses, the character would be stronger than it would be in a double line of the same blood without the character. In one case the peculiarity would amount to a good deal of a fixture, while the other it might be well high, or completely, bred out.

To the single ancestral character of color we may add disposition. The two might travel along together down the single line of descent and both be lost in the double line of descent. Other characters peculiar to the remote ancestor might be added to those of color and disposition, and these might be fixed more firmly through a single line of descent than through a double line. The quantity of blood, as determined by a measure of the pedigree, does not fix the quantity of ancestral peculiarity.

As a general rule, it may be said that we are likely to reach and preserve the peculiarities of a particular ancestor by resorting to the double or triple cross. In doing this we are not working on a plan of mathematical certainty. We are simply increasing the chances by going often to the fountain head.

What is of importance in this connection to the breeder who would retain and perpetuate the character of an ancestor is to know how it may best be done. To know that when he returns, by means of a cross to the particular ancestral blood, that he go through those of his descendants which have inherited in a greater or less degree some of the ancestral virtues he desires to fix in his strain. When the horse inherits ancestral quality through horses which have that quality themselves he may be certain that his horse stands a good chance of being able to hand down to a future generation these same qualities. On the other hand, where there is an absence of one or more ancestral faults in the descendants used, those faults will be less likely to crop out. It is not the strength of ancestral blood that we must look for, but a strength of ancestral quality and an absence of ancestral faults in the blood used.

A good example of ancestral virtues asserting themselves in a horse group, in spite of outcrossing to opposing qualities, is found in that class of horses we have come to know as the Morgan type, descended from old Justin Morgan, that died about a hundred years ago. It is not that these horses have a preponderance of Justin Morgan blood but, rather, that in all these years the desirable qualities of the ancestor of many years ago have been perpetuated. The Morgans are not a breed by any rule. They are scarcely capable of classification as a strain of light harness horses. Yet there is a group of horses, descended from the best descendants of old Justin Morgan, which have a great many peculiarities in common not possessed by any other group of horses. They are a type of horse which transmits with

some degree of certainty their peculiarities when bred within the group. It may be said of this group that it is going through a formation process which will ultimately make the group capable of breed classification. Should the descendants of this group reach a breed dignity, there will always be plenty of breeders who will attempt to measure the quality of their horses by the percentage of Justin Morgan blood they may have in their veins, as shown by the rule of percentage. And yet the horses with the most Justin Morgan blood may be less typical than horses with a smaller percentage of that old blood.

This Morgan type of horse may be said to have gotten, in a great measure, many of its peculiarities from Justin Morgan, but the presence of the type is due to the persistent breeding to the typical horses from Justin Morgan, rather than from mere Justin Morgan blood. The type, in so far as it exists, has been created and has been helped by breeding to horses of similar type which did not trace to Justin Morgan. The group therefrom may be said to owe just as much to the force of selection as it does to Justin Morgan blood. It is immaterial, so far as the matter under consideration is concerned, whether the Morgan type is desirable or not. It is merely used by way of illustration. What is true of the parts that contribute to the Morgan type is equally true of speed harness horse parts. They come by persistent and wise selection from desirable blood and not alone through mere blood lines.

We may take a pair of trotting horses, well bred and of great individual excellence, and in a comparatively few generations create from the same blood two distinct groups, each of which will be readily recognized. The blood of each group would be the same, but the type and performance might differ materially.

We have in the trotting horse group fast horses which weigh upwards of 1,200 pounds. Many of these horses are docile and of good conformation. Then we have other fast horses which weigh less than 1,000 pounds, many of which are of a highly sensitive nature. They may be equal in speed and the speed inheritance. Yet if they were separated and bred, each within its own group, for a number of years, we would soon produce horses of a difference in type that would be marked and the peculiarities of each would be handed down by heredity. If we continued to race the smaller group, the type of these horses would become more fixed and tend in a certain direction. They might become smaller and more nervous.

On the other hand, should the larger horses be bred to slower work they would become more docile and take on substance. In the course of a very few years by such breeding we would have two distinct groups of horses from identically the same blood, and to attempt to measure the ancestral virtues or faults in each would be the height of breeding folly.

So far as the near ancestry is concerned, we should be more concerned with blood lines. It is better to lead through good horses to a near ancestor than it is to go back through horses known to be mediocre. Still, the influence of a grandsire is always to be reckoned with seriously, whereas one more remote may be said to exercise little or no influence for the good unless he is reached through good horses. When we have a good remote ancestor in the pedigree, the longer the good line he hands down the better. But, as before stated, the mere tracing to a good horse several times in the pedigree is not of itself of much consequence. Not so much as it is generally held to be.

This must not be taken to mean that continuous lines of high-class performers can be maintained. The individuals may be good by nature, but not highly developed performers. These usually show their worth by making themselves known as producers of ancestral virtues. They hand their own quality down, which quality they inherited.

It takes some knowledge of general and special breeding laws to know when there is quality in the line, and then it requires skill to know how best to make use of such knowledge.

It is a pretty safe rule, however, to pay less attention to the quality of the remote ancestry as a mere matter of blood and look more closely to the quality of the near ancestry.—C. B. Whitford, in Chicago Horseman.

TROTTERS ABROAD.

One important matter in connection with the breeding of fast horses and the harness turf in general, which has not been observed much, was the unusually large number of highly bred stallions and mares, the majority with fast records, that were exported to foreign countries during the year of 1907 and the first month of the new year.

The first export certificate was issued by the secretary of the National Trotting Association in 1891, when the black gelding Frank T. 2:23½ was shipped to France. Only three other trotters were sent abroad that year, which was practically the beginning of our foreign trade in trotting bred horses.

In 1892 twenty-one horses were exported, or a total of twenty-five within the two years. The following year the number increased to ninety, and reached the high water mark in 1898 when a total of 617 certificates were issued for trotting bred horses. The number gradually decreased, and in 1903 only seventy-nine horses were exported and in 1906 the total was seventy-three.

The following table shows the number of horses,

all trotting bred, which were sent abroad and for which official certificates of breeding were issued by the National Trotting Association. It shows where the beginning was and how it ended at the close of 1907, in which year are included the few sent during the last month, namely, Codero, Lottita and Icon.

Year.	No.	Year.	No.
1891	4	1901	124
1892	21	1902	113
1893	90	1903	79
1894	216	1904	106
1895	268	1905	97
1896	410	1906	73
1897	500	1907	132
1898	617		
1899	439	Total	3,506
1900	217		

During the seven years, or from 1894 up to and including 1900, most of the trotting horses taken up by foreigners were for breeding purposes, and while from that date down there was a sudden falling off in the foreign trade, yet the quality of the horses purchased was far superior to those on previous exportations. It might be said that the real period of sending horses with fast records abroad began in 1900.

To show how foreign buyers based all their purchases exclusively on their records and speed merits it will be sufficient to state that of the 124 horses exported in 1900 more than half had a standard record, and of these only two trotters had marks of 2:30, all the rest had shown speed better than 2:23½. Among that year's exports were Merry Chimes 2:08½, Gayton 2:08½, Neeretta 2:09½, Contralto 2:10, Greenbrino 2:10½ and the pacer Passing Belle 2:08¾.

A majority of the 113 horses exported in 1902 also had standard marks, among the number being twenty-one with records of 2:15½ or better, including Poindexter 2:09 and B. B. P. 2:09¾.

Of the seventy-nine horses exported in 1903 only eight had records slower than 2:22½, among the fastest ones being Dulce Cor 2:08½, Aggie Medium 2:10½, Lady Constanina, Prosperity Bill, Neighbor Girl and Hamward, all with a mark of 2:12½.

In 1904 foreigners played havoc with our fast record horses by taking 106, of which fifty-two had marks better than 2:15, among them such great horses as Onward Silver 2:05½, Tommy Britton 2:06½, Dolly Dillon 2:06½, Fanny Dillard 2:03¾, pacing, Belle Kuser 2:08, Lamp Girl 2:09, Idolita 2:09¾, Dillon Boy 2:09¾, Wainscott 2:10½, and the two great youngsters Alta Axworthy 2:10½ and Katherine A. 2:11½.

The year 1905 was notable by the fact that we got rid of two noted hopped pacers by sending to England Prince Alert 1:59½ and Gallagher 2:03½. The average record of the ninety-seven horses exported that year was the fastest of any previous year, however, in the list being Jupe 2:07½, Belle Starr 2:07½ and such noted race horses as Alice Barnes 2:10½, Hamilton 2:10½, Reelected 2:11½ and Iva Dee 2:12½.

Although the smallest number of horses were exported in 1906 than in any year since 1893, yet the exportations included a most select list of horses. It showed plainly that the foreign buyers had plenty of breeding stock, and what they wanted was the faster class.

The export trade of last season also was a sure indication of this sentiment, and from now on we may expect foreign trade in extremely fast trotters only.

Of the forty-two record horses we sent abroad in 1906 were the two pacing geldings Don Carr 2:06 and Robert Lee 2:06½; also A. Penn 2:08¾, General Forest 2:08, Alton 2:09½, Susie N. 2:09¾, Emma Brook 2:09¾ and a large number of highly bred colts and stallions, which proved good racing material on the Continental turf.

All records for the export in fast trotters were lowered last year when our foreign customers took away some of the most noted trotters from the American harness turf. The demand for fast record horses started early in the year and kept up to the close and, in fact, up to last month, when Codero and Lotta were shipped by John Splan.

Among the earlier exportations of last year were Glenwood M. 2:07¾, Susie J. 2:06½, Brilliant Girl 2:08¾, Totara 2:09¾, Prince Selma 2:10½ and Grat-tan Bells 2:10½, the last named proving one of the most consistent winners sent from this country and raced abroad.

These were followed late in the fall and winter with a list of fast horses which are of too recent dates to mention, yet the choicest ever taken away, and all high-class speed horses, with fashionable pedigrees and all indications of proving great winners on the harness turf abroad.

In the future we will sell well bred horses to foreigners for breeding purposes, yet it might reasonably be said that our future trade in trotting horses must be confined to those which have shown great speed and ability and can be raced with profit abroad.

There are persistent rumors that the American and National Trotting Associations are to be amalgamated. The rumors are brought about no doubt, by reason of the fact that a committee from each association met in New York a few days ago to consider plans to bring about a closer association in the matter of rule drawing for the two associations.

Drink Jackson's Napa Soda.

PALO ALTO 2:08¾, STAMBOUL 2:07½ AND NELSON 2:09 AS SIRE.

It is an old story that no one is ever so zealous in a cause as a convert previously prominent in the opposing ranks. It is the renegade who can always be trusted to out-Herod Herod. This seems to be true in all spheres where creed, tenet or doctrine obtains—and just now we are having an unique exemplification of it in the trotting world. For nearly forty years past Mr. Hamilton Busbey has been in the forefront of the believers in close crosses of thoroughbred blood in trotting pedigrees, and the amount of literary effort that he has put forth to inculcate that belief would, if printed in book form, make several volumes as big as Webster's Unabridged. Now, in the evening of his life and labors, he has recanted and gone over to the opposition—the party believing in trotting-bred trotters and in no other kind. His reasons for doing so seem excellent and deserving of applause, but with this he is not content and now we are being treated to the strange and surprising spectacle of his belittling of horses which, in the past, he has extravagantly praised; this belittlement being due to the same cause which formerly caused the praise. In his original laudations fact seldom hampered him and no more does it in his present disparagement, as a sample case will show.

It is scarce necessary to state that of all trotters with a close thoroughbred cross, Palo Alto 2:08¾ is the one blazing "beacon light of history." From a purely running-bred dam, he was one of the world's greatest trotters, a wonderful race horse, winner of the stallion championship and a marvel of speed, gameness and endurance. As a text for the preaching of thoroughbred potency in trotting pedigrees he was monumental, and of all the inspired utterances which his performances evoked, none equaled in either extent or fervor, those of Mr. Busbey—as anyone who cares to turn to the files of the "Turf, Field and Farm" may ascertain. Now, in the true spirit of the apostate, when he seeks for an image to deface, it is to that of the son of Dame Winnie that he turns. His latest utterance concerning him reads as follows:

Palo Alto was not potent in the transmission of speed, but his early death had something to do with his failure as a sire. Nelson, Stamboul and Axtell completely overshadow him as sires of trotters.

As above-said, facts never hampered Mr. Busbey in his arguments for "hot blood close up," nor do they now in his arguments against it. His statements above quoted are thoroughgoing examples of the spontaneous facility with which he can and always could, pervert them. It is almost seventeen years since Palo Alto won the stallion championship, and sixteen since his death, which followed hard upon it and present-day horsemen are not, as a rule, familiar with the incidents of his career. We will therefore state that his death, which occurred at the age of ten years, cut him off before he had made even one full season in the stud, as he had been almost continuously in training from his two-year-old form in which he trotted a trial in 2:23. He was never stood for public mares, and the entire number of foals got by him was only forty-four. Of these fifteen made standard trotting records, and eleven have sired or produced makers of such records. The only way in which to compare him with Stamboul, Nelson or Axtell as a sire is to consider how they would now stand in the "Great Table" had they been cut off with but their first 44 foals to represent them on the turf and at the stud. No other basis is at all reasonable and its consideration reveals the speciousness of the Busbey dictum completely.

Axtell, we may grant, was a greater sire than Palo Alto. In his third year he got that grand mare Elmoree 2:08¾ and those remarkable producers Enola D. (dam of Chase 2:07¾) and Etholen (dam of George Muscovite 2:08¾); in his fourth year he got that fine sire Axtell 2:18¾; and in his fifth Praytell 2:09¾, the wonderful sire Axworthy, 3, 2:15¾, Pixtell (dam of Mainsheet 2:05) and Euxine (dam of Euxetine 2:11¾ and 4 others). Still it remains to be said that it is probable that in his fourth year alone Axtell got as many foals as did Palo Alto in his entire life; and only reference to his original stud books would show just what percentage of his first 44 foals ever became known to fame. But when we come to a consideration of Stamboul and Nelson, in comparison with Palo Alto, as sires, the records show that, if the latter was as Mr. Busbey says, a failure, they have been gigantic ones. Nelson is still living, at the age of 26. He is a horse that has been largely patronized in the stud and has sired, without question, hundreds of foals. Yet his entire list of standard trotters number but 33, his sons to date have sired but 11 and his daughters produced but 5. He has sired no trotter with a record faster than 2:14¾, while Palo Alto has to his credit Iran Alto 2:12¾ and Pasonte, 4, 2:13. In the way of early speed Nelson can show nothing better than Conquest Star 2:23 at two years, while Palo Alto can show Palita 2:16 and Avena 2:19¾, both two-year-olds. No son of Nelson has ever sired a 2:15 trotter, while Palo Alto has three that have done so—Iran Alto, sire of Dr. Frasse 2:11¾ and Thomas R., 4, 2:15; Day Bell, sire of Graydon 2:11¾; and Fillmore, sire of Ora Jansen 2:12¾. Stamboul lived to the age of nineteen—nine years longer than Palo Alto. His breeder and first owner, the late L. J. Rose, gave him good stud opportunities early in life; he then passed to the late W. S. Hobart, who had collected one of the finest and most expensive collections of brood-mares in existence; and then to Mr. E. H. Harriman, where he was

again surrounded by a "gilt-edged" harem. His total number of standard trotters is 49 and among them are six with records from 2:10¾ to 2:15. This is apparently, an excellent showing—but Stamboul's remarkable opportunities, the excellent advantages given his numerous get, and the fact that none of them ever touched the 2:10 limit, had caused him to be a sire shunned by breeders at the time of his death. None of his get were as successful as colt trotters as were the get of Palo Alto. Of his sons, three have sired 2:15 trotters, but none has to his credit one with a record better than 2:12¾, while, as above seen, two sons of Palo Alto have sired better-than-2:12 trotters. It is as a sire of broodmares that Stamboul's blood is breeding on best, his daughters having produced five 2:15 trotters, but none with a record below 2:11¾. It is also valued for the fine conformation which it imparts. Stamboul was one of the handsomest stallions of his day and he transmitted good looks to his get.

When the "cold facts" are considered, it is apparent that Palo Alto was, as a sire, the superior of either Nelson or Stamboul. Considering his early death—which Mr. Busbey is forced to admit—his speed list is a remarkable one; and, had he lived, there is every reason to believe that he would to-day rank very high as a progenitor. But bad luck, to an uncanny extent, prevailed in his family and seems to have pursued it almost unrelentingly. At least two of his get were better-than-2:10 trotters and a number of them possessed wonderful early speed which the records will never show.

Palo Alto was not bred in the lines favored by the Review; he was, in a sense, a *lusus naturae*—the one fruitful oasis in a desert of sterilities. But that does not blind us to his greatness. Under happier auspices he might, with little doubt, have left as deep a mark on breeding history as he did upon turf annals. His entire career was a struggle against adversities which culminated in an early death. Nothing only honor attaches to his name and fame; and only an apostate would think of defaming him. He was a phenomenon produced by illogical methods. Mr. Busbey's former efforts to popularize those methods failed, but, having recanted, it will not increase that gentleman's reputation to discredit the one supremely great "half-bred" horse—the shining exception that has everlastingly proved the rule.—Chicago Horse Review.

AMERICAN COACH HORSES.

Those of us who are interested in the American trotting horse in a broad way, says The Horseman, should cast our eyes abroad occasionally to note what success befalls Alfred G. Vanderbilt in his English coaching venture with American horses. Be it remembered that he is coaching with all the pomp and ceremony a man of his means may, and while this of itself is of little more than passing interest to most of us, it all serves to direct the attention of the world more sharply to the all-important fact that American-bred trotting horses are pulling his coaches.

Mr. Vanderbilt is a man whose fondness for horses is notorious. He purposes spending something like \$100,000 in his present coaching venture, and if he succeeds, as we believe he will in making the world know more of the worth of our national horse, he will have accomplished much more for his native land than many another rich man who has tried. Mr. Vanderbilt during the coaching season will no doubt impress the fact on the English people and others that our large, well-bred trotting horse falls almost naturally into a coach horse class.

We particularly desire to call attention to the fact that the doings of Mr. Vanderbilt's horses, coaching on an English highway, will be a most important and inexpensive object lesson to our government breeders. Here is an American of large means spending a great sum of money to prove the worth of our well-bred trotting horse, while our government breeders are groping about in the dark trying to find combinations of blood that will produce the very thing which Mr. Vanderbilt believes at least he has found ready made.

One of the important things which Mr. Vanderbilt will be likely to demonstrate with his American-bred trotting horses will be the question of their usefulness for the work to which they are being put. They may be somewhat wanting in the arbitrary coach horse style, as fixed by show men, but we venture the prediction that they will go the route and do their work with greater ease than any other kind of horses which have pulled coaches over the same road. At all events as breeders we should be interested in watching the work of these horses.

Perhaps Mr. Vanderbilt may not be fully alive to the importance of the work he has undertaken as a pastime. Perhaps he is far-seeing enough to realize the advantage his undertaking will be to American breeders. In any event he will earn the good will of Americans if he is successful.

The Copenhagen, Denmark, trotting races opened April 26th with stormy weather. They however, started their horses over there, rain or shine. The colt Dreamer Boy that was sold last October as a three-year-old, to accompany his sire Dreamer (3) 2:14¾ to Denmark, won his race of 2,400 metres that day.

Twenty-three head of broncho ponies sold for \$5,000 at New York recently. They were partly broken as polo ponies. The highest price paid for any one was \$500.

THE SHAPE OF HORSES' FEET.

A level surface is not the only aim a farrier has to keep in mind; it may be produced with such exactness that a level shoe rests on it perfectly, and yet the hoof may be altogether out of proportion. Both sides of the hoof must be left at the same height, and if the sides of a foot when it comes to a farrier be of unequal height, it is evident that one side must be reduced more than the other to obtain a proper form. Again, it is clear that if the foot be level on both sides, a man may rasp away more horn from one part than another, and so cause a disproportion. Carelessness in the use of the rasp frequently leads to unevenness of the bearing surface.

From the position in which a foot is held on or between the knees of a farrier, some portions of the hoof are more easily reached with the rasp than others. The left foot suffers by over reduction of the outside and inside toe, the right foot at the inside heel and outside toe. A left-handed man is liable to injure the feet in just the opposite positions. It is equally possible to over-lower both heels or only the toe. Even when the surface is quite even from heel to toe on both sides of the hoof, the foot may remain disproportionate. The heels may be left too high, or the toe too long, and the proper adjustment of these two extremities of a hoof is the most difficult and more frequently neglected part of the preparation of a foot. The great cause of difficulty is the fact that horses' feet are not of definite form, and that much harm may be done by attempting to carve a foot to some ideal standard.

Some feet have naturally high heels, which can only be reduced to a shapely pattern by weakening their structure. Some feet have naturally low heels, and some have long toes, which must not be interfered with. As a rule, when the overgrown wall is reduced to the level of the sole, very little more horn need be removed. The effects of lowering the heels are to lengthen the bearing surface backwards, and to increase the slope of the wall in front.

Too much horn at the heels tends to straighten the foot and lift the frog from contact with the ground. It is always desirable that the frog should touch the ground; but when it is wasted no attempt to let it down by over-lowering the heels should be made. When a hoof is excessively sloped in front, and the toe long, it would be injurious to shorten the toe by rasping the under surface of the foot. Such a hoof is properly treated by directly shortening the toe with a rasp applied to its border.

When a hoof presents broken horn on the lower border of the wall it is necessary not to allow a shoe to rest on it. Broken horn cannot support weight, and when it yields may cause injury to the sensitive parts and always causes shoes to become loose. Broken horn should be removed, unless it can be left in a position offering no bearing to the shoe. When a foot is insufficiently covered with horn, either as the result of excessive wear from work without shoes, or as the effect of previous removal by a farrier, great care is necessary to produce the best bearing surface. As a rule, the quarters of a foot are most broken, and the heels may be trusted to take most bearing.

Given briefly, the rules for preparing a foot for shoes are as follows: With a rasp form a level bearing surface for the shoe from heel to toe; keep both sides of the hoof the same height; see that the length of the toe and the height of the heels are proportionate; let the frog and bars alone; remove from the sole only such portions as are loose or may receive undue pressure from a level shoe; finally run the rasp lightly round the circumference of the hoof, so that no sharp edge be left, which is useless to support weight and might be broken.—From "The Horse, Its Treatment in Health and Disease," by Professor Wortley Axe, M. R. C. V. S.

TROTTERS INCREASING IN POPULARITY.

Away back in 1895 there was the same talk of harness racing being injured and ruined by anti-betting laws, that we hear to-day, yet during the thirteen years that have elapsed since then the trotter has experienced most unusual prosperity, and has grown in favor with all classes of people, says the American Sportsman. The reformers in 1895 claimed that racing was a bad thing and injurious to public morals, and that unless pool-selling was forever stopped great evils would befall us. Yet the sport has prospered and grown until to-day in every state it is supported and patronized by the very best class of citizens, and there are more people engaged in the business of breeding and racing trotters than ever before. It has been claimed that there are not so many large farms devoted to breeding the trotting horse as there was ten or fifteen years ago, and this may be true, but it is doubtful, as there are great numbers of big farms in almost every state, but there are more people breeding trotting horses than ever before. That this is a fact is shown by the entry lists of the big futurities, which recently closed. Two of them had entries from almost 2,000 breeders, and few of these 2,000 nominators entered more than from one to five mares, and this shows that the breeding industry is being carried on largely by individual breeders. A casual glance over these lists of entries shows that these men are from all walks of life, and from all parts of the country, and they are breeding trotters not particularly for gain, but because they love the trotter, and like to see him race.

THE FARM

Two hundred wool growers of Utah and Western Wyoming, representing an ownership of over 2,000,000 sheep, held an enthusiastic meeting last week. The meeting was called by the Utah Wool Growers' Association, and every sheep interest in the State was represented. The purpose of the meeting was to decide on the plans to be followed whereby the wool growers could secure the best market for their wool. A resolution introduced by George Austin of Salt Lake, that no wool grower of Utah shall consign wool to commission brokers in the East, but that the wool grown in the State shall be either sold here or stored to await a better market, was unanimously adopted. Similar resolutions have been passed by the Wool Growers' Association of Idaho and Wyoming. The need for such action was felt by the wool growers because of the fact that the sheepmen of the West believe they have been defrauded by the commission men of the East, who have stored the wool for the growers and sold it at any time they saw fit, which has a tendency to create a lower market than would have been the case if the wool were kept in the West until the demand forced the market upward. It was suggested that the country and district wool growers' associations form communities and appoint committees of members to handle their wool and to sell it at a time when the price was the best.—Denver Farm and Home.

THE SAN DIEGO DRIVING AND MATINEE CLUB

Will hold a meeting on the
Coronado Track, July 4, 1908

and offer the following purses:
2:16 Class, Pacing • \$600
2:12 Class, Trotting • \$600

Entries to close June 5, 1908.

Entrance 5 per cent and 5 per cent additional from winners. Races under National rules.
Address,
GEO. M. TODD, Secretary,
Keating Block, San Diego, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:03 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

POSITION WANTED.

Do you want a real good trainer of colts and aged horses, that has had some remarkable success as such, and not afraid to work, and thoroughly knows his business, how to conduct a breeding farm from A to Z, or take charge of a boarding stable? If you do, communicate with me. Best of references. Address **TRAINER,** care "Breeder and Sportsman."

Oakland's Banner Meeting

Emeryville Track, August 10 to 15.

Entries Close Tuesday, June 9th.

The Alameda County Fair Association announce the following classified events to close on Tuesday, June 9.

Trotting, 2:09 Class, Purse \$1050
Trotting, 2:11 Class, Purse 900
Trotting, 2:30 Class, Purse 750
Trotting, 2-Year-Olds, Purse 600
Pacing, 2:05 Class, Purse 1050
Pacing, 2:10 Class, Purse 750

CONDITIONS:

Entries close on Tuesday, June 9th.
Five per cent entrance, with the usual five per cent from money winners.
Three heats, every heat a race, except two-year-old trot, which is two heats, every heat a race.
Money division: Fifty, twenty-five, fifteen and ten per cent.
Nominators have the right to enter two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 1 o'clock the day before the first day of the meeting at which the race is to take place.

MEMBER NATIONAL TROTTING ASSOCIATION.

For entry blanks and other information address the manager.

BEN BENJAMIN,

In care of Breeder and Sportsman

366 Pacific Bldg., San Francisco

Watch for announcement of the Golden Gate Futurities! Most liberal conditions ever offered breeders of the Pacific Coast.

PACIFIC BREEDERS PACING HANDICAP

to be paced at the regular annual race meeting in August, 1908, at the
Pacific Coast Trotting Horse Breeders Association

Stakes \$1500 Guaranteed

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse to be handicapped slower than up to a mile in 2:15.

Entries close Monday, June 15, 1908.

More than one horse from the same stable may start.
RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168½ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classified for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Conditions as to payments will be announced next week.

E. P. HEALD,

President.

F. W. KELLEY, Secretary,

P. O. Box 447, San Francisco

Ellis' Improved
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,631.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

THE GREAT ANIMAL TONIC
The Kind That Dan Patch Has Eaten Every Day since 1902 and during this time Dan has broken the world's record 12 times and Annihilated The Entire World with his wonderful condition, endurance and speed. Try It For Your Horses. Up to the close of 1907 Dan Patch has paced 10 miles averaging 1:56 2-5 and 20 miles averaging 1:57 2-5 and 31 miles averaging 1:59 1-10 and 62 miles averaging 1:59 6-10. These miles were paced over all kinds of tracks and in all kinds of weather. Dan is faster than ever. Look Out For A Mile in 1:54 during 1908. The combined records of all pacers and trotters that have ever lived do not equal Dan's record. International Stock Food tones up the system, purifies the blood, greatly aids digestion and assimilation and causes animals to obtain more nutrition from all grain eaten. It tones up and permanently strengthens the entire system, keeps stock healthy and saves grain by aiding digestion. It gives more "nerve force," which insures more speed for horses. It Will Make Your Horse Two To Five Seconds Faster. We guarantee \$50.000 Dealers to Refund Purchasers' Money if it Ever Fails. NAME THIS PAPER and we will ALSO MAIL YOU FREE A Large Colored Lithograph showing Farm, Stable and Fine Pictures of the Four Stallions named above. These Beautiful Pictures are made from life. YOU WILL BE PLEASED WITH BOTH PICTURES.

M. W. Savage, sole owner of "International Stock Food," and also of "International Stock Food Farm," positively Guarantees that His World Famous Champion Stallions, Dan Patch 1:55, Crescent 2:07 1/4, Directum 2:05 1/4 and Arion 2:07 1/4, and his brood mares and colts eat it every day. You are specially invited to visit this Great Harness Horse Breeding Farm ten miles from Minneapolis, and see the practical results of the every day use of the greatest purely vegetable animal tonic ever used on a farm. It is constantly used and strongly endorsed by over Two Millions of the most up-to-date Stockmen and Horse Breeders of the world.

Dana Patch 2:05 1/4, the Gamest and Fastest green Pacer racing in 1907, has eaten International Stock Food every day for over two years. This remarkable pacer was sired by Dan Patch 1:55, has paced in 2:03 1/4 and promises to be the Next Two Minute Pacer. Dan Patch 1:55, the champion pacer and Fastest Harness Horse the world has ever seen is proving to be a Wonderful Sire of uniform speed. Watch his list as proof that he is one of the Greatest Sires in all horse history. If you raise a Dana Patch colt you have an Absolutely Sure Winner. Dana Patch just sold for \$10,000.00. From a Good Mare you may raise a Dana Patch colt that will bring you from \$10,000.00 to \$50,000.00.

THE DRAFT HORSE.

The Forehead.—This should be wide and neatly made. It is not desired that the skin and bone be thick or heavy here, as it is not necessary and only takes of room that might better be given to brain and muscle. There should be enough muscling present to function well locally (it might be added that the muscle here shows the amount that may be expected elsewhere in the body). Many writers and breeders claim that a large brain accompanies a large forehead. In many cases this is true, but not always, for an unusual thickness of skin, bone or muscle may materially diminish the brain cavity. Nor does a large brain necessarily indicate intelligence. As a rule, however, our best behaved horses possess a good frontal development.

The Ears.—The length of the ear should be proportional to the length of the head. Small ears make the head look small and the eye more expressive. A refined ear, covered with thin skin, short hair and prominent blood vessels, is usually associated with distinguished and energetic horses. Thick, loggy ears and commonness and laziness are often combined. The ears should be wide apart for the same reason that the eyes should be. Set low, the ears give a better expression to the face. A horse in which they are set closely together is likely to be either easily excited and foolish or stubborn in nature. Free movement of the ears in a horse is desirable. Those that show little movement are likely to be lazy and frequently troubled with deafness.

The Cheek.—This should be clearly defined, clean in front and well muscled over the mouth cavity, as horses that are good feeders must possess muscles to manipulate the jaws easily. Swellings or enlargements along the upper jaw indicate poor teeth.

The Throat.—The region between the two sides of the jaw bone should be wide and roomy. If this part is narrow breathing is interfered with as the horse moves its head, since the larynx is located here. For the same reason fullness at the throat latch is objectionable.

The Head as a Whole.—The head should only be medium in length. The distance from the angle of the shoulder to the hip joint in good horses is about two and a half times the length of the head. When properly proportioned the horse reins easily and too much of the load is not placed on the front legs. A light head is objectionable, because it does not favor the hauling of heavy loads. A heavy head, while not desired in a light horse, is not at all objectionable in a draft horse.

The head should be carried so that it will make an angle with the ground of 45 degrees. When thus placed the best possible view for the eyes is secured, the bit rests on the bars of the jaw properly and the head forms a better connection with the neck, since both the extensor and flexor muscles running from the neck to the head then make the same angle and the greatest efficiency is secured.

When the head is held horizontally the centre of gravity is moved forward, more weight falls on the front legs, the horse cannot see so well and stumbles more easily, and the muscles of the neck tire more readily, because the muscles attaching the top of the head to the neck pull at an obtuse angle, which is not advantageous.

When the head is carried in a vertical position the centre of gravity is moved backward, and the easy, quick movement of the head becomes impossible. The muscles of the top of the head now pull at an acute angle, which is obviously unfavorable.

The natural easy position of the horse's

head should be at right angles with the neck itself, set at an angle of 45 degrees. —Farm, Stock and Home.

ARTIFICIAL WOOL THE LATEST.

A representative of a Swiss manufacturer is in New York to introduce a new artificial wool made from jute by a secret process, says Boston Transcript. He states that the manufacturer has established a factory at Roubaix, France, and has sold the French rights to a well-known manufacturer for \$20,000; that manufacturers in Bradford are now negotiating for the sole rights in the United Kingdom; that the price set for the British rights is \$150,000, and that British manufacturers are trying to get the exclusive rights for this country. The representative refuses to have his or the manufacturer's name mentioned, and says:

"We are not anxious to come before the public with our product, as the negotiations for American rights to produce the wool are still in progress. For some time the price of raw wool abroad has been advancing steadily, and even to-day is very high. This caused many to cast about for a substitute which could be mixed with pure wool without affecting the quality of the material. All attempts proved futile, as the product when turned out would not stand dyeing. The product which we have produced can easily be combed in with the natural wool. With no other substitute have the same results been obtained. It will stand dyeing as well as natural wool. In our product mixtures of 50 per cent or more may be used with safety and the quality remain unimpaired.

"The artificial wool, it is claimed, can be used to great advantage for manufacturing felts, hats, clothing, yarns, carpets, etc., and the finest sizes of yarn can be spun, as from the best natural wool. In cases where our artificial wool must be bleached, it is necessary to use a good quality of jute in the mixture, while for the raw material an inferior grade will answer the same purpose. For dark colors and blacks, the most inferior grades of jute are suitable. Light colors, however, must be made from better grades."

DAIRY FEEDS.

Here is something that can be studied with great profit by the dairymen and owners of cows generally. It comes from an old dairy student who has worked out the matter he talks about in a practical way, Mr. Edward Van Alstyne of New York. He says:

It will be noticed that all the green foods have some 75 per cent of water, and about 10 per cent of fiber. When they are dried, the water has shrunk to 20 per cent, and the fiber increased to 40 per cent. We all appreciate the value of the green foods over the dry ones. Much of the nutriment in the succulent state becomes woody fiber in the dry. The silage compared with dry stalks will illustrate this. I will engage to keep my cattle in as good condition and get as much from them when fed the silage as with the same stalks fed dry, and with two pounds of grain daily in addition. When sufficient corn is in the silage, it will not pay to add cornmeal to the ration. The blood and lean meat in the animal must come from the protein in the food and not from the carbohydrates or fat, which produce heat, energy and fat. True, the protein does make all these, but it is usually more expensive to do in this way. Note carefully one-fourth of the solids in milk are protein. One can then readily see that the more milk a cow gives the more protein she needs. A young, growing animal necessarily needs more of this than a mature one. It is a mistake to withhold from the cow, during the last two months of pregnancy, sufficient of this element even though she is giving no milk, for the calf develops very rapidly at this time and if the cow is not given material in the food to build this calf, she will take it from her own body, in which case she will not be in shape to do her best, and will not fill her udder at calving time.

Unless she does this, she will seldom if ever make a good record through

the year. At such time I would not feed the very concentrated foods, like cotton seed meal, gluten or the high-grade grains, but bran or malt sprouts. If bone material or ash seem to be lacking in the ration, feed a couple of tablespoons daily of bone meal.

The bone meal is deficient in our home-grown feeds, such as corn, timothy or mixed hay, stalks or silage. The carbohydrates—or starch and sugar—produce heat and energy. The fat does the same, but is two and a quarter times as strong. These are most necessary, and as they are abundant in the feeds just mentioned we do not need to buy them.

How can we apply these principles so as to be of service to us, in economically feeding our cattle? First, by feeding silage (if in a corn country) rather than dry stalks. If we have clover to supplement our carbonaceous feeds we will need to buy less protein. Alfalfa is still better, as 11 pounds of it will take the place of 8 pounds of bran. It should be easily apparent that it will pay any stock keeper to strive for a stand of this plant, even though he may have difficulty at first.

Canada peas and oats, mixed two bushels of the former to one of the latter, sowed from two to three bushels per acre, and cut when the oat heads are just forming, and the peas are in blossom, make a splendid feed, high in protein.

If the various hays are cut when not more than half the plants are in blossom such hay will produce as good results as when the same come to maturity with one pound of grain a day added.

A well-known dairyman gives the following as a safe rule to follow when you are selecting a dairy cow: Choose first of all a good dairy type, deep body large heart girth, firm abdominal wall, indicative of good constitution. Then look for a square-shaped udder well forward and and up behind, giving great length of attachment to the body and good, squarely placed teats. Then seek a rich yellow colored hide which is easily seen at base of horns, inside of ears, tip of tail as well as over the body generally; and finally, for sake of uniformity, choose a uniform color with amber hoofs and horns, and cream colored nose.

When chicks are droopy, instead of hunting for poultry tonics, look for lice.

The combination of hot weather and lice will sap the vitality of the most robust chick.

Select your pullets from the first hatchings by choosing the most vigorous and thrifty.

High Grade Short-Horn Sale

About eighty head of the well-known Humboldt Herd of Short-horns will be sold at the Humboldt Ranch, one mile east of Suisun, Solano County, Cal., on June 17, by Auctioneer Col. Geo. P. Bellows, of Maryville, Mo. The owners of this herd, Messrs. B. F. Rush and William Pierce, are about dissolving partnership and all of their stock must be sold within the next few months. The sale of June 17th is therefore not a clearance but a dispersal sale, and the individual animals to be sold on this date are some of the best of their exceptionally fine collection.

Carriages will meet all trains at Suisun on the day of sale to convey visitors to and from the station.

For more detailed information, or for catalogue, address,

RUSH & PIERCE, Suisun, Cal.

P. O. Box 69.

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12½, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18¼, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12½, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

KING DINGEE

is by the greatest son of McKinney—the magnificent Zombro. His dam is by Diablo and his granddam has 2 in the 2:15 list. He is a grand individual and trotted a mile last year as a 4-year-old in 2:22.

Season of 1908

AT

Santa Rosa, Cal.

A Highly Bred and Grand Individual.

Fee: \$20 the Season

SAM NORRIS, Santa Rosa, Cal.

The Bureau of Animal Industry has shipped a horse afflicted with marsh fever all the way from Cheyenne to Washington, D. C., to make a careful study of the disease. The horse belongs to R. S. Van Tassel and was brought to Cheyenne several years ago. Marsh fever is an unusual disease and has more than once baffled the veterinarians so that the report of a well developed case on the Van Tassel ranch was immediately followed by efforts on the part of the government to have the horse shipped to Washington for observation.

Give chicks plenty of encouragement to scratch by keeping a portion of earth freshly spaded.

A handful of millet seed is good for the hen and her brood.

Next to a supply of suitable feed, fresh water, a shady run, a dust bath and good care, let fowls have plenty of exercise.

Kill the lice and watch the young chicks grow.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balm sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

"SAVE-THE-HORSE" SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

CHAS. TAYLOR & CO., Broomecorn Brokers.

ARTHUR, ILL.

Troy Chemical Co., Binghamton, N. Y.—

Gentlemen: Your Save-the-Horse Spavin Cure was recommended to me by Mr. W. M. Checkley, now postmaster of Mattoon, Ill., for curb, and after using the medicine as per directions in 3 weeks the lameness and enlargement had completely disappeared and has never returned, and that was five years ago. Since that time I have used the Save-the-Horse on a badly strained leg which threatened to result in a bog spavin and thoroughpin with a complete cure.

I am driving a little road mare to-day which I cured of a bone spavin which had refused to yield to Biniodide of Mercury and Cantharides and a rigid fring with a red hot No. eight wire. Yours truly, CHAS. TAYLOR.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual. \$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

Bonny McKinney 41383

Son of
McKinney 2:11¼
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustie; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03¼
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13½ (2-year-old champion of 1907), Aerolite (2-year-old record) 2:11¼, trial 2:05½. Dam Rita E. by Boodle Jr.; 2nd dam Gablan Girl by Gablan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alcyone 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

General Watts 2:06 1/4. World's Champion three-year-old stallion by

"AXWORTHY" (3) 2:15 1/2

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal. The Empire City Farms, Cuba, N. Y.

TRAINING DISTEMPER...

Ever hear of this? Yes, of course you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 30c and \$1 a bottle; \$5 and \$10 a dozen. Sold by all good druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Indiana.

LIMONERO

BREED YOUR MARES TO

ZOMBRO 2:11

Son of McKinney 2:11½ and Whisper by Almont Lightning.

SERVICE FEE—\$50.

Zombro holds the Coast record (2:13) for three-year-old trotting stallions. His daughter, Bellemont 2:09½, holds Coast trotting record for three-year-old fillies. His son, Hymettus 2:08½, holds world's race record for three-year-old geldings. Zombro has four in the 2:10 list and seven in the 2:20 list. He has won more first prizes in the show ring than any other stallion in California, among them the gold medal at the great Portland Fair—over eighteen competitors. His colts always sell for big prices. Address.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the

BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

W. G. HOWARD, Manager,

Hotel Belvedere,

Belvedere, California.

Campbell's EMOLLIC IODOFORM

Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.
PRICE—25c, 50c and \$1.00.

Stanford Stake of 1910

Trotting Stake for Foals of 1907

To be trotted at the California State Fair of 1910. Entries to close June 1, 1908, with J. A. Filcher, Secretary, at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1908; \$5 November 1, 1908; \$10 June 1, 1909; \$10 June 1, 1910, and \$20 on the tenth day before the first day of the State Fair of 1910; \$300 added by the Society. Mile heats, three in five to harness.

The stakes and added money to be divided 50, 25, 15, and 10 per cent. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2-3 per cent to the winner, and 33 1-3 per cent to the second horse. A horse distancing the field will be entitled to first money only. In no case will a horse be entitled to more than one money.

A horse not winning a heat in the first three shall not start in the fourth heat, unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will ENHANCE THE VALUE OF HIS COLT in case he desires to sell.

Your colt entered in the Occident Stake for 1910 is eligible for entry in this stake.

Remember the date of closing is June 1, 1908.

J. A. FILCHER, Secretary.

THE NEW TRACK AT CHICO has been selected as the place where the Pacific Coast Trotting Horse Breeders' Association will hold its annual meeting this year. This was decided on last Tuesday by an almost unanimous vote of the Board of Directors, the dates chosen being August 19th to 22d inclusive. The meeting will thus be held during the week immediately following the Oakland meeting, and allows a vacant week before the opening of the State Fair at Sacramento, thus giving Woodland an opportunity to give four or five days racing, if the new driving club there so elects. The directors' meeting on Tuesday was largely attended. There were three propositions submitted to the Board as follows: The Chico Driving Club offered a bonus of \$1,500, the Salinas association also offered \$1,500, while the Santa Rosa Driving Club offered \$800. After considerable discussion the offer of the Chico Club was accepted as it was considered the best. The horsemen and citizens of that community have recently incorporated the Chico Driving Club with a capital of \$50,000, purchased sixty acres of land and built the best laid out and widest track in the State. Sixty stalls have been erected and as many more will be finished before the meeting. The track is in fine shape now and will be fast by the date of the meeting. A fine grand stand and other buildings are in course of erection, and by August Chico will have one of the most modern and best appointed tracks on the coast. Chico is one of the most thriving, enterprising and busy towns in California at the present time. Two railroads pass directly by the track, one an electric line that will make a low rate during the meeting for those living in Sacramento, Marysville, Oroville and other towns who desire to visit the races. The steam railroad will offer like inducements. It is very probable that larger gate receipts can be had this year at Chico for a good trotting meeting than at any other place in the State, and it is a foregone conclusion that the meeting will be a big success. Salinas made a generous offer also, but it was considered by the Board that the one from Chico was preferable especially as it would enable the association to put its dates two weeks later, this being considered an advantage for those desiring to start their colts in the futurity stakes. As the association has held many of its meetings at Santa Rosa, the directors thought it best to visit another place this year, although it was stated that the track at Santa Rosa and the climate could not be excelled, and that former meetings had invariably been suc-

cessful in every way. Now that the place and date of the Breeders' meeting are selected horsemen can make their arrangements for racing in all the stakes closed, as the dates of the three most prominent meetings to be held this year in California have now been fixed. Oakland will begin the circuit August 10th to 15th, the Breeders' meeting following at Chico on the 19th to 22d, and the California State Fair beginning August 29th and closing September 5th.

THE \$50,000 TROTTING HANDICAP has closed with 125 entries, and every horse owner in America is to be congratulated upon the success of the first big race of this kind ever advertised in the United States, and the thanks of the entire harness horse breeding industry of the country are due the enterprising management of the New England Trotting Horse Breeders' Association. A full list of the entries has not reached us at this writing, but such trotters as Sweet Marie 2:02, Sonoma Girl 2:05½, Highball 2:06½, Mack Mack 2:08 and many other fast ones bred in California have been named, besides a number of horses with slower or no records. In all the history of trotting races there has not been so brilliant an array of fast ones entered in one race, and the probability is that a large field will go to the post in one of the greatest contests ever seen in America. Thousands of people will attend and the chances are that the crowd will be the largest ever congregated on a trotting track. This is clearly evidenced by the many applications that Secretary Jewett has already received for reserved seats in the grand stand, which have been pouring in on him ever since this great race was first announced. We hope the race will prove a big success every way, because such a result will cause all other associations to arrange for handicap races on every program advertised and this will certainly enhance the value of fast horses all over the country as their earning capacity will not then be taken away even should they become champions, as is now the case.

THE CENTRAL CALIFORNIA CIRCUIT announces its program for four good race meetings to close June 15th. The circuit comprises the tracks at Bakersfield, Tulare, Fresno and Hanford, and at each place there will be a county fair held in conjunction with the race meeting. The purses are very liberal and arranged for all classes of horses. There is no more prosperous section of the entire United States than the one where this circuit is located, and the wonderful products of the country will be on exhibition during these fairs. It will be a circuit well worth taking in, the purses being large enough to pay winners a nice profit for racing through it. Entries will close Monday, June 15th. If you do not intend to go north to Oregon after the California State Fair, enter clear through the Central California Circuit.

DON'T FORGET that entries close on Tuesday, June 9th for six good big purses to be trotted at Oakland's Banner Meeting in August. These are in addition to the big stakes which closed April 1st. These races are three heats, every heat a race and all have a chance to get some of the money. If you win money in the first heat you will get it even though your horse should be so unfortunate as to be shut out in the next heat. Manager Ben Benjamin is sparing no expense to make this the best meeting of the year in California and he deserves success. Give him a rousing entry list.

The matching of horses in size, color, conformation, action and temperament is one of the most difficult problems in the commercial horse industry. The demand for matched pairs is always active at prices above what the animals would command if sold as individuals. Men who take pride in owning matched pairs of drivers or drafters know how difficult it is to fill their orders. It is not difficult to buy a good horse, but to secure two good horses of a class that closely match in every particular is a hard task. Horses are easily matched in one or more homogeneous attributes, but to mate two horses is as difficult as finding twin foals when all desirable qualities enter into the problem. It is no marvel that well-matched pairs command good prices.

Ben Benjamin is trying to arrange a race for John Caldwell 2:08½, Wild Bell 2:08½ and Athasham 2:09½. If these three trotters should meet at Oakland we expect to see the biggest crowd seen at a trotting meeting in California in years. They will make the fastest field Californians have seen for a long time, and every horseman would want to see them race.

POINT BONITA.

There, standing like an angel grand,
A light within her outstretched hand,
She lights the darkness of the night
And brings the wand'ring ships to sight.
But when the fog, with mantle gray,
Shuts out the light and bars the way,
The siren shrieks to ships afar—
"Beware the rocks! Beware the bar!"

Thus guards Bonita Golden Gate;
She leadeth sail and steamer straight
Past beetling crag and frowning fort,
Thro' currents swift, all safe to port.

Oh, light that shineth from the sky,
Oh, voice that speaks when none is nigh,
So guide our ship to heav'n afar
Where love is seen in ev'ry star.

—Rustic.

The Hals, the famous pacing bred pacers of America have found their way to sunny California and before many years have passed this State will doubtless produce some of the best and fastest Hal pacers to be found racing on the Grand Circuit, as it has already produced several of the champion trotting bred pacers, including Bolivar 2:03½, Anaconda 2:01½, Coney 2:02, Directly 2:03½ (two-year-old record 2:07½), Sir Albert S. 2:03½, Flying Jib 2:04, (with nursing mate 1:58½), and others. When Chas. De Ryder brought Star Pointer 1:59½, fastest of all the Hals, to California for the purpose of crossing this grand horse on our mares he did an act which should be highly appreciated by California breeders, and especially those who own pacing mares. Dr. Henry Calmes of Fruitvale, Alameda County, has recently purchased the roan mare Carmen by Newsboy, sire of the dam of John A. 2:03½, dam Sky Blue by Gibson's Tom Hal, and has bred her to Star Pointer. The produce will be strongly inbred to the famous Hal blood, and should the result be a colt he should make a good outcross for our California trotting bred pacing mares of which we have many. The Hals not only possess great speed, but are bull-dog race horses and game to the core.

The Denver Gentlemen's Driving and Riding Club has anticipated all other racing associations in giving a handicap race, modeled after the plan adopted in some European racing centers and to be tried at Readville in the fall. The horses were handicapped by placing them at various scratches according to their previous performances. The race last Saturday was arranged so that the slow horse should be on the mark, the others to race more than a mile. When the word was given in the first heat each of the five starters was at a standstill, so it was from the old standing start made familiar in the days of bicycle racing. Both heats were pretty contests. In the first Casta Nada 2:09½ by Don Derby, given the greater handicap almost won over Condon who took the heat in 2:25½. The second heat promised almost a duplicate of the first, but at the finish Casta Nada came stronger and succeeded in getting first in 2:28½ with his handicap of 525 feet.

A very pleasant sight on any afternoon when the sun shines is the large number of pony-drawn vehicles on Chicago's boulevards, says the Breeder's Gazette. The number is larger than it was at this time last season or the season before, and that means larger than ever. For the most part they are good ponies and well turned out. The same influence which has operated to increase the number of saddlers in the great American cities has also tended to augment the number of ponies in use. The rich folks ride mostly in automobiles, but they buy ponies for their children. The writer knows of a number of very handsome and costly stables that once upon a time sheltered many horses, but now house motor cars and ponies only. There are plenty of them. It is a promising sign. If the children are given a chance to grow up in an intimate acquaintance with horseflesh as personified in a good pony there never will come a time when the horse will be wholly discarded. In the meantime breeders of ponies are figuratively in much clover. Demand is strong for their goods and prices fully satisfactory.

An unfortunate accident occurred at the Fresno track last Saturday where Prof. M. P. Holmes was knocked down and severely injured by a horse driven by Schuyler Walton. The Professor had a large number of children from the public schools at the track to compete in athletic contests, but the horsemen had understood that they were to have the use of the track until 10:30. Walton was riding in a low seat, long shaft cart behind a big colt and did not see Mr. Holmes. The accident was doubtless an unavoidable one and while the local papers condemned Walton very severely, those who know him cannot believe he would do any such act intentionally. We all know how careless people are who get on tracks where horses are being worked out and it is a wonder that more are not injured.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal.

Drink Jackson's Napa Soda.

NOTES AND NEWS

CALIFORNIA HARNESS RACING DATES.

Oakland	-	-	August 10-15
Chico (Breeders Meeting)	-	-	August 19-22
Sacramento (State Fair)	-	-	August 29-September 5
Bakersfield	-	-	September 14-19
Tulare	-	-	September 21-26
Fresno	-	-	September 28-October 3
Hanford	-	-	October 5-10

The Breeders' meeting goes to Chico.

\$1,500 and all the privileges, a new track and a boom town were the inducements.

Entries for the Alameda County Fair meeting close on Tuesday, June 9th.

Entries for the Central California Circuit will close June 15th. The full program is in our advertising columns.

The present outlook is that the light harness meeting at Oakland will be a crackerjack. No money is being spared to bring the fastest horses together.

There is no better track in California than the one at Santa Rosa Stock Farm at the present time. For a summer track the adobe soil cannot be excelled.

John Caldwell 2:08½ is on his way back to California and should arrive this week. He will be entered in any races offered for horses of his class in that State.

If the Breeders give an extra meeting at Santa Rosa, which is very likely, the purses will be of good size and the meeting will be held the week before the Oakland meeting.

The Angelus by Zombro 2:11, dam Hazel Kinney 2:09¼ by McKinney 2:11¼, trotted a workout mile in 2:17¼ last week at Pleasanton and came the last half in 1:05 flat.

The Board of Police Commissioners of Los Angeles have issued an edict that no permits will be issued for public games or sports of any description to take place to-day, Memorial Day.

The saddle stallion Artist Jr., that W. A. Hunter is standing at Woodland this year, has done a good business and has been bred to a number of fine mares, many of them standard bred trotters.

Sonoma Girl 2:05¼ has developed another splint but thus far it has not caused any lameness. She had not been driven a mile better than 2:30 up to last week, but will be asked to step faster from now on.

E. D. Dudley of Dixon went to Pleasanton last week to see the horses he has in Sutherland & Chadbourne's care, and reports them all doing well. McFadyen 2:15¼ is in fine shape and has beaten 2:10 handily.

Fred Hahn of this city has consigned several highly bred trotters to Chase's sale of July 27th. Among them is a full brother to that good trotter Deroll, and the brood mare Nelly Emoline with a foal at foot by Chas. Derby.

The Park Amateur Driving Club will hold a matinee this afternoon at the Stadium track. If you enjoy seeing fast trotters and pacers contest for blue ribbons visit the Stadium this afternoon. The program is an excellent one.

H. B. Slocum consigns nine head of good trotters bred at John Mackey's Yolo Ranch to Chase's July sale. These horses are by James Madison, Knight, Wildnut and Knight Moor, and some good prospects are among them.

The trotting mare Belladi 2:19, by Chehalis 2:04¼ and out of the dam of Helen Norte 2:09¼, recently foaled a filly by Moko, and has been bred back to that stallion. Belladi is owned by T. H. Brents of Walla Walla, Washington.

Mr. Frank J. Kilpatrick, owner of Washington McKinney will enter this handsome stallion at the National Horse Show in New York next November. It will take the handsomest horse in America to win from him in the show ring.

P. W. Hodges expects to leave Pleasanton about June 1st for the Grand Circuit where his good trotting stallion San Francisco is well entered. Both San Francisco and The Angelus are entered in the \$50,000 handicap at Readville.

After letting his two-year-old Zombro run in a padlock for four months during the winter and spring, Mr. C. A. Canfield of Los Angeles had the colt taken up in April, and in just 30 days Walter Mahen drove him through the stretch in 33½ seconds.

Glenn H. 2:15¼, trotted an exhibition quarter at Cleveland in 29 seconds the day before the Blue Ribbon Sale, and then sold for \$800. The buyers must have thought there was a weak point in him somewhere or he should have brought more money.

Pique, the dam of Chainshot 2:06¼, Brash 2:14¼, Grange (2) 2:30¼, Halgretta 2:23¼ and Icclander 2:10¼, is dead. She was twenty years old and owned in recent years by Sterling R. Holt of Indianapolis who has two foals from her by Sidney Dillon.

In all the cases heard before the Pacific District Board of Appeals of the National Trotting Association at its meeting held in San Francisco in April, the Board of Review at its meeting held in New York, May 6th, sustained the decisions of the local board.

Al Charvo shipped east in the De Ryder car last week from Pleasanton, taking Griffith & McConnell's stallion Bonnie Steinway 2:06¼ which he will race where opportunity offers. It is too bad there are not races on this coast for such horses as Bonnie Steinway.

The Rural Spirit says that Fred S. Shaft, owner of Sherlock Holmes 2:06, dropped dead on the streets of Spokane Friday, May 15. He was a retired lumber merchant and has devoted his late years to the harness horse and through his efforts Sherlock was brought out.

Charles DeRyder did not take the roan horse Birdson, owned by Thomas Ronan east with his racing string. Birdson after showing 2:10 speed was well entered on the Grand Circuit, but went wrong and had to be left at home. He is the making of a 2:08 trotter when right.

The statement that Mr. J. H. Brooks of Vancouver, has been expelled by the National Trotting Association is not correct. He was only suspended until he pays \$50 for starting the mare Aunt Jennie under the name of Nelly B. without paying the recording fee of that amount.

Mr. C. D. Evans of Healdsburg, who owns the mare Lakie by Milton Medium, sends us a photograph of her with a two-days-old colt by a four-year-old son of Bayswater Wilkes at foot. This mare is just 30 years old this spring, and from her picture is remarkably well preserved.

Mr. P. H. Smith, of Santa Monica, who is interested in harness horses to a limited extent and has an ambition to breed a fast one some day, has been in this city the past week on a visit. Mr. Smith owns the Diablo mare Katherine 2:19 by Diablo, and two or three more well bred ones.

The Breeders' Association may give an extra meeting at Santa Rosa, and hold it during the week before the Oakland meeting. It would be of great advantage to horsemen if the Salinas folks would also give a meeting this year. They have a good track down there and the people always turn out well.

The semi-annual meeting of the members of the Park Amateur Driving Club will be held at the Fairmont Hotel, Tuesday, June 9th, at 8 o'clock p. m. for the purpose of electing directors for the ensuing year, and the transaction of such other business as may properly be brought before the meeting.

P. W. Hodges expects to ship east next week. He will take San Francisco, son of Zombro out of a Nutwood Wilkes mare, to fill his engagements on the Grand Circuit, and will leave The Angelus (Zombro-Hazel Kinney) here to race in California and up north. Both trotters have beaten 2:15 in their work.

The manager of the Alameda County Fair Association has shown great liberality in offering good purses for the fast classes. The owner of fast trotters have a chance of entering in both the 2:09 and 2:11 trots. These classes are close together, but there are enough good horses in California to fill both events.

Mr. Ferguson, who was formerly engaged with the Littleton Farm, at Washington, Pennsylvania, the home of Moquette 2:10, has been in California for several weeks looking for a place to locate, and finally concluded that Sonoma County about suited him, and last week he purchased a tract of several acres near Santa Rosa.

The full report of the Blue Ribbon sale will not reach us until next week, so we cannot give the average until then. Prices were rather low however. The big railroad strike at Cleveland came on just as the sale began, and prospective buyers had no way of shipping horses out of town. But for this, the prices would have been better.

Carlotta Wilkes, dam of the pacer Inferlotta 2:04¼ and the trotter Carlokini 2:13¼, was bred to Guy Dillon at Santa Rosa Stock Farm in 1906 and 1907. Both foals are black, the yearling a square trotter and the suckling a natural pacer. Carlotta seems to be making an equal division of gaits as far as is within her power.

Mr. W. E. Valentine of Corona, Cal., writes us that he is now inclined to send his great pacing mare Inferlotta 2:04¼ east about the first of June. He thinks she is stronger than last year and has fully as much if not more speed. Should Inferlotta strike the eastern tracks in good shape there is no doubt but she would make a great showing.

The width of the Chico track is such that big fields can race over it without being crowded. The stretches are each eighty feet wide which is not the case with any other track in California, the back stretch in all other instances being narrower than the home stretch, and very few of our California tracks are wider than sixty feet at any part of the mile.

W. J. Andrews worked Sweet Marie 2:02 out with the pacer Ethan Robert 2:04¼ a few days ago at Poughkeepsie, Andy McDowell being up behind the latter. They went an easy mile in 2:18, the fastest mile of the season at that track. Sweet Marie is looking and acting well. She will make her first start this year at Readville on July 4th in the \$5,000 free-for-all.

According to breeding "dope" the two fillies by John A. McKerron out of Lou Dillon should be great brood mares. Lou Dillon's dam was a great brood mare, and John A. McKerron's sire is a great brood mare sire, and out of a mare by the greatest of all brood mare sires, while his dam has a very prominent position in the Great Brood Mare table, being the dam of six in the list.

The 2:30 class trot at Alameda was planned so as to give the moderate class green horses a chance. Consequently it may be set on the same day as the 2:20 class trot. The manager of the Alameda association wishes horsemen to understand this fact. Great care will be exhibited in arranging the order of events for the week and horses that have double engagements will be protected.

Fred L. Boraff of San Fernando, California, is breeding eight of his best mares this year to George Becker's handsome stallion Zobelein, a half brother to Zombro 2:11. Mr. Boraff owns a very large stock ranch, on which he has many cattle and about one hundred head of horses. Zobelein, while not as large as Zombro, is shaped like a show horse, and has as much action as a prize hackney.

A horse owner of Eureka, Humboldt County, has sued a druggist of that city for \$750 the value of a horse which the owner claims died as the result of being administered a dose of medicine put up by the druggist as a cure for bot worms from which the horse was suffering. The druggist claims the medicine, which was a compound of kerosene and linseed oil did not kill the horse but the worms did.

W. A. Hunter of Woodland has a yearling by A. B. Rodman's McKinney stallion Money Mac, that is acting like a stake winner. The fourteenth time this yearling, which is a filly, had the harness on she stepped an eighth of a mile at a 3:40 gait a pretty fair rate of speed for a baby. Mr. Hunter is working a filly by Tuberosa, belonging to Ray Hollingsworth that is working nicely and is quite a prospect.

Zombro will probably make the season of 1909 in Kentucky. Mr. Beckers is receiving many requests from the leading breeders in that section to bring his great stallion there and he is giving the matter serious consideration. Zombro is the greatest son of McKinney as a sire, and is founding a remarkable family of trotters. The beautiful form and finish he impresses on his get are also great qualifications for a sire.

W. G. Durfee has arranged to make a short season at Wheaton, Illinois, with his grand stallion Del Coronado 2:09¼. Mr. F. S. Gorton has arranged to send several mares to the fast son of McKinney, two of them by Axtell 2:12, two by Highwood, the sire of Early Reaper 2:09¼ and one by Count Louis. Mr. W. P. Cowan will breed the dam of Loyal, the Geers entry in the M. & M. to Coronado also. This mare is by Trevillian 2:08¼.

Electeur, a fine imported Percheron stallion owned by Senator B. F. Rush and W. B. Connelly of Suisun, died last week from impaction. He was one of the finest horses of this breed ever brought to America and cost his owners \$2,750 three years ago. He was a gray, stood 17½ hands and weighed 2,056 pounds. He took first prize at the Paris show of 1900. A yearling by Electeur was sold by Mr. Connelly a few days ago for \$1,000.

Manager Benjamin of the Oakland Association will probably set the 2:30 trot, entries for which close June 9th, for the same day as the 2:20 trot, entries for which have already closed. The 2:20 trot is for a purse of \$2,500 and all the fastest green trotters in California are entered in it. Manager Benjamin has now offered \$750 for a 2:30 trot for the purpose of giving owners of slower horses a chance to win a race. By putting this race on the same day as the 2:20 trot the owners of the fastest green trotters will not enter them in it. Mr. Benjamin, by thus looking out for the interests of all the horsemen is making his program very popular with them and he will doubtless get a big entry to the additional classes that close June 9th.

Our occasional correspondent, "Rustic," visited Point Bonita in Marin County on May 6th, to witness from that point the incoming of the great fleet of American battleships under command of Admiral Evans, and while there, was so impressed with the beauty and importance of the spot whereon is located one of the principal lighthouses of the Pacific Coast, that he "wrote the rhyme" which appears on the third page of this issue of the Breeder and Sportsman.

Helen Stiles, the three-year-old filly by Sidney Dillon, dam by Silver Bow is showing up well for a green one. She is owned by Mr. S. S. Stiles of Oakland, who sent her to Jack Phippen last November with instructions to go slow with her until spring. Mr. Stiles had the satisfaction of seeing her trot a mile in 2:25 last week and as she came the last quarter in 35 seconds he was pretty well pleased. She is eligible to start in the Breeders' Futurity.

Charles De Ryder left Pleasanton last week for Castleton, South Dakota, where he will start his horses the first time this year. He will race at three or four meetings in that State, and then ship to Winnipeg where he will race before shipping to the Grand Circuit opening meeting at Detroit. In his stable are the pacers Argot Boy 2:03½, Sherlock Holmes 2:06, and Senator Clark, and the trotters Charley T. 2:11½, Diablo Mac, and Nutwood Princess.

S. Christenson of this city reports the following foals of this year from four of his mares. All the foals are by Bon Voyage 2:12½. Simone by Simmons foaled a bay filly April 27th; Lady Estelle by Athadon foaled a bay colt with white hind feet and star April 28th; Marguerite K. foaled a brown colt with white hind feet and star May 1st, and Perza by Allie Wilkes foaled a brown filly May 25th. All these mares are being bred to Lynwood W. this year with the exception of Marguerite K. who was mated with Star Pointer.

Alex. Davidson, the well known horse shoer and horse owner of Phoenix, Arizona, was presented with a beautiful filly on Sunday, May 17th, by his mare Lillian Zolock, trial 2:14½, a daughter of Zolock 2:05½. The filly is by Col. Greene, trial 2:10½ (by Zombro out of a mare by Raymond) and knows nothing but pace up to the present time. Mr. Davidson has bred his mare Delnette 2:25 to J. K. Wheat's stallion Col. Randolph a five-year-old bred by Henry and Ira Pierce. Col. Randolph is by Mendocino out of Wilfan by Mambrino Wilkes, and while not registered is eligible as both his sire and dam are registered.

Martin Carter, proprietor of the Nutwood Stock Farm, sent two fine young mares down to Santa Clara last week to be bred to Kinney Lou 2:07½. They were Louise Carter, now five years old, with a three-year-old record of 2:24, and an own sister to John A. McKerron 2:04½. Louise Carter is by Chestnut Tom 2:17, son of Nutwood Wilkes, and is out of Ingar, the dam of John A. McKerron 2:04½ by Director. The mating of two such mares with Budd Doble's great stallion should produce something extra good. Mr. Carter, who is one of the most successful breeders in California, has a habit of sending some of his choice young mares to the best stallions in the State every year, and the result is that he has now on his farm some of the best bred young stock on the coast. Among the outside stallions he has bred to are McKinney, Zombro, Zolock, Stam B., Bonnie Direct, Direct, Director, Searchlight, Star Pointer, Kinney Lou, and many others. Mr. Carter has sold off nearly all his old mares in the past few years, and now has at the farm as choice a collection of young mares and colts as can be found anywhere.

WHO WILL BUY THIS STALLION?

The late Frank Malone, who was one of the most influential of California breeders in the early days, and who after making a big fortune in the mines, died in this city last year in abject poverty, left a widow a worthy woman, who is now dependent upon charity for support. Mr. Malone at his death owned the stallion Gambetta, which is, we believe, twelve years old. He is said to be by Director out of Brainy by Echo, therefore a well bred horse. This stallion has been for several years in the keeping of Mr. Jos. A. O'Neill, of 1252 Vine street, San Jose, who now generously offers to sell him at private sale or public auction, the entire amount received to be turned over to Mrs. Malone, Mr. O'Neill making no charge whatever for the keep of the horse up to the day of sale. Gambetta is a bay stallion, sound and all right, and a nice looker. He has never been trained a day, but is broke to drive and is a kind and gentle horse. Mr. Malone raised him from a colt in this city, keeping him in a city lot, but he is strong and vigorous and might yet make a success in the stud. We do not know whether the horse's breeding can be established so as to get him registered, as all Mr. Malone's papers were burned in the big fire following the earthquake, but Mrs. Malone can give the pedigree from memory. Any one wanting a stallion should address Mr. O'Neill at the address given above. He will sell to the highest bidder and turn the money over to Mrs. Malone who owns the horse.

THE WASHINGTON McKINNEYS.

The bunch of Washington McKinnneys that Mr. Kilpatrick has in training at the Stadium track in this city are all doing remarkably well. Lady McKinney, matinee record 2:12½, is in perfect shape and the stable believes she will trot in 2:10 the first race she starts in.

On last Saturday Ray McKinney, the big bay six-year-old who has been worked just 65 days trotted a mile in 2:19, the first half in 1:11, last half in 1:08.

Belle of Washington trotted a mile in 2:19½, the first half in 1:10½, the last half in 1:09½.

McKinney Belle, four-year-old, trotted a mile in 2:23½, first half in 1:13½, last half in 1:10½.

Fabia McKinney trotted a mile in 2:25.

Rex McKinney, a six-year-old full brother to Lady McKinney, which never had a work out in his life until Wednesday afternoon, trotted a quarter in 35½ seconds and repeated in 34½ seconds, an eighth in 16½ seconds.

Reed McKinney, a chestnut six-year-old, dam by Daly, grandam by Ansel, trotted a quarter in 38½ seconds, the last eighth in 18 seconds. Rex and Reed McKinney have never had any training. They were owned by a lady in Santa Rosa who used them to a surrey for the past three years. Their quarters in 38½ seconds and 34½ respectively. Mr. Kilpatrick says is the best performance he has ever seen by any horse under the same circumstances.

Mr. Sam Norris has a five-year-old Washington McKinney pacer at Santa Rosa which he writes can pace in 2:15 and has had very little work.

John Quinn writes that Mr. Markham's five-year-old Washington McKinney colt trotted the Sacramento track in 2:22½.

Mr. Charles Durfee, former owner of McKinney, visited the Park Amateur Driving Club stables on Tuesday, looked over the seven Washington McKinnneys there, and ordered Frank Turner to purchase him a two or three year old by this horse as soon as he could find one he approved of. The get of this horse is bound to become fashionable.

P. W. Hodges, who gave Geo. W. McKinney 2:14½, the full brother to Washington McKinney, his mark, also handled the latter as a two-year-old. When the colt was turned over to him he was lame, and as Hodges was just ready to ship to Denver he did not do anything with him, but put him in the car with the others and took him along. After finding that the colt had thrush, he doctored the foot and let him step along one day and he made the mile in 2:33. Hodges says he was a very fast colt and should have had a low mark. George W. McKinney trotted better than 2:10 in a heat in which he was beaten by the winner in 2:07½ and should have had a mark better than 2:10. Mr. Hodges, who has been a very successful breeder of fast trotters and pacers having directed the matings which produced such horses as Copa de Oro 2:07½, Del Coronado 2:09½ and a long list of other celebrities including The Pig, now known as Phoenix, gives it as his opinion that Washington McKinney will be one of the greatest sires of speed in the country if he has the opportunities.

OUTLOOK FOR BIG RACES.

From present indications the \$50,000 handicap trot at Boston next August will be a great success. The American horse owner is nothing if not a taker of long chances, and the certainty that some one horse will take down \$30,000 at the end of the dash, with five others getting comfortable sums, is what gets him. Every man thinks he has the best trotter on earth when it comes to a standing start, and likewise he is confident his pet nag can go a mile and a quarter or more with the best of them, and for these reasons 125 entries were made.

The question of getting quickly under way from a standing start came up recently during a talk about the race, and two well-known drivers, "Knapsack" McCarthy and John Hussey, took a hand in it. Hussey, who has given the matter a good deal of thought, says that any trotter that can do the entire distance at a 2:12 rate from a standing start will be in the money, and horsemen generally were inclined to agree with him. He figures it will take a good mannered and spry horse to get to the quarter pole in :35. On this figuring the other four quarters would have to be done in :32½ each to make the 2:12 average for the whole distance.

On this sort of figuring Highball should come pretty near winning, even if he is set 500 feet behind the handicap mark. He could step in 2:04 last summer, and gets away extra well for a double-gaited horse. Of course the nags on the mile and a quarter mark will have the better of it if they have 2:08 speed or better, and there is little doubt some of them will be "covered up" for the race to that extent.—Exchange.

Quarters below 30 seconds were quite common at Glenville track the day before the Blue Ribbon sale opened, and it seemed hard to believe when Glen H. trotted a quarter in 29 seconds flat. Horsemen looked at their watches in amazement when this ten-year-old bay gelding reeled old his wonderfully fast quarter, but the clocks did not lie and the official time was given out as 29 seconds, although several watches snapped at 28½. The first eighth was trotted in 14½ seconds. Glen H. has a record of 2:15½, and a trial in 2:12. He is by Glendarlton, dam by J. W. Bailey. He is a handsome looking horse and was raced last year by Jimmy Burns and it is claimed that a mile in 2:10 is not beyond his speed.

CHARIOT RACE RECORD BROKEN.

The Pacific Coast and probably the American record for four horses to a chariot was broken May 22d, at Association Park, San Bernardino, when A. N. Wiggins of El Monte, drove his splendid bays a mile in 1:51. When it is considered that the world's record for a running horse is 1:35½ and that these four horses pulled a chariot and driver a mile in 1:51, on a track that is not fast, the marvel of the performance begins to appear. Chariot racing has not been sufficiently recognized as a modern sport to be reported in any authority available, but experts declare that the best Pasadena record is 1:53.

The horses were matched for two events, and the winners in these two events ran off the tie for the first and second purses, while the losers were matched to decide third money.

In the opening race A. N. Wiggins of El Monte, drove against Milton Kauffman also of El Monte, and to a splendid start the eight horses sped away over the course, keeping even for the first half, but before the third quarter pole was reached Kauffman's team began to show distress and was badly beaten.—Time 1:53.

In the second event E. J. Levingood of Santa Ana drove his four against F. C. Michel of Los Angeles. Levingood had the pole and kept the lead for the mile with Michel hard on his trail.—Time 1:55.

The third event was between Michel and Kauffman for third money. Michel winning in a race that was not in fast time, but created excitement among the vast crowd of onlookers. Through the back stretch there wasn't a length between the fours, but as they headed into the stretch Michel seemed to be leading but by such a trifle that the crowd began to cheer for both colors. Michel dashed under the wire, the winner in flat 2 minutes.

The last and best event was between Wiggins and Levingood to decide the first and second purses. The splendid animals sped away around the turn like the wind, with Levingood at the pole. Wiggins keeping his four alongside until the half mile was reached when he began to draw ahead and before entering the stretch had taken the pole and came home a winner, but with Levingood close up, and both fours covering the distance with almost incredible swiftness. The time announced by the timekeepers was 1:51, the best ever known in the west.

Other events of the afternoon included a three-eighth of a mile run between Ingol's Ace, William Long's Vividore and Hoagland's Entry. Ace won in 38½. Ingol's Grip and a Pomona entry ran a quarter, Grip winning in 24 seconds.

The Catalina and Whittier bands furnished entertaining music between acts. Altogether the afternoon sport was great, and thoroughly enjoyed by the crowds of people gathered to witness the events.

The horse show of the Festival of the Arrowhead at San Bernardino surpassed all expectations and made a great hit with the spectators. J. H. Kelley was in charge of this department, and although he had informed the executive committee that it would be a big showing, few there were who believed it possible for such an aggregation of magnificent horse flesh to be rounded up in the two counties that contributed to the display. It was purely a parade of the best horses in San Bernardino and Riverside counties, and it sure was a bunch of horses to be proud of. The best sires of the counties were there and most of them well represented by a good showing of their colts. The list of entries is too long to give in this writing.

The Driving Club of San Bernardino are arranging to hold another matinee on June 17th. Horses from Riverside, Redlands, Bloomington, Highland and San Bernardino will participate in this event, which promises to be the best of the year. Many new horses are in training and will perform on this occasion. A full announcement will appear later.

G. H. P.

THE \$1,500 PACING HANDICAP.

One of the best races at the Breeders' meeting at Chico next August should be the \$1,500 handicap for pacers which has been announced with nearly the same conditions as the fifty thousand dollar trotting handicap which the Readville, Mass., association recently closed with one hundred and fifty entries.

The entrance fee is two per cent. due June 15th, when entries close, one per cent. additional if not declared out on or before July 15th, and two per cent. additional to start. The handicap will be announced on the first day of the meeting.

This race should provide an excellent contest. At Denver two weeks ago to-day the amateur driving club of that city held a handicap on this plan. The California bred horse Castanada 2:09½ was handicapped at the furthest distance, something over five hundred feet back of the scratch horses who paced a mile, yet Castanada won, pacing the distance in 2:28, and only beat a scratch horse a length. The race was pronounced a success in every way. We are sorry to have not received a complete report of this race as it would be an object lesson to our trainers and drivers.

Read the conditions of the pacing handicap over and enter your horses June 15th.

General Watts (3) 2:06½ wintered finely, and is now making a thoroughly satisfactory season at the farm of his owner in West Virginia. His book is full and closed.

DEATH OF WALDSTEIN 2:22½.

On May 5th, the famous stallion Waldstein, son of Director, died at San Luis Obispo, where his owner Matt Zahner was making a season with him. Mr. Zahner writes that the old fellow died as he had raced game to the core, and stood on his feet until he was practically dead. Up to the time of his sickness he was looking better than he had for years, and would have made a good season had he lived. Waldstein was foaled in 1885, consequently was 23 years old at his death. He was bred by Albert Waldstein of San Francisco, passed from him to John Goldsmith, then to H. S. Hogoboom and then to Matt Zahner who kept him in Humboldt County until this year, when he removed to San Luis Obispo.

Waldstein was a remarkable horse in many particulars. For many years he was the only stallion in the country sired by Director that was out of an Electioneer mare. According to the Year Book he made his first start at Eureka July 2nd, 1889, when he was a four-year-old, starting against Pete Steinway by Steinway and Poscora Hayward Jr. by Poscora Hayward. He won in straight heats, the fastest of which was 2:39¼. Three days later he started against Pete Steinway and Electric. The Steinway gelding took two heats in 2:40 and 2:38¼ and then Waldstein distanced both horses in 2:35¼. At Rohnerville in September of that year he again met Pete Steinway and distanced him in 2:33¼ the first heat, that time remaining his record as a four-year-old. As a five-year-old he was not raced but in 1891, when he was six years old he started four times, winning twice and lowering his record to 2:25½ at Wilows.

In 1892, when he was six years old he started in five races. At the Oakland meeting he won two heats and second money in a race won by Boodle, getting a record of 2:22¼ in the fourth heat and being beaten by a narrow margin the fifth and final heat in 2:21½. Three days later he started for a purse of \$1,000 in a dash of five miles against Sunrise by Abbottsford, Langford by Mansfield Medium and Little Witch by Director. Waldstein won in 13:05½ lowering the world's record at that distance for stallions, a record which still holds.

He was not raced after that year, but retired to the stud, and while not given the best of opportunities has made quite a reputation as a sire.

His list of standard performers contains but nine names in the Year Book, but Mr. Zahner tells us he has seven others in the list whose records were made over non association tracks and not officially reported. His fastest performers are the trotters Jack W. 2:12¾ and Humboldt Maid 2:13½, and the pacers George Perry 2:11½, Lady Waldstein 2:15 and Irene W. 2:15¼. Daughters of Waldstein have produced Swift B. 2:12¼, Young Monterey 2:24 and Daisy E. 2:22. His daughter Lady Waldstein 2:15 is the dam of Phoenix, better known as The Pig, the fast green pacer than goes east this year in W. G. Durfee's string.

Waldstein was sired by Director 2:17, dam Nelly W. by Electioneer 125, a full sister to Albert W. 2:20, sire of Little Albert 2:10, Neernut 2:12½, and twenty more in the list. The second dam of Waldstein was Sister, great brood mare by John Nelson, and his great grandam the Lamott mare, dam of that fast early day trotter Aurora 2:27.

While Waldstein's racing career was not an extended one, the fact that his five-mile record is still the fastest ever made by a stallion stamped him as a horse of speed and endurance beyond the average, and while his list of standard performers is short for one of his reputation, the opportunities he had in the stud must be taken into consideration when his rank as a producing sire is reckoned.

GREAT BROOD MARE DEAD.

On the morning of May 10th, 1908, the old brood mare Concha, owned by Mr. W. C. McCully of Bloomington, California, was found dead in her stall at her owner's ranch at Westminster. She had evidently dropped dead from heart failure, as from all indications she had passed away without moving a straw of her bedding.

Concha was a mare of highly nervous temperament and must have had remarkable strength and vitality as Mr. McCully has known her to go several months without lying down. She was a gray mare, foaled 1886, and was by A. W. Richmond 1687, dam Paganip by Crichton, son of Imp Glencoe, grandam Bay G. by Argyle, great grandam by son of Joseph. She was the dam of Italia 2:14¼ trotting and 2:04¼ pacing, by Zombro, that took the world's record for the fastest green pacing mare of 1906. Concha was also the dam of Conchita 2:29 and of three or four more fast trotters and pacers that have beaten 2:20 although they have no official records. We should like to have a complete list of her foals and the names of their sires, and hope Mr. McCully will find time to send them to us, as there are a number that are not registered but are eligible and we would very much like to publish a list of them all, together with a statement of the speed they have shown. Mr. McCully owns a five-year-old called Gen. Torres that is by Neernut 2:12½ out of Concha that has stepped quarters at the trot in 33 seconds with but little work, and he also has a yearling sired by his stallion Cedric Mac that he thinks is as good a prospect and fine a colt as Concha ever dropped.

SOME SUNDAY FUN AT MARYSVILLE.

There was some good racing at the Marysville track on Sunday, May 17th, where several fast horses from Sutter and Yuba counties were given a very creditable tryout. Most of the horses were soft and not in training, but they made an excellent showing.

The first race was between a horse owned by W. L. Vance and a mare owned by Senator Shippee. The mare took the first heat in 2:34½, and the horse the second in 2:29¾.

George Ohleyer drove his Monteo against Vance's Easter Bells and took the heat at 2:27¾. Easter Bells got the second at 2:24½.

There was a close race between Court Reporter Calum's mare and a colt owned by Mr. Sangster. The latter got both heats. Best time 2:31½.

In the next event George Magruder's two-year-old filly by Sir John S. went against a three-year-old owned by Padilla. Mr. Magruder's filly took the heat in 2:52½.

Vance then brought out Sir John S. and gave an exhibition heat. He went the mile in good time, considering the fact that he is out of training for the present.

About 200 enthusiasts witnessed the racing, which was conducted by the following officers: Judges, Chas. Raish, M. Gomez and W. R. Carpenter. Timers, R. R. Raish and George Magruder.

RACING AT DAVIS.

In spite of several counter attractions there was a pretty fair attendance at the matinee of the Davis Driving Club last Sunday, and the contests were the closest since the club was organized.

The first event was for three-year-olds and had three starters. Will Stone entered Ginger, J. C. Montgomery, Lad, and J. P. Montgomery, Jimmie. After an exciting contest Ginger took the first heat in 2:36. The second heat went to Lad, time 2:30, and he also took the third heat and race in 2:26.

The second race was a match between J. P. Montgomery's Jimmie, an old vet., and Stuart Montgomery's young green horse, L. J. The first heat was a pretty contest, as first one and then the other led, passing and repassing on account of breaks, but the veteran finally got under the wire first. The second heat was taken by Jimmie, which gave him the race. The time was 3:20 and 3:05.

W. R. Pugh's Hazel and Jack Cecil's Baby Wilkes were the starters in the next event. In the first heat Hazel broke badly and Baby Wilkes won easily, but the second heat was a pretty contest and was called a dead heat by the judges. The third heat was Baby Wilkes all the way. With training these two would put up a good race.

The Davis Driving Club seems to be getting on well, several new members being received this week.

UKIAH DRIVING CLUB.

The interest in the driving club is increasing and most of the business men of the town are now enrolled as members. It is desired to get as large a membership as possible and the members argue that all the business men of the town should be members whether they own a horse or not as the club will be the means of interesting people in raising good horses and will thus raise the standard of breeding.

It is expected that several matinees will be held during the summer and some interesting contests will be given. The track is being put in first-class condition for the races on the 3rd of July. It now has the reputation of being one of the fastest half-mile tracks in the state and the members are determined that it shall be no disappointment to the lovers of racing at the approaching matinee.

The members of the driving club want it understood that there will be no charge at the gate for the matinee on the 3rd of July the performance being free. There will be no betting or pool selling or bar privileges at the track. Trophies will, of course, be hung up for the winners of the events.—Ukiah Press.

WILL DURFEE SHIPS TO WHEATON.

The well known Los Angeles trainer and driver, W. G. Durfee, leaves there for Wheaton, Illinois, this week taking fourteen head of trotters and pacers with him. His first destination is Wheaton, Illinois, where his horses will be acclimated and make ready for the races in which they are entered. Mr. Durfee writes:

"I leave about May 30th. My horses are all in nice form and all fairly well along except Del Coronado 2:09¾ who has been mated with over forty mares this spring, consequently has been pretty busy in that line. Had the misfortune of losing my best trotter, Regalo by Osita 2:13¼, who died last week after having been sick for three weeks. His disease was brought on first by a severe attack of gastritis, or what the doctors called gastric colic, after which time the case was very much of a puzzle. In my opinion Regalo was the best trotter I ever had anything to do with, and on the day he was taken sick could not have been bought for \$15,000. Mr. Gerrity leaves about the same date for Peoria. His string is not a large one but they are all in excellent condition, Bon Voyage (3) 2:12¼ especially looks great."

Drink Jackson's Napa Soda.

SOME FACTS ABOUT HORSES.

Prof. Marshall of the Ohio Agricultural College in a recent bulletin compiled some good points about horses. He says there is about one horse for every four people in this country, and that three-fourths of the horses are on farms. Different kinds of work require different kinds of horses. A horse is of no particular value except for what he can do. To fulfill his mission he must travel. If he can draw a buggy containing one or two persons at the rate of ten miles an hour he is valuable as a roadster. Another horse that can draw his share of a load weighing upward of a ton, even though he moves slowly, performs an equal amount of actual work and is just as useful to his owner as is the roadster. Since all horses are valuable because they travel, although at various rates and under varying conditions, it will be interesting to make a study of those parts of the horse's body directly connected with his locomotion. It is not difficult to understand that with the horse, as with ourselves, all motion is the result of the action of the muscles. About forty per cent of the weight of an ordinary horse is muscle. All muscles concerned with locomotion are attached to bones, and when they contract they cause the bones to which they are fastened to move. The lower part of a horse's legs are nearly all bones, but the muscles in the body and upper part of the limbs are attached to various parts of the bony construction by tendons and can thus produce a motion of the parts located some distance away. The muscles we are discussing, when contracted, are about three-quarters as long as when at rest. The amount of motion produced by the action of the muscles of, say, one of the horse's hind legs, will depend upon the length of the muscles and the length and the relation of the bones to which they are attached. The commonest idea among students of this subject is expressed in these words: "Long muscles for speed, short muscles for power." We have already seen that a long muscle enables a horse to get over the ground rapidly. A short muscle, however, is not powerful because it is short, but because in horses constructed on that plan the muscles are thicker, contain more fibres, all of which pulling together when contracted exert a much greater pulling force than a long, more slender muscle. It is because of this that in buying horses to draw heavy loads we look for large and heavy muscles, while in roadsters we must attach importance to the length of the muscles.

The most of a horse's muscle is in the hind quarters. This may be a surprise to you, but the next time you have an opportunity to see a horse pulling a very heavy load study him carefully. You will be impressed with the idea that most of the work is being done with the hind legs. When the hind foot is moved forward the toe rests on the ground and the leg is bent at the hock joint; if the toe does not slip, and the horse is strong enough for his load the muscles above, pulling on the tendon fastened to the back and upper point of the hock, will close the joint, or in other words, straighten the leg and cause the body to move forward. It is by the performance of this act at every step that the horse moves, although, of course, the strain on all the parts is much greater when pulling very hard. This will also show the necessity of having large, broad, straight joints and legs, that give the horse the most secure footing. You have probably also noticed when driving that many horses put their hind foot on the ground in front of the mark left by the fore foot, and the faster they go the greater will be the distance between the marks made by the fore and the hind feet. This shows that the length of a step is determined by the hind quarters; it also explains the need of large, strong hocks and legs that are not so crooked as to seem weak or so straight as to lessen the leverage afforded by this very wonderful arrangement of the parts.

Then there are some other things that are desired in all kinds of horses. One of these is a short back—that is, short from the hips to the top of the shoulders (the withers). From what we have learned of the hind parts we see that the horse is really pushing the rest of his body along. If the back is short and strong instead of long and weak the whole body will move more easily and rapidly in obedience to the force produced in the hind parts. Although the hind parts have most to do with the horse's traveling, we must not forget that the front parts are also very important. No matter how much muscle a horse has or how strong his hocks are, if there is anything seriously wrong with his front legs he cannot travel, and so derives no benefit from his good parts. Some horses may be seen whose knees are not straight, others when looked at from in front show that their feet are not in line with their legs. Such animals are more likely to slip or strike one leg with the opposite foot, thus making themselves lame and unable to do any work.

There are a great many interesting things about a horse which cannot be told here, but which you may learn at home or from some neighbor who keeps good horses. We will, however, say something about horses' feet. Inside a horse's hoofs there are some very sensitive parts resembling the attachment of the finger nail and the finger. When anything gets wrong with the foot, these parts cause a great deal of pain and even though the horse is otherwise perfect the pain in his feet makes him too lame to travel. Horses with large, wide feet that are wide across where they touch the ground when you look at them from behind (or in the heels) are not likely to have this trouble.

NATURAL AND ARTIFICIAL GAITS.

Every now and again we are treated to a more or less profound dissertation on natural and acquired characters, including the gait of the horse and other animals. The trend of these philosophical papers are to the general effect that a horse, for example, is born with what the writers are pleased to call a natural gait, which is sometimes changed by the art of man. The horse, it is held by these philosophers, is born with the running gait in his head and then this same horse has his gait changed by the art and cunning of man into the trotting or pacing gait. And so the conclusion is reached that the horse always was a runner naturally and always will be. Our trotters, therefore, are not born, but made.

Some one attempted to convince one of the old time philosophers that the rain fell for the purpose of making the corn and the grass grow. The wise man said he had no concern with the purpose of the rainfall, that as a reasoning being he could only conclude that the corn and the grass grew because of the rainfall. He could see no good design back of the rainfall because at times it fell graciously upon the parched corn field and at the same time fell with equal force upon the sun cured hay in the adjoining field, which it ruined.

Some of our modern philosophers do not appear content to consider things rationally as they find them. They must needs go back of patent facts and speculate on the designs of that mysterious something which they call nature. They must have nature creating the horse to go at a gallop and stay at the galloping gait generation after generation. And along with this galloping gait they have nature put a galloping bump somewhere in his head so that if his legs don't want to gallop his head will force them into the natural gait.

Now, as a matter of fact, the horse does not gallop with his legs primarily because the pace is set in his head, but he gets the galloping desire in his head because that gait suits his physical conformation. Change this physical conformation by artificial means and along with this change will come the changed desire.

The walk and the trot is as much a natural gait with the horse as is the gallop. And with each of these gaits there is a feeling. The action is suited to the feeling, and the feeling changes with a change in conformation.

The horse which does not belong to a fast trotting family will have the trot nevertheless, and by artificial means this trot may be improved. Constant fast trotting for a number of generations changes the conformation so that it finally becomes just as natural for the trotter to go a 2:10 pace at the trot as it is for the thoroughbred running horse to gallop at that pace. It is not natural for the thoroughbred to trot at a 2:10 pace. He may be able to trot at a slow pace, but his conformation is such that he cannot trot fast. To make speed he must break into a gallop. He has the galloping desire because he has the galloping conformation. The trotting horse when bred long enough to the trotting gait, gets the trotting feeling and the trotting desire.

Animals change to suit the conditions under which they exist. It were perhaps more exact to say that it is the conditions that furnish the initiative; that the conditions of existence are responsible for the changes.

If the best bred trotters, with the trotting conformation and the trotting instinct, were turned out to roam in a wild state on the prairies, they would in time lose the trotting desire and the trotting conformation. They would suit their pace to their conditions, and these conditions would influence their style of going.

To talk seriously about one set of characters being natural and inborn and another artificial and acquired is to confess an ignorance of fundamental truths the tyro should know. All characters, including the gaits of horses, are natural or acquired or artificial. It all depends upon the point of view. If the horse acquires a peculiar gait while running wild that gait is in the first instance an acquired gait and then it becomes a natural gait. On the other hand if we take up this wild horse and change his gait by artificial means he acquires the gait we desire him to have, by design, and as his conformation and feeling change to suit this gait, the new gait becomes a natural gait, which will be transmitted by heredity with as much certainty as any other characters, no matter whether we call them natural or artificial. It is all the same whether a character comes to an animal as an accident or is created by design by the skillful breeder. If the character is fixed in the organism by long continued use, it will become a part of the inheritance of that organism's descendants, and it matters not whether the character is a mere matter of color or the complex characters which go to make up the running or trotting action.

Out of one crop of horses we have created many. The trotter and running horse or thoroughbred have pretty much the same ancestry. One has been trained for a great many years to gallop on a smooth track. He wastes no energy in picking his feet up high from the ground. He does not need to do so. He runs low, and has the straight shoulder conformation best suited to his gait. On the other hand the trotter must lift his feet in order to go fast at the trot. For this high action a different shoulder is necessary. Long continued work at the trotting gait has given this horse the trotting conformation and the trotting feeling, so that his gait is quite as natural as that of

the thoroughbred. In fact, we might pick out a lot of thoroughbreds and by use and selection breed a group of trotters from them. The early trotters which were successful carried a large percentage of thoroughbred blood, the best of them coming from thoroughbred horses which had a shoulder conformation that more nearly approached the true trotting horse shoulder than they did the ideal running horse shoulder. The product of these horses were kept at the trotting gait until it has become fixed and instinctive in our present day trotting horse. They have this gait in a "natural" way; are born with it, and they will hand it down to their progeny.

The man who spends his life at hard work on the farm acquires a gait to suit the conditions under which he exists, just as the man who does light work and dwells in a city. If the country bred boy comes to the city he acquires the city gait, and the city bred boy who goes to the country to live soon acquires the country gait, which is the one best suited to travel over the rough fields and country roads.

Would these different gaits be transmissible by heredity? Would the boy be born with the acquired gait of his ancestry?

He would to a great extent be born with the intention toward the ancestral mode of going. It would be more natural for him to walk as his ancestors had walked than it would to walk in any other way. He would acquire another kind of gait if he were surrounded by conditions suitable to such a gait. At all events the hereditary impression would be light and the change would be easily effected. Moreover, mankind is more effected by example than the lower animals are, and almost unconsciously he does a great deal of self-training. There is the general desire on the part of mankind to "do in Rome as the Romans do."

As a general rule, we are likely to underestimate the power of conditions to change the nature of animal or plant life. We are disposed to measure the changes artificially wrought in the horse by years rather than by generations. It is but three or four generations from some of our prominent living sires to Hambletonian 10. Reckoned by years it is a life time. Yet in these few generations the trotting instinct and the trotting conformation has been so well fixed that it has become a birthright. The changes, if we think of what has occurred in a few generations, have been brought about quickly.

We are often led into the belief that time—a very long period of time—is necessary to fix characters so they will be a natural inheritance, from the study of wild animals. We see the fixed type of the buffalo, the elk, the deer, the wolf, the fox, etc., and notice no change in either during the acquaintance of a life time. We think of the years upon years it has taken to fix these permanent types, and somehow we are impressed with the idea that they have no end of "natural" characters that are unchangeable. As a matter of fact these "natural" characters, fixed by existing under similar conditions for ages, are just as subject to the laws of change as are the characters of domestic animals, created by crossing and selecting. The difference is only one of degree. The characters of long standing are not as readily impressed as those more recently acquired. But they are subject to change, nevertheless, and the newly acquired character becomes a "natural" character in place of the one lost. Furred animals in the south have a different coat from those of their own variety of the north. The difference is marked, both as to texture, quality and color. Yet these change readily under a change of conditions, and these changed characters remain permanent "natural" characters so long as the conditions of existence are not changed.

When we give our horses the trotting gait we give them the trotting desire and the trotting conformation. All this is handed down by heredity and their trotting is just as much a natural character as their walking or galloping gaits.

Most of us have been schooled in that other error, viz., that it requires a long line of ancestors with the necessary acquired characters made manifest. We all may know that we do not need a horse with a long line of record ancestors to create trotters from. We can get enough speed inheritance for our purpose through six or eight record horses out of fourteen. Of course we want good blood behind this, but not necessarily highly developed blood.

McKinney is one of our famous sires. His sire had a mark of 2:27, and his paternal grandsire a mark of 2:22, while his maternal grandsire had a mark of 2:20½. His dam and both grandams are recordless. With this light speed inheritance he produces that which may be developed to go very fast. His is a well balanced pedigree. His sons are also prepotent in the matter of speed.

Moko could not be much in the estimation of those who believe records—fast records alone—make desirable pedigrees, for he is not highly developed himself, and cannot boast of a great record ancestry, having but three record ancestors in the nearest six. And these records are not much to boast of. Yet this horse is well bred, if we are to judge him by what he has done, rather than by what the "intense" theorists would have him do. He gets extreme speed out of a great variety of mares, and as further evidence that this speed and trotting desire is born with his foals, it is only necessary to refer to the fact that he heads the list of sires of early speed, as shown by his future winners.

Trampfast, a young horse, much in the public eye at present, is another example of a great trotter

which has something more than mere records behind him. He is well bred after the fact. That is to say his ancestry have proven that in spite of the fact that they do not show a mere lot of fast records they are able to produce fast horses. They have enough speed but they have something else quite as important as shown by the records. Trampfast is by a fast horse not worked hard enough to burn up his substance. His dam was a natural trotter, able to show a 2:20 clip as a yearling, but she broke down and was therefore not trotted to the fast record she might have made. The speed potentially is in the ancestral lines of Trampfast, and they have been made manifest in him. But what is more to the point he has inherited something besides speed, and that is the robustness which is often lacking in horses which have too many fast and overworked horses in the ancestral lines. He has enough artificial speed to make his speed a natural inheritance that he will pass on to his progeny as natural characters.

All of which serves to show how a little of acquirement soon becomes a matter of natural inheritance. And to the studious breeder it further shows that there is much of value in a trotting horse's pedigree besides mere quantity of speed ancestry.

At this time of the year there are to be found on many of the large breeding farms seven and eight months old colts and fillies trotting far below the three-minute gait. These youngsters have not had time to acquire speed and the speed desire. It was born with them and they are ready to give it material expression up to the limit of their physical powers. The cold-blooded colt which might acquire considerable speed in later life as a result of training will not do the things the youngsters are doing all over the country, which have a reasonable line of speed and strength behind them.

Not only do artificial gaits become natural, but they are more readily fixed as an inheritance than most people suppose they are. The continuous lines of speed ancestry in the pedigree are not essential, as is amply proven by the records. All the competent evidence, taken as a whole, tends to prove that the trotting bred colts of the present and future are more likely to suffer from too much ancestral record than from too little.—C. B. Whitford in Chicago Horseman.

ANSWERS TO CORRESPONDENTS.

J. S. F., Haywards—We are unable to furnish you any information about the breeding of your mare. The fact that she is branded 27 under the mane is evidence that she was bred on some farm where records were kept. The only way for you to get definite information of her breeding is to trace her back to her breeder. Have the person from whom you bought her tell you from whom he purchased the mare, and in this way trace her ownership back to the farm where she was bred. This is the only way we can suggest for you to get her correct breeding.

A. Dolan, San Francisco—Al. Sandy is by Wayland W. and has an official record of 2:29¼ pacing according to the Year Book. He doubtless has a matinee record, or bar, possibly a bit faster than this, but we have no official record of it. He was racing ten years ago, but we do not know his age. We can find no account in the Year Book of his winning a race. The Secretary's books of the San Francisco Driving Club, and the old Golden Gate Driving Club may furnish you with the information you desire.

RACING AT CONCORD JUNE 21ST.

C. R. Windeler, the new manager of the Concord, Contra Costa County race track, will give a one-day meeting there on June 21st. A purse of \$150 open to all trotters and pacers will be given, also a purse of \$75 for pacers and trotters of the 2:20 class. Entrance to these pupes will be ten per cent.

In addition to these races a purse of \$40 will be given for roadsters, the entrance fee being \$2.50.

The Concord track is an excellent one, and there is no doubt but a large crowd will gather to witness the sport.

Mr. Windeler desires that horsemen from Pleasanton, San Francisco, Vallejo and other points will enter their horses in these races, and promises all fair treatment and good accommodations for their horses.

Fanella 2:13, the dam of Sadie Mac. 2:06¼, and Todd 2:14½, did not prove to be with foal this year and has been bred to Mokides, the four-year-old brother to Siliko, 3, 2:11¼.

CATARRHAL FEVER.

This is an insidious disease for it so often deceives the very best of horsemen, and often is so intermittent in its nature that the poor horse is worked on his "good days" only to become alarmingly bad the next day. This disease is contagious and infectious, and in some ways is more serious than distemper. The only successful way to treat this malady is to kill the germs of bacteria that produce the disease. Be sensible. Benefit from the experience of others. Get Spohn's Distemper and Cough Cure and settle the case in short order. Spohn's cure does not wait for the disease to "run its course," but routs the germs from the start and soon restores the normal functions of the impaired organs. All druggists, turf goods houses and manufacturers will deliver it to you at 50 cents a bottle, \$5 a dozen bottles. Don't wait, but be ready.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The Trap Shooters' League shoot at Ingleside last Sunday was slimly attended, weather conditions, dust and wind, were such, that it made the shooting extremely disagreeable for those who were present and those who staid away have been congratulating themselves since on a lucky absence. The day, for a wonder at this season, was the worst in many years.

The regular program was declared off and a series of special events were shot, those present would not be denied the pleasure of powder burning.

First event, 20 targets—Tony Prior 19, Dick Reed 19, A. J. Webb 19, C. C. Nauman 18, E. Holling 18, M. J. Iverson 18, Johnson 17.

Second event, 20 targets, 10 double rises—Nauman 18, Webb 18, Reed 16, Prior 15, Holling 14.

Third event, 20 targets, "one man in the pit." The shooter being stationed in the retrieving pit near the line of live bird traps, the targets were taken sideways from the blue rock traps—Prior 17, Holling 17, Reed 15, Nauman 14, Webb 12, Iverson 12.

Fourth event, 25 targets—Reed 23, Prior 23, Holling 22, Nauman 22, Iverson 22, Nauman 22, Webb 22, Webb 21, Nauman 20, Prior 19.

Fifth event, 25 targets—Reed 25, Webb 25, Holling 25, Iverson 23, Prior 21, Johnson 20, Nauman 19, Wilson 15.

Sixth event, one man up, use of two barrels, 25 targets—Webb 21, Reed 20, Nauman 20, Holling 19, Wilson 17, Prior 16, Iverson 15.

Seventh event, "walk around," 25 targets—Iverson 25, Reed 23, Holling 23, Wilson 23, Cate 17, Nauman 13, Cate 20, Wilson 18, Nauman 15.

Trap shooters will find some interesting data in Trade Notes on pages 10 and 11.

The new grounds of the Crescent Gun Club at Venice-by-the-Sea are popular and draw regularly a good attendance of shooters.

The new grounds at Salinas have evidently struck home with the valley shooters. The first shoot in the 250-bird contest for a trophy took place at Alisal Park shooting grounds on Sunday last, the event was quite successful. The scores made by those who faced the traps in this first handicap event, at fifty birds, were as follows: Sixteen yards—Smith 32, Gross 27. 18 yards—Parker 34, Viera 42, D. McFadden 38, G. McFadden 36. 20 yards—Pearson 41, Greene 44.

The result of each shoot for the trophy will be watched with interest, as there will be four other trials at the traps before the winner will be known.

The Glendale Gun Club, Glendale, Los Angeles County, will hold regular blue rock shoots, on the rifle range grounds in Verdugo canyon, one Sunday each month, the remaining Sundays being devoted to rifle shooting. In a 25 target race May 17th the scores were: W. E. Coan 15, D. R. Easton 14, E. V. Parker 12, H. H. Easton 12, J. A. Bullis 11, R. S. Jones 10, H. D. Crutcher 10, H. Valiant 7.

The Ely Gun Club, Nevada, will open the trap season on the first Sunday in June with a live-bird shoot at which they expect to use between 1000 and 1500 birds. The entry list at present is signed up for 650 birds.

At the recent Idaho-Utah Sportsmen's Association tournament at Salt Lake City, May 7th, 8th and 9th, Fred B. Mills of Long Branch, won general high average with 380 out of 400.

The big event of the closing day of the Salt Lake tournament was the Salt Lake Handicap at 50 targets. E. D. Farnim of Sand Point, Ida., 20 yards, broke 48 out of 50 and won. McClure of Tremonton, Ida., won the individual championship with 25 straight. The team shoot was won by the newly organized Wasatch Gun Club of Ogden—Egan 17, Skeen 19, Anderson 20—56 out of 60.

The Wheatland Gun Club and guests propose to enjoy the annual club dove stew July 19th.

The twenty men of the Southern California Rifles who will try for places on the team which it is expected will shoot a match with the sailors of the Tennessee and the California when these warships return to southern waters, have been selected from the shooters who were at the elimination match last Sunday, and who shot over both ranges. The men are: Neff, Wolf, Andrews, Beatty, Overhart, McClellan, Von Weber, Caston, Backus, Hendricksen, Ostrander, Don Orrill, Hamby, Tracy, Barnes, Tailman, Hillerman, McIntire, W. C. Harrison, Watts.

These men will practice at Scheutzen Park Sundays using a separate target and the scores at each range will be totalled and eliminations made accordingly. Arrangements will be made to have both ranges in use at the same time. The elimination match and target practice by the other shooters will be conducted

under the rules of the National Rifle Association, to which the Rifles belong.

Records for the Illinois state shoot are expected to be broken when the annual event is held at the grounds of the Chicago Gun Club. The entry list is already larger than ever before, and a close contest is expected for both the amateur and professional championships.

Chauncey I. Powers and Herbert Clark are now thought to be the most dangerous candidates for the amateur state title, held by Joseph Barto. Powers has been shooting in great form in various tourneys throughout the state and also in the South. His southern trip must have had some effect in seasoning him, and in this respect he will have the advantage over Barto, who did not leave the city this winter and who has done comparatively little shooting. Barto is the only local shot who has ever represented his club in the Grand Prix de Monaco, the big shoot held yearly at Monte Carlo.

In the professional handicap Frank Riehl will lose his title unless he changes his present plans. He is in Montana and is not expected back in time for the event. Moreover, he has dropped shooting, to a great extent, for the last year. Lee Barkley, George Maxwell and Ed. Graham are thought to be the men most likely to win it.

Barkley has been shooting in remarkable form all spring, is thoroughly seasoned and now leads the professionals of the country with a high average. Rolla Heikes, Fred Gilbert and W. R. Crosby are getting into form, however, and his percentage may be cut down as soon as they are fairly in their stride.

Frank Fuller, the amateur champion of Wisconsin, is to be there for the state shoot, but cannot take part in the championship event. This was decided by the tournament board, as it was agreed that the title of the state should be limited strictly to marksmen who were residents of Illinois.

Herbert Clarke, amateur champion of the United States, is also to shoot at this meet. He has done comparatively little since he won the honors at the Grand American meet last year. Herbert Thwaite is also regarded as a dangerous amateur. So is Jesse Young. Both men have been doing well in the club fixtures and their work in the big contests will be keenly watched. J. R. Graham is also a strong factor.

Alec Vance, who won the L. C. Smith trophy last year, will be back in the game. This emblem is shot under rules which permit of two barrels being used and is entitled the "double-barrel championship."

MANY MOUNTAIN LIONS KILLED.

The hunters' license law passed by the legislature at the last regular session is the means of effectively clearing the State of mountain lions, the dreaded animal that destroys more deer than are killed by the rifle. The effect is indirect, but the result is nevertheless all that could be desired. To explain: The money paid into the State by licensed hunters created a fund which is being used as a reward money (\$20 a head being paid for mountain lions) to induce hunters to kill the animal that destroys deer.

The State will pay out for mountain lion rewards for the month of April \$800, according to the reports turned over to the State Board of Examiners by the Board of Fish Commissioners, says the Sacramento Union. The money represents that forty lions have been killed in the month of April; also that 200 deer and over per year will live, whereas were the big cats still in existence they would have been clawed to pieces. The figures might be carried further.

It is only since the hunter license law, by which a citizen of the United States pays \$1 per year and a foreigner \$10 for the privilege of hunting that the Fish Commission has been able to offer a reward that would be any inducement to the hunter. In the past ten months, when the law has been most effective, the State has paid out on an average of \$500 per month. This represents the death of 250 mountain lions in the past ten months, with the accompanying good result to the health of the deer. It must be remembered that the lion sometimes kills human beings so the work of the Commission in destroying the animal is a great one.

Most of the panthers are killed along the coast, in Humboldt, Mendocino and Del Norte Counties, and also south in the San Jacinto mountains. Siskiyou and Shasta Counties also furnish their share. A notable fact is that almost every county in the State that contains a hill has furnished a dead panther.

It is thought that at the present rate the Fish Commission will have succeeded in destroying all but a very few of the animals in a couple of years. As long as the hunter license law remains in force there will be money to pay bounty. Thus the deer in the mountains will be preserved and the hunter will unconsciously pay a mite for his sport.

From the Sisson hatchery there will be available this year 1,000,000 fry of rainbow and brook trout for the stocking of favorable streams.

STATUTE AGAINST AUTOMATIC GUNS UNCONSTITUTIONAL.

A case was recently decided on appeal to the Quarter Sessions Court of Delaware County, Pennsylvania, that will be of considerable interest to the sportsmen of this country in view of the fact that, in various States, Pennsylvania included, laws have been passed prohibiting the use of automatic or repeating shotguns.

Thomas McCoombs was arrested, taken before Robert Smith, an Alderman of the city of Chester, charged with violating the provisions of the statute law of Pennsylvania. He was, after hearing, convicted and sentenced to pay a fine of fifty dollars or suffer imprisonment for fifty days.

The statute is as follows: "Sec. 1. Be it enacted, that from and after the passage of this act, it shall be unlawful for any person to use what is commonly known as an automatic gun for the killing of game in this commonwealth. Each and every person violating any provision of this section shall be liable to a penalty of fifty dollars for each offense, or shall suffer an imprisonment in the common jail of the county for a period of one day for each dollar of penalty imposed.

"Sec. 2. Each and every magistrate, alderman and justice of the peace within this commonwealth shall have the right of summary conviction in all matters pertaining to a violation of any of the provisions of this act, and all prosecutions for violation of any of its provisions shall be conducted and the penalties disposed of in manner and form as is now prescribed by law for violation of the game laws of this commonwealth."

An appeal was taken to the higher court, the grounds being that the fine was illegally imposed, because the act is in derogation of the Fourteenth Amendment of the Constitution of the United States, which declares: "Nor shall any State deprive any person of life, liberty or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

The further contention was made that the act was also in violation of Section 1, Article 1, of the Constitution of Pennsylvania, viz.: "All men have certain inherent and inalienable rights, among which are those of enjoying and defending life and liberty of acquiring, possessing and protecting property and reputation, and of pursuing their own purpose."

Also of Section 7, Article 3, of said Constitution, which prohibits the General Assembly from passing any law "granting to any individual any special or exclusive privilege or immunity."

In discharging the defendant and granting the appeal this month, the court held: "There is no doubt of the right of legislation to regulate the manner of taking game, but in doing so, it must not discriminate in such way as to produce injustice to individuals."

The statute prohibits the killing of game with automatic guns and permits it to be killed with all other kinds of guns.

"This is a discrimination against the makers of automatic guns, and deprives them of the equal protection of the laws guaranteed by the Constitution of the United States, and the Constitution of Pennsylvania."

The foregoing is substantially the same view (on the Fourteenth Amendment) as was taken by Judge Ross of the United States Circuit Court several years ago, in the Marshall case.

Marshall was prosecuted under an ordinance passed by the Board of Supervisors of Marin County prohibiting the use of repeating shotguns. On appeal to the Circuit Court, the contention was that the ordinance was unconstitutional—for one reason, in that it prevented the defendant from enjoying the rights of his property, the alleged shooting with a pump gun have taken place on defendant's own land.

BLUEJAYS ARE MARAUDERS.

Referring to a paragraph in last week's issue in which was questioned the accuracy of the general opinion as to the bluejay's destruction of young quail and other birds and also of birds' eggs we are in receipt of a communication from a gentleman sportsman who writes:

"Referring to the above article which appeared in the Breeder and Sportsman of the 23rd inst., allow me to state that from personal observations made on my place in Alameda I am of opinion that the bluejay's principal article of food at this season of the year consists not only of the eggs pilfered from the nests of other birds but of young birds also. During the past few days I have witnessed three instances of a bluejay taking little birds from their nests and devouring them. When I have stated concerning their recent actions can be corroborated by two other persons if necessary. Knowing of their habits I have for several years past taken great pleasure in killing them whenever opportunity offered."

This is the first instance we can recall in the nature of corroborative evidence against the bluejay, and knowing the writer personally we give the statement full credence. In this respect we invite further correspondence and information, for notwithstanding the unsavory reputation the bird has among sportsmen in this state, it seems to have quite a few friends.

SAN FRANCISCO FLY-CASTING CLUB.

DOINGS IN DOGDOM.

HYDROPHOBIA SAID TO BE INCREASING.

The accuracy and delicacy scores given below show a remarkably skillful development. This is the work that tells on the trout stream. These records are all the more interesting for the reason that several of the contestants were new beginners a season ago.

Saturday Contest No. 5, Classification Series, Stow Lake, May 23, 1908.

FISH LINES.

A recent press dispatch from Yuba City states: The local anglers will enjoy some excellent bass fishing this season. A prominent farmer was in from the tule district to-day and reported that the bass are very plentiful in Butte Slough—in fact, more so than ever before.

Fish Commissioner Birmingham has been out through that section during the past few days endeavoring to locate some of the parties who have been carrying on illegal fishing in the catching of bass out of season. The bass season does not open until June 1st, but the fish now take the spoon and worms freely, and consequently some of the anglers cannot resist the temptation of gathering in some good messes which they market at a good figure.

Trout fishing in Southern California has been excellent since the season opened. Harry Carver and Frank Shipley, Santa Paula anglers, captured a big steelhead in the Ventura River, near the old school house, below Matilija Springs. It measured 31½ inches and weighed 7½ pounds when dressed.

Some angler had missed the record-breaking capture and lost a foot of leader and a fly, into the bargain, as the bit of tackle was dangling from its "lower lip." It was a bouncer and a beauty.

Leigh Garnsey, assistant general manager of the Huntington-Redondo Company, fishing from the Wave Motor Pier at Redondo, on Friday, May 22d, with the regulation light tackle, caught a striped bass weighing nineteen pounds and thirty-three inches long, the first striped bass of the season caught in Southern California waters.

Mr. Garnsey was fishing with a No. 5 hook, single gut leader and single gut snell for corbina, with sand crabs for bait. When the bass struck he thought it was a shark. The fish put up a splendid fight, at one time carrying out 400 feet of line. Time, twenty minutes.

The catch will be brought to the attention of the fish authorities at Washington, some of the experts having expressed the opinion that the striped bass could never be made at home in Southern California waters. As a matter of fact striped bass are taken down south ever season.

Early this season George Barnes caught a pound trout in Mill Valley creek, just where the small stream enters the marsh. Going back to the same place next afternoon, he was surprised by getting a strike from a pound and a half fish which he landed.

The record catch of the season was made the morning of May 16th by C. A. Gilmore, who, from the launch Success, caught 900 pounds of yellowtail and bonita within half a mile from the breakwater at Venice by-the-Sea trolling with medium tackle. The catch demonstrates that deep sea fishing is beginning to improve again.

Trout fishing in the creeks and streams reached from Nevada City is reported to be excellent at present. Fishing in Deer creek, one day last week, a 19 inch trout was landed by a youth who was on the Broad street bridge.

A. Casamerbe, a resident of the upper section of Nevada county, was caught fishing with a net in Truckee river and fined \$30 last week.

The Ladies Kennel Club is now permanently organized with the following list of officers: Mrs. W. C. Ralston, president; Mrs. Dr. J. Auburn Wiborn, vice-president; Mrs. Dr. Gertrude Spriggs, secretary; Mrs. George Flexnor, Mrs. George A. Nieborger, executive committee. A one day show is on the tapis for San Francisco along towards fall. We predict that the entry will be a large one and that the show will be the deserved success that we cordially wish will follow the club during its career.

There will be a Collie show in connection with the State Fair at Sacramento next September.

Mr. S. Christenson has recently purchased from Mr. W. W. Van Ainsdale three English Setter puppies each about ten months old that he considers splendid material for the next Coast Derby. Two of the youngsters are by Count Whitestone out of Keepsake, the other is by Ch. Caesar out of Peach Blossom.

Chris's judgment in field trial eligibles has proven correct in more than one instance during many years past and if there is anything in these puppies it will be thoroughly developed. The pups are now in charge of the "Old Reliable" W. B. Coutts.

San Rafael will hold a one day show in July. The date will be announced next week, probably near the end of the month. Local judges will be in the ring, we are told.

Stockton has claimed dates for a show to come off the latter part of September.

It is reported that San Jose will hold a show in November in conjunction with the Poultry show.

At the annual meeting of the Washington State Collie Club, the following officers were elected for the ensuing year:

President, Dr. L. W. Brydon, Seattle; first vice-president, H. W. Ilman, Everett; second vice-president, Mrs. L. W. Brydon, Seattle. E. L. Winslow was re-appointed secretary and treasurer.

E. C. Bickford of Everett; Mrs. L. W. Brydon and Fred Leisler of Seattle, were elected members.

It is the intention of the club to give a show next winter, when the Collie will be in perfect coat. The annual report of the secretary shows the organization is flourishing. In appreciation of the efforts of the club to advance the Collie to the foremost rank of dogdom, the merchants of Kent presented the club with a \$60 cup; another beautiful cup was presented by Samuel Hyde of Seattle.

Frank E. Watkins writes us follows: "As a member of the board of directors of the Portland Kennel Club I can not let your misstatement regarding our late show as to entries compared to our former shows go unnoticed. You have evidently been misinformed for by looking over the catalogue which I sent you the day after our show closed, you will see that we had something like 254 dogs entered and no padding either. We had 233 dogs on the benches, which is about 25 dogs benched more than at any of our former shows, and over 50 more than last year. This year's show was our largest and best in every way and a money-maker besides and I can not see why anyone would make a mis-statement to you regarding our show. Kindly correct your statement and give us credit for having the best and largest show in our career, this year."

For smug prevarication and egotistical self-presentation of a bunch of hot air wild flowers the following by "Wayfarer," referring to the Seattle show, is about the best in its peculiar line:

"No one dreamed of such an entry and of course naturally enough, they began to look for the cause, when one bright individual said: Look who's here," pointing to the Judge, which caused quite a laugh, but while there was a whole lot of truth in the wit's remark, there's no doubt but that Secretary Bailey's untiring efforts and Judge Bradshaw's popularity were accountable for the large entry. The daily papers were loud in their praises of the Judge's awards (something unusual in this neck of the woods; the judge generally gets an awful turning over) and not a kick was recorded."

As a matter of fact the Seattle papers were decidedly shy in laudatory notices of Fried Liver Jack, merely prefatory in mention of his connection with the show. The general indifference was so thorough that self-boasting was an emergency resort. This will not mislead fanciers who are capable of judging for themselves.

There is no import tax or other bar to the entry of dogs at Honolulu for the coming bench show in the island metropolis. Dogs, as well as other animals are, however, examined before landing, to prevent the possibility of the introduction of contagious diseases.

It looks, from recent data, as if the Hawaiian show this year will be a corker. The island fanciers have recently secured a number of good dogs of various breeds, enthusiasm and interests in the doggy cult are apparently taking on a strong upward tendency.

(Continued from Last Week.)

Skepticism as to Existence of Rabies.—In spite of all the work that has been done on rabies there are still many persons, including some medical men, who are skeptical regarding or absolutely disbelieve the existence of this disease. Some physicians say that they have been practicing fifteen, twenty, or thirty years and have never seen a case; but this proves nothing. During the past fifteen years but three cases of the disease have occurred in human beings in Washington, D. C. It can be readily seen, therefore, that only a small percentage of the medical practitioners would see them.

Others have advanced the statement that in Constantinople, where there are more dogs than in any other place of equal area in the world, rabies is unknown. This statement has been disproved by Remlinger, director of the Imperial Bacteriological Institute in that city, who reports many cases of the disease in Constantinople and adjoining provinces. But even if it were a fact, it is no more remarkable than the fact that in London, where there are more people than in any other place of equal area in the world, bubonic plague is unknown, which fact, however, is not remarkable at all. It simply means that the specific cause of the disease is not present in that particular locality.

Any person in the United States can see cases of rabies in one or more species of domestic animals if he will get in communication with veterinarians, health officers, or laboratories where the disease is constantly being found. With the increasing frequency of the disease in the United States and the characteristic microscopic changes which can be constantly demonstrated, together with the fact that many prominent investigators have been writing on the subject lately, especially in reference to the Negri bodies, there appears to be less skepticism in regard to the disease.

Period of Incubation.—The period of incubation of rabies varies within wide limits, being more or less different in the various species of animals. It also differs in the same species, depending on several important factors, as the location of the bite, the character of the bite, and the amount of the virus injected. Bites about the head, face, and hands in human beings are the most serious because these parts are the most exposed. The clothing on other parts of the body tends to wipe the saliva from the teeth, and thus prevents it from inoculating the wound. Bites about the face and head are also more dangerous than on other parts because they are so thickly supplied with nerves and the distance the virus has to travel to reach the central nervous system is short. Through experimentation it has been pretty definitely proved that the virus travels along the course of the nerves rather than by means of the blood current. Deep, penetrating, or lacerating bites are obviously of greater import than superficial scratches, as more virus enters the former wounds and they are difficult or impossible to cauterize completely. Severe hemorrhage from the wound is favorable, as there is a possibility of part or all of the virus being thus mechanically removed. Infection and suppuration of the wound may also destroy the virus. None of these conditions, however, can be depended upon, but they account for the fact that a considerable proportion of persons and animals bitten do not contract the disease even when no treatment is given.

The shortest period of incubation is six days in the rabbit. This short period can only be obtained with what is known as "fixed virus" obtained in the laboratory by repeated passage of the ordinary virus through a long series of (50) rabbits. The disease as contracted from the bite of a rabid dog requires an incubation period of from fifteen to ninety days. At times this incubation has been prolonged greatly in excess of the above figures. In one case which came under the observation of this laboratory a dog belonging to one of the District fire companies was bitten by a rabid dog which was examined by the Bureau. The animal, being a great pet, was not killed and remained normal for exactly one year, when it came down with a typical case of rabies which was proved by microscopic examination and rabbit inoculations. Such a long incubation period, however, is so extremely rare that it is usually not considered in formulating quarantine laws for the prevention of the disease. Shorter periods of incubation than fifteen days have been reported, but they are very unusual.

Symptoms of Rabies in the Dog.—The symptomatology of rabies is of primary importance, since a knowledge of the manifestations is the only ante-mortem method of recognizing the disease, thereby allowing measures to be taken to control the animal, and thus prevent its doing any serious damage. The symptoms are generally described under two types, the furious or irritable and the dumb or paralytic. The latter type is always seen in the terminal stages of the former; and, when the cases are of the dumb form from the outset, it is probable that the toxemia is overwhelming, and such cases usually run a more rapidly fatal course.

The Furious Type.—In the furious type, following the variable period of incubation, there is first noticed a change in the disposition of the animal, which should at once excite suspicion. Playful animals become morose, and quiet, reserved dogs may become unusually affectionate. The animal is nervous and easily excited, but obeys any command of its owner.

In the course of a day or two the nervous condition increases and the animal becomes irritable and may snap if approached suddenly or startled. The bark becomes changed to a long drawn out combination of a whine and a howl, impossible to describe but never forgotten when once heard. Some dog owners speak of it as being somewhat of the nature of the bark of a foxhound while in the hunt, but this does not properly describe it. The animal if loose may pick up and swallow straw, sticks, stones, leather, and other foreign bodies. In some cases there is a tendency to bite parts of the skin, usually at the point where the animal was bitten, and in one case under the writer's observation the animal chewed the skin over the os calcis until the entire head of the bone was exposed to view. This tendency to bite the skin is probably due to an intense localized pruritis.

There is a marked tendency in these early stages for the animal to seek quiet spots and to hide in corners or dark places. If an attempt is made to remove the animal, the person is in great danger of being bitten. The restlessness of the animal becomes more marked. He may stand looking intently into space as if at an imaginary object. There is difficulty in swallowing, and saliva may dribble from the mouth. The irritability increases until the animal becomes furious, biting at a stick or other object thrust toward him. At this stage if the animal is not secured he may leave home and travel for miles. During the long journey he will fight with dogs and attack other animals in his path, but never barks or makes and outcry during these attacks. The animal may go 20 or .5 miles from home, but always returns, if not prevented, in an exhausted condition, covered with wounds and dirt and greatly emaciated. Signs of commencing paralysis now appear, with dropping of the lower jaw, inability to swallow, and irregularity in the pupils. The legs finally become paralyzed and the animal passes into the dumb form of the disease.

Dumb Rabies.—This form of the disease occurs in only a small percentage of the cases. The symptoms are somewhat similar to those of furious rabies except that marked irritability is absent and there is an early appearance of paralysis. This form of the disease, therefore, renders the dog less dangerous than the furious type. The animal lies quietly in some secluded place and appears to be stupid. The paralysis of the jaw comes on early, the tongue protrudes and becomes congested and covered with dirt, giving rise to the term "black tongue," which is a bad synonym used in some localities, especially in the South, for this form of the disease. The use of this term to designate dumb rabies should be discouraged, as it tends to confound the disease with dog distemper. The hind legs, trunk, and forelegs become paralyzed, and death usually ensues in about three days, while the furious type lasts from six to eight days.

Recovery from rabies in the dog after well-marked symptoms have developed is possible, and authentic cases have been reported by Pasteur, Roux, Babes, Courmont, and Remlinger. This is so rare, however, that it is of little importance except in cases where a person has been bitten by a dog showing all the symptoms of rabies and the animal afterwards recovered. The saliva in such cases remains virulent for several days or a week after the subsidence of symptoms, and a diagnosis can be made by inoculating rabbits with some of the salivary secretion.

Summary of Symptoms.—The important symptoms, any one of which when well marked should render the dog suspicious and lead to its being confined, are: (1) Change in disposition; (2) Alteration of voice; (3) Inability to swallow; (4) Leaving home and returning in an exhausted and emaciated condition; (5) Paralysis of the jaw; (6) Swallowing abnormal substances, as wood, stones, etc.

Proper Disposal of Dogs After Biting Persons.—In many cases in which a person is bitten by a dog there is immediately a great popular clamor to have the animal at once destroyed. This should always be discouraged. The mere fact that a dog inflicts a bite on a human being does not by any means prove that he has rabies. This is the dog's only means of defense and he bites instinctively when harmed. When the dog has been killed at once and sent to the laboratory, an examination is made for the microscopic evidence of rabies, which often is not found, as in many such cases the dog is not affected with rabies. In order to be on the absolutely safe side, however, the laboratory is then required to inoculate rabbits with the brain tissue. The incubation in rabbits requires at least two weeks, during all of which time the person bitten is kept in suspense. On the other hand, if the animal were left to live it could be examined by a competent veterinarian for evidence of rabies, and if it remained normal for ten days the bite would be harmless.

Therefore, after a person has been bitten, do not kill the dog unless a competent veterinarian has pronounced the disease rabies or the dog is showing well-marked symptoms. Instead, when practicable, the animal should be tied up securely and watched carefully for a week or ten days. In case suspicious symptoms do develop the dog should be examined by a veterinarian familiar with the disease, and if he pronounces the case rabies the animal may then be killed and the laboratory will be able to find the pathognomonic microscopic evidences. At the end of ten days the dog may be killed, if so desired, but if the animal is valuable and shows no symptoms of rabies there is no reason for destroying it. In this way valuable dogs can often be saved to their owners.

Post-Mortem Examination of Carcass.—When a dog suspected of having rabies has died or been killed a post-mortem examination should be made. In rabies there are no absolutely characteristic post-mortem findings. Particular attention should be paid to the stomach. The mucous membrane of this organ is frequently congested, and in some cases a marked hemorrhagic inflammation is present. Foreign bodies, as sticks, straw, stones, coal, dirt, etc., and an absence of food in the stomach are very suspicious indications of rabies. The absence of these conditions, however, does not by any means exclude rabies. Undoubted cases of the disease have frequently been received at this laboratory where a considerable quantity of food was present in the stomach and the mucous membrane was in a normal condition. Redness and congestion of the pharynx and larynx with cerebral and meningeal congestion are also to be found in some cases. A negative post-mortem examination when the animal has died naturally also tends to suggest rabies as the cause of death. From the fact that the pathological alterations are not constant they are not relied upon to any extent in his laboratory. There are cases however, in which, the microscopic changes being indefinite, we are forced to get all possible information, including history and post-mortem findings, if we are to draw conclusions without waiting for rabbit inoculations to decide definitely the diagnosis.

Preparatory Methods.—It is only necessary to forward the head to the laboratory after the post-mortem examination has been made. This is removed with the skin intact by cutting through the middle of the cervical vertebrae. It should then be wrapped in dry cheese cloth or other material and forwarded by express. During very warm weather the head, after being wrapped, should be placed in a tin receptacle and packed in a wooden box containing chopped ice. By removing the head at the middle of the cervical vertebrae the plexiform ganglia are left intact, and upon arrival at the laboratory they can be removed and examined microscopically for the lesions described by Van Gehuchten and Nelis, and a diagnosis can be made within twenty-four hours.

This plan is not practicable in summer when several days are required for the head to reach the laboratory, as the brain undergoes softening, becomes invaded with bacteria, and the experimental rabbits inoculated are liable to death from septicemia. Putrefactive changes are also liable to occur in the ganglia, and thus render the conclusions from their examination indefinite. In case the time required to reach the laboratory is considerable and the weather warm, the brain, including the medulla oblongata, should be removed as carefully as possible in one piece, immersed in two to three times its volume of pure neutral glycerine, and sent in this manner. In large animals one cerebral hemisphere and the medulla are sufficient. In some cases even with this method the Negri bodies can be demonstrated in the large nerve cells of the hippocampus major, and thus a diagnosis can be made in a few hours without waiting for the rabbits to develop the disease, which requires from two to three weeks.

It must be remembered, however, that to get the best results with the rapid methods of diagnosis it is essential that the animal be allowed to die naturally from the disease or that it be destroyed only after symptoms are well advanced. When the animal is killed in the early stages the changes in the nervous system have frequently not developed sufficiently to be recognized.

Diagnosis of the Disease by Laboratory Methods.—Until within comparatively recent years the only method of diagnosis of the disease after death was by inoculation of rabbits with an emulsion of the brain of the suspected rabid animal. This required an incubation period of at least fourteen days, and it was not an uncommon occurrence for the rabbits and the person bitten to develop simultaneously symptoms of the disease.

The examination of the nervous system for microscopic changes was begun as early as 1875. No diagnostic changes were known until 1886 and later in 1892, when Babes carefully described the histological lesions which he constantly found in rabies. The most important change which he found consisted in a degeneration of the nerve cells in the medulla and an invasion by embryonal cells of the space normally occupied by the nerve cells. These collections of cells were called by Babes rabic tubercles, and have since been named after their discoverer Babes tubercles. They are easily found in the majority of cases by making cross sections of the medulla and examining about the region of the central canal.

In 1900 Van Gehuchten and Nelis published the results of their work on the microscopic changes in this disease, which gave to the world a valuable addition to the methods of rapid diagnosis. The changes consisted mainly in a proliferation of the endothelial cells lining the capsule of the ganglionic cells and an infiltration of the ganglia with leucocytes. These changes are easily found and are most marked in the plexiform ganglia.

In 1903 Negri, of the University of Pavia, Italy, published the results of his researches and claimed to have found the causative agent of the disease, which consisted of cell inclusions, now universally known as Negri bodies, in the large nerve cells. The relation which these bodies bear to rabies has since been confirmed by many investigators, and they are at present considered pathognomonic of the disease. Whether or not they are the real etiological factor in the production of rabies still remains to be proved.

Within the past year Porcher has laid great stress on the presence of sugar in the urine in cases of rabies. He says it is equally as valuable from a diagnostic standpoint as the Negri bodies or the changes of Van Gehuchten and Nelis, but his work requires confirmation. We have recently subjected the urine of two positive cases to Fehling's test for sugar, with negative results in both cases.

In the pathological laboratory of this bureau when a suspected rabid dog is received a post-mortem examination is made. The plexiform ganglia are removed and placed in 95 per cent alcohol. The skull is then opened and the hippocampus major and a small piece of the medulla are removed. The latter is placed in neutral glycerine and laid aside until the microscopic examination is completed. The Negri bodies being most numerous in the hippocampus major, this is placed in acetone and then in paraffin, by which method sections can be cut in three hours. The sections are stained with Mann's stain and examined. The Negri bodies, if present, are found in the protoplasm of the large pyramidal cells and stain a bright pink color, while the cell takes a purplish tint. Frothingham's stain is also valuable. It consists in applying a saturated alcoholic eosin solution for fifteen minutes, followed by Loeffler's methylene blue, and decolorizing in 770 per cent alcohol, using the microscope to determine when decolorization is sufficient. With this method the nerve cell stains blue, while the Negri bodies appear yellowish pink and their granules stand out prominently, being stained very dark blue. Such an examination can be made in three or four hours, and when Negri bodies are found the diagnosis of rabies is made at once.

The touch preparation method of Frothingham is much more rapid than the preceding, but is not quite as reliable. It consists in making cross sections of the hippocampus and touching them to the slide. The thin film of nerve tissue adhering to the slide is then fixed in Zenker's fluid and stained with the eosin and methylene blue solutions.

When the Negri bodies can not be found the ganglia are examined. They are usually left in 95 per cent alcohol over night, transferred to absolute alcohol in the morning for an hour, and then placed in warm cedar oil in the paraffin oven for another hour. This clears the nerve fibers rapidly, leaving the opaque ganglia clearly outlined. One of the ganglia is then trimmed down with a sharp knife so that nothing but the ganglion remains, as in this condition the sections cut much easier. After trimming it is left one-half hour longer in the oil and then transferred to paraffin for one to two hours. It is then embedded, sectioned, and stained with hematoxylin and eosin. When Negri bodies are found and the changes are present in the ganglia, which rarely happens, the case is considered suspicious and rabbits are inoculated. These ganglionic changes may not be marked when the animal is killed early, and they may also be present in other diseases. In one case the ganglion of a horse which had died of cerebro-spinal meningitis at the Arlington Experimental Farm was examined and lesions similar to those of rabies were found. These changes may also rarely be present in dogs with distemper, especially when showing nervous manifestations. When Negri bodies are found, rabbits are not inoculated.

(To be Concluded).

At a meeting of the Walla Walla Rod and Gun Club, about 200,000 young trout, recently hatched at the local fish hatchery, were apportioned to streams in Walla Walla, Columbia and Garfield Counties, Oregon. The club has, through its efforts, succeeded in getting a large quantity of fish eggs from the government, and as soon as they are hatched are placing them in streams where they are needed.

TRADE NOTES.

Winchester Pace Never Stops.—Since the popular and winning demonstration of Winchester shells and guns at the Southern Handicap they have continued in the same strain at many tournaments since. At Willamantic, Conn., May 5th, J. S. Fanning won high professional and H. C. Kirkwood high amateur average, both shooting "Leader" shells. At Circleville, O., May 6th-7th R. Taylor won high professional average, making the high score of 286 out of 400, with Winchester shells and guns. C. L. Frantz was high amateur at Malone, N. Y., scoring 356 out of 400; A. L. Barry was second and H. W. Smith third, all using "Leader" shells, and the first two Winchester guns also. In the five-man team race the Syracuse team won with 86 out of 100, every member shooting Winchester shells. At Fairmont, Minn., May 8th-9th, F. G. Bills won high professional average, scoring 383 out of 400, against many well known experts. He shot Winchester shells and gun.

At Ossining, N. Y., May 13th-14th, W. M. Foord won high amateur average with "Leader" shells, scoring 345 out of 375 targets. The beautiful and valuable Sheriff's Cup, for which there was strong competition, was won by Amos Bedell with Winchester gun and shells, scoring 88 out of 100. At Des Moines, Iowa, May 12th, 13th, 14th, C. G. Spencer won high professional average with 579 out of 600, using Winchester gun and shells. O. N. Ford, who was high amateur, used a Winchester gun, L. Foley being second and John Malland third, both using "Leaders." At Marion, Ind., May 12th, 13th, L. R. Barkley was high professional, with 381 out of 400, using Winchester gun and shells. At the tournament of the Idaho

Utah Sportsmen's Association, held at Salt Lake City, May 7th, 8th, 9th, F. B. Mills won high general average, scoring 380 out of 400 with Winchester shells. John S. Boa was second, using Winchester gun and shells.

Cleaned Up Everything—Just a line to announce a significant fact—Du Pont Smokeless won everything at the Northwest Tournament, Walla Walla, Or., last week.

Killing Trout Lures—Not for many seasons past has the fishing on the Truckee been so good as it is at the present time. The killing lures are red spinners and red ibis—Golcher Bros, 511 Market street, San Francisco, have a stock of flies—some recently imported Scotch flies, that have never been equaled on the coast for beauty of finish, life-like appearance, quality of steel and strength of snell and price. Anything and everything the angler likes or needs is ready in quality and price better than ever before and that means something from a firm that has been selling goods to sportsmen for over twenty-five years.

Ithaca Guns Growing in Popularity—Here's what E. Beckwith, secretary of the Mt. Pleasant Gun Club, Mt. Pleasant, Ia., writes:

"The pigeon gun came yesterday. It is a beauty and a hard close shooter. The boys all tried it at our club shoot and every one pronounced it a 'peach'."

Peters Points—A new amateur record was established by Mr. J. S. Day, of Midland, Tex., at the Sulphur, Okla., tournament, May 14th and 15th; he scored 198 out of 200 each day, making a total of 396 out of 400, or 99 per cent with straight runs of 139 and 158. These two runs were separated by a single unbroken target, which, however, was hit hard and failed to break. This record has never been equaled by any amateur, and will likely stand for some time to come. Mr. Day used Peters' factory loaded shells.

Peters shells made practically a clean sweep of the honors at Sulphur, Okla., May 14th and 15th. Mr. J. S. Day won high general and high amateur averages, 396 out of 400; Mr. Harvey Dixon second amateur average, 382; Mr. Geo. K. Mackie third amateur, 380; Ed. O'Brien high professional and second general averages, 390; L. I. Wade third professional, 385; Fred. Bell, fourth professional, 378. Mr. Wade had one run of 117 straight. This gives Peters shells the highest individual amateur score on record, in addition to the highest five-man team score, 484 out of 500, made at Wilmington, Ohio, November 11th, 1907.

Mr. L. H. Fitzsimmons won third professional and third general averages at Wilwaukee, May 17th, scoring 140 out of 150 with Peters factory loaded shells.

At Capron, Ill., Tournament, May 14th and 15th high professional average was won by Mr. W. D. Stannard shooting Peters' factory loaded shells, score 367 out of 400. Mr. L. H. Fitzsimmons was third professional with 364, also using Peters shells.

At Clay Center, Neb., May 14th and 15th, Mr. Albert Miller won high general and high amateur averages, 300 out of 320; C. D. Lindermann second, with 299; A. H. Hardy third general and first professional, 297; all using Peters' shells. Mr. Lindermann made a run of 193 straight.

Quite a unique record was made at the Vicksburg, Miss., Tournament, May 11th, by the squad composed of Messrs. Powers, Dixon, Mackie, Freeman and Crosby. In one event of 25 every man won straight, and they did the same in another event of 20 targets. Three of the five, Messrs. Dixon, Mackie and Freeman, used Peters' loaded shells.

Second professional average and second general average at Danville, Ill., May 18th and 19th, were won by Mr. H. W. Cadwallader with Peters' factory loaded shells, score 332 out of 360.

A Double Header—The Southern Handicap was won by a shooter who used a winning combination—a new Remington "pump" gun and U. M. C. shells. Pretty good going that. One hundred and sixteen of the crack shooters of the Southern States as well as entries from as far north as Wisconsin and as far west as Kansas and Nebraska were on the firing line. George L. Lyon of Durham, N. C. (19 yards) tied with J. R. Livingston of Springfield, Alta. (18 yards), with 94 out of 100 each. On the tie shoot off at 20 birds, Lyons scored 18 to Livingston's 16. Mr. Lyon, a popular amateur shooter was the winner of the last Preliminary Grand American Handicap and is recognized by amateurs and professionals alike, as one of the most expert shots of the day. His new Remington "pump gun" and U. M. C. shells were the winning combination.

William H. Heer, also shooting U. M. C. shells and a hammerless Remington double gun, won the high professional average at regular targets, 292 out of 300, 97½ per cent, and that is "some shootin'."

U. M. C. shells in Remington guns preached a most convincing sermon—these two wins were the premium honors. The Southern Handicap event was the feature of the tournament and it should not be confused with any subsidiary handicap win. The new Remington "pump" handles fast and easily and shoots the well known Remington pattern. It is the only gun of its type which is solid breech and hammerless. The "trap" grade is now ready. The Remington "pump" won the first Interstate Handicap in which it was entered. How is that for a start.

U. M. C. shells need no comment—they stand for quality, accuracy and regularity.

THE GREAT FOUNDATION TROTTING SIRE.

It is of interest to look back over the list of great sires that have been instrumental in building up the breeding industry. The list of course is headed by Messenger, whose fortunate importation from England resulted in a family of horses that is to-day the most useful as well as ornamental of any of the numerous breeds to be found on this continent. I think that most of us in dwelling upon Messenger's advent into this country remember the story of his charging down the gang-plank from the vessel which carried him across the sea, and of the impression that was made upon the beholders of his landing, and I am sure that every horseman who has read the history of this very remarkable sire has felt that had he been other than he was, had he not been capable of withstanding the effects of a voyage which even in this day of luxurious travel is a hardship to a horse, he could not have founded a family of such greatness, a race of as stout, game and courageous trotters as has been descended from him. Whether or not it was the thoroughbred blood in Messenger that enabled him to lay the foundation for such a family, or whether it was his individuality, his iron constitution and his great gameness, may never be known, for Bellfounder was also instrumental in laying this foundation, and while he may have had thoroughbred blood in his veins, was probably a member of the tribe from which has come the hackneys of England.

The history of the light harness horse in America must be said to begin with the importation of Messenger, yet the first really great sire was of course Hambletonian, for this descendant of Messenger begot trotters and race horses, and it was he who gave to the world the first of the great harness performers to make the sport of racing a national one, and to instill into the minds of the American people the affection they now hold for this type of horse. Hambletonian was a tremendously great sire, not merely because he founded a family that has almost monopolized the pages of the history of the horse, but because he accomplished these things in the face of obstacles, with few opportunities, for in those days well bred mares were comparatively rare. It is true that he had the assistance of the Clay and the Star blood, yet these strains did comparatively little when crossed on others than the Hambletonian family. The hero of Chester founded a dynasty which has been more lasting than many of the human race, and his greatness has descended from sire to son in a straight line. There was no need for the law of primogeniture in his case; no necessity of battling for the family supremacy, for as he was the greatest son of his sire, so in turn have come succeeding generations to prove their superiority, and about whose supremacy there has been no question. Hambletonian was not the greatest sire of trotters that has ever lived, quite naturally, and it would be unfair to compare his success in this direction with that of latter day stallions; yet he was the greatest sire of sires, the greatest founder of great families, that has ever been known. His various sons have founded clans, have been interbred, and still the breed goes on, improving each year.

Alexander's Abdallah was a truly great sire, and when one considers how short was his stud career, his success is all the more surprising. It is true that he was owned at Woodburn, where he was given the best mares at that famous breeding farm, yet he was a comparatively young horse when he died, as a result possibly of his having been stolen from the farm during the war, and had he never given to the world any other trotter than the wonderful Goldsmith Maid, his fame would have become immortal. His sons continued his successes, and the family has been instrumental in building up the present race of trotters, of which America is so justly proud. One of his sons, Belmont, bred and owned at Woodburn, sired Nutwood, whose family to-day is found, through its representatives, on nearly every breeding farm in this country, and whose sons and daughters have bred on until the tribe has spread over the trotting world. George Wilkes, got by Hambletonian in New York, became his greatest entire trotter, and after a period extending over many years, in which he met all the great race horses of his day and gained for himself a reputation of being the fastest and one of the greatest stallions of his time, came to Kentucky and there changed the whole history of the light harness horse. The advent of this horse to the Blue Grass region was of greater importance to the community than the coming of any other member of the equine race, for here he founded a family that has surpassed all of them, a tribe the representatives of which are found in nearly all the important events of the trotting turf. George Wilkes not only sired trotters of note, race horses of great class, but through his sons and daughters added more to the trotter as a breed than did any other stallion of his era. He was possibly the greatest progenitor, with the exception of Hambletonian, that ever lived, and so great has been his fame that it has in a measure overshadowed that of his sire. Almost every one of his sons was a success in the stud, and so potent was his blood that it has bred on from one generation to another, adding to the fame of the breed.

Dictator, another son of Hambletonian who was transplanted from New York to Kentucky and whose success in the stud practically began with his advent to that state, while he has never been as prolific as some of the other sons of Hambletonian, ex-

celled most of them in more than one respect. Of all the sons of the great progenitor none was superior to Dictator in conformation in quality, in elegance and finish, and no other son equaled him in the ability to produce race horses of the highest class in the first and succeeding generations. He gave to the world the wonderful trotter Jay Eye See, incomparable as a race horse and a champion, who, while he only held the record for a comparatively few hours, was probably infinitely superior in point of class to the mare who dethroned him. Another son, Phallas, was the champion stallion of his day, a very high class race horse, yet a failure in the stud. It was this failing that prevented Dictator from taking a place with George Wilkes as a very great progenitor, for while the Dictator family is to-day without a superior, while none of the other sons of Hambletonian gave through their sons and grandsons, their daughters and their granddaughters, as many absolutely first class race horses as did Clara's son of Hambletonian, the latter was not a consistent breeder. Electioneer, a part of whose life was wasted at the farm of his breeder in New York, sprang into prominence soon after he was taken to California, and there with the aid of scientific training methods, the faultless climate, and a breeding stud conducted on a larger scale than any other in the world, he furnished to the trotting turf more record breakers than all the other sons of his sire combined. His family to-day rivals that of George Wilkes, yet never equaled this great tribe in the production of resolute courageous race horses. Electioneer controlled the action of his get more completely than did any other sire in history, and from thoroughbred mares, from others of little or no breeding, he got well-gaited, natural trotters of extreme speed, good manners and beauty. He excelled George Wilkes in one respect, and that was in his ability to sire colt trotters, for the get of the son of Dolly Spanker were not precocious, although his descendants in succeeding generations have been remarkably so.

Woodford Mambrino, another Woodburn product, founded a family which has been conspicuous at irregular intervals, yet its greatest claim to distinction comes through the performances of Alix, the trotting queen of her day. The descendants of Woodford Mambrino have been of greater value through the female line than through the male, although not a few of his sons and grandsons have sired race horses. Woodford Mambrino was himself a game race horse, taking his record after many seasons of stud duty, and during his career on the tracks of this country, proved himself to be a trotter of much class. He was a horse of great substance and the members of his family have always been noted for their gameness, and it is more than likely that had he lived to a ripe old age his descendants would have founded a tribe which would have rivaled the members of other more prolific strains, instead of dying out as they seem to be doing. The blood of this family has been instrumental in helping build up the American trotter as an outcross on the Hambletonians, and while to-day stallions descended in the male line from this somewhat remarkable horse are not as popular as the descendants of many of the sons of Hambletonian, they have sired a few trotters of very great capacity. Mambrino Patchen, whose chief fame has come through his daughters, was a horse of striking individuality; in fact, so great was his beauty and so little his resemblance to other members of the Mambrino Chief tribe that the story existed at one time that this great brood mare sire was in reality a son of one of the Denmark stallions standing in Kentucky. Such a theory, however, was long ago exploded, and any attempt to give it color has always been futile. Mambrino Patchen proved a wonderful cross for George Wilkes' blood and much of the success of the latter stallion as a progenitor was the result of the happy nick which was found in Mambrino Patchen mares. The brother to Lady Thorne, so unlike her in appearance, was a failure as a sire of trotters, his son London alone representing him in this respect; yet he more than made up for any lack of ability to get trotting race horses by his power to transmit through his daughters and through the female line speed and racing ability.

The most successful outcrosses that were found for Hambletonian blood were furnished by American Star and the different Clay stallions, one of the latter having been credited with the dam of George Wilkes. There has, however, always been much doubt cast on the pedigree of Dolly Spanker, and while she is given as by Harry Clay, some of the deepest students in pedigree statistics have offered what must be considered reasonable proof that her sire was unknown, or at least unauthenticated. American Star, with his exquisite quality, his finish, and his blood-like conformation, was an admirable cross for the coarse, heavy and phlegmatic Hambletonian and the result was seen in Dexter, his exquisite brother Dictator, and in many other cases. Dictator, while a little undersized, being not over 15.1, was full of quality (in fact, I think no other son of his sire could compare with him in this respect), with a head and neck as exquisite as that of a thoroughbred, with perfect legs and feet, and with a temperament which doubtless had much to do with the success of his descendants on the trotting turf and in the stud. The brother to Dexter lived to be thirty years old, and as his active career in the stud did not begin until he was twenty, his age when he was permanently located in Kentucky, he can be spoken of as one of the greatest old sires that ever lived. He got Impetuous very late in life and several others less prominent

but of great merit. His son, Jay Eye See, sired in Kentucky on his first visit to this state, was, all things considered, the greatest trotting race horse of his day, and Director and Phallas were stallions of great class. The former added materially to his sire's reputation and his descendants are frequently spoken of as the gamest race horses in the world. Direct, one of the most precocious youngsters that ever lived, has proved a phenomenal sire of early and extreme speed and through him and other descendants, the blood of Dictator will continue to hold its own in the race for supremacy on the track and in the stud.

Almont, Happy Medium and Aberdeen, all three owned at Fairlawn, were great sires, and each gave to the world at least one very high class performer; yet none has maintained the position he once occupied, and a son of any one of the trio would attract little attention to-day. The blood of each, however, has gone on through the female line successfully and forms a valuable cross for the Wilkes and Electioneer families. Robert McGregor, whose sire, Major Edsall, was a son of Alexander's Abdallah, earned undying fame as a race horse and his capacity in this direction was transmitted to his get in a marked degree. As the sire of Cresceus, the stoutest, gamest and greatest trotting stallion the world has ever seen, Robert McGregor must be given a place in the list of truly great sires, and while his sons have as yet failed to live up to the reputation he himself made in the stud, his daughters have produced more than one high class performer. Harold owes his reputation chiefly to his daughters, one of whom was a trotting champion, and in her he sired a trotter who was phenomenal and whose record of 2:08½ to a high wheel sulky made over a regulation track is likely to stand for all time, as the style of the vehicle is obsolete, and the few attempts that have been made to take away the crown from the erstwhile queen have been unsuccessful. The importance of these sires and their influence on the race of trotters which has been built up in this country quite naturally gives rise to the question of influence in the sire compared with that of the dam, a question which has been asked many times and which has never been satisfactorily answered. A majority of the stallions above mentioned sired creditable performers from mares of comparatively little breeding and this is especially true of those who lived when breeding the harness horse was in its infancy.

A more striking example of the ability of a stallion to beget high class performers from mares of little or no breeding is Pilot Medium, whose stud career in Michigan was wonderfully successful and whose opportunities were probably fewer than those of any great sire who could be mentioned. Here was a horse of ultra fashionable breeding, who was crippled as a youngster and unable to prove his merit as a trotter, yet when taken to a community in which there were very few mares of any breeding made a distinct success. I know of no other instance of a trotting stallion so completely overcoming the obstacles in his way as did the gray son of Happy Medium and Tackey. To have achieved success under such circumstances is a greater proof of merit than a hundred 2:30 performers that are sired from mares of rich breeding, and it is just such stallions as Pilot Medium that really build up the breeding industry. A son of this horse or one of his daughters from a really well bred mare could hardly fail to accomplish great things in the stud, and the few of his sons now before the public whose dams have any merit at all have shown themselves as possessed in some degree of the marvelous capacity of their sire. Peter the Great has already sired a first class trotter and one who, if she had lived, must surely have been a trotting champion. Nutwood, whose roll of honor has been piled up by 2:30 performers, was in his day the most fashionable trotting stallion living. He was a son of the great brood mare Miss Russell, was a horse of striking individuality, and although not a natural trotter, was given a record of 2:18½ at maturity. His opportunities in the stud were probably greater than those of any horse of his day, and yet his chief fame has come through the performances of his descendants rather than those of his immediate get. His popularity rested on his breeding, his looks, and the Nutwood boom, while it lasted, was a profitable one to his owner; yet out of the one hundred and fifty 2:30 trotters that he sired there were not half a dozen capable of winning an important event in the Grand Circuit. His sons and daughters, as well as their descendants, have done well and the blood of the son of Belmont and Miss Russell is extremely valuable for breeding purposes. One of his daughters produced the incomparable Arion, the most wonderful colt trotter the world has ever seen, and the family is in point of numbers one of the greatest in the land, yet with all the glamor that has been thrown around this sire, he was unable, even with advantages accorded no other horse to accomplish anything like as much as was done by Pilot Medium in Michigan. It is the stallion that gains a reputation in spite of all ill luck that may confront him, it is the horse that gets winners and race horses, even with few opportunities, that must be called truly great, and in the long list of sires, beginning with the foundation of the breeding industry until to-day, those of true greatness, of real capacity, stamp their individuality upon their get, and in spite of their lack of opportunities proclaim their greatness. It is among this list there must be placed the name of Alcyone, a horse in many respects the most remarkable in the history of the trotter, for here was

a sire that through the achievements of his sons and daughters and their descendants is given a place in the very front rank of great stallions, a position he attained only six seasons in the stud. No other horse, I think, in the history of the trotter accomplished as much in so short a time as did the son of George Wilkes and Alma Mater. In his brief career in the stud he got colt trotters of exceptional merit, classic event winners, and the family that he founded is noted for its speed, its good individuality and its racing ability. Alcyone was a rare individual himself, was a trotter of some pretensions to class, and from the very beginning of his stud career, he showed his capacity as a sire. His brother, Alcantara, much the faster trotter of the two, also became the founder of a family of merit, yet he never equalled the achievements of his brother, although he lived to be an old horse and had opportunities which were denied his mother's greatest son. Of the sires of the past who have been given ample opportunities and have been owned by men who used judgment in the selection of their mares, yet who even with everything in their favor failed to sire great race horses, some, it is true, have added materially to the list of 2:30 performers registered in the Year Book, but the fact that performers of real merit are conspicuous by their absence, destroys whatever claim these stallions may have to distinction. It is unjust to the very great sires of the past to give credit to those who have done less well, and it is unfair to posterity to give the same place in history to the inferior sires as is held by the truly great ones. That this is often done can easily be seen in reading the records of the past, for even the most impartial historian is prone to give a popular sire a leading place in his story of passing events. Who thinks for an instant that Hambletonian, Alexander's Abdallah, George Wilkes, Electioneer, were not infinitely greater than Mambrino Chief, American Star or any member of the Clay family? For while these sires made it possible for the greater stallions to accomplish what they did, it should be remembered that Mambrino Chief, American Star and the Clays did not sire great trotters in abundance, and have not bred on as have the first named. It is unnecessary to draw comparisons, yet the wise breeder is he who follows successful strains and who abandons the families who are dying out, for if their merit was real, if their capacity was genuine, there would be no such thing as an eclipse for them. The lasting strains will come from the great families and those possessing the greatest degree of merit, and the breeder has but to follow the history of the past to be guided in his future efforts.—Hawley in Kentucky Stock Farm.

RIVERSIDE MATINEE.

The San Bernardino Driving Club gave one of its excellent matinees on the afternoon of May 14th.

Interesting events developed, and one, the 2:18 mixed, proved to be a very fast race, Charlie M. winning in 2:15½, defeating Adalanthia in two straight heats in a race that was really exciting. The first heat was a very close one, and the Arizona horse won by but a length. In the second it looked like a close finish, when Adalanthia lost her feet on the home stretch, making Charlie M. an easy winner.

But Charlie M. was not the only new horse that appeared in the events, and which proved a winner. Prize Oh So, another Arizona horse, won the 2:30 pace, while Zenobia Z. took the honors in the 2:40 mixed race.

But perhaps the surprise of the afternoon was the 2:22 trot, and the showing that Bolock of San Bernardino made in the event. It was conceded that Marigold could probably win the race if Bonny June did not show an exceptional burst of speed. But to the surprise of all Bonny June fell down completely, and it was a neck and neck race on the second heat between Marigold and Bolock, the latter owned by J. H. Kelley of the county seat. Had not Bolock lost his feet for a few steps just before the finish he would have won by a nose.

In the 2:30 trot there was a pretty race. As it was Emma Z., owned by L. Potter of Riverside, and driven by Axel Nelson of that city, took two straight heats, proving herself a steady traveler at every stage of the game. Worth While, owned by E. F. Binder of Riverside, has the speed, but broke and lost every chance he had to win.

The next matinee will be given by the club the afternoon of Wednesday, June 17th, when it is expected there will be a good string of entries, there being a number of animals at the track in training that will be ready for racing by that date. Results:

First event, 2:40 mixed—Zenobia, owned by G. H. Parker, San Bernardino, first; Prince Valentine (G. M. Carrigan, Riverside), second; Miss Patrick (H. H. Eastwood, San Bernardino), third; time, 2:44, 2:37.

Second event, 2:22 trot—Marigold, owned by J. T. Garner, San Bernardino, first; Bonnie June (J. E. Fairchild, Redlands), second; Bolock (J. H. Kelly, San Bernardino), third; time, 2:26, 2:21.

Third race, 2:30 pace—Prize Oh So, owned by Mr. Mickens, Phoenix, first; Mammy (A. B.) Miller, San Bernardino), second; time, 2:25, 2:26, 2:26.

Fourth event, 2:18 mixed—Charlie M., owned by M. J. O'Donohue of Redlands, first; Adalanthia (G. W. Prescott, Highland), second; time, 2:19, 2:15½.

Fifth event, 2:25 trot, was not called.

Sixth event, 2:30 trot—Emma Z., owned by L. Potter, Riverside, first; Worth While (E. F. Binder, Riverside), second; Teddy Horn (J. M. Horn, Colton), third; time, 2:32, 2:27.

HOW HIGHBALL IS ACTING.

While not much has been printed about Highball since he finished his campaign last fall after a series of misfortunes that would have laid an ordinary horse up for good, writes Henry T. White, he is, if looks and actions go for anything, a better trotter than ever. When, at the Libertyville track last July, Highball turned up lame in his race against Sonoma Girl it was feared he never would be exactly right again during the season, and this proved to be the case. In the M. and M. at Detroit he got a flying start from the outside in the opening heat and won in 2:07¼, a full second slower than one of his winning heats at Libertyville, and from that time until the season ended he was at no time at his best. Then he had a spell of sickness that left him weak, and so when the handsome gelding got to his winter quarters at Memphis he was in sorry plight.

Geers adopted the old fashioned plan of letting the horse rough it during the winter, keeping him out of doors every minute the weather would permit, and under this treatment he put on a lot of flesh and is now rugged as a bear, while the exercise he gave himself during cold weather, added to that he has received in harness since March 1st, has made him hard as nails. As showing the sort of natural speed Highball has on tap it may be mentioned that during a recent visit of some Chicagoans to Memphis the great trotter was "blown out" one day, preparatory to a repeat twenty-four hours later, and in the course of this light work he brushed the final eighth of the track in :14, a 1:52 clip. Among those who saw and timed this eighth was Editor Hervey of the Horse Review, who says: "My prediction for Highball this year is 2:02, at least, provided he stays sound and well."

When it is remembered that only two trotters, Lou Dillon and Major Delmar, have trotted better than 2:02, and that but one other, Sweet Marie, has equalled that figure, the prediction seems a rash one, but I am of the opinion that Mr. Geers himself rates the horse that well. He believed him up to a mile in 2:04 before the gelding went lame at Libertyville last summer and told me so, and when Geers says a horse can trot in 2:04 the chances are he is even a little faster.

One important change in Highball this year is regarding his rigging. He is being driven with two pairs of lines. He is a delicate mouthed horse, and this fact, together with his being double gaited and of such high nervous organization, he is always anxious to trot fast, has made him difficult to control without taking more hold than his mouth would stand without injury. To overcome this trouble Highball was fitted this spring with a halter under his bridle, and into this one set of lines is fastened. With this arrangement he can be taken back while going at slow gaits without putting any pressure on the mouth, while the ordinary bit, with its separate set of lines, is in reserve for emergencies that require its use. Whether he will be raced in this rig is undecided, but it works like a charm in the training stunts. The present plan is to trot Highball on the grand circuit, coming west in the fall for the 2:06 purse at Hamline. It is believed he will be named in the \$50,000 handicap at Boston.

BARON WILKES 2:18 SOLD.

Mr. E. Knell, of Carthage, Mo., informs Spirit of the West that he has sold the noted sire Baron Wilkes 2:18 to Messrs. T. L. Matkins, of Kansas City, Mo., and J. E. Lambert, of Emporia, Kansas, price \$10,000. Although this great horse is twenty-six years old he is, perhaps, the youngest and most vigorous of his age in the United States. The horse will be shipped to his new home, Emporia, Kansas, June 4th. Up to date there have been thirty colts foaled this season that are sired by Baron Wilkes, which is a remarkable record for a horse of his age. As a sire of early extreme speed Baron Wilkes is almost without a rival in the history of American trotting stallions. Foaled in Kentucky, where his early years were spent and where his opportunities in the stud were commensurate with his merits, he demonstrated to the satisfaction of horsemen everywhere that as a sire of speed he stood in the front ranks of the greatest trotting stallions this country has ever produced. Not only have the sons and daughters of Baron Wilkes met the expectations of the most ardent admirers of this distinguished sire, but the second generation has proved beyond the domain of controversy that his ability to breed on is second to no horse of the age. The last Year Book credits Baron Wilkes with one hundred and six trotters and thirty pacers in the list; sire of fifty-six sires of two hundred and eighty-six trotters and one hundred and twenty-one pacers, and sixty-one dams of sixty-five trotters and twenty-seven pacers.

Stamzie, a five-year-old bay mare by Stam B. 2:11¼ out of Ituna, the dam of Tuna 2:08½ by Steinway, sold at the Blue Ribbon sale for \$170 last week.

A MERITORIOUS ARTICLE.

Mr. J. H. C. Watts, Bel Air, Md., writes: "After failing with several other remedies I succeeded with Quinn's Ointment in removing a bad curb from a four-year-old filly. I have recommended your splendid Ointment to several, who all testify as to its merit. For Curls, Splints, Spavins, Windpuffs and all blemishes use Quinn's Ointment. It cannot be obtained from druggist or dealer, address W. B. Eddy & Co., Whitehall, N. Y. Price \$1, delivered."

THE FARM

HOG FEEDING AS PRACTICED IN EUROPE.

In practically all European countries considerable attention is given to the production of hogs. As a rule, farmers are not engaged in the industry as a specialty. The prevailing custom is for each farmer to rear only enough pigs to utilize the waste on the farm, but where dairy farming is followed as a chief occupation pigs are reared and fed in considerable numbers as an auxiliary industry. The two industries go hand in hand, and to all appearances neither one can be so successfully conducted alone as the two combined, especially in those countries which rank high in the production of high-class bacon. The real secret of success in European feeding for prime bacon is due to the large amounts of skim milk and buttermilk fed with grain and meal.

Pigs are fattened for market in many districts. Both the fat and the bacon pig are produced, but most attention is given to the development of the bacon type. In Wiltshire the finest bacon in the world is produced, and very close discrimination on the part of packers in grading the pigs and paying for them according to quality has caused the farmers in these districts to use every possible precaution in feeding. In the production of fat or lard pigs much less skill is demanded of the feeder. Although the majority of the farmers aim to produce either one type or the other, on some farms both types are produced. The fat pig is especially useful in utilizing damaged and cheap feed when skim milk is not available.

On the best farms the sows are often twelve months old before being bred. Two litters per year is the prevailing custom, and a good breeder is never discarded so long as she continues to rear good litters. The period of usefulness varies from three to eight years. The sows get exercise during the summer, and feed from pasture or a forage crop. Clover and alfalfa are both largely used, and many farmers use vetches and oats or peas and oats. In the milder parts of the country the sows have exercise during the winter on pasture, and in the colder districts special exercising pens are provided under cover. Raw and steamed mangels, beets or turnips are fed in winter.

Previous to farrowing brood sows are fed moderately. Any fattening or heating feed is eliminated entirely from the ration or fed in very small quantities, and then in conjunction with cooling feeds, such as skim milk and bran. Within a week or so of farrowing time the principal part of the ration is decreased and the bran increased. Sometimes from four to eight ounces of Epsom salts, according to the size of the animal, are given each sow about two days before farrowing.

During the suckling period, which varies from five to seven weeks, the sows are liberally fed. Rations of equal parts bran, shorts and barley meal, scalded and fed with skim milk, or two parts middlings and part barley meal, and one part corn meal, soaked or steamed, and fed with or without skim milk, are in general use. The sows are always fed three times per day and in some instances four times per day. Skim milk and buttermilk are used whenever they can be had.

The young pigs are encouraged to eat at an early age. When they are three weeks old some milk and finely ground oatmeal or shorts are supplied in low troughs where they may get at it.

In feeding the boar the general idea is to keep him in fair flesh and good health. Old boars are even kept in thin flesh. Exercise is given careful attention, both for the favorable influence which it exerts on the general health and on the condition of the feet and legs. During the summer the boar is on pasture, and during the winter he has an open yard for service. The best breeders are very strongly opposed to the use of any highly fatten-

ing feed. Corn is seldom used and when fed is nearly always fed with bran, oats, skim milk and roots, and abundant exercise is given. When fed in this manner, especially in cold weather, it is not deemed to be injurious to the animal.

The young pigs are inspected at an early age, and those which promise to make useful breeding animals are separated from the rest and fed accordingly. The rations used are those that will develop bone and muscle, and skim milk and buttermilk are used by every breeder who can secure it, especially during the first four months of the pig's life. Linseed cake to the extent of about ten per cent of the ration is fed by many breeders. Feed is generally soaked for several hours before feeding. Young pigs are usually fed three or four times per day.

Many things are demanded in a good side of bacon. The thickness of fat on the back must be uniform in all parts; the fat must not be oily or yellow in color, but must be a clear, bright white; the flesh must be firm and the pigs should be uniform in size to insure uniformity in curing. These results are only obtained when uniformity, care and good judgment are used in compounding rations and feeding them. Considerable latitude is permissible in the selection of feed, but the use of an undesirable one, even when combined with others which in themselves are very desirable, may depreciate the quality of what would otherwise become a very good carcass.

The writer is inclined to believe that pounds of gain in the bacon hog cannot be produced as economically as in the case of the fat or lard hog. This is due to the fact that a much more limited range of feed can be used with safety in feeding the bacon hog and some of the best feed for the production of heavy gains, such as corn, must be fed with great care. Practically all the best bacon producers lay a great deal of stress on the use of dairy by-products. From the standpoint of quality of the bacon produced no rations have proved more satisfactory than barley meal and skim milk; shorts and skim milk; equal parts barley meal or shorts with skim milk; or equal parts ground peas, ground barley, and shorts with skim milk. All of these rations have produced good firm bacon, white in color and free from oil or flabbiness. Some feeders use equal parts ground barley and corn meal with skim milk or whey. This ration is said to produce heavier and more economical gains, but the quality of the product is inferior.

On some farms bacon pigs are grown as stores for four or five months, during which time they are on grass or forage crops and are fed again rather lightly. They are then confined to the pens for about three months and are fed liberally. A great many successful farmers have their pigs ready for market at about six months old, which can be done to good advantage where skim milk is available.

The farmers in all parts of England feed a considerable number of pigs to supply the demand for hogs for lard or sausage. They do not require so much skill in feeding as bacon pigs. Most of these pigs are marketed between the ages of eight and twelve months, but there is always a demand, especially at Christmas time, for a limited number of heavy pigs. Amount of grain and economy of production are the two points which receive consideration.—from United States Department of Agriculture Report.

Taken as a whole butter-making will rank well in the mechanical arts. The whole process is simple and the laws that govern it are few, but for all this good butter-makers are comparatively scarce. The only explanation is that the majority fail to grasp the principles in their fundamental sense and our agricultural colleges are not regulating this tendency. There are but three things in the whole process of butter-making—cleanliness, regularity and an understanding of the underlying principles.

POULTRY PICKINGS.

Every poultry keeper should have trap nests, as they will help pick out the hens that are working.

A good feed for ducklings is made by mixing corn meal and bran, equal parts into a mush with milk.

One of the reasons and probably the main reason why hens steal their nests out is because the nests in the poultry house are not kept clean and comfortable. Before placing eggs in a nest it is a good thing to sprinkle insect powder, sulphur or tobacco dust in it, as this will keep away the lice and the young chickens will be free to start on. As the season for hatching with hens has arrived careful attention must be paid to their feeding. We are apt to over feed and a fat hens egg never hatches well.

Kerosene the roosts thoroughly.

Clean out the coops and replace the old litter with fresh straw. Refill the next boxes and keep the houses well aired during the day.

Hens that lay soft shelled eggs do not get lime enough in their feed. They should be fed a different diet, with more grit and vegetables. When they drop these soft shelled eggs, the other hens are encouraged to egg eating.

Wheat is one of the best foods that can be given to the hens to promote egg production. Make wheat the principle food of your young chicks after they are a week or two old and they will grow rapidly.

If the little turks can be reared to the end of the first month with good health there is little danger of serious loss afterward under ordinary conditions.

The same dry foods that are fed the chicks will be successful to raise the turks, but be very careful not to over-feed the turks, or trouble and loss will follow.

Shade of some kind must be provided for both old and young chickens in summer. If it is possible, arrange so the runs may be a benefit to the trees by destroying many of the insects. Board shelters are sometimes provided or sun-flowers, hops, etc., will do as substitutes while trees are growing.

Keep the drinking vessels clean. The ducks drinking trough should have slats nailed across the top, four or five inches apart to prevent them from getting into it with their feet and making the water filthy.

E. L. Potter, a member of the 1908 graduating class in the Animal Husbandry Department of the Iowa State College, has just been appointed Instructor in Animal Husbandry (in charge of the department) in the Oregon Agricultural College. Mr. Potter graduated from the science course in the Montana State College and then entered the Animal Husbandry Course in the Iowa State College last year. He was a member of the Iowa State College stock judging team which won first place and three Armour scholarships at the International Live Stock Show in competition with the leading colleges of the United States and Canada.

No man can make a profit from a poor cow with good feed and care; and neither from a good cow with poor feed and care. The best cow and the best feed and a good man make a profitable combination.

The value of foods for milk production cannot always be determined by a chemical analysis, because some foods influence digestion more favorably than others and require less energy for mastication and assimilation.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 555,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

NOW IS THE TIME

FOR THE ROAD DRAG.

During this time of the year our roads are nearly always very rough, which makes traveling over them disagreeable. Very little work, at slight expense, with the road drag will make a wonderful improvement. There is no other tool better adapted to the improvement of earth roads, so far as the actual work done, cost, ease of operation, etc., are concerned, as the drag.

The ordinary reversible blade grader must be used to give the roadbed its proper shape; after this, it is best maintained by using the drag after each wet period.

A good two-horse drag may be made as follows: Use either a split log or a 2x12x16 oak plank sawed in two. If made from a log, secure one from 10 to 12 inches in diameter and about 8 feet long; split or saw this into as nearly equal halves as possible. These halves are set on edge with the flat side to the front, 30 inches apart, and are fastened together with 3 strong pins wedged in. The plank drag is similarly constructed. The front piece should stand about a foot farther to the right than the back one, so when the drag is pulled at an angle of 45 degrees, it does not interfere with the back piece following in its track. The right one-half of the front piece should be shod with a piece of steel, to give it a cutting edge and to prevent it from wearing. The drag is hitched so as to pull at an angle of 45 degrees, which causes it to move a small amount of dirt from the side of the road to the centre, thus keeping the crown well rounded.

USE OF THE DRAG—The best time to use the drag is after each wet spell, just as the surface is beginning to dry and is still wet enough to smear.

The mud formed on the road after a rain represents the dust, in part, which has been made by constant tramping and wear of the road surface. When moistened, this dust forms a paste similar to cement. By the use of the drag just as the surface begins to dry, this "dust-paste" is crudely troweled or smeared over the surface. The action of the wind, sunshine, and travel has a tendency to dry, harden, and beat down this mud covering until it becomes a sort of roof which turns the water very readily. Travel then begins to work up more dust, this is again formed into a "dust-paste" by the next rain. Another dragging spreads another coat over the first and the surface becomes harder, smoother, and more nearly water proof than before.

Every time the mud is spread over the surface and is beaten down and dried the road is improved. One dragging at a time is usually sufficient.

H. M. BAINER,
Professor of Farm Mechanics, Colorado
Agricultural College, Fort Collins.

MIXED BREEDING.

In mixed breeding, or cross breeding, nothing is accomplished beyond the first cross. While a few good individuals may be secured, the tendency is for the progeny to be below rather than above the average. A man conducting his breeding in a haphazard way is contending with fearful odds, groping in the dark following a will-o'-the-wisp. In a hundred years he would be just where he started. Incidentally this is just what we have been doing in this country from the beginning, and the reason why we have so few pure breeds of live stock, and are, after all this time, sending our good money across the water for pure bred sires which we should produce at home.

After animals have been graded up to a practical purity of blood, the longer

they are bred along this line the more prepotent they become, and the more certain that the off-spring will uniformly possess general excellence of form, quality, action, and utility.

The same is, of course, true of all live stock. The only certain method of raising the average standard of excellence is by persistent breeding to sires of the same breed until the native blood is obliterated and the progeny uniformly possesses all those desirable qualities of the pure breed employed.

GEO. H. GLOVER, D. V. M.,
Colorado Agricultural College, Fort Collins.

AZATOURIA.

This is the name of the disease I am going to tell you about. If I knew a more common name for this strange malady, I would prefer to use it. After reading the description of this disease, any of you will recognize it, and perhaps remember it to your sorrow. This is the way the disease comes on:

A horse in perfect health, that has been worked regularly, and then allowed to stand in the barn from one to three days, is taken out to work, and before he has gone far, will begin to sweat profusely, get lame in one hind leg, tremble, and lose his usual spirit. If he is kept moving, he will soon go down with paralysis of the hind legs, the eye balls will turn yellow, he will breathe rapidly and in a few days will probably die. This malady affects horses only, and almost invariably comes on in just the way described. Prevention consists in reducing the amount of feed when the horse is not at work. When on the road, if he begins to sweat profusely, stop then and there, no matter where you are, if you value the life of the horse. Knowing these things will often save the life of a valuable animal.

It is not my purpose here to take up a discussion of the pathology of the disease. "An ounce of prevention is worth a pound of cure." This disease may be entirely prevented by the proper feeding of the animal, and the fatal termination may be prevented in many cases by un-hitching him when the first symptoms appear. The paralysis is caused by the impure condition of the blood, and this condition of the blood is caused from accumulation of the azotized or improperly changed or unassimilated excessive food products circulating in the blood. The treatment consists in eliminating these products through the excretory channels of the body, giving, say, an ounce of aloes as a physic; two ounces nitro ether as a general stimulant and to stimulate the kidneys, and throw on the blankets. The muscles over the hips usually become very hard, and some benefit, no doubt, might be derived from the use of stimulating liniments, with vigorous rubbing of the hips.

The disease is very fatal in the eastern states. In the West, under the same treatment, it seems that a much larger percentage of cases are saved. A knowledge of the conditions under which this disease appears would save the owners of horses many a valuable animal.

GEO. H. GLOVER, D. V. M.,
Colorado Agricultural College, Fort Collins.

SELECTING A HERD FOR BEEF.

In building up a herd for beef production, select cows with a broad, deep square body, cows with a deep coating of flesh, for these, if bred to the right kind of bull, will produce calves that will prove profitable feeders.

The bull is half the herd. He stamps his qualities on all the calves, not simply on one calf a year, as with the cow. Get a registered bull of the breed you want, even if you have only grade cows, as then you are sure you are getting a beef breed from beef ancestors. Select a bull that is of good size, with a proud masculine bearing a good

intelligent head, broad and full between the eyes, yet with a quiet expression, as a nervous excitable animal will never fatten to good advantage. He should be broad and straight across the back, with smooth, even hips. He should have well sprung ribs, heavily covered with flesh.

Spring is the natural season for cows to drop their calves, and the cows should be bred so as to drop their calves in the early spring, and then when the cows are turned to pasture in the spring the calves are old enough to go with them and thus have advantages for making rapid growth and require very little attention during the busy summer months.

When the calves are a few weeks old they should be castrated and the wound washed with some good germ-killer, so it heals rapidly. In the fall the calves should be weaned and fed on good, nutritious food. This should consist of silage and roots, clover or alfalfa hay, oats and bran—equal parts. Many recommend a daily allowance of some reliable stock food to aid digestion and promote a quick growth.

The age at which steers should be marketed depends largely on the market prices, but as a rule well fed steers sell best at 14 to 16 months old. In case you do not wish to dispose of your product as beef, then you must choose one of the dairy instead of beef breeds of cattle.—Dr. David Roberts.

DAIRY NOTES.

To show the effect of the attendant on the production of butter fat and milk, one needs but to glance at the record of Dolly Bloom. When her regular attendant was on duty her milk was averaging 52 pounds per day with a test of 5.10 per cent. When the attendant became sick and another had taken his place, the flow of milk fell to less than 38 pounds per day with a test that barely reached 4.7 per cent. There was no difference in the feed or methods, but changed conditions so affected the nervous system of the animal that there was a noticeable decrease in both flow and fat content.

Pure, cool water is needed to insure pure, wholesome milk. One of the very best ways to insure pure, cool water is to have a deep well and a cement watering tank, covered with closely matched boards.

A good cow poorly kept is sometimes no better than a poor cow well kept. It takes both good cows and good keeping to get the most out of dairy-ing.

Hogs need fat-forming feeds, but it is a little too expensive to supply it to them in the form of butter fat in the skim milk. If you have a separator that does not remove all the butter fat possible, it will be economy to throw it in the junk heap and order a good one.

A recent Missouri bulletin tells of a

High Grade Short-Horn Sale

About eighty head of the well-known Humboldt Herd of Short-horns will be sold at the Humboldt Ranch, one mile east of Suisun, Solano County, Cal., on June 17, by Auctioneer Col. Geo. P. Bellows, of Maryville, Mo. The owners of this herd, Messrs. B. F. Rush and William Pierce, are about dissolving partnership and all of their stock must be sold within the next few months. The sale of June 17th is therefore not a clearance but a dispersal sale, and the individual animals to be sold on this date are some of the best of their exceptionally fine collection.

Carriages will meet all trains at Suisun on the day of sale to convey visitors to and from the station.

For more detailed information, or for catalogue, address,

RUSH & PIERCE, Suisun, Cal.

P. O. Box 69.

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12½, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18¼, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12½, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

KING DINGEE

is by the greatest son of McKinney—the magnificent Zombro. His dam is by Diablo and his granddam has 2 in the 2:15 list. He is a grand individual and trotted a mile last year as a 4-year-old in 2:22.

Season of 1908

AT

Santa Rosa, Cal.

A Highly Bred and Grand Individual.

For further particulars address

Fee: \$20 the Season

SAM NORRIS, Santa Rosa, Cal.

dairy farmer in Adair county: He has a herd of grade Jerseys that average about 200 pounds of butter a year, or about \$46 per head. The skim milk at 20 cents per hundred weight amounts to about \$10; in all, about \$56 per year per cow gross income. He estimates the cost of keeping his cows at \$35 each per year. This leaves him about \$20 profit per cow annually. With the aid of skim milk he is bringing hogs to a marketable weight, 250 pounds, in two months' less time than the beef cattle men. He says one of the greatest mistakes he ever made was to use a beef bull with his Jersey cows, thinking he would get a calf much superior as a vealer. As a result, his supply of herd heifers has run very short.

The first step in treating contagious abortion is to separate cows which show indications of the trouble, placing them in an isolated barn and lots entirely away from the other cattle. In no case should a bull that is used in the healthy herd be allowed to serve a cow that has recently aborted. The department suggests the following as a reliable method of treatment to prevent a recurrence of the trouble: Dissolve one dram corrosive sublimate, one ounce each of alcohol and glycerine and shake this up in a gallon of water, to use as injection into the vagina and a wash for the parts about the vulva and root of the tail. Being very poisonous, it should be kept in a wooden barrel out of the way of ani-

mals and children. Every morning the vulva, anus, back of the hips and root of the tail should be sponged with this liquid, and this is best supplied to the whole herd. A one per cent solution of carbolic acid is a good substitute.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For — It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. **Human Body** — CAUSTIC BALSAM has no equal as a Liniment.

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints.

We would say to all who buy it that it does not contain a particle of noxious substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

REMOVES THE SORENESS—STRENGTHENS MUSCLES
Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than \$10.00 paid in doctor's bills."

FOR SALE.

Grey Boy
a grey gelding by Knight, dam by Algona. This is a great pacer, 6 years old. He has worked in 2:13 and is now ready to go fast. J. S. Phippen will show him at any time at the Pleasanton track.

E. B. TOWNE, Palo Alto, Cal.

FOR SALE.

Bay horse, 15.3 hands, hackney breed, high actor, plenty of style, but lady can drive; price reasonable. Address or call,

116 Palm Ave., San Rafael.

For Sale.

J. Arthur, bay colt three years old, by Longworth, son of Sidney out of Ferndale Bell, dam of Alfred D. 2:12 1/4 by Judge Saulsbury, son of Nutwood. This colt is a grand individual and with very little training worked a quarter of a mile in 35 seconds. Address or apply to

SARS A. C. DIETZ,
5403 San Pablo Ave., Oakland Cal.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address,

SABLE MCNEER,
1319 Pearl St., Alameda, Cal.

FOR SALE—FACER.

Highfly: 2-year-old record 2:24 1/4; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale. My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

POSITION WANTED.

Do you want a real good trainer of colts and aged horses, that has had some remarkable success as such, and not afraid to work, and thoroughly knows his business, how to conduct a breeding farm from A. to Z, or take charge of a boarding stable? If you do, communicate with me. Best of references. Address TRAINER, care "Breeder and Sportsman."

"SAVE-THE-HORSE" SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

Such results as the following explain why this is the only remedy sold under a contract:

ALPHA, SASK., Canada,
April 26th, 1908.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I wrote you from Indian Head, Sask., two years ago concerning Save The Horse Spavin Cure for my stallion Game Keeper, No. 39145, A. L. A., by Gamaleon. I tried your Save The Horse and it did all you claim for it and more. This horse was raised by Phillips Bros., Delevan, Wis., and in shipping to the horse sale at Chicago the winter of 1904 got his right hind leg through the car in some way and was badly hurt. A Vet. in Chicago advised his owners to take what they could get for him; that he never would be of any use. He was bought for \$50 at the sale. I bought him the next October for \$75. I tried a great many remedies on the leg, but to no purpose. I purchased Save The Horse and it did the job; to put it short, it made a \$75 horse well worth \$1000, and if I could afford to keep him I would not take \$1000 for him, for I am sure that he is one of the fastest absolutely untrained horses that lives. The first time I go to Indian Head I will mail you a photo of the horse and you will see what kind of a job Save The Horse made of a very large leg. I have used it on different horses without a single failure. Yours truly,
JOHN LYNCH.

A. F. POULSON, General Hardware Agent for Sampson Wind Mills.

CASTLEWOOD, South Dakota, May 11, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: I write this to inform you regarding a horse with a bone spavin upon which I have been using your "Save-the-Horse". Possibly you remember that I wrote to you several times. I bought and used it and to-day the horse is as sound as could be wished for, and he is doing well. It is certainly all right and does all it is recommended to do. If there is anyone in doubt refer them to me and I will speak a good word for it. Yours, etc.,
A. F. POULSON.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

\$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

Oakland's Banner Meeting

Emeryville Track, August 10 to 15.

Entries Close Tuesday, June 9th.

The Alameda County Fair Association announce the following classified events to close on Tuesday, June 9.

Trotting, 2:09 Class, Purse	\$1050
Trotting, 2:11 Class, Purse	900
Trotting, 2:30 Class, Purse	750
Trotting, 2-Year-Olds, Purse	600
Pacing, 2:05 Class, Purse	1050
Pacing, 2:10 Class, Purse	750

CONDITIONS:

Entries close on Tuesday, June 9th.
Five per cent entrance, with the usual five per cent from money winners.
Three heats, every heat a race, except two-year-old trot, which is two heats, every heat a race.
Money division: Fifty, twenty-five, fifteen and ten per cent.
Nominators have the right to enter two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 4 o'clock the day before the first day of the meeting at which the race is to take place.

MEMBER NATIONAL TROTTING ASSOCIATION.

PACIFIC BREEDERS PACING HANDICAP

to be paced at the regular annual race meeting in August, 1908, at the Pacific Coast Trotting Horse Breeders Association
Stakes \$1500 Guaranteed

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse to be handicapped slower than up to a mile in 2:15.

Entries close Monday, June 15, 1908.

More than one horse from the same stable may start.

RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168¾ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classed for one mile. While the faster horses travel farther in this race than the slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Entrance two per cent, due June 15, 1908. One per cent additional if not declared out on or before July 15, 1908. Two per cent additional to start.

Declarations must be made in writing, accompanied by the amount due when made, or nominator will be held for all payments except starting payment.

Money divided 50, 25, 15 and 10 per cent. Except as stated, conditions advertised for the meeting to govern.

MEMBER NATIONAL TROTTING ASSOCIATION.

E. P. HEALD,
President.

F. W. KELLEY, Secretary,

Dillon 1:58¹/₄); dam Cricket 2:10 (dam of 5 in 2:30
list) by Steinway 2:25¹/₄ (sire of Klatawah 2:05¹/₄;
Bonnie Steinway 2:06¹/₄, etc.) He is a horse of
great muscular development and shows plenty of
perfect dispositions, bone, substance and speed. He will make the Season of 1908 at a fee of \$25.
For further particulars address

C. MATTESON, Haywards, Cal.

Bonny McKinney 41383

Son of
McKinney 2:11¹/₄

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustie; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc
Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly
bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most
critical horseman could look for. His trotting action is perfect, and it is my intention to have him
trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of
SEARCHLIGHT 2:03¹/₄
King of Race Horses.

Reg. No. 43899

Sire of Ray o' Light 2:13¹/₄ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11¹/₄, trial
2:05¹/₄; Dam Rita B. by Boodle Jr.; 2nd dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 591, etc.
Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast
natural trotter and will be trained to race this year. His blood lines are of the richest—Alcyone 2:27,
Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice),
Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined
to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie
Searchlight is a trotter.

Will make the Season of 1908 at Alameda Race Track, ALAMEDA, CAL.

Fee: \$40 for the Season for either horse.

January 1st to July 1st.

Money returned in case mare does not get with foal.
Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if
mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Address or apply to

BEN. F. RUSH, Suisun, Cal.

McKENA 39460

Brown stallion, foaled April 11, 1900, 16-2. Sire, McKinney 2:11 $\frac{1}{4}$, the greatest sire of extreme speed living. Dam Helena 2:11 $\frac{1}{4}$, dam of Wild Nutting 2:11 $\frac{1}{4}$, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:09 $\frac{1}{4}$; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinnies. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm,

Stanford University, Cal.

CHESNUT TOM 43488

Race Record 2:17 $\frac{1}{4}$. Trial 2:14.

Sired by Nutwood Wilkes 2:16 $\frac{1}{4}$ (sire of John A. McKerron 2:04 $\frac{1}{2}$, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:04 $\frac{1}{2}$); granddam Lida W. 2:18 $\frac{1}{4}$ by Nutwood 600. Chestnut Tom won the 221-trot at Salinas, 1906, in three straight heats.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the

BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

R. V. HALTON, Manager,

Hotel Belvedere,

Belvedere, California.

ROBERT DIRECT 0883

Black stallion, sired by Direct 2:03 $\frac{1}{2}$, dam Daisy Basler (sister to Ethel Basler, dam of two in 2:15 $\frac{1}{4}$) by Robert Basler 2:20 son of Antevolo 2:19 $\frac{1}{2}$; second dam Richmond by Pasha by Sultan 2:24; third dam Miss Rowland by A. W. Richmond, etc. The largest, handsomest, best bred and best gaited Direct in California.

Terms: \$30, or \$50 to Insure.

BEST POLICY 42378

Bay stallion, sired by Allerton 2:00 $\frac{1}{4}$ (sire of Locanda 2:02, Redlac 2:07 $\frac{1}{2}$, etc.), dam Exine 2:18 $\frac{1}{4}$ by Expedition 2:15 $\frac{1}{4}$ (sire of Bon Voyage 2:12 $\frac{1}{4}$, etc.); second dam Exine (dam of 4 in 2:30) by Axtell 2:12 (sire of 7 in 2:30 and dams of 6 in 2:10); third dam Russia 2:28 (sister to Maul S. 2:48 $\frac{1}{4}$) by Harold; fourth dam Miss Russell (dam of Nutwood 2:18 $\frac{1}{4}$) by Pilot Jr. 12.

The choicest and most fashionable bred trotting stallion on the Pacific Coast!

Terms: \$50 for the Season.

These choice stallions will stand at

R. O. NEWMAN,

Visalia, Cal.

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 $\frac{1}{4}$

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08 $\frac{1}{4}$ (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and granddam of 12 in the list.

Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frasse 2:11 $\frac{1}{4}$, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege.

Pasturage \$5 per month.

H. S. HOGBOOM, Woodland, Cal.

 Tulare.....September 21-26
 Fresno.....September 28-October 3
 Hanford.....October 5-10

DRIVING CLUBS are becoming more and more numerous in California, showing that there is a renewed interest in road driving here as elsewhere. In nearly every town where a track is kept in condition for speed contests there is a flourishing club in existence and matinees are of weekly or monthly occurrence. Among the towns and cities where clubs have been organized are Los Angeles, Riverside, San Bernardino, San Diego, Downey, Santa Maria, Bakersfield, Hanford, Tulare, Fresno, Sacramento, Oak Park, Chico, Woodland, Davis, Santa Rosa, Ukiah and San Francisco. The majority of these organizations are amateur clubs where the racing is all for blue ribbons or trophies and is free to the public. Some of the clubs permit professional drivers to compete, the Park Amateur Driving Club of San Francisco being the only one in all probability that conforms strictly to the amateur rules and has applied for membership in the Amateur League. With so many good clubs on the Coast it should be easy for them to get together and give one inter-city meeting each year at which each club would be represented by its best horses, which would compete for cups or other valuable prizes that might be offered. There is no sport that would attract more people if it were known that the best horses from the different sections of the State were to meet in friendly contests at which there would be no betting, no liquor selling, and nothing but legitimate sport. Under the new amateur rules admission can be charged at such meetings, and if it were properly advertised the gate receipts should pay the entire expense. We suggest to the amateur clubs of California that they take this matter up at an early date and see if some such a meeting cannot be held this fall. It would stimulate the sport of amateur racing greatly.

NEXT TUESDAY, June 9th, is the day for closing entries to six harness events for which generous purses have been hung up by the managers of Oakland's Banner Meeting to be held in August during six days beginning Monday, the 10th, and closing Saturday, the 15th. These races are all on the plan of every heat a race and should attract big fields of entries. For the trotters there are four races—the

2:09 class, \$1,050; the 2:11 class, \$900; the 2:30 class \$750, and the two-year-old trot, \$600. Then there is \$1,050 for pacers of the 2:05 class and \$750 for pacers of the 2:10 class. Manager Benjamin will fill each and every one of these races if he thinks there will be contests, and will not hold out for big lists that will make the purses self-supporting. In the 2:09 trot, for instance, four entries will be considered enough to fill, and it will be the same in the 2:05 pace, providing the best horses are entered. The list of entries received for Oakland's early-closing events was a generous one, and Manager Benjamin has every reason to expect a liberal list to those which close on Tuesday next. If the Oakland meeting is a success this year, and there is every indication that it will be, a good program of harness racing will be given there every year, purses will be increased and colt stakes inaugurated. We hope every horse owner who intends racing in California this year will include Oakland in his itinerary and that when the entries are all in it will be found that all the leading trainers in California will have representatives from their stables among the horses named.

ONLY a little over a week remains before the date of closing entries for the four weeks of racing advertised by the Central California Circuit, comprising the tracks at Bakersfield, Tulare, Fresno and Hanford. There is nearly \$6,000 to race for in purses, the majority of which are of \$500. This circuit of agricultural fairs is one of the best managed, most popular and best attended on the Coast. The tracks are good, the shipments short and the racing well managed. As nearly all the fastest horses in California to be raced this year will be shipped north to Oregon after the California State Fair at Sacramento, the opportunity for those who stay here is much better, and the Central California Circuit offers a chance for them to get some of the money which they would otherwise not have. The advertisement of the four meetings will be found in our business columns to-day, and we suggest that owners who desire to race on that circuit should make their entries immediately, as the date of closing is Monday next, June 15th. Address the entries for each place to the secretary of the association at that place. The programs are all alike and are fully set forth in the advertisement.

THE GREATEST SCARE the bookmakers are getting is from the successful operation of the mutual and auction pools at the Kentucky tracks. It has been clearly demonstrated during the past month that these systems of betting are not popular with race-goers, but that they return a larger revenue to the associations as well and make the racing cleaner. If the alleged reform statesmen all over the country would, instead of making a frantic and narrow fight against all racing, unite on a law to make mutuels and auctions the only methods of wagering on races, taking from the total amount wagered a percentage tax to be distributed in charities and in improving all useful breeds of horses they would not only accomplish some good, but would relieve a noble sport of its greatest curse—the professional gambler.

WE HOPE the \$1,500 stake offered for a pacing handicap by the Breeders' Association for its Chico meeting will attract a large number of entries. Owners of pacers should remember that any horse that can pace a mile in 2:15 or faster will have a chance in this race, as they will all be handicapped by experts as near equal as possible and it should furnish the sensational race of the meeting. The race will be a dash, and as there are four moneys, \$750 will go to first horse, \$375 to the second, \$225 to third and \$150 to fourth. If this race is a success others like it will be given and when handicaps become general the earning capacity of harness horses will not be destroyed by their fast records. Give this race a good liberal entry list. It deserves to have a fair trial.

THE LIVESTOCK BREEDERS of Yolo County are considering making a collective exhibit of their stock at the coming State Fair, and the idea is one that can be adopted with profit by the breeders in every other county. The proposition is for the breeders to make a joint collection of the very best animals from all the herds in the county and to jointly bear the expenses of sending them to Sacramento for

exhibition. The individual expenses of showing stock at the fair would thus be brought down to a low figure and would not fall heavily on anyone. Such an exhibit would also be much better and have more class than any individual exhibit, and be better for all concerned. It would also attract much attention to the county marking it as a stock growing center.

A SALE OF STANDARD BRED HORSES is to be held at Fred H. Chase & Co.'s pavilion on Valencia street on the 27th of next month. A number of well-bred mares, colts and geldings have already been consigned and there promises to be a splendid lot of horses for the sale. Entries for this sale will close on Wednesday next, the 10th inst., and those having horses to sell should send the list in to Chase & Co. immediately. The market in San Francisco is pretty fair at the present time, and buyers will be numerous when the sale is held. Write to Chase about terms, etc.

SANTA ROSA FIRST ON THE CIRCUIT.

The Pacific Coast Trotting Horse Breeders' Association Decides to Hold a Summer Meeting in July on the Santa Rosa Track.

At a meeting of the Board of Directors of the Pacific Coast Trotting Horse Breeders' Association held last Wednesday, a proposition was presented from the people interested in Santa Rosa for a Breeders' meeting to be held on the Santa Rosa track. As far as has been announced, this will be the first meeting on the Circuit this year, and as the Santa Rosa track is one of the best tracks in the State and is now in first-class condition, it is expected that most of the horses will go there to train as soon as this announcement is made. This association, until of late years, has always given two or more meetings. A summer meeting in July for aged horses and an annual fall meeting later, at which time the colt stakes were given. This year the fall meeting will be held in Chico following the meeting at Oakland. With Santa Rosa opening the Circuit to be followed by the big meeting at Oakland, Chico and the State Fair, there will be four good meetings in California before the horses go North to fill engagements in the big purses offered on the North Pacific Circuit. The Board announces the following program for the meeting, entries to stakes to close Wednesday, July 1:

Trotting.	
2:24 Class. Sonoma Trotting Stakes.....	\$1,000
2:19 Class. F. S. Turner Trotting Stakes.....	500
2:16 Class. Occidental Hotel Trotting Stakes.....	500
2:13 Class. Grace Bros. Trotting Stakes.....	500
2:10 Class. J. H. Gray Trotting Stakes.....	750
2:30 Class for three-year-old trotters, Sidney Dillon Stakes.....	400
Pacing.	
2:20 Class. Santa Rosa Pacing Stakes.....	\$1,000
2:15 Class. Sebastopol Pacing Stakes.....	500
2:12 Class. Petaluma Pacing Stakes.....	500
2:08 Class. Overton Hotel Pacing Stakes.....	500
Free-for-all Pacing Stakes.....	750
2:25 Class for three-year-old pacers, Chamber of Commerce Stakes.....	400

EARLY REAPER 2:09¾ GOES TO RUSSIA.

The stallion Early Reaper 2:09¾ has been purchased for export to Russia, where he will be used in the stud. This is another indication of the popularity of American bred stallions and the effort of foreign horsemen to improve their trotters by the use of the best they can buy. In the last few months a number of fast record stallions have gone abroad, where they will be raced, and where they will do service in the stud.

Early Reaper was foaled in 1893, sired by Highwood 2:21¼, dam Atalanta (dam of 4) by Alcantara, granddam Starling by George Wilkes. Early Reaper is strongly bred in George Wilkes' blood and has always been regarded as having a promising future as a sire of speed. He was a successful race horse, displaying uncommonly good form as a colt trotter. He secured a record of 2:25½ as a three-year-old, reducing it to 2:21 as a four-year-old, and to 2:09¾ as a five-year-old. He started in but one race as a three-year-old. It was at Darlington, Wis., in a 2:50 class race, in which there were eleven starters. The race went five heats, Early Reaper winning the first, second and fifth heats. The next season in his four-year-old form he started in eight races, and as a five-year-old he started five times.

Since his retirement he has been in the stud continuously, and is credited with four trotters and two pacers. His most conspicuous trotter is the fast mare Early Alice 2:07¾, who in 1906 indicated by her races that she was a fast trotter. Last year she reduced her record to 2:07½ early in the season, but was laid up when her important engagements came on to be raced. She is said to be a very fast mare. She is the only fast record performer to the credit of her sire.

Early Reaper should do well abroad as a sire. His sire, Highwood, has another son, Cald 2:07¾ abroad who has become a very great sire, and if Early Reaper does as well it will be a great record for their sire.—American Sportsman.

PARK AMATEUR DRIVING CLUB.

A high wind that swept through the park on Saturday last made the place anything but a pleasant one to spend a half day in, yet a large crowd attended the races held by the Park Amateur Driving Club and remained until the last one was finished.

An innovation that was not very satisfactory to the spectators was the lengthening out of all the races to mile heats instead of three-quarters, as has been the rule heretofore. The horses seemed to cover the regulation distance without tiring. Starting the horses at the last quarter pole resulted in delays, however, and try as they would, the Marshal and other officials found it difficult to get the horses out in time to start promptly in every event, and scoring on the turn made it very difficult to get the horses away on an even break, but Mr. T. J. Crowley, the club's starter, did well under the circumstances.

The race for Class A trotters resulted in an excellent contest between Mr. F. J. Kilpatrick's Princess W. and Mr. A. Ottinger's gray gelding Rozelle. There were two other starters in this race, Major Cook and Telephone, but they were not up to heats at a mile and under the rule went to the stable after two heats, leaving the final contest to the gray and the black. Rozelle took the first heat of this race in 2:19½, and then Princess W. won the two following heats in 2:17, excellent time for heats where the horses had to face a strong wind in first and last quarters.

The race for Class A pacers was a disappointment, as after winning the first heat in 2:15, Mr. Brown drew his horse Victor Platte and Mary K. had a walk-over for the next heat. The summaries:

Class B Trotters—
F. W. Thompson's Lady Washington (Thompson).....1 1
F. J. Kilpatrick's Ray McKinney (Kilpatrick).....3 2
M. W. Herzog's Lady Nell (Herzog).....4 3
E. Stewart's Peter Pan (Stewart).....2 4
Time—2:26, 2:23½.

Class A Pacers—
Dr. Hoffman's Mary K. (Hoffman).....2 1
T. H. Brown's Victor Platte (Brown).....1
Victor Platte withdrawn after first heat.
Time—2:15, 2:23½.

Class A Trotters—
F. J. Kilpatrick's Princess W. (F. J. Kilpatrick).....2 1 1
A. Ottinger's Rozelle (Ottinger).....1 2 2
D. Hoffman's Major Cook (Hoffman).....3 3
H. C. Ahler's Telephone (Ahlers).....4 4
Time—2:19½, 2:17, 2:17.

Class C Trotters—
R. Consani's Presto (Consani).....5 1 1
A. P. Clayburgh's Charles II (Clayburgh).....7 7 2
G. D. Mackay's Quill (Mackay).....3 3 3
C. F. Von Isseldorf's Cita Dillon (Von Isseldorf).....4 4
J. W. Smedley's Red Velvet (Smedley).....1 2 4
I. L. Borden's Barney Barnato (Borden).....2 5 5
F. J. Kilpatrick's Belle of Washington (Kilpatrick).....6
Time—2:25½, 2:27, 2:27½.

Class B Pacers—
Captain Olsen's Zulu (Olsen).....2 1 1
H. M. Ladd's Ringrose (Ladd).....1 4 2
T. F. Bannon's Jim Chase (Bannon).....3 3 3
W. Hammerton's Colonel C. (Kilpatrick).....4 2
Time—2:20, 2:22, 2:24.

Class C Pacers—
W. Lange's Doc (Kilpatrick).....1 1
J. Franklin's Black Bess (Bannon).....2 2
Time—2:25½, 2:23.

WOODLAND HAS DRIVING CLUB.

The Woodland Driving Club organized on Thursday evening of last week with fifty members. Those interested met at the Julian Hotel and in a short time effected an organization with the following officers:

President, H. P. Eakle; vice-president, Chris Sieber; secretary, C. E. Binning; treasurer, M. C. Keefer; board of directors, H. P. Eakle, A. C. Stevens, D. J. O'Keefe, C. C. Brown, Chris Sieber, Dr. W. A. Joyce, W. S. Black, George D. Zimmerman and Charles Johnson.

Speed committee—C. Spencer, C. B. Bigelow, Hiram Hogoboom.

The club proposes to hold several matinees during the summer, the first to be given on Saturday afternoon, June 20th.

There are many fast roadsters owned by the club members and as good contests as can be seen anywhere—HACKETT

where will doubtless occur on the Woodland track at the matinees given by this organization.

THE WINNING SIRES.

An Eastern compiler of turf statistics has recently published a list of the money winning stallions of 1907. McKinney heads the list with twenty-seven money winners having a total of \$28,905 to their credit. Lynwood W. comes next with three winners of \$27,255. Of the stallions owned in California Zombro is next with sixteen winners of \$10,631, and then come Diablo with eleven winners of \$10,307, Zolock five winners of \$9,445, Nutwood Wilkes with eight winners of \$8,947.50, Athadon three winners of \$7,786.25, Star Pointer five winners of \$7,155, Wildnut six winners of \$7,082.91, Steinway (now dead) four winners of \$6,412.50, and Athabla with two winners of \$5,750.

SAN FRANCISCO CLUB AT VALLEJO.

That energetic and enthusiastic organization of road drivers, the San Francisco Driving Club, held two afternoons of harness racing at the mile track at Vallejo on Saturday and Sunday last. There was a good attendance both days, the racing was good and fair time was made in every event. Excursion boats were run from this city on both days. The races resulted as follows:

Saturday, May 30.

First Race, 2:18 Pace—
F. E. Burton's Nico.....4 1 1
John Banz' Babe.....1 4 3
Charles L. Becker's Charles B.....2 2 2
Time—2:22, 2:22, 2:20.

Second Race, Solano County Event—
M. J. Ream's Oro Belmont.....1 1
Dr. McFarland's Tom Mack.....2 2
J. Nightingale's Glenal.....3 3
John Sirouse's Abe Lincoln.....4 4
Time—2:21, 2:18.

Third Race, 2:25 Mixed—
John Banz' Belle.....1 1
J. V. Galindo's Hunky Dory.....2 2
J. E. Butler's Lady Cupid, F. Benson's Bowell and N. Lawlar's Balm, distanced.
Time—2:24, 2:20.

Fourth Race, Free-for-all Trot—
Charles Becker's Walter Wilkes.....1 1
G. Lindauer's Homeway.....3 2
F. Gomme's Verona.....2 3
Time—2:18, 2:18.

Sunday, May 31.

First Race, 2:20 Trot and Pace—
Fred Blopore's Monk.....2 1 1
J. Zamponico's Lucero.....1 2 4
Dan Siebert's Ed Ray.....5 3 2
Charles L. Becker's Sycamore.....3 4 3
M. M. Donnelly's Lucky Dillon.....d
Time—2:24½, 2:19½, 2:20.

Second Race, Free-for-all Pace—
A. H. Schofield's Harry Hurst.....1 3 1
George Nutting's Byron Lace.....4 1 3
George Kitto's Deroll.....3 4 2
A. H. Schofield's Albert S.....2 2 *
Time—2:21½, 2:17, 2:20.

*Fell.

Third Race, 2:15 Pace—
T. H. Corcoran's Lady Falrose.....3 1 3 1
H. Schottler's Dynamite.....2 2 1 2
D. Robert's Edenvale.....1 3 2 3
Time—2:19, 2:20, 2:22, 2:20.

Fourth Race, Solano County Road Race—
R. Halford's Donabrook.....1 1
H. Smith's Demio Wilkes.....2 2
E. Ream's Zulu.....3 3
Time—2:20½, 2:19½.

OAKLAND'S BANNER MEETING.

Prospects are very bright for the big August meeting at Oakland. Some grand sport can confidently be expected as the various classifications have been arranged with a view of securing spirited contests. Manager Benjamin has issued the following statement:

"The main track at Emeryville will be especially prepared for harness racing. It will be reserved exclusively for the trotters and pacers. Owners and trainers need have no hesitation in making entries to two classes, as there will be sufficient number of days intervening to give every one a fair chance. The six events which close on Tuesday are as follows: Trotting, 2:09 class, purse \$1,050; trotting, 2:11 class, purse \$900; pacing, 2:05 class, purse \$1,050; pacing, 2:10 class, purse \$750; trotting, 2:30 class, purse \$750, and trotting, two-year-olds, purse \$600.

"I am especially anxious to fill both the 2:09 and 2:11 classes. These two events will be kept well apart. As a general rule two-year-old races do not bring about interesting contests for the spectators, but as there are quite a number in training, owners have been given a chance for a try-out as a preliminary to the Breeders' Futurity. Owners and trainers who have green horses of some promise should not overlook the 2:30 trot. The fastest green horses are doubtless engaged in the 2:20 classes and the 2:30 class was included so as to give the horses of moderate caliber a chance."

Do not overlook the fact that Tuesday is the last day on which you can make entries for the Oakland meeting.

AN INTERESTING STATEMENT.

A very prominent trainer, after using all makes of carts, claims that the Houghton No. 70 Cart is the finest he has ever ridden. Another who bought on the "show me" plan says it rides finer than a buggy. All Houghton Carts have properly graded springs, hung in swinging shackles. The spring freely lengthens and shortens as the weight requires. A spring a MILE LONG improperly hung or graded will ride hard.

We repeat, Houghton Carts are easy riders. They are built on the time-tried Houghton Idea to last and to please and sold on the satisfaction-or-your-money-back plan.

Houghton builds twenty-four different styles of two and four wheelers. An interesting thirty-two-page catalog will be mailed on application to the Houghton Sulky Company of Marion, Ohio.

The Pleasanton Stock Farm has paddocks and box stalls for stallions, young or old. Best of care taken of horses. Attention given to feet. Call on or address S. O. Fesler, Pleasanton, Cal.

INTER-CITY MATINEE.

The matinee of harness racing given at Agricultural Park, Sacramento, on Decoration Day would have been more of a success had it not been for a high north wind which prevailed and made fast time out of the question. Members of the Chico, Sacramento and Stockton driving clubs started their horses in the different events and a large crowd of spectators enjoyed the sport.

The race of the day was expected to have been the special event in which Frank Ruhstaller's trotter Wild Bell 2:08½, and the two pacers Kelly Briggs 2:08, owned by Frank Wright, and Cranky Thorn, owned by C. Helms of Stockton, were the contenders. The rule of the club barring hoppers was suspended in this race, and the pacers were permitted to appear with the extra harness on. Wild Bell was not up to a fast race and both pacers beat him in 2:17 and 2:16½. This was the fastest race of the day, but in a special trot Frank Wright drove his James Madison stallion The Statesman to victory in 2:17 and 2:18½, beating Chestnut Tom 2:17¼ of Stockton and Scotch John of Chico. The Statesman is entered all through the Coast circuit and looks like one that will get a share of the money during the season. The summaries:

Special Trot—
Statesman, Frank Wright, Sacramento.....1 1
Chestnut Tom, G. T. Algeo, Stockton.....2 2
Scotch John, Frank Colen, Chico.....3 3
Time—2:17, 2:18½.

Special Pace and Trot—
Kelly Briggs, Frank Wright, Sacramento.....1 1
Cranky Thorn, C. Helms, Stockton.....2 2
Wild Bell, Frank J. Ruhstaller, Sacramento.....3 3
Time—2:17, 2:16½.

Class A Event—
Briarwood, I. Christie, Sacramento.....1 1
Lady Irene, J. Jones, Stockton.....2 2
Harold B., L. B. Daniels, Chico.....3 3
Time—2:21, 2:23½.

Class B Event—
Prince A., A. B. Sherwood, Stockton.....1 1
The Judge, Thomas Coulter, Sacramento.....2 2
Katy B., George Shane, Sacramento.....3 3
Time—2:26½, 2:27½.

Class C Event—
Presto, M. P. Hunt, Sacramento.....2 1
Flyaway, Frank Silva, Sacramento.....1 4
Gladys Moore, L. B. Daniels, Chico.....3 2
Time—2:45, 2:40.

Class D Event—
Derby Mac, C. Fagan, Stockton.....1 1
May B., W. Powell, Sacramento.....2 2
Billy George, George Vice, Sacramento.....3 3
Time—2:45, 2:46.

SHOW TROTTERS WIN IN EUROPE.

With a pair of American trotting bred high stepers, Louis W. Winans of Brighton, England, won the gold cup awarded at the Brussels (Belgium) Horse Show last month for the best pair of carriage horses in the show. English, French and German horses were represented in the competition, and the victory was one of the most notable ever won by American horses abroad.

The winners were Three Cheers and Hurrah, a pair of superb dark bays, 15.3 hands high, that were shown in the lead of the Tichenor-Grand four-in-hand team of the Durland Horse Show last year. One of the horses was by Gambetta Wilkes 2:19¼ and the other was by a son of Nutwood 2:18¾.

Mr. Winans is a new exhibitor at the horse shows. He has been prominently identified with trotting in Europe, having campaigned such light harness horses as Wig Wag 2:19¼, Alta Axworthy 2:10¼ and Siliko 2:11¼, but has not heretofore exhibited heavy harness horses. He is going to show Three Cheers and Hurrah at the London International, where it is understood that he will have a large stable, made up wholly of American trotting bred carriage horses.

LOST FIVE HORSES.

Two horses belonging to M. McEldowney, who resides about five miles west of Rio Vista, dropped dead the first of last week, making the fifth lost by Mr. McEldowney since the first of May. All the horses have died suddenly and from causes that have not as yet been satisfactorily explained, in fact even the State Veterinary is at a loss to account for the trouble. Only recently he was in that section when two horses had died in a similar manner, and although the several organs of both were removed for further investigations, as yet nothing definite has been determined as far as we can learn. Many are of the opinion that the horses die from the fumes from the Selby smelter, while others claim it is a poisonous grass or weed that is responsible. A botanist from the University at Berkeley will visit the section soon to investigate the poison theory. The peculiar part of the situation is that only horses seem to be affected, although cows and sheep pasture on the same grounds.

HAS TRUE MERIT—CURED FISTULA.

Feeling that true merit should be recognized, I want to give my experience with Gombault's Caustic Balm. A month ago one of my horses gave every indication of having a fistula. I was told that his case was incurable, but sent for a bottle of Gombault's Caustic Balm and applied it per directions. The case yielded to the treatment from the first, and the horse is now entirely cured.—C. T. GREATHEAD, Tancred, Cal.

HORSES AT SALINAS TRACK.

There are now thirty-five trotters and pacers at the Salinas track, and these are being put in fine condition for the California circuit. Trainer Charles Whitehead has fourteen in his care, among them many well known in past seasons. The horses are:

Delphi 2:12½, pacing stallion, by Director; dam by Dexter Prince; owned by Charles Whitehead.

Miss Delphi, trotting filly, three years old, by Delphi; dam The Mrs., by Derby Ash; owned by Whitehead.

Two-year-old bay trotting mare, by Delphi; dam Nina B.; owned by Whitehead.

North Star 2:11¼, J. B. Iverson's famous trotting gelding, has worked a mile in 2:16 already this year.

Della Derby 2:17, trotting mare; owned by J. N. Anderson. Della Derby has covered a mile in 2:12¾ this year.

Red Robin, bay trotting stallion, by Robin, dam by Juno. Red Robin is the property of Paul Bianchi of Gonzales. He has covered a mile in 2:22.

Elaine 2:22¼, brown pacing mare, by Robin; dam Altoonita, by Altoona; owned by Cheri Hebert. Elaine's best work this year is 2:18.

The Kid, brown trotting gelding, 3 years old, by Delphi, dam Altoonita; owned by Cheri Hebert. The Kid has been a mile in 2:37.

Delphino, trotting gelding, two years old, by Delphi, dam by a son of Eugeneer; owned by J. B. Iverson. Delphino's best is 2:41.

Leccora, black two-year-old trotting stallion, by Lecco 2:09¾; dam Amy I., by Diablo; owned by J. B. Iverson.

Derby Beauty, five-year-old trotter, by Charles Derby; dam by McKinney; owned by J. B. Iverson. Mile in 2:27.

Salva, bay pacing mare, by Dictatus Medium; dam Aunt Sally, by Benton Boy; owned by Ed Wright. Mile in 2:15.

Grey Ghost, roan trotting mare; sire Richmond Chief 2:11¼; dam by Comet; owned by Mr. Ryan, Pacific Grove.

Ray O' Light, champion two-year-old pacer 2:13½; brown stallion by Searchlight 2:03¼; dam Carrie B. 2:18, by Alexander Button; owned by E. S. Train of Santa Cruz. Ray O' Light has worked a mile in 2:14 this season and a quarter in :30¼.

Trainer W. H. Williams has eleven horses in his care. These are:

Sidonis, trotting stallion, by St. Nicholas; dam by Nutwood Wilkes.

Wild Girl, trotting mare, by Wild Nutling 2:11¼.

Kermit, pacing gelding, by Henry Nutwood; dam Two Minutes.

Zaza, two-year-old trotting mare, full sister to Kermit.

Roma, trotting mare, by Dexter Prince; dam Miss Valensin.

Diabull, six-year-old pacing gelding, by Diablo; dam by Tom Hal, Jr.

Torpedo, pacing stallion, by Del Norte.

Mr. Williams has also two three-year-old trotting geldings by Welcome, one five-year-old brown trotting mare by Boodle and one chestnut three-year-old trotting stallion. These are all green horses.

Trainer W. H. Combs has two horses in his care. These are: Albert Direda, four-year-old pacing stallion, by Robert Direct; dam Ida May, by Grosvenor. The pacer is the property of the trainer, a Hanford horseman, and has been a mile in 2:12 this season. Two-year-old trotting filly, by Hambletonian Wilkes, out of the dam of Albert Direda; owned by Dollenmayer of Hanford.

Trainer James Harris also has upon the track a horse of which he is very proud. This is Judd Parsons' famous bay trotting stallion, Bob McKinney, a four-year-old, by Nick McKinney, dam by Carr's Mambrino.

With this fine aggregation of horse flesh and a number more of pacers and trotters which are expected, there should be a fine lot of racing on the local track this summer.—Salinas Index.

NEW BLOOD FOR OREGON.

I. D. Chappelle of Hillsboro, Oregon, returned last week from the East, where he purchased six head of horses, including two well-bred stallions, Kinggo and Bushnell King 2:21, both sired by Norval King 2:12¼.

Among others he bought are Iowa Boy (p) 2:17¼, who was nosed out in a race by Tommy Grattan in 2:04¾ and 2:05¾.

Ohio Boy (t), a chestnut gelding, who was a close second in a race in 2:11 and 2:13 on a half-mile track. He is a sure two-tener.

Nellie Ash (p) 2:13, by Ashburt, who can step a half in 1:02. She wears only quarter boots.

Lady W. (t), a fine black mare, bred in the purple. She is 16 hands high and perfectly city broke and safe for a lady to drive. She can step a quarter in :32 and shows lots of speed.—Rural Spirit.

POPULAR RACING AND TRAINING VEHICLES.

The Toomey Sulkies and Carts are and have been for over fifty years the leading racing and training vehicles. They are built upon the most practical lines, first class in every way, and give the best results. The greater per cent. of the successful race horses all over the country have been educated, trained and raced to Toomey Sulkies and Carts, which have been found by owners and trainers to be perfect in every respect; in fact, the name "Toomey," when applied to a vehicle, is a mark of excellence.

Descriptive catalogue will be sent free upon application to S. Toomey & Co., Canal Dover, Ohio, U. S. A.

THE BIG HANDICAP.

Late in the afternoon of May 23d, the directors of the New England Trotting Horse Breeders' Association announced that all of the early-closing events for the Grand Circuit meeting at Readville had filled, including the \$50,000 American Trotting Derby. This decision was only voted by the board of directors after one of the warmest sessions in the history of the association and, from what can be learned, the holding of the \$50,000 race can be credited to President J. M. Johnson, Colonel John E. Thayer and Arnold Lawson's strenuous efforts in its behalf.

In the beginning Secretary Charles M. Jewett showed that up to date there had been received for the big race 125 entries, with California and the far Northwest still to be heard from. It was calculated that possibly there may be five more entries in later mails, which, at the outside, would bring the entry to 130. This made a majority of the directors feel that it was no use in going ahead with the project under the prevailing conditions of no betting, etc., as in their minds there should have been 150 entries at least in taking a chance. Messrs. Johnson, Thayer and Lawson then set right down to convincing their associates that the race must go, and in the end brought them round to voting that way. The result has made horsemen in this section feel that there is a bright future in store for them, and its beginning is this year.

So certain is Mr. Jewett that the handicap plan of racing is the right one that he openly says that in a few years all of the early-closing events down the big line will be of that order, with the entrance fee not over one per cent for starters. And the beauty of the proposition is, that with the contestants handicapped the week previous to each meeting from Detroit to Lexington, no one trotter and pacer can have a cinch in cleaning up through the circuit in their respective divisions, while the money-winners will have earned more when the season has passed than can possibly be the case under the old \$10,000 class races with five per cent to starters and an extra five from those winning a share of the purse.—Horse Review.

WORK-HORSE PARADES.

The work-horse parade idea is spreading over the country, and appears in the most widely scattered places, from Boston, New York and Philadelphia in the East, to Los Angeles on the Pacific Slope, and from Grand Rapids, Michigan, to New Orleans. In Chicago there has been much talk of a parade, but no parade as yet, although that city is said to contain more truck horses than any other in the world.

Boston, the pioneer in this matter, held its sixth annual parade Memorial Day. The entries numbered over 700, and the quality of the horses shown was better than ever before. There were fifteen four-horse and six six-horse teams in the parade. The old horse class, which the directors consider to be the most important, contained about fifty entries. All work-horses that have served their present owners ten years or more are eligible for this class, provided that they are in good condition and serviceably sound. The prizes in this class consist of gold and silver medals, street blankets and sums of money offered by humane societies and individuals. Similar prizes are offered for veteran drivers; and there are special prizes in the classes for horses that are most apt to be overworked and abused, such as local expressmen, hucksters and barrel collectors.

Every entry judged worthy to be in the parade received a ribbon of some kind, and with each blue ribbon there went a brass medal to be worn on the harness as a permanent ornament. Next year it is proposed to give a metal pin or badge to every driver who obtains a blue or red ribbon two years in succession. Sixty or seventy judges were required, many of them coming from distant points, for the judges have been selected and sifted with such care from year to year that it is considered an honor to be one of them.

A free lunch was furnished to the judges, and another to the drivers and police. Watering carts carried water to the horses, and the veterans in the old horse class were regaled with a special preparation of oatmeal and water.

As an amusing illustration of the thoroughness with which the details of the parade were worked out, it may be mentioned that sponges and fresh water are provided to clean the noses of the old horses after they drink their oatmeal.

The holding of the annual parade is not the only work of the association. It maintains during the winter a course of free lectures on subjects relating to the care and use of horses; it employs a permanent agent who assists poor and ignorant horse-owners with advice, information, and in proper cases, with free shoeing, medical treatment, the gift of a collar or blanket, etc., and finally, it holds an annual stable competition. Entries are received up to January 1st, and after that date the stables are inspected from time to time, defects in the treatment of the horses are pointed out to the owners, improvements are noted, and, at the annual Memorial Day parade, medals and certificates are awarded to the stable foreman and to the owners of the horses, provided that they reach the standard fixed by the judges. The stables are not judged in competition with one another, but they are judged individually, and receive first, second or third prizes, or nothing, according to their deserts.

THE AUTOMOBILE FROM A HORSEMAN'S POINT OF VIEW.

At one of the social functions which were a feature of the recent Toronto Horse Show Mr. George B. Hulme, a well-known New York horseman, made the following remarks on "The Automobile from a Horseman's Point of View":

In these days of automobiles, when a horseman is called upon to speak, he feels very much as David must have felt when he stood in the camp of the Philistines; but he would feel a great deal worse than he does, if we did not all of us remember what happened to Goliath.

It has been well said, "Pity not thine horse that hath both sire and dam; but pity rather thine automobile that hath no sire, but is d—d by everybody."

When I was asked to speak at an automobile banquet in New York the other day, on the subject of "The Automobile from a Horseman's Standpoint," the gentleman who invited me told me that I could go as far as I liked; but he forgot that we lived in a city where there was a society presided over by one Anthony Comstock, and that if I said what I really thought some of my remarks might have had too much gasoline in them.

Personally, as you all know, I love a horse, but I respect an automobile; I have to, it is so much bigger than I am, and travels so much faster. Automobileists, however, have one or two mistaken ideas that ought to be corrected. In the first place, they have an idea that every horseman damns the automobile. They are mistaken. Why should any self-respecting horseman take the trouble to make an ass of himself by anathematizing an inanimate creation of steel, iron, wood and rubber? No gentleman, no horseman wastes his breath in damning an automobile; he damns the chauffeur. Again, how often do we hear that so and so was out with his auto, and met so and so driving; and his horse was scared to death at the auto. Mistaken again; nine times out of ten the horse was not nearly as much scared at the auto as the horseman was at his horse.

Again, when the owner of the auto is taking a spin up the road, with his best girl wrapped up in her pony-skin coat, and he sees a long-haired, wild-eyed youth waving his arms, and when he gets within earshot hears him cry, "Oh, hell what have we here?" he thinks that he and his auto are the cause of the ejaculation. Wrong again! It is only some student from a dramatic school reciting Shakespeare.

After all, I don't see that the automobilist has any the best of the horseman; in fact, the balance is rather in favor of the latter, as I will prove to you. Once in a while an auto gets cranky and refuses to start; but a horse can be balky, too. The wheel of an auto sometimes strikes a stone, and skids, but a horse can shy; the auto can run away, but so can a horse; the auto climbs up telegraph poles, but a horse jumps over them. When a horse breaks down and dies the owner can still send him down to Barren Island and get a five-dollar bill for him; but when the auto breaks down and is towed back to the garage, the owner gets a bill for much more than five dollars, and the chauffeur gets the devil.

Statistics prove that the value of all the horses in the United States in 1907 increased \$20,952,000, yet the average value only decreased ten cents. I am not sufficiently well posted on the automobile industry to know how much their total value increased, but from what my friends tell me the value of a great many machines decreased until they were worth ten cents.

Again, statistics prove that more horses were sold during 1907 than in any previous year. I don't, however, consider that altogether a bull argument for the horse, for two reasons: First, there were more horses by 245,000 to be sold; and, second, those who had horses to sell were eager to find customers before they were all killed off by the automobiles.

After all, when you come to think of it, automobiles have their uses. A few years ago, the roads in our parks used to be closed for renewals about once in three years; now they are closed three times in one year. That benefits the contractor. Again, those roads used to be as smooth as a floor; now they are so full of ruts and holes that we have to send our carriages into the shops for repairs every season. That benefits the carriage builders. And many an honest dollar has been earned by the farmer by hiring out a team to draw back to the nearest garage an auto that is out of commission. That benefits the farmer. And we all know that what benefits the farmer benefits the entire country. Therefore, as the auto benefits the farmer, the auto benefits the entire country. Q. E. D.

Well, gentlemen, there is plenty of room for both of us, except, perhaps, in a narrow lane, where the auto, of course, ought to make way for the horse. All we need is a little more of the spirit of give and take. Let the chauffeur show a little more consideration for the pedestrian, and the horseman a little more for the chauffeur, and we shall all get along.

The auto has come to stay, whether we like it or not; so we might as well stop kicking, and rather give this parting word of advice to our friends who own autos: "Safer is the owner of an auto in a road full of frisky horses, than in his machine with a chauffeur full of ponies of brandy."

Red Silk 2:10 is nursing an own sister of Helen Hale (2) 2:13¼ by Prodigal 2:16 at Fairlawn Stock Farm, Lexington, Ky.

NOTES AND NEWS

Entries close on Tuesday for the big Oakland meeting.

Central California entries close one week from Monday next.

D. L. Bachant has entered Athasham in the 2:09 class at Oakland.

It is said the Russians recently made offers for both Allerton 2:09½ and Expedition 2:15½.

The \$1,500 handicap for pacers will close Monday, June 15th. This race will give every pacer on the Coast a chance.

It is almost a certainty that every event announced for the Oakland meeting will fill, not excepting the 2:05 pace.

Alta McDonald will ship Major Delmar 1:59½, George G. 2:05½, Wilten 2:15½ and Munic 2:16½ to Readville, Mass., about June 15th.

Trainers of two-year-olds, especially those eligible for the Futurity, should enter at Oakland. An actual race is sure to be a great aid to any youngster.

W. W. Evans has named his Todd colts Wilkerson and Henry Setzer in the Readville \$50,000 handicap. The former is four and the latter three years old.

The pacer Captain Derby 2:06½, in W. J. Andrew's stable at Poughkeepsie, is well liked by the critics, and certainly looks good and has a world of speed.

The contract for the new grandstand at Chico track calls for its completion in time for the matinee to be held July 2d. It will cost \$5,000 and seat 3,000 people.

Juliet D. 2:13½, by McKinney 2:11½, owned by Cobb Bros., Wellsville, N. Y., has foaled a bay filly by Monterey 2:09½. The filly is an own sister of Irish 2:08½.

It is quite a jump from the 2:08 pace to the 2:14 pace. That is why Manager Ben Benjamin is now offering a 2:10 pace which is to close on Tuesday for a purse of \$750.

W. J. Andrews' stable at Poughkeepsie has quite a Californian appearance, with three such good ones in it as Sweet Marie 2:02, Sonoma Girl 2:05½ and the pacer Captain Derby 2:06½.

W. J. Kenney, 531 Valencia Street, San Francisco, has three or four second hand bike-runabouts on sale. Mr. James Smith of Vallejo, Jere Driscoll of this city, Mr. John Dan and Henry Patterson all bought carts from him the past week.

William Garland of Los Angeles, Cal., the former owner of Sweet Marie 2:02, shipped a gelding by James Madison 2:17½ to Alta McDonald when W. G. Durfee took his stable East. He has been a mile in 2:13½ and a half in 1:04.

The Butchers' Board of Trade will give their annual races and picnic at the Oakland race track on June 24th. They will offer fourteen trotting and pacing races. A program of the events for the meeting will be published next week. The races will be open to all.

The 2:09 pace for which \$2,500 was offered at Portland attracted a tremendous big list of entries, no less than twenty-one horses being named in it. The 2:13 trot, also for \$2,500, received sixteen entries, enough to pay for it if all pay up.

The Rural Spirit purse of \$1,500 for 2:10 trotters at Portland received seven entries: R. Ambush 2:11½, North Star 2:11½, Athasham, 2:09½, Era 2:11½ and Adam G. 2:11½, all from California, and Prince Seattle and Satin Royal 2:15½, Northern horses.

The glory has departed from Snyder McGregor 2:05½. He brought but \$525 at the Cleveland sale. Ditto of Norman B. 2:06½, who brought but \$510. Three years ago these two once-great performers fought out what is still the fastest four-heat race ever trotted.—Horse Review.

In the list of mares nominated in Stake No. 8, Pacific Breeders' Futurity, the breeding of H. G. Patterson's mare Donna P. was transposed. She was given as by Richmond Chief and bred to Athadon when it should have been stated that Donna P. is by Athadon and bred to Richmond Chief.

The sale of eighty head of high-grade shorthorn cattle takes place at Suisun on the 17th inst., or one week from next Wednesday. These cattle are from the celebrated Humboldt herd owned by Rush & Pierce, and are all registered stock. Col. George P. Bellows of Missouri will be the auctioneer.

Henry Helman has the Oregon pacer Lord Lovelace 2:10 in his string now, the horse's owner, Mr. E. B. Tongue, having sent him down last week. This horse is said to be a real crackerjack and was the one that made Sherlock Holmes pace in 2:06 at North Yakima last year. Henry will race him through the Northwest this summer.

James Brady has sixteen head at the Poughkeepsie, N. Y., track, fourteen of which are owned by James Butler, and the most of them are youngsters. Brady owns the star of the lot, a two-year-old by Walnut Hall 2:08½, out of Silicon 2:13½, by Wilton. Brady believes she is the best trotter he ever handled, and, while she was not broken until the first of the year, can brush a two-minute clip.

The Colorado Springs track has been leased to a number of prominent horsemen and they are preparing to give a mixed race meeting following the meeting to be held at Denver. It is their plan to open a meeting July 25th and give ten days' racing with not less than one harness race a day. They will get the same horses that will race in Denver with the exception of a few of Mr. Estabrook's best horses that will race in the Grand Circuit.

California stables will be well represented up North this year. Among the drivers from here who will be seen on the North Pacific Circuit are Fred Chadbourne, James Thompson, Fred Ward, C. Walker, Henry Helman, Charles Spencer, James Sutherland, T. W. Barstow, J. W. Zibbell, Patsy Davey, George Ramage, W. L. Vance, W. H. Williams, Frank Williams, Charles Whitehead, G. W. Bonnell, Schuyler Walton, Henry Delaney, Richard Ables, and several others.

Allie Nun 2:22, one of the greatest show mares of the light harness type ever seen in this country, died a few days ago at Cruikston Stock Farm, Galt, Ont. She was owned by E. T. Stotesbury of Philadelphia and was being used for breeding purposes. In her show ring career she met and defeated practically every prominent horse in her class and twice won championship honors at the National Horse Show. She was by Allie Wilkes out of a mare by Nutwood.

The recent death of Todd 2:14½ recalls the fact that his noted half sister, Sadie Mac 2:06½, also died when at the zenith of her glory. She had never been beaten in a regular race as a three-year-old or five-year-old. She died while racing for the coveted Charter Oak stake at Hartford, Conn. As a three-year-old she won the Hartford Futurity at the track where two years later she met her death. Two sons of Todd, Cochato and Douglass, also won the Hartford Futurity.

William Wallace Buchanan, believed to be the oldest living man in Napa County, celebrated his eighty-ninth birthday May 27th. The old gentleman is hale and hearty, and so active that for pleasure he drives daily the delivery wagon of a friend. When Sheriff Dave Dunlap was a little boy back in Missouri nearly half a century ago he knew Buchanan as "Professor Wallace, the horse tamer." Even yet Buchanan can handle the wildest equines almost as well as ever.

The critics are trying to induce Mr. Uiblein to allow The Harvester a year or two to develop and become fully educated before he races him down the Grand Circuit. It looks like the right thing to do, as the fast son of Walnut Hall has had considerably less work than his other opponents in the colt classics have had and he would have to outclass them greatly to perform creditably. It will be remembered that all the work he has had has been given to him since he was sent to Geers last winter.

The shortest cut to the ideal American carriage horse is through the American trotter, and the government breeders are likely to learn this important truth if they keep in close touch with the trotting horse breeders they have invited to co-operate with them. The best type of well-bred trotting horses today are little more than an intensified type of the carriage horse. They have the best conformation for road work of any horse in the world. The best for the heavier work of pulling a big carriage. They have been bred until they possess a harmony of good points unknown in any other horse. All of these things are desirable in the carriage horse.

A phenomenally fast pacer, never given track opportunity, was a big gray stallion bred by John Biggs, Garden City, an enemy to the pacing gait, the first foal out of the dam of Goldust Maid 2:07½, Vanita O. 2:19½ and Goldthrone 2:26½, sired by the double registered horse Arthur Larkin or Normedium, son of Norman Medium 2:20½, out of Eve, dam of Walton Boy 2:20½, by Edward Everett. This big fellow called Jack R., after thirty days' work paced a half mile in 1:05 to jogging cart without hoppers or straps and showed a two-minute gait. His owner is a wealthy ranch man, George Carr, with ranch near Woodward, Oklahoma, where Jack R. is kept and where over one hundred gray foals by him from bred up thoroughbred mares by him are found. Mr. Biggs always claimed that Jack R. could pace as fast as a good horse could run from a colt. It is said he is siring colts that show the same speed.

An offer of \$10,000 has been refused for Baron May 2:14½, by Baron Wilkes, dam by Electioneer. Roy Miller made it for an Austrian patron.

Mamie R. 2:15½, the mare Maurice Reams of Suisun sold for \$6,000, will carry the colors of James Butler in the Readville \$50,000 Derby, and she is being prepared especially for that event by James Brady, at Macon, Ga. One morning recently a visitor at Macon caught her a quarter in 34 seconds from a standing start.

There is a growing feeling among breeders and stock farm proprietors that there should be more colt racing at the county fairs, and there is no doubt but what this kind of racing is a good thing for the breeding interests. Many of the fair associations in the southern part of the State give half-mile heat races for small purses for two and three-year-olds, and they always prove attractive features, and provide good racing. It allows breeders to start their colts in actual races, and not be compelled to give the youngsters records if they win. These colt races encourage breeders and create an interest in breeding, and are altogether a good thing for the sport in every way.—Exchange.

With the object of co-operating with county fair associations throughout Indiana and adjoining States in the improvement of harness racing, the Central Breeding and Racing Association filed articles of incorporation with the Secretary of State at Indianapolis, Ind., May 14th. The capital stock is \$10,000, and the incorporators include Sterling R. Holt of Indianapolis, owner of Maywood Stock Farm; R. R. Criere, Xenia, O.; J. T. Montgomery, Charleston, Ill.; Charles F. Smith, Montpelier, Ind.; Dick Wilson, Rushville, Ind.; Amos Whiteley, Muncie, Ind., and C. L. Fleming, Terre Haute, Ind. This corporation will assist county fair and other associations in giving good clean harness races. Something of the same sort should be organized here in California where a little encouragement is all many places need to become members of the circuit.

Work on the grounds and race track of the Portland Country Club, where the big live stock exhibit and race meeting are to be held this year, is being rushed forward. The entire grounds are fenced, some of the stables are completed, other buildings are going up and the mile track is nearly done. The live stock meeting next fall, at which \$40,000 in prizes will be offered, has attracted widespread attention throughout the entire United States and Canada. Enthusiasm among stock growers in California has reached a climax, and all the chief herds of cattle, horses, sheep and swine will go North, while Idaho, Montana, Colorado, Washington and Oregon will be thoroughly represented. There will be a large showing on the part of the live stock growers of the Mississippi and Missouri River valleys. The display promises to exceed that of the Lewis and Clark fair.

The Klamath Falls Agricultural Association is now building a fair grounds with regulation half-mile track. The old mile-track grounds has been cut up into building lots on account of the boom attending the extension of the S. P. into the cozy little Falls City in the near future. Work is being rapidly done on the last twenty-five miles of the road bed between Dorris and "The Falls" but as a tunnel 3800 feet long, and several fills are on the contractors' list the completion is months away.

E. R. Reams is the prime promoter of all that interests the trotter in Klamath County. He owns a slashing big brown stallion by Iran Alto 2:12½, out of Guy Center, by Guy Wilkes, 2:15½. The oldest get of the horse are now two years old and a few of them being worked show lots of action and plenty of step.

Several thoroughbreds are raised in the county and raced at the home track. The entry list at Klamath Falls is always one of the first filled in that part of the country and the races draw everyone. It goes without saying that the association is always money ahead.

In the horse show parade at San Bernardino, May 22d, there were more than two hundred and fifty entries. Among the notable ones of the show was the Kentucky gaited saddle horse owned by A. G. Hubbard of Redlands. The rider exhibited him in several special places before the queen's throne. In the gentlemen's drivers were Willie Jib and Captain, shown by Mrs. John A. Cole of San Bernardino, a span by W. R. Cheney of Redlands, span by E. C. Sterling of Redlands, span by J. W. Harvey and span by Buthbertson & Sheed. Among the standards with families were On Stanley, owned by William Rouffe of San Bernardino; Direct Heir and three of family, owned by Mrs. M. S. Severance of Valencia Ranch; Bolock, with family, shown by J. H. Kelley of San Bernardino. Other notable entries were: May Kinney, dam of R. Ambush 2:11½, the holder of the trotting record of the Pacific Northwest; Happy Maid, dam of Sherlock Holmes 2:06, owned by Thomas Holmes, San Bernardino. Coach horses, Charlatan and Royal Pioneer. The heavy drafters list included Leon De Ormei, shown by J. H. Brewster of Colton; Valser, shown by Edgar Hazel; Viz Alert, shown by A. B. Wise of San Bernardino, and Master De Felney, shown by J. H. Kelley of San Bernardino.

George T. Beckers of Los Angeles passed through San Francisco this week on his way to Fair Grounds, Oregon, with his great speed sire Zombro 2:11 and the fast trotting mare Helen Dare 2:14, matinee record 2:12, by Zombro. He brought in the car from Los Angeles the Zombro mare Zombwyette 2:14½, owned by L. H. Toddhunter of Sacramento, that was bred to the McKinney stallion McKenna 2:17 while in Southern California, and the mare Nelly W. 2:15½ by Woolsey, that was bred to Zombro this year. Zombro was looking fine as he passed through this city, car riding being an old thing to him and not bothering him in the least. He has over forty mares booked for his Oregon season, which will extend into September.

The expedition to the Antarctic regions which some time ago sailed from Australia took with it fifteen Manchurian ponies for sledge and pack work on the ice. This is the first time horseflesh has ever been used in such cold regions, and the experiment is being watched with interest. The ponies were purchased in China, and are thus described: "With hogged manes and exceptionally big heads they present rather a coarse appearance; they stand from 14 to 14½ hands, and were they in proper showing condition would take a lot of beating as a whole. They are particularly big-boned fellows, stout of quarter, very long underneath, heads full of character. In color they are white, dun, fleabitten grey, brown, and black. The white ponies are reckoned the best." These ponies are extremely hardy, and could beat the Australian ponies in China in point of endurance. They are quite at home in cold latitudes—in fact, they roll in the snow and bury themselves in it when at liberty. These Manchurian ponies are all bad tempered, and so troublesome to shoe that it is necessary to sling them whenever their feet require attention.

RAISE GOOD COLTS.

If the farmers who are fortunate enough to be located within easy reach of a really good standard-bred trotting stallion would agree to do their work with well-bred mares of good individuality instead of using mules or geldings, even if they had to carry 25 to 50 per cent more mares to accomplish the object, and would breed the mares to such a stallion and would see that the foals were carefully looked after, made gentle and tractable by kindness at an early age and kept growing by liberal feeding, the three or four mares so bred would, in all probability, make more net money than all the other annual products of a well-managed 200-acre farm.

If there is to be a county fair in your section, it would be a good idea to interest the boys in the growth and development of the foals by allowing them to have such premiums as they might win by exhibiting the colts at the fairs.

It would be a good idea, also, to agree upon a given price that the father would take for the colt when it was one or two years old and to allow the boy who has given special care to its raising and development to have all over that amount that the colt might sell for.

It would not be unreasonable to expect a well-bred and standard and registered yearling or two-year-old colt to sell for \$200 to \$500 and sometimes several times that amount might be realized.

Dr. Talbert of Lexington, Ky., bred a good mare to Mambrino Patchen thirty or forty years ago. The produce was the now very noted brood mare, Alma Mater. This mare was bred to George Wilkes and produced the horses Alcyone and Alcantara. For these two young horses the doctor realized something like \$40,000, and they, in turn, have grown to be the best the world has ever known.

Alcyone is the sire of a number of great ones, including McKinney 2:11½, that has been sold within the last five years for \$50,000. Alcantara is the sire of 155 colts with records from 2:05½ to 2:30, and his daughters are almost invaluable as brood mares.

Alma Mater produced six other foals with standard records, and was sold in her old age for \$5,000. The one buggy mare, judiciously mated, brought to the doctor over \$100,000.

About nine or ten years ago a Boston gentleman paid about \$6,000 for the well-bred mare Fanella, with a colt at foot by Bingen 2:06½, and in foal to Peter the Great. The colt is the noted stallion Todd, that sold at auction in New York in December last, in spite of the hard times, for \$30,000 cash. The second foal was the very noted trotting mare Sadie Mac 2:06½. She won \$20,000 and was sold for \$20,000. Fanella and her produce have been and are reasonably worth \$80,000.

I could tell of a great many similar instances, but of course these are the extreme cases, and the ordinary breeder can not, reasonably, look for such results, but if he will select his mares with care and be judicious with the choice of the stallions he uses, and raise, educate and develop the foals so that they will make truly useful horses, he will have the right to expect to get from \$200 to \$300 for his yearling and two-year-old colts, and it will always be possible for him to produce a \$1,000, a \$5,000 or even a \$10,000 colt.

The miner is reasonably satisfied with the washing of his pan if it furnishes him a grub stake, and he whistles while he digs hoping to find a true vein. A farmer who breeds a few good mares, to some extent, will occupy the same position. He will most assuredly get a grub stake, and he may find a nugget.—Henry Exall, in Exchange.

PORTLAND ENTRIES.

Every class at Portland received a big entry list, and all the races were declared filled, even the 2:05 class pace. As far as we know, all the races on the entire North Pacific Circuit filled, especially those from Salem to Walla Walla. It is by far the greatest entry list ever received on this Circuit, and a large percentage of the horses entered are from California. The following is a list of the entries:

Open River Purse, 2:13 Pace, \$1,000—30 Entries.

Frank J. Richardson's b. m. Lizzie C.; F. E. Ward's b. m. Explosion; W. Griswold's ch. g. Diabull; L. Y. Dollemeyer's bl. h. Albert Direda; McGowan & Cuicello's br. m. Queen Derby; I. D. Chappelle's b. h. Bushnell King and b. m. Alta Norte; L. C. Shell's br. m. Bonnie M.; E. F. Bean's b. m. Queen B.; A. G. Dahl's b. m. Freely Red; Lou Mativia's bl. h. Alton; J. Galindo's ch. g. Pilot; R. E. George's ch. g. Baffles; Albert Smith's ch. h. Prince Charles; Phillips & Reichel's b. g. Buck and ch. f. Beulah; Homer Rutherford's b. m. Josephine; Fred Brooker's b. h. Zomvert; J. D. Isom's bl. m. Oregon Baby; Francis B. Allen's b. m. Cleopatra; J. Oakland's b. s. Merry Monarch; L. D. Gibson's b. h. Zom Nort (formerly Lord Lister 2:16); E. S. Train's br. c. Ray o' Light; James Stranahan's b. g. Atabal; E. D. Dudley's ch. s. McFadyen; G. A. Pounder's rn. g. Rockaway; F. E. George's ch. g. Kermit; F. S. Byers' br. g. Chilly The Clipper; A. R. Gumaer's b. g. Speedway and bl. g. Highway.

Commercial Club Purse, 2:16 Trotters, \$1,000—27 Entries

Albert Smith's b. g. Patsey Rice; L. C. Shell's b. m. Lady W.; George Ramage's b. g. Bert Arondale; C. Whitehead's bl. m. Della Derby; F. J. Kilpatrick's bl. m. Princess W.; Morris Bros.' b. m. Modicum and b. c. Alsandra; Warlow & Walton's b. h. Nogi; Robt. Prior's b. m. Irene; S. S. Bailey's b. h. Prince Seattle and b. g. Doc Munday; N. K. West's c. h. Satin Royal; Ed. Cudihue's b. h. Freddie C. Jr. and br. g. Gebbie; W. L. Vance's b. m. Easter Bells and b. s. Tonopah; W. W. Ashley's b. g. Deception; W. E. S. Coyne's br. h. Bull McKinney; E. R. Fraser's b. g. Regal Baron; Oscar Hartnagle's g. g. Henry Gray; William Smith's b. m. Starlight; A. Phillips' bl. h. Van Norte; Mrs. L. J. H. Hastings' b. m. Princess Louise; Jos. F. McGuire's b. g. Day Break; A. C. Lohmire's ch. g. Red Skin; J. H. Nickerson's b. m. Iowa Sprintress; Parslow & Hoag's General H.

Board of Trade Purse, Two-year-old Trotters, \$400—12 Entries.

Robert Britts' b. g. On Time; Sam Casto's b. c. Pat Duff; George Bryan's b. c. Killarney; E. C. Keyt's b. g. Gordon; J. W. Hollinshead's ch. m. Jimema King; M. J. Jones' b. c. Lanzo M.; G. W. Gill's b. h. Zomdell; D. B. Stewart's br. s. Silk Hal; John Pender's bl. h. Dr. Jones; Thos. H. Brents' ch. c. Vincumar and ch. f. Edgarella; N. K. West's b. f. Kittie Wealth.

Chamber of Commerce Purse, Three-year-old Pacers, \$600—10 Entries.

J. W. Hollinshead's b. m. Pet Palestine; E. C. Keyt's b. f. Grace Seal; James Sutherland's b. s. Moortrix; Gose & Whitmore's bl. m. Tangerine; Ed. B. Armistage's b. m. Stella A.; Ed. Gooch's b. f. Hazel Gold; J. W. Zibbell & Son's b. f. George Z.; E. S. Train's br. c. Ray o' Light; C. O. Thornquist's br. s. On Bly; Wallace & Sebastian's b. f. Cora.

Manufacturers' Purse, Two-year-old Pacers, \$400—5 Entries.

Ben Bucholtz's m. Rosa R.; E. C. Keyt's br. s. King Seal and b. f. Snick; W. T. McBride's b. g. Bonnie Antrim; J. W. Tilden's ch. f. Sadie T.

Rose City Purse, 2:09 Pacers, \$2,500—23 Entries.

James Thompson's b. h. Charley D.; S. S. Bailey's ch. h. Tidal Wave and b. m. Vinnie Mann; Thomas H. Brents' br. m. Magdi; J. Galindo's ch. g. Pilot; I. D. Chappelle's ch. g. Iowa Boy; L. C. Rural Spirit Purse, 2:10 Trotters, \$1,500—10 Entries.

Homer Rutherford's br. h. R. Ambush; C. Whitehead's b. g. Nort Star; D. L. Bachant's b. h. Athashtar; S. S. Bailey's b. h. Prince Seattle and b. g. Doc Munday; N. K. West's ch. h. Satin Royal and b. h. The Commonwealth; William Morgan's b. m. Era; J. W. Zibbell & Son's b. g. Adam G. and br. m. Fresno Girl.

In addition to the state fairs previously announced as having adopted the classification for American carriage horses, as recommended by the Department of Agriculture in co-operation with the American Association of Trotting Horse Breeders, the Minnesota State Fair has adopted the classification. This makes six fairs for 1908 which have adopted the classification as a whole, and a total of ten, which have adopted it in whole or in part. Considerable interest is also being shown in this matter by county and district fairs.

Drink Jackson's Napa Soda.

STATE FAIR ENTRIES.

The following is a list of the entries received by the State Agricultural Society for their classes which closed on the 1st inst. All of them filled, with the exception of the 2:24 class, four-year-old trot, which was declared off:

2:12 Class Pacing, Purse \$800—11 Entries.

J. V. Galindo's ch. s. Pilot; T. W. Barstow's b. g. Highfly; S. H. Hoy's b. m. Memoria; E. S. Train's br. c. Ray o' Light; E. D. Dudley's ch. s. McFadyen; J. C. Kirkpatrick's b. s. Charley D.; Reichel & Phillips' b. g. Buck and ch. m. Beulah; G. A. Pounder's rn. g. Rockaway; John Renatti's b. s. Montec; C. H. Widemann's b. g. Fred W.

2:10 Class Trotting, Purse \$1,000—9 Entries.

J. C. Kirkpatrick's br. m. Lucretia; H. Delaney's br. g. Thomas M.; W. Parson's br. m. Berta Mac; J. W. Zibbell's b. g. Adam G. and br. m. Fresno Girl; Frank Williams' b. h. Era; C. Whitehead's b. g. Nort Star; D. L. Bachant's b. s. Athasham; Homer Rutherford's br. h. R. Ambush.

2:17 Class Trotting, Purse \$800—14 Entries.

George T. Algeo's ch. s. Chestnut Tom; George W. Beutler's b. g. Hunky Dory; H. H. Hush's b. g. Prince H.; W. L. Vance's b. m. Easter Bells; F. H. Burke's br. m. Valjejo Girl; William Michelson's b. g. Wilmar; F. J. Kilpatrick's bl. m. Princess W. and b. m. Lady McKinney; Ted Hayes' b. m. Modicum and b. h. Alsandra; G. A. Pounder's bl. m. Wenja; E. A. Swaby's m. Ramona S.; C. Whitehead's bl. m. Della Derby; Warlow & Walton's b. s. Nogi.

2:15 Class Pacing, Purse \$700—14 Entries.

Alfred Solano's bl. s. Botton De Oro; J. A. Kirkman's bl. s. Radium Way; G. Peirano's bl. h. Alto, Jr.; J. Depoister's ch. s. Milton Gear; S. H. Hoy's b. m. Memoria; T. D. Witherly's b. s. T. D. W.; W. B. Snyder's b. h. Wanderer; E. D. Dudley's ch. s. McFadyen and br. m. Truth; Ted Hayes' b. g. Buck and ch. m. Beulah; G. A. Pounder's rn. g. Rockaway; John Renatti's b. s. Montec; C. H. Widemann's b. g. Fred W.

2:14 Class Trotting, Purse \$800—6 Entries.

J. C. Kirkpatrick's br. m. Lucretia; W. Parson's b. m. Berta Mac; T. H. Ramsay's b. s. Kinney Al; Burke & Masero's b. m. Yolande; Frank Williams' b. g. Queer Knight; S. K. Treffy's br. s. Kenneth C.

BOOKMAKERS' PROFITS.

An interesting illustration of the way which the money of the public passes into the satchels of gamblers at the racetracks through the failure of the legislature to enforce the constitution was afforded by disclosure to-day of the business done by one bookmaker in the field betting ring at the Jamaica track.

This bookie wanted to get a bankroll big enough to satisfy the jockey club's betting ring manager of his financial ability to make a book in the grandstand betting ring, so he disclosed his books to the man whom he asked to back him.

The totals for six days are given in the following table:

	Rec'd.	Paid out
Friday	\$ 294	\$ 42
Saturday	326	79
Monday	210	26
Tuesday	280	44
Wednesday	248	56
Thursday	120	38

Totals

The \$1,478 received in six days by this one bookmaker in the field ring was made up entirely of small bets, put down by clerks, workmen and others of small incomes, who cannot afford to pay the \$3 admission fee to the grandstand.

The \$285 paid out includes all the winnings of the victims who put up the \$1,478, as well as all the expenses of the bookmaker. These expenses total \$108, so that the men and boys who wagered \$1,478 with this bookie got back only \$177.—New York correspondence of Chicago Tribune.

THE HORSESHOER'S SIDE.

Many a horseman refuses to admit that the horse-shoer knows as much about shoeing as he does himself, and insists that his directions be obeyed. Oftentimes the owner is correct but there are exceptions. A horseshoer writing on this subject in The Horseshoers' Journal says: "Many times the horseshoer has his troubles with the owner, who will come and dictate how he wants his horses shod, and whether right or wrong the horseshoer must not give his opinion as to how he would shoe the horse to prevent the trouble, for if he does he is likely to lose a customer. The horse-owner will say to you that he is paying to have his horse shod his way, and will carry himself in such a way as to show that he has no confidence in his shoers. Horseshoeing is a mechanical art, and not the roughly hewed work which some men who know no better, put it down to be, but unfortunately we are not looked upon by many people as being in charge of a fine mechanical calling, and some men do not seem to care as to how they are viewed, at least they do not get enough for their work. If they would charge a going-living price, and take more time in doing the work, looking over each point which should be considered by the horseshoer when he undertakes the responsibility attached to shoeing, a great deal of trouble and annoyance would be avoided and there would be less interfering and off-gaited horses." The owner who has not made something of a study of the horse's foot, its care and shoeing will, as a rule, do well to follow the advice of a competent shoer. On the other hand a thorough student of the foot will be justified in having his say as to his horse's shoeing, but in most cases his knowledge will be recognized by the intelligent shoer, and there will be no trouble as to how the work should be done.—Exchange.

Good pasturage is at a premium in most localities in California this year.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

GRAND AMERICAN HANDICAP.

Programs for the ninth Grand American Handicap have been issued by Mr. Elmer E. Shaner, Secretary-Manager of the Interstate Association. The target tournament will take place at Columbus, O., June 23-26 inclusive. Regular entries for the Grand American Handicap must be made on or before Saturday, June 13. Entries mailed in envelopes bearing postmarks dated June 13, will be accepted as regular entries.

There is little need of using up space to inform the sportsmen of America that the program of this magnificent trap shooting event bears out in every phase the liberal, square-to-the-mark policy, adopted by the Interstate Association when its first Grand American Handicap Target Tournament was announced to the trap shooting world. The program has been carefully prepared and all events are arranged on a basis of entry fees as low as is consistent with the equity of the events and the material values which should award good performance in the competition, and which are essential to it.

Exclusive competitions for amateurs in all events except one comprise the offerings. The one event for both amateurs and professionals is governed by conditions so admirably adjusted that it is "any man's game," as the popular phrase goes. The Interstate Association's Handicap Committee does not present any slipshod work, and it aims to bring about a consummation so devoutly wished for—a tie bout with all hands breasting the tape as one man. Clever handicapping produces keen competition, and when the battle of skill and stamina waxes warm there is a quickening of interest not only among the men who are testing their art, but among the fringe of eager spectators. As squad after squad advances to the firing points, that cherry flush of competition mounts the cheeks; nerves are keyed up, and when the final gun has been fired, pent-up enthusiasm gives way to a hearty cheer for the deserving winner. The man who wins the Grand American Handicap at targets would hardly exchange his lot then and there for the highest trust in all America.

Just a word about the scene of the coming engagement between the best in the world. The tournament will be held on the grounds of the Columbus Gun Club. Ohio's beautiful capital city has a shooting park par excellence. The field rolls level, the club-house is inviting, the club members are famed for courtesy and hospitality, and with Columbus tapped by main lines of half a dozen or more railroads, the outlook is for a vast outpouring of contestants.

The members of the Columbus Gun Club are on their mettle, and they plan to show that the Interstate Association did not err in selecting Columbus as the city for holding this top-notch shooting tournament.

The program is worthy of careful perusal, for each bit of experience gained by the Interstate Association has been gathered together and put in operation to bring forth comfort and pleasure for those who will compete.

Conditions Governing the Grand American Handicap—One hundred targets, unknown angles, handicaps 16 to 23 yards, high guns—not class shooting. Two hundred dollars (\$200) added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. Entrance money \$10, the price of targets being included. In addition to first money, the winner will receive a trophy, presented by the Interstate Association.

Regular entries must be made on or before Saturday, June 13, 1908, and must be accompanied by \$5 forfeit. The remaining \$5 must be paid before 5 p. m., Wednesday, June 24. Entries mailed in envelopes bearing postmarks dated June 13 will be accepted as regular entries.

Penalty entries may be made after Saturday, June 13, up to 5 p. m., Tuesday, June 23, by paying \$15 entrance—targets included. All entries must be made on application blanks, and they will be received by Elmer E. Shaner, Secretary-Manager, 219 Coltart Square, Pittsburg, Pa.

In the Preliminary Handicap, the Grand American Handicap, the Amateur and Professional Championships, and the State Team Event. High guns win—Not class shooting. Briefly summarizing, it will be noted that two (2) places are created for each ten entries or fraction thereof up to two hundred and fifty.

It has always been the custom of the Interstate Association to exercise the greatest care in the selection of its Handicap Committee. Each member of the committee must possess certain qualities which unfortunately, are to be found in few men; the choice of a duly qualified committee is, therefore, always a matter of difficulty.

A brief inspection of the names of the gentlemen who have kindly consented to award handicaps at its tournament during 1908, will show that the association has been just as careful as ever in selecting its material. Each member of the committee is thoroughly well qualified to judge of the individual merits of the contestants, and to award handicaps accordingly. The committee is constituted as follows: C. H. Newcomb, Philadelphia, Pa., chairman; George L.

Lyon, Durham, N. C.; George L. Carter, Lincoln, Neb.; H. R. Bonser, Hartwell, O.; George K. Mackie, Scammon, Kan.

Mr. Elmer E. Shaner, Secretary-Manager of the Interstate Association, will be secretary to the committee, but will not have a vote in the handicapping of contestants.

The committee will meet at the Chittenden Hotel, Columbus, O., Saturday, June 20, but handicaps will not be announced until the next day.

The scores made by contestants at this tournament will be included in the official averages of the year, as the tournament is registered.

Up to the time this program went to press there were 310 tournaments registered with the Interstate Association.

It is to the interest of all gun clubs to register their tournaments. It costs nothing to have a tournament registered. It gives the tournament importance, permanency in the authorized records, and the dignity which comes from good auspices. The scores made at a registered tournament become a part of the official averages of the year.

The season's averages for both amateurs and professionals will be computed on not less than 2,000 single targets for amateurs, and not less than 5,000 single targets for professionals, shot during 1908, from the standard distance fixed by the Interstate Association (the distance at this time being 16 yards) and only in registered tournaments.

For application blanks and further information concerning registered tournaments, address Elmer E. Shaner, Secretary-Manager, The Interstate Association, 219 Coltart Square, Pittsburg, Pa.

Each contestant who makes application to enter the ninth Grand American Handicap is required to specify for himself his average. Any contestant failing to comply with this demand, as exacted by ruling at the Interstate Association's annual meeting in 1905, or who materially falsifies his classification, will be allotted the back mark in the Grand American Handicap as a penalty. This applies to all contestants, amateurs and manufacturers' representatives.

Monday, June 22—Preliminary practice at 1 p. m. Six events of 20 targets each; entrance \$2.00 per event. Rose system, 8-5-3-2. Sweepstakes open to amateurs only. Any contestant may shoot for "targets only" to-day, if he so requires. Squads will not be divided into sections to-day.

First Day—Tuesday, June 23—Event No. 1—Twenty targets; \$20.00 added; entrance \$2.00. Event No. 2—Twenty targets; \$20.00 added; entrance \$2.00. Event No. 3—Twenty targets; \$25.00 added (use of two shots; 19 yards rise); entrance \$2.00. Event No. 4—Twenty targets; \$20.00 added; entrance \$2.00. Event No. 5—Twenty targets; \$20.00 added; entrance \$2.00. Event No. 6—Twenty targets; \$20.00 added; entrance \$2.00. Open to amateurs only. Manufacturers' agents, paid representatives, etc., may shoot in the above events for "targets only." Note—Entries for the Preliminary Handicap and penalty entries for the Grand American Handicap close to-day at 5 p. m.

Second Day—Wednesday, June 24—Event No. 1—The Preliminary Handicap (open to amateurs only).—One hundred targets, unknown angles, \$7.00 entrance—targets included, handicaps 16 to 23 yards, high guns—not class shooting, \$100 added to the purse. The handicaps contestants receive for the Grand American Handicap will govern in this event. The number of moneys into which the purse will be divided will be determined by the number of entries, as is fully explained elsewhere in the program. In addition to first money, the winner will receive a Trophy, presented by the Interstate Association. Event No. 2—Ten double targets; 16 yards rise; entrance \$2.00.

Manufacturers' agents, paid representatives, etc., may shoot in the above events for "targets only."

State Team Event—Open to amateurs only—Special event for Wednesday, June 24. Each team shall consist of five contestants who are bona fide residents of the same state, or of the same province of Canada. One hundred targets per man—five hundred targets per team, \$35.00 entrance per team—targets included, no handicaps, high guns—not class shooting. Ties that are shot off will be at 20 targets per man. The number of moneys into which the purse will be divided will be determined by the number of entries, as is fully explained elsewhere in the program. In addition to first money, the members of the winning team will each receive a Trophy, presented by the Interstate Association. Entries must be made at the cashier's office on the shooting grounds before 5 p. m., Tuesday, June 23. The names of the five contestants must be announced at the time of making team entry, and no substitution of names will be permitted after entries are closed. Entrance money cannot be withdrawn after entry has been made. Penalty entries will not be accepted.

Third Day—Thursday, June 25—The Grand American Handicap (open to all).—One hundred targets, unknown angles, \$10 entrance—targets included, handicaps 16 to 23 yards, high guns—not class shooting, \$200 added to the purse. The number of moneys

into which the purse will be divided will be determined by the number of entries, as is fully explained elsewhere in the program.

Fourth Day—Friday, June 26—Amateur Championship (open to amateurs only).—Two hundred targets, unknown angles, \$20 entrance—targets included, 18 yards rise, high guns—not class shooting, \$100 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. In addition to first money the winner will receive a Trophy, presented by the Interstate Association.

Professional Championship (open to professionals only).—Two hundred targets, unknown angles, \$20 entrance—targets included, 18 yards rise, high guns—not class shooting, \$50 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. In addition to first money the winner will receive a Trophy presented by the Interstate Association.

Shooting will commence at 9 a. m. sharp each day. The Interstate Association Trap Shooting rules will govern all points not otherwise provided for. Note that Section I, Rule II, of the Target Rules, relating to bore of gun, is not in force at this tournament. Targets will be thrown about 50 yards. Price of targets (2 cents each) included in all entrances.

The Interstate Association reserves the right to refuse any entry.

The standard bore of the gun is No. 12, and in the handicap events all contestants will be handicapped on that basis. Contestants using guns of smaller bore must stand on the mark allotted to them.

Professionals who take part in the preliminary handicap will be handicapped the same as other contestants, and must shoot for "targets only" from handicap distances as allotted by the handicap committee.

The purses in all events the first day and the double event the second day will be divided according to the Rose System into four moneys at the ratio of 8-5-3-2.

The Interstate Association will add \$1,000, of which amount \$425 is in trophies—\$100 for a trophy for the winner of first money in the Grand American Handicap; \$100 for a trophy for the winner of first money in the amateur championship; \$50 for a trophy for the winner of first money in the preliminary handicap; \$50 for a trophy for the winner of first money in the professional championship, and \$125 for five trophies, one for each member of the team that wins first money in the State team event.

The Grand American Handicap—The Interstate Association reserves the authority to postpone the Grand American Handicap at targets on account of bad weather or other important cause if, in the judgment of the management, such postponement is necessary. The manner of shooting the Grand American Handicap at targets is as follows: Five automatic traps will be used, and five different events will be commenced at the same time, one respectively at each trap. The total number of qualified contestants will be divided into five sections, as nearly equal in number as possible, and a section will be started at the same time at each trap. After all members of a section have finished competing at their trap, they will pass on to the next trap and compete there, and so on until they have competed at each of the five traps.

For example: Say we have 200 entries—40 squads of five men each. Divide the 40 squads into five sections and it would make 8 squads to each section. Squads 1 to 8 would compose the first section. Squads 9 to 16 would compose the second section. Squads 17 to 24 would compose the third section. Squads 25 to 32 would compose the fourth section, and squads 33 to 40 would compose the fifth section. These sections simultaneously would be started at Nos. 1, 2, 3, 4 and 5 traps respectively. After all squads of a section finished competing at a particular trap, their entire section would pass on to the next trap and compete there, and so on, until they had competed at the entire five traps.

The foregoing arrangement will do away with a squad shooting 100 targets "off the reel," right down the line of five traps. Yet a true equity will be maintained, as each contestant will compete alike in each particular event.

On the first and second days of the tournament the total number of qualified contestants will be divided into six sections.

The official score will be kept on a score board in plain view of the contestant.

In the handicap events ties that are shot off will be at 20 targets per man, and the original distances contestants stand at will govern.

Through the courtesy of the Winchester Repeating Arms Company, Mr. Fred C. Whitney, of Des Moines, Iowa, will again have charge of the cashier's office, and Mr. L. A. Cummings, of Bunker Hill, Ills., will have charge of the Compiler of Scores office.

The Interstate Association reserves the right to limit the number of entries it will accept for the Grand American Handicap, provided they reach such number as to interfere with the smooth handling of the tournament. All entries must be accompanied by the maker's full name and address.

When making an entry by mail, remittances covering the amount of forfeit (\$55) should be made by bank check, draft, postoffice money order, express money order, or registered letter. Bank checks, drafts, or bills of exchange will not be received at the cashier's office in payment of entrance; nor will any check, draft, or bill of exchange be cashed dur-

ing the tournament. This rule will be strictly enforced.

Guns, ammunition, etc., forwarded by express must be prepaid and sent to Smith Brothers' Hardware Company, 42 West Chestnut street, Columbus, Ohio. Mark your own name on the box that goods are shipped in, and it will be delivered at the shooting grounds without charge.

Loaded Shells.—All standard factory loaded shells of the Union Metallic Cartridge Company, Winchester Repeating Arms Company and Peters Cartridge Company will be for sale on the grounds, and any special loads will be furnished and delivered to the grounds, by Fred Shattuck, Secretary Columbus Gun Club, 42 Board of Trade, Columbus, Ohio.

AT THE TRAPS.

After two days of shooting the eleventh annual trap shooting tournament of the Kimball-Upson Company came to an end Sunday, May 31, with the shooting off of the big events of the day, the individual championship and the three-man team shoot. To A. J. Webb, of Emeryville, goes the beautiful imported vase representing the individual championship of Northern California, and to the Golden Gate team of San Francisco goes the silver trophy offered by the Buffalo Brewing Company.

The event of the day was the individual shoot for the Hunter Arms trophy. When the match was shot four men tied for first place with nineteen targets each, while six were second with eighteen targets. This necessitated a shoot-off between C. D. Hass of Stockton, E. Holling of San Francisco, J. W. Gibling of Marysville and A. J. Webb of Emeryville. Webb was the steadier of the quartet in the shoot-off, and again scored nineteen birds, while Gibling broke 16, Hass 15 and Holling 13.

Webb also figured in landing the three-man team trophy, as he was one of the team with M. O. Feudner and E. Holling of San Francisco. They scored 55 out of a possible 60.

Two expert teams consisting of King, Seaver and Hoelle and Reed, Haight and Willit, shot for birds only the first team scoring 45 birds and the second 53.

Frank Newbert was high man on Saturday, breaking 182 birds out of a possible 200, and scoring the longest run, that of 79 straight. He had three straights in succession to his credit on Saturday.

A pretty race that lasted the two days was between Newbert and Frank Merrill, the Stockton crack, for high average for the shoot. Newbert led by a safe margin the first day, but Merrill recovered the lost ground, and when the tournament was over it was found that Merrill had beaten out Newbert by just one bird. The scores stood: Merrill 322, or an average of 89.49 per cent, while Newbert had 321 birds out of a possible 360, or an average of 89.16 per cent.

Though lacking in numbers in comparison with past shoots, the tourney made up in interest and enthusiasm. The strong north wind interfered to a great extent with the making of good scores, but notwithstanding this handicap the trigger pullers shot well.

The program for Saturday, May 30, comprised 10 twenty target races. Event No. 8 was a merchandise shoot with prizes for nine classes.

Sunday, May 31 there were nine events—Nos. 1 to 5 at 20 targets each, Event No. 6, 20 targets, championship race for the Hunter Arms trophy. Event No. 7, 20 targets, merchandise prizes, 11 classes. Event No. 8, special, three man team race, 20 targets per man for the Buffalo Brewing Co.'s \$100 cup. Event 9, 20 targets. Moneys were divided into four equal parts as per Adams' system.

High amateur averages for the first day were: Frank Newbert 182 out of 200, E. C. Ickes of Fresno 179, M. O. Feudner 177, F. Merrill 177.

High professional averages were: Dick Reed 176 out of 200, W. H. Seaver 171, F. Willett 165.

High amateur for the second day were: F. Merrill 145 out of 160, E. Holling 143, C. J. Haas 141, M. O. Feudner 141.

High professional averages were: W. H. Seaver 137 out of 160, Reed 133, Willett 128.

Nine high scores for the two days at 360 targets were: F. Merrill 322, F. Newbert 321, E. C. Ickes 318, M. O. Feudner 318, Dick Reed 309, W. H. Seaver 308, A. J. Webb 301, Ed. Fissell 300, Fred B. Mills 300.

Three-man team race, 20 targets per man—
Golden Gate Gun Club Team—E. Holling 19, M. O. Feudner 20, A. J. Webb 16—55.

Trade Team No. 2—Dick Reed 19, C. A. Haight 19, F. Willett 15—53.

Sacramento No. 2—Young 15, Fissell 19, D. Ruhstaller 18—53.

Stockton Team—F. Merrill 17, C. J. Haas 16, H. Garrison 17—50.

Sacramento Team No. 1—F. Newbert 19, F. Ruhstaller 15, D. E. Newbert 15—49.

Trade Team No. 1—D. W. King 15, W. A. Seaver 15, E. Hoelle 15—45.

Folsom Team—O. E. Ferguson 10, O. J. Miller 16, J. P. Joerger 15—41.

The following scores were shot at Sacramento, May 24th, in a practice shoot—

Frank Newbert shot at 130 broke 123, G. Young 130-118, E. De Meritt 110-83, F. Ruhstaller 100-85, S. Thomison 100-87, B. Adams 90-77, H. Trumpler 90-72, H. Stevens 60-54, L. Smith 60-27, R. Long 60-33, A. A. Entician 40-34.

Southern California sportsmen and shotgun experts of Long Beach and vicinity have organized a new gun club for trap shooting. The club starts with a membership in the neighborhood of 100. F. E. Shaw and George Flint will be the managers. The grounds are situated about five minutes' walk toward the hill from the junction on the trolley line from Long Beach to Alamitos. The club will hold its first blue rock shoot to-day.

The California Wing Club live bird club shoot for June will take place at the Ingleside grounds tomorrow.

The Rod and Gun Club of Kettle Falls, Wash., has received 30,000 eastern brook trout from the state hatchery on the Little Spokane river. The fish were distributed in the Colville river, Mingo creek and Sherman creek. The club paid the entire expense and will protect the newcomers.

HYDROPHOBIA SAID TO BE INCREASING.

(Continued from Last Week.)

The Pasteur Treatment and Its Results.—The preventive treatment of rabies devised and perfected by Pasteur has done much to strip this dread disease of its mortality among human beings. It was first advocated by Pasteur in 1885 after thorough experimentation on the lower animals.

In 1886 the original Pasteur Institute was opened in Paris. From that time until 1905, inclusive, 29,201 persons had been treated at this institute, with a mortality ranging from 0.94 per cent the first year to 0.18 per cent in 1902. During the four years from 1902 to 1905, inclusive, it averaged 0.32 per cent. The first Pasteur Institute in the United States was opened in New York City in 1890, and was followed by a similar institution in Chicago in July of the same year. During the first eleven years of its establishment the New York Pasteur Institute treated 1,608 persons, with a mortality of 0.63 per cent. The Chicago institute has recently issued a summary of its results from the time of its foundation to October, 1907. During this time 3,010 persons received the treatment and only seven subsequent deaths from the disease resulted, making the very low mortality of 0.23 per cent. Eleven persons, however, died of the disease at the institute while under treatment. Ten dogs have also been treated and all of them were successfully immunized.

Recently N. G. Keirle, director of the Baltimore Pasteur Institute, connected with the College of Physicians and Surgeons, has published a report of the first 1,000 cases treated. Two deaths occurred, one of which was doubtful, as the man had chronic Bright's disease, although if this is included the percentage of failures is only 0.2 per cent. Eight other deaths occurred under his observation in persons who were either not treated or in whom the disease developed during or shortly after treatment.

Through the courtesy of Dr. A. G. Hoen, director of the Pasteur department of the University College of Medicine at Richmond, Va., we have received a report of the first 208 cases treated there without a single failure. Two persons who had received bites about the face died, one during and the second immediately after treatment, and are correctly not considered as failures by the institute. One dog was also successfully treated.

J. N. Brawner, in charge of the Pasteur Institute at Atlanta, Ga., has kindly reported that up to the present time they have treated 670 patients with only two deaths, one of these occurring in a victim of the morphia habit, the percentage of failures being only 0.33. Three other cases developed the disease during treatment. Doctor Brawner during the past seven years has also kept a careful record of all reported cases of persons bitten by rabid animals in Georgia who did not take the treatment, and of 120 such persons 29 died of the disease. This observation is of great importance and represents the signal value of the preventive inoculations which in this one instance showed a decrease in the mortality from 24 per cent without treatment to 0.33 per cent with treatment. The bites of rabid animals in Georgia, therefore, have proved 72 times as fatal without treatment as with it. This institute has also treated 12 dogs and five horses, with no deaths.

The frequency of the disease throughout the country and the number of people consequently applying for treatment has led to the foundation of a number of Pasteur institutes. Besides those already mentioned there are others at Pittsburg, Ann Arbor, St. Paul, New Orleans, St. Louis and Houston.

Method of the Pasteur Treatment.—The principle on which the treatment is based consists in the production of an active immunity by means of repeated injections with an emulsion of spinal cords of rabbits dead from inoculation with fixed virus, which cords have been attenuated to various degrees by drying.

Rabbits inoculated with fixed virus die in from six to seven days. Their spinal cords are removed aseptically and dried in bell jars over sodium hydrate. Fifteen days of such drying renders the cord harmless, and such a cord is emulsified with normal salt solution and 2 or 3 c.c. of the emulsion is injected beneath the skin, constituting the first inoculation. Cords dried fourteen, thirteen, twelve, eleven, ten days, etc., are used for the subsequent injections, until finally an emulsion of a cord dried only three days, which contains practically all its virulence, is injected. The injections are made daily for a period covering fifteen to twenty-one days. The cost of the treatment is from \$100 to \$150 including board and room at the institute. The New York Board of Health has on several occasions prepared the material and sent the requisite dose each day by mail to physicians and veterinarians in other cities at the rate of \$25 for each course of treatment.

The treatment is not harmful except for the slight pain caused by the hypodermic injections. Patients are not required to remain in the institute constantly during the treatment, it only being necessary for them to present themselves each morning to have the injections made.

Value of the Treatment.—The value of the Pasteur treatment can not be overestimated. In 1896, nine years after the parent institution in Paris was founded, there were still many who doubted its value. In this year a commission was appointed by the House of Commons of England, consisting of Paget, Brunton, Fleming, Lister, Quain, Roscoe, Sanderson and Horsley, to ascertain the value of the treatment. After exhaustive investigation this commission re-

ported that Pasteur's inoculations were as valuable against rabies as Jenner's vaccination was against smallpox. The statistics of the larger number of Pasteur institutes during the past ten years are alone sufficient to prove that this was one of the greatest of Pasteur's discoveries. Without the treatment the mortality ranges from 10 to 80 per cent of the persons bitten. With the treatment the mortality statistics covering thousands of cases is always less than 1 per cent, and during recent years has been reduced to from 0.3 to 0.5 per cent. The observations of Brawner of Georgia, noted above, are very convincing in this connection.

Although in the past the treatment has been principally confined to human beings, its equal value in the domestic animals has long been established. Its cost is too great for it to be used as a routine procedure on all animals exposed to the infection. There are, however, many valuable horses, cattle and dogs succumbing annually to the disease, practically all of which could be saved by the preventive treatment. The Bureau of Animal Industry is consequently contemplating the routine preparation of this virus to be shipped by mail at nominal cost to veterinarians having exposed valuable animals under their care.

The Hogyes Method of Prevention.—In Hungary the Hogyes method of preventive inoculation is used exclusively. It consists in diluting the spinal cord of rabbits dead from fixed-virus inoculation with physiological salt solution. The dilutions made are 1:10,000, 1:8,000, 1:5,000, 1:2,000, 1:1,000, 1:500, 1:200, 1:100. The cord diluted 10,000 times with the salt solution is harmless and constitutes the first injection, 2 or 3 c.c. being injected. Then the stronger solutions are gradually injected until 1:100 is reached. With the stronger solutions only 1 to 2 c.c. are injected. Hogyes claims that this method is far superior to that of Pasteur, and his statistics seem to prove his claim.

Since 1890 the Budapest Pasteur Institute, of which Professor Hogyes is director, has treated 22,558 persons with 108 deaths, or a mortality of 0.47 per cent. Of this number, 3,410 were treated with Pasteur's method, of which 54 died, a mortality of 1.58 per cent. The remaining 19,148 were treated with the dilution method, of which number 54 died, or a mortality of only 0.28 per cent. While other institutes using the Pasteur method have had a much lower mortality than 1.58 per cent, the Budapest statistics amply prove the value of the dilution method. It is not being used, however, in any of the institutes in this country at the present time.

Serum Therapy Treatment Against Rabies.—A great deal of work along the line of serum therapy has been done by Babes, Tizzoni, Centanni, and others, and some brilliant results have been obtained. The latter two investigators after exhaustive experimentation produced absolute protection against the disease in experimental animals by what they termed the Italian method of vaccination against rabies. It consists in the immunization of sheep by inoculations with rabic virus which has been attenuated by means of being digested with gastric juice. In order to keep the serum potent the sheep has to be revaccinated at intervals of from two to five months. The serum from such an animal when used in doses of 20 c.c. in the liquid or two to five grams in the dried condition is claimed to contain absolutely protective qualities against rabies in the human subject. It is even claimed to have curative effects after symptoms of the disease develop. Tizzoni and Centanni claimed that its greater efficiency and convenience would cause it to be completely substituted for the Pasteur vaccination. This claim, however, has never been realized, and its value on the human subject has not been satisfactorily demonstrated. The excessively elaborate technique required in its preparation will probably prevent its ever coming into general use.

Eradication of the Disease in the United States.—If eradication were once accomplished all that has been said about treatment would be rendered unnecessary. Furthermore, rabies is one of the most easily eradicated of all infectious diseases.

The factor of success in the undertaking can be summed up in three words, namely, muzzling all dogs. Could this be efficiently carried out in the United States for a few years rabies would be entirely eradicated, as has been demonstrated by the experience of other countries. Other domestic animals have the disease, it is true, but its transmission by these animals is rare and need not be considered. Wild animals as a factor in its spread may require consideration in a few localized sections of the country.

When the muzzling of dogs is suggested, however, the sanitarian meets with many obstacles. Many dog lovers can not appreciate, or are indifferent to, the anxiety, mental terror and suffering of several thousand human beings in our country yearly, and the actual death of from 100 to 300 yearly, not to mention the suffering and death of countless dumb brutes. But once a dog-muzzling law is passed dog owners are up in arms, using their time, influence and money to secure its repeal or prevent its enforcement on the ground of alleged cruelty. In reality there is no cruelty whatever inflicted on a dog by causing it to wear a muzzle when in public places or running at large. The animals soon become used to it and manifest not the slightest inconvenience.

In the absence of muzzling the disease will continue year by year, causing constantly increasing suffering, financial loss, and death. The greater freedom of movement which the dog enjoys over all other domestic animals, except possibly the cat, makes it difficult or impracticable to control the disease by

any other means than general muzzling. How is this to be accomplished? This question seems to be almost insurmountable. A national dog-muzzling law is sometimes proposed as a solution, but the power of the Federal Government in dog muzzling, as in other matters, would be confined to those cases where the interstate dissemination of the disease is involved. The Secretary of Agriculture under present law could quarantine States where the disease exists, but it can readily be seen that it would be impracticable to enforce such a quarantine further than to require that all dogs transported interstate by common carriers should be muzzled. This, however, would have no material influence in the eradication of the disease. Practically all the States are infected, and the great majority of the serious outbreaks of rabies are entirely within the confines of particular States.

It is necessary, therefore, for the States and municipalities to take action and for the public to be educated to the importance of the disease and the value of dog muzzling. Dog-pound service should be increased in all the large cities. This results in the destruction of a large percentage of homeless and ownerless dogs, which class of animals are mainly responsible for keeping the infection of rabies alive. The importance of this service is shown by the effect which it had in Washington in 1900, when 2,771 more dogs were impounded than during the previous year, with an immediate and marked decrease in the frequency of the disease during the following year.

To secure individual State legislation in regard to dog muzzling, Federal co-operation, and the equally important education of the public will require concerted action on the part of professional men and sanitarians, with the co-operation of the general public and the press. With such State legislation, the Bureau of Animal Industry could co-operate with the State authorities by placing officers within the confines of a State in case of an outbreak where the disease was spreading beyond the control of the State authorities. A large percentage of homeless and ownerless dogs could be impounded and humanely destroyed. No dog would be seen on the streets of cities or loose in the country without a muzzle. Animals developing the disease would be unable to transmit it, because they would be either muzzled or confined. Financial loss, suffering, and death due to this disease would rapidly decrease from the beginning, and in a few years' time rabies would be unknown in this country.

Once our country becomes free from the disease, we could easily prevent its reappearance by enforcing a prolonged quarantine of all dogs coming into the United States from foreign countries where the disease prevails.

Results of Muzzling Dogs in Other Countries.—To prove the practical value of these repressive measures we have only to observe the results obtained in foreign countries. Prior to 1875 rabies had been prevalent in Berlin for many years. In that year a law was enacted, including the whole of Prussia, which provided for the killing of dogs suspected of having rabies, and the muzzling and leading of all dogs when in public places. This led to the complete eradication of the disease, and no case has occurred in Berlin since 1883.

In Holland in 1875, rabies being quite prevalent, dog muzzling was established. The disease immediately began to disappear, and in 1879 only three cases were reported, since which time the country has been free from the disease, except along the Belgian border.

In Great Britain the value of muzzling, which was enforced in spite of great public opposition, has been admirably demonstrated. In 1889 it was first adopted, and the disease had almost disappeared in 1892, when the muzzling was stopped on account of the determined opposition. The disease immediately began to increase, and in 1895 muzzling was again enforced. The decrease in rabies was immediate and marked, and since November, 1899, the country has been entirely free from the disease.

In Sweden the value of muzzling has also been demonstrated. In fact, in all cases where this measure has been effectually carried out the disease has been completely controlled.

The disease has never been known in Australia. This is due to the fact that the infectious agent never gained a foothold in that country, and for a number of years the government has wisely prevented such an unfortunate occurrence by laws which absolutely exclude the importation of dogs into that country.

In countries where steps have been taken to exterminate rabid dogs—Holland, Sweden, Norway and Germany—rabies in man has almost disappeared. In England, where the disease in dogs has been eradicated, and in Australia, where the affection has not been allowed to enter, the disease among the residents is unknown.

The largest volume yet issued of the series of A. K. C. stud books, Volume 24, is now out and ready for the fancy. There are 2691 pages and 10,495 registrations as against 2425 pages and 9729 registrations last year. This is a record breaker, 1907 was regarded as rather phenomenal. It all goes to show that the general public is paying more attention from year to year to highly bred dogs and that authentic records, by registration has its deserved recognition.

It is pleasing to note that the sporting dogs division has developed a healthy increase. In other breeds there seems to be little if any falling off, Bostons and Airedales show a strong advance as do Collies.

A SPORTSMENS' EMPORIUM.

Early this week Golcher Bros. moved into their new location at No. 510 Market street this city, almost opposite No. 511 Market street where they had begun business anew shortly after the calamitous days of April, 1906.

The new store is well lighted, commodious and elegantly fitted up, in fact on par with the grand sporting goods emporium formerly at 538 Market street which contributed its \$100,000 mite to the big bonfire and which was widely known as the result of a quarter of a century's study and application in the building up of a prosperous and successful business that catered to every branch of sportsmen's, outing, athletic and contingent demands and needs—one of the largest establishments in its line west of the Rockies.

The new emporium is larger than the old and is stocked with a complete line of goods that for up-to-date quality, variety and prices will find a quick response from sportsmen and the general public.

This move was contemplated some time back, the necessary change awaiting the completion of building operations. The store across the street rapidly became too small for the requirements of the old time support and the needs of a growing business.

Golcher Bros.' big new store will be hailed by sportsmen, for one appreciative class, as going a long way towards the rehabilitation of the well remembered Sportsmens' Row of old, but now new Market street.

STRIPED BASS CLUB BANQUET.

The San Francisco Striped Bass Club banquet, at a popular down town resort on Thursday evening, May 28, will go down in local angling annals as one of the most enjoyable re-unions of sportsmen for more reasons than one. The club has proudly placed itself on record by having the tables graced with the presence of ladies, a happy precedent that may well be followed by other sportsmen's clubs.

After an appetizing and substantial menu had been disposed of, speeches, songs, stories and music enlivened the balance of the evening. The tables, by the way, were prettily arranged and prodigally decorated with flowers.

Among the speakers were: Charles P. Ladresse, C. B. Hollywood, Frank Marcus, Prof. Winegar, Jas. Lynch, Jas. S. Turner, Al. Varozza and others.

M. J. Hynes sang songs and told stories in his own inimitable style. Mr. J. A. Cook and Mrs. C. D. Story gave several vocal selections that were well rendered. Master Stewart Hynes piano selections were given deserved applause. Charles P. Ladresse presided as toast-master.

Among those present were: Mr. and Mrs. C. P. Ladresse, Mr. and Mrs. C. B. Hollywood, Fred Franzen, Charles H. Kewell, Miss Martha Benn, Mr. and Mrs. James Lynch, T. Lynch, W. S. Turner, James S. Turner, Dr. and Mrs. Charles E. Turner of Vallejo, Jos. Uri, Charles Attinger, Mr. and Mrs. E. Acceret, Miss Harmon, Mrs. C. D. Story, E. Oetzman, Al. Varozza, George Becker, Frank Marcus, James Paulson, J. C. Wallace, Miss Duckel, Mr. and Mrs. W. J. Hynes, A. L. Bowley, Ed. Conlin, J. A. Cook, J. X. De Witt, M. J. Hynes and Stewart Hynes.

The announcement in last week's issue of the organization of a ladies' kennel club was given in good faith by our informant, but in some respects a bit premature. At the meeting last week there was a departure from the original schedule, an amicable one at that, and we now give the following correct list of the officers of the California Ladies' Kennel Club.

Mrs. J. Auburn Wiborn, president; Mrs. Robert Wallace, first vice-president; Mrs. Irving C. Ackerman, second vice-president; Mrs. E. T. Morgan, third vice-president; Dr. Gertrude Spriggs, secretary-treasurer; Mrs. George A. Nieborger, corresponding secretary.

The club has formally requested permission of the San Francisco Kennel Club to hold a show in this city sometime during the coming fall.

The next meeting of the club will be held Wednesday, June 10, at 3 p. m. at the residence of Mrs. Dr. Spriggs.

Bloomsbury Baron, the well known Bull Terrier owned by Mr. Albert Joseph has taken the final canine journey. Baron made his first appearance here in 1900 under Mr. James Mortimer, by whom he was given a v h c despite some good wins in England, including a first at Crufts'. He made good at the Tanforan show following where Mr. Harry Lacey awarded him first honors.

More important, however, is the record of Baron as a producing sire. Among his get may be mentioned Ch. Edgecote Peer (and that alone would be sufficient honor), Edgecote Baron, Edgewood Baron, Woodlawn Baron, Bloomsbury Queen, Stiletto Madge, Stiletto Flash, Edgecote Queen Bess and others.

All lovers of the Cocker will be sorry to hear of Tom Blight's loss of the handsome lemon and white Fantana, not only a winning bench, but as amicable and faithful a little pal as one could desire.

Prince Lion, a grandson of California Eboracum, and one of the few good St. Bernards we had left is now no more, a bit of bad luck for Mrs. Jack Matthews that the fancy will deplore.

Drink Jackson's Napa Soda.

THE FARM

PIG PEN WISDOM.

Select a thoroughbred sire, if you have to drive miles to get him. It will make all the difference in the feeding and growing capacity of the pigs.

Try sowing some rape for the pigs.

Sow broadcast or in drills, about four pounds to the acre.

It can be sown from the first of May to the end of August. It will be fit for pasture in about five weeks.

Rape will stand quite a heavy frost without any apparent injury.

When cutting for soiling care should be taken to cut about four inches from the ground, and a second and even a third crop can be expected from the same seedling.

It makes the finest pasture for brood-sows and pigs. An acre sown on good land will carry from twenty-five to forty pigs from June to October, if handled properly.

Be careful how you feed sows that have little pigs. If too heavy a feed is given, it may lead to sickness in the pigs.

Keep the pigs growing all the time. The minute a pig stops growing you have a job on hand, for stunted pigs are hard to deal with.

Linseed meal makes a most nourishing and profitable slop for hogs of all ages, and it is cheaper than bran these days; but don't feed it too freely. It is concentrated stuff. Every pound of it fed on your farm has a fertilizing value of at least fifty per cent. of its cost, aside from its food value.

The pig that has to live exclusively on bought foods will cost more than its pork is worth, unless it is given a special valuation for home use. The pig is primarily a waste user, and it must be kept in its place. Make it use the garden wastes.—Farm Journal.

POULTRY FACTS.

White Leghorns are in high favor on many farms.

The trap nest has destroyed the peace and happiness of the slothful hen.

The air-tight poultry house, like the wagon shed and barn yard fence, is a back number.

Poultry keeping is more profitable than dairying—for the man who likes poultry better than he does cows.

The flocks that are making the big egg yields are owned by men and women who employ practical commonsense methods in caring for them.

If the hen will not pay for her board in eggs, she should be made to yield a profit by being slaughtered and her carcass sold. No poultryman should keep drones; he cannot afford it.

HIGH-CLASS STALLIONS FOR SALE.

Sky Pointer, Jr., by Sky Pointer, dam Juliet D. 2:13½ by McKinney 2:11¼. Handsome dark bay, stands 15½ hands, weighs about 1150 pounds. Has paced miles in 2:12¼, driven by W. G. Durfee. **F. S. Turner 2:24**, chestnut horse, standard and registered, by Valloia, he by George Norval, out of Carlotta Wilkes (dam of Inferlotta 2:04¼, Carlockin 2:13½, etc.), dam by Phallas 2:13¼, second dam by Onward. His colts are all young and promising and in training at the Santa Rosa Stock Farm.

Stambolita's Guy, two-year-old stallion by Guy Dillon, dam Stambolita 2:27 by Stamboul, second dam Biscari (dam of 8 in 2:30), next dam Bicara (dam of 7 in 2:30). Large, handsome colt, absolutely sound and a good racing prospect and will make a great sire.

F. S. Whitney, by F. S. Turner, dam By Guy by Guy Wilkes, second dam By By by Nutwood. Handsome, dark bay colt, three years old, sound, good prospect for the track and bred to make a great sire.

Seven Yearling Stallions by such stallions as Major Dillon, Guy Dillon and Sky Pointer, Jr. All these horses will be sold at reasonable prices. To see the horses, for prices and further particulars, apply to or address, F. S. Turner, Santa Rosa Stock Farm, Santa Rosa, Cal.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Foully Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. I. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

NOTHING BUT GOOD RESULTS.

Have used GOMBALT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. HAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY. I have used GOMBALT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every case of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—F. C. CRABER, Training Stables, 990 Jennings Street, New York City.

CARE OF YOUNG CHICKS.

In caring for young chicks don't feed them too soon. This is a mistake that causes lots of trouble. Each chick, remember, comes from the egg full, nature having made preparations for its nourishment for at least twenty-four hours, by allowing it to absorb the contents of the yolk just previous to emerging from the egg. For twenty-four hours, therefore, it should not be fed, and if left twelve hours longer, it will cause it no serious inconvenience. The second day, as early as possible, is an excellent time to fix upon for feeding young chicks, and the earlier the better. The third day is not so urgent, however; that is, feeding may not begin until two or three hours after sunrise.

Hard-boiled eggs, finely crumbled (the whites and yolks mixed), should first be given them, including all the egg shells, broken finely. This bill of fare should be renewed as often as they will eat it up cleanly the first, second and third day, whereupon a variety of food may be presented them. Certainly they should have a little green food, such as onions, tender grass, cabbage and many other kind of wholesome green vegetables. Fine gravel and pounded bone should also be kept before them constantly. It is important, too, that the food be supplied with a degree of neatness and care, since there can hardly be success where filth abounds.

It being variety that keeps chicks in health, cracked corn, whole wheat and buckwheat may be fed them as soon as they will eat it. Along with everything else, they want fresh drinking water, free from dirt, within their reach at all times. When a fortnight old, milk is one of the very best foods that can be given them.

Needless to say, their surroundings should always be kept dry, dampness being fatal to chicks, and if they are mothered by a hen a cheap and efficient coop can be constructed from drygoods and grocery boxes and covered with tarred paper, which affords good shelter and plenty of warmth.

An excellent place for the coop is in the garden. The little chicks will do no harm whatever to the vegetables and fruits there, albeit they procure among these the greater and more important part of their food themselves. There is, in truth, no better way to have one's plants freed from the bugs, worms and insects that always infest them in early summer than doing like this when a brood of chicks are available.—Fred O. Sibley, Milford, Otsego Co., N. Y.

In Denmark and Holland farm values range from \$600 to \$800 per acre. Dairying is the principal occupation of the farmers of these countries. Dairying only can make this land pay. Dairying has made this land so valuable. Here is something else more forceful. The islands of Guernsey and Jersey have the average cash value of agricultural lands up to \$1250 per acre. The dairy cattle bred on these islands tells the story. Intelligent dairying raises land values everywhere and enriches the dairyman accordingly.

The most critical period in the chick's life seems to be the first two weeks and if he can be gotten through this period healthy and strong the chances for maturity are good.

A man feeding steers for the market does not feed stingily—he knows that it requires feed to make beef. Then since feed makes milk, why feed the milk cow stingily? To feed scantily for milk is as foolish as to feed stingily for beef.

It pays to feed chickens well for results.

Sulky and Cart for Sale.

SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

Such results as the following explain why this is the only remedy sold under a contract:

ALPHA, SASK., Canada,
April 26th, 1908.
Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs: I wrote you from Indian Head, Sask., two years ago concerning Save The Horse Spavin Cure for my stallion Game Keeper, No. 39145, A. L. A., by Gamaleon. I tried your Save The Horse and it did all you claim for it and more. This horse was raised by Phillips Bros., Delevan, Wis., and in shipping to the horse sale at Chicago the winter of 1904 got his right hind leg through the car in some way and was badly hurt. A Vet. in Chicago advised his owners to take what they could get for him; that he never would be of any use. He was bought for \$50 at the sale. I bought him the next October for \$75. I tried a great many remedies on the leg, but to no purpose. I purchased Save The Horse and it did the job; to put it short, it made a \$75 horse well worth \$1000, and if I could afford to keep him I would not take \$1000 for him, for I am sure that he is one of the fastest absolutely untrained horses that lives. The first time I go to Indian Head I will mail you a photo of the horse and you will see what kind of a job Save The Horse made of a very large leg. I have used it on different horses without a single failure.
Yours truly,
JOHN LYNCH.

A. F. POULSON, General Hardware Agent for Sampson W. Mills,
CASTLEWOOD, South Dakota, May 11, 1908.

Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: I write this to inform you regarding a horse with a bone spavin upon which I have been using your "Save-the-Horse". Possibly you remember that I wrote to you several times. I bought and used it and to-day the horse is as sound as could be wished for, and he is doing well. It is certainly all right and does all it is recommended to do. If there is anyone in doubt refer them to me and I will speak a good word for it. Yours, etc.,
A. F. POULSON.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

\$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the
BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

R. V. HALTON, Manager,

Hotel Belvedere,

Belvedere, California.

BEST FOR LEAST MONEY

JOHN MIDDLING'S

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

3-in-One keeps all fishing tackle in perfect order. Reels oiled with 3-in-One won't stick or hang at critical moments. They always work easily and surely. 3-in-One will not gum, turn black or sticky.

3-in-One prevents rust on steel rods, keeps joints and connections clean and smooth, preserves wooden rods, too, making them tough and pliable.

Draw your line, salt or linen, through rag moistened with 3-in-One. Makes it stronger and last longer. Will not rot, twist or tangle, preserves, lines, nets and traps in either fresh or salt water.

FREE Try 3-in-One at our expense. Write for liberal free sample and booklet. 3-IN-ONE OIL COMPANY, 112 New St., New York

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12½, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18½, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12½, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma, where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

KING DINGEE

is by the greatest son of McKinney—the magnificent Zombro. His dam is by Diablo and his granddam has 2 in the 2:15 list. He is a grand individual and trotted a mile last year as a 4-year-old in 2:22.

Season of 1908 AT **Santa Rosa, Cal.**

A Highly Bred and Grand Individual.

Terms: \$50. Return privilege.

Nutwood Wilkes has sired John A. McKerron 2:04½, Copa de Oro 2:07½, Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes 2:10½, Georgie B. 2:12½, North Star 2:13½, Claudius 2:13½, and 32 more in the list. His daughters have produced Mona Wilkes 2:06½, Miss Georgie 2:08½, Lady Movry 2:09½, Aerolite (3) 2:11½ (trial 3, 2:06½) and many more. He is the greatest sire of early and extreme speed and stake winners in California. Send for card giving full tabulated pedigree and particulars. Address

MARTIN CARTER, Nutwood Stock Farm, Irvington, Cal.

WILLIAM HAROLD 2:13¼

Sire of Janice 2:08½, Dan Burns 2:15 and 2 others in 2:30. Sired by Sidney 2:19½ (grand sire of **Lou Dillon 1:58½**); dam Cricket 2:10 (dam of 5 in 2:30 list) by Steinway 2:25½ (sire of Klatawah 2:05½, Bonnie Steinway 2:06½, etc.). He is a horse of great muscular development and shows plenty of quality. All of his progeny are noted for their perfect dispositions, bone, substance and speed. He will make the Season of 1908 at a fee of \$25.

For further particulars address

C. MATTESON, Haywards, Cal.

McKENA 39460

Brown stallion, foaled April 11, 1900, 16.2. Sire, McKinney 2:11½, the greatest sire of extreme speed living. Dam Helena 2:11½, dam of Wild Nutting 2:11½, Dobbell 2:22 and Hyita (trial) 2:12 by Electioneer; second dam Lady Ellen (dam of 6 in the list) by Carr's Mambrino, sire of dam of Sweet Marie 2:04½; third dam, by Owen Dale, son of Williamson's Belmont; fourth dam, by Williamson's Belmont.

McKENA is one of the best bred of all the McKinneys. He is a large powerful, and grand-looking young horse, and a sure foal getter. He is by a great race horse and sire and out of a mare that was a great race mare and producer, his second dam being one of the greatest brood mares of Palo Alto Farm. He cannot help being a success in the stud.

FEE: \$40 the Season.

Mares may run on pasture at \$7.50 per month. No responsibility will be assumed for accidents or escapes.

Palo Alto Stock Farm, Stanford University, Cal.

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

Bonny McKinney 41383

Son of **McKinney 2:11¼**

World's Greatest Sire of Speed

Two-Year-Old Trial 2:20

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonny McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Bonnie Searchlight

Son of **SEARCHLIGHT 2:03¼**
King of Race Horses.

Reg. No. 43899

Sire of Ray o'Light 2:13½ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11½, trial 2:05½. Dam Rita B. by Boodle Jr.; 2nd dam Gablian Girl by Gablian; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Acyono 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at **Alameda Race Track, ALAMEDA, CAL.**

Fee: \$40 for the Season for either horse. January 1st to July 1st.

Money returned in case mare does not get with foal.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

THE ALLERTON-ELECTIONEER STALLION

Alves	-	Eighth dam—Daughter of Sumpter
		Ninth dam—Daughter of Imp. Buzzard

SEASON OF 1908 at

Association Park, San Bernardino.

Fee: \$35 for the Season. \$25 returned if mare fails to get with foal.

For particulars apply to or address

E. F. BINDER, Owner, Riverside, Cal.

G. W. BONNELL, Manager, San Bernardino, Cal.

LIMONERO Reg. No. 33389

3-Year-Old Race Rec. 2:15¼

Winner of \$5000 Stake at Lexington for 3-y-o

Sired by Piedmont 2:17½ (sire of 26 in 2:30 list); dam Lula neer (great brood mare) by Electioneer 125; second dam Lula 2:15 (winner of 56 heats in better than 2:30) by Norman 25, etc., etc. Bay stallion, 16 hands, weighs 1150 lbs. Perfect trotting action. Splendid individual in every respect.

DIRECHO

Standard Bred.

Public Trial 2:15

Sired by Direct 2:05½ (sire of Directly 2:03½, Direct Hal 2:04½, Bonnie Direct 2:05½ and 9 others in 2:10 list); dam May N. by the Great McKinney 2:11½ (world's champion sire of speed); second dam Belle by the great brood mare sire Echo 462, etc., etc.

Fee: \$25 for the Season, Either Horse.

Cash or approved note. Usual return privilege.

The above stallions will stand at **Agricultural Park, Los Angeles**

For folders and further particulars address or apply to **J. H. WILLIAMS, Agricultural Park, University Station, Los Angeles, Cal.**

The Great Speed Sire Lynwood W. 32853 Rec. 2:20½

By Guy Wilkes 2:15¼ (sire of Fred Kohl 2:07½, Hulda 2:08½, Less Wilkes 2:09, Seymour Wilkes 2:08½, etc., etc.), dam Lindale by Sultan Jr.; next dam Flora Pearson by General McClellan 144, etc. Lynwood W. is the sire of Sonoma Girl 2:05½, the sensational trotter of 1907, winner of \$23,650 on the Grand Circuit and sold for \$26,000 also sire of Charley Belden 2:08½, the champion green trotter of 1906, winner of \$11,140, and several more in the list. Lynwood W.'s get all have beauty, size, style, speed and level heads and sell for big money.

Season of 1908 at "Round Stable," **Santa Rosa**

TERMS: \$50.

Box 213. **H. A. CARLTON, Santa Rosa, Cal.**

Aerolite

2-y.-o. Record 2:15½
3-y.-o. Record 2:11¼

Public Exhibition 2:05½

By Searchlight 2:03¼; Dam Trix by Nutwood Wilkes 2:16½, Sire of John A. McKerron 2:04½, Copa de Oro 2:07½, Tidal Wave 2:09, Miss Idaho 2:09½, etc. Dam Trix, dam of Mona Wilkes 2:06½, and 3 others in 2:10 list, all by different sires that have beaten 2:15. Among them Moortrix, that nosed out Ray o'Light last season in 2:13½. She is destined to be one of the greatest of broodmares, as everything she produces shows extreme speed; second dam Trix by Director 2:17; third dam Mischief (dam of Brilliant, sire of Brilliantins 2:17½) by Tuckaho 2:28½, son of Flaxtail; fourth dam Lucy by Peoria Blue Bull; fifth dam Fanny Fern by Irwin's Tuckahoe and sixth dam by Leffer's Consul (thoroughbred).

Will make the Season at **PLEASANTON, Cal.** (Limited to 20 approved mares.)

Fee: \$50 for the Season.

\$40 returned if mare fails to get with foal.

No old non-breeding mares taken. Pasturage \$5 per month. All bills to be paid before removal of mare.

Ship mares to **Sutherland & Chadbourne, Pleasanton, Cal.**

Breeder and Sportsman

Oakland's Banner Meeting

Emeryville Track, August 10 to 15.

Entries Close Tuesday, June 9th.

The Alameda County Fair Association announce the following classified events to close on Tuesday, June 9.

Trotting, 2:09 Class, Purse	\$1050
Trotting, 2:11 Class, Purse	900
Trotting, 2:30 Class, Purse	750
Trotting, 2-Year-Olds, Purse	600
Pacing, 2:05 Class, Purse	1050
Pacing, 2:10 Class, Purse	750

CONDITIONS:

Entries close on Tuesday, June 9th.
Five per cent entrance, with the usual five per cent from money winners.
Three heats, every heat a race, except two-year-old trot, which is two heats, every heat a race.
Money division: Fifty, twenty-five, fifteen and ten per cent.
Nominators have the right to enter two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race, and the starter to be named by 4 o'clock the day before the first day of the meeting at which the race is to take place.

MEMBER NATIONAL TROTTING ASSOCIATION.

For entry blanks and other information address the manager.

BEN BENJAMIN,

Watch for announcement of the Golden Gate Futurities! Most liberal conditions ever offered breeders of the Pacific Coast.

PACIFIC BREEDERS PACING HANDICAP

to be paced at the regular annual race meeting in Aug. 19-20-21-22, 1908, of the Pacific Coast Trotting Horse Breeders Association

CHICO, Cal.

Stakes \$1500 Guaranteed

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse to be handicapped slower than up to a mile in 2:15.

Entries close Monday, June 15, 1908.

More than one horse from the same stable may start.

RECORDS WILL NOT NECESSARILY GOVERN

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168½ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classed for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Entrance two per cent, due June 15, 1908. One per cent additional if not declared out on or before July 15, 1908. Two per cent additional to start.

Declarations must be made in writing, accompanied by the amount due when made, or nominator will be held for all payments except starting payment.

Money divided 50, 25, 15 and 10 per cent. Except as stated, conditions advertised for the meeting to govern.

MEMBER NATIONAL TROTTING ASSOCIATION.

Campbell's EMOLLIC IODOFORM

Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and \$1.00.

ENDORSED BY THE U. S. ORDNANCE BOARD!

The Winchester

The Only Repeating
Shotgun so Honored

There never was a time since its introduction when the Winchester Repeating Shotgun was more popular or in greater demand than it is to-day. The number of them being used in the field and at the trap is rapidly increasing and they are steadily supplanting double guns for all kinds of shooting. Some restless experimenters who are always following strange and unknown gods have from time to time laid aside their trusty Winchesters to try some new and loudly heralded contraption, but they have speedily and gladly come back to their first choice, convinced by comparison and experience that the "one best bet" in the repeating shotgun line is the Winchester. There are other makes of repeating shotguns, but the Winchester is the only one that has successfully stood every conceivable test that sportsmen could put it to, and also the rigid technical trials of the U. S. Ordnance Board, embracing strength, accuracy, penetration, endurance, excessive loads, defective shells, rust and dust. Its popularity with sportsmen and the official endorsement by the Government are all sufficient proof of its reliability, and wearing and shooting qualities. Further, it is not necessary to become adept in the sinuous art of contortion in order to load it. Winchester Repeating Shotguns are made in four grades, listing at from \$27.00 to \$100.00, and are sold everywhere.

High Grade Short-Horn Sale

About eighty head of the well-known Humboldt Herd of Short-horns will be sold at the Humboldt Ranch, one mile east of Suisun, Solano County, Cal., on June 17, by Auctioneer Col. Geo. P. Bellows, of Maryville, Mo. The owners of this herd, Messrs. B. F. Rush and William Pierce, are about dissolving partnership and all of their stock must be sold within the next few months. The sale of June 17th is therefore not a clearance but a dispersal sale, and the individual animals to be sold on this date are some of the best of their exceptionally fine collection.

Carriages will meet all trains at Suisun on the day of sale to convey visitors to and from the station.

For more detailed information, or for catalogue, address,

North Yakima, Wash.....Sept. 28-Oct. 3
Spokane, Wash.....Oct. 5-10
Walla Walla, Wash.....Oct. 12-17

THE BIG ENTRY LISTS received by the associations on the Pacific Coast that have advertised programs this year are most flattering to the managers and very satisfactory to horse owners. The large lists are proof positive that the interest in harness racing is on the increase and that liberal purses announced early will be liberally patronized. Oregon and Washington are far ahead of California in the way of purses and stakes offered, but the majority of the horses named in these events are now being trained for them by California trainers. Before another year has passed there should be some effort made to merge the California and North Pacific Circuits into a Pacific Coast Circuit, whose dates can be selected and announced in January and the entire program of races arranged and advertised by March or April. The Pacific Coast Trotting Horse Breeders' Association, the California State Fair, and a number of other California organizations should become members of this Pacific Coast Circuit and join in making it the equal of any circuit in the country. We have the horses and the tracks and the people will patronize the meetings. There is an opportunity on this coast to have harness racing begin July 1st each year and continue until November. By starting at Los Angeles, the horses can work north through Fresno, Stockton, San Jose, Oakland, Santa Rosa, Woodland, Sacramento, Marysville and Chico, before going north to Oregon and Washington, thus providing a circuit of four months racing that would be equal to any given in the United States.

ANOTHER HANDICAP FOR PACERS is advertised by the California State Agricultural Society to be decided at the State Fair, September 5th. This stake has a guaranteed value of \$1,000 and its conditions are very similar to the handicap advertised by the Breeders' Association for its Chico meeting. Look over the advertisement of this race which appears in our business columns. Entries close July 1st. Any pacer that can pace a mile in 2:15 has a chance to get first money in this race and every pacer, no matter how fast his record, can start in the event.

PUT YOUR PACER in the \$1,500 handicap which has been announced by the Pacific Coast Trotting Horse Breeders' Association for its meeting at Chico in August. Entries to this novel race will close with Secretary Kelley on Monday next, June 15th, and your pacer should be named in it. The handicap system will be the greatest benefit ever conferred on harness racing if it proves successful, and the only way to ascertain its practicability is to have a few races on this plan. The \$50,000 trotting handicap inaugurated by the Readville association has received 127 entries, and there is scarcely anything else talked about among harness horsemen at the present time. It is a foregone conclusion that the crowd at Readville on the day this race comes off will be the largest ever seen on a trotting track in America. If the \$1,500 pace offered by the Pacific Coast Trotting Horse Breeders' Association fills well and results in a good race, the probability is that the association will give larger purses next year for both trotters and pacers, and that other associations on the coast will follow suit, thus making it unnecessary for the fastest horses to go east to get racing. We hope every pacer in California that has speed enough to be called a race horse will be named in this stake next Monday. If every owner will get in and boost a little this year the circuit of 1909 will be the greatest ever held on the coast, as there are many associations that will want to join the circuit next season if this year's circuit is a success.

A NEW TRACK AT SAN JOSE seems to be certain. It is said work will begin on it within the next sixty days and the track to be ready for training on by the time the summer racing season is over. Mr. Buck, who is the proprietor of this new track, has already purchased the land which is alongside the Alum Rock electric railway, a short distance outside the city limits of San Jose, and is only waiting now for the crops growing on the property to be harvested before commencing grading and erecting the necessary buildings for the accommodation of horses, etc. There is no finer location in the world for a training track than the vicinity of San Jose. Its proximity to San Francisco, from which it can be reached by twenty-five or thirty trains daily, makes it so convenient that all San Franciscans who have horses in training will want them located there. The soil on which the new track is to be built is said to be perfect for winter work, and Mr. Buck will make a special effort to so build and drain it that horses can be trained there every month in the year. When the track is finished San Jose will undoubtedly be once again listed with the cities of California where a harness race meeting will be held every year.

BRIGHTON BEACH is known the country over as one of the most delightful tracks on which racing is held in the United States. Its stakes are among the leading classics of the running turf, and attract the entries of all the leading stables. On the opposite page will be found the announcement of four stakes to be run at this famous track at the midsummer meeting of this year. The Seashore Handicap is for three-year-olds and upwards at a mile and a quarter and has \$2,000 added. The Triumph is for two-year-olds at one mile, with \$5,000, and the famous Pharsalia Plate worth \$2,500 added. The Sunshine is for two-year-olds at five and a half furlongs and has \$1,500 added. The Chantilly Steeplechase is to be over the short course of nearly two miles, is for four-year-olds and upwards and has \$1,500 added. We suggest that all owners of runners look these offerings over, and make their entries by Monday next, June 15th, the date of closing.

THE ONLY OBJECTIONS to the standing start in the big \$50,000 handicap at Readville seem to be made by those who want the best of it instead of a fair start, and that other numerous class, the gamblers who pride themselves on being game enough to back a horse in a 2:15 trot that has shown 2:02 in private. One turf writer who seems to be trying his best to "knock" the race asks how it will be possible for a fast horse to get through a crowd of slow ones lined up across the track in front of him. Does any sane person believe that eight or ten drivers can be found in one race who will line their horses up and drive like a cavalry company head and head across the track so that faster horses cannot get through? Such a game has never been worked in the past and it is 1000 to 1 that it can not be in the future.

FOUR WEEKS OF RACING for \$500 purses is the offering made to horsemen by the Central California Circuit this year. The program is the same at each of the four tracks on this circuit, and is already arranged so that owners can see at a glance just how the races will be called and can enter accordingly. Bakersfield, Tulare, Fresno and Hanford are the towns which comprise this circuit and the advertisement appears in this issue of the Breeder and Sportsman. The date of closing has been fixed for Monday, June 15th, so this is the last opportunity we will have to call the attention of owners to the date. We hope none of the owners or trainers who will race in California this year and are not intending to go north after the State Fair will fail to enter their horses on the Central California circuit, as it will not only furnish some of the best racing in California this year but will be an economical circuit to race over, and deserves to be supported by the horsemen. Don't let next Monday go by without filling out the entry blanks for the Central California Circuit and mailing them to the respective secretaries.

THE OPENING MEETING of the California Circuit will be held at Santa Rosa this year, and will be given by the Pacific Coast Trotting Horse Breeders' Association. The Santa Rosa track has a world wide reputation as one of the best training tracks in the country as well as one of the best and fastest race tracks. The climate there is near perfect, and horses and colts always do well. The program of the Breeders' meeting, which will be found in this issue, provides for every class in training in California, and we ask every owner to look it over carefully and be prepared to make as many entries as possible to the different events that will close Wednesday, July 1st.

ANSWERS TO CORRESPONDENTS.

T. M. H., Selma—We cannot find any horse registered in the American Stud Book by the name of Nanisau. Perhaps the imported stallion Nena Sahib is the horse you refer to. He was a chestnut horse, bred by Mr. Nugent in England, and brought to California in 1862 when a five-year-old. He was by Horn of Chase out of a mare by Irish Birdcatcher.

Thos. Charlton, Ukiah—The cases against the parties you name who were arrested for non-payment of stall-pace an eighth of a mile in 18 seconds. The dam is but were dismissed on motion of the District Attorney, it having been shown to that official that the law under which the arrest was made had been repealed two or three years before.

A. K. Kerr, Salida—In the Year Book the record of Dan Patch is given as 1:55½ and two asterisks (* *) precede the name, indicating that the record was made with pace-maker in front with a dirt shield.

J. M. Horton, Bishop—Bob Mason's record is 2:27½ made at Los Angeles in 1890 when he was eleven years old. We believe he is now dead, as if living he would be 29 years old.

John Dunlap, White River—Star Pointer 1:59½ is by Brown Hal 16,935, dam Sweepstakes (dam of Hal Pointer 2:04½, etc.) by Knights Snow Heels, grandam Kit by McMeenan's Traveler.

W. G. Lutz, Bakersfield—Jonesa Basler 2:05½ did not win the race in which he took his record, but he has won several others. He won three races in 1907, three in 1906, one in 1905 and three in 1903.

DEATH OF SILVER COIN 2:10.

The stallion Silver Coin 2:10 by Steinway, dam Jenny Mac 2:09 by McKinney 2:11½, had his leg broken the other day by a kick from another horse and had to be destroyed. Silver Coin was a remarkably handsome horse, a rich mahogany bay, standing nearly 16 hands and weighing over 1100 pounds. He was bred by Dr. W. P. Book of Los Angeles and owned at the time of his death by William Loftus of Fullerton, Cal. Silver Coin got his record when a four-year-old, after taking a three-year-old record of 2:11½ in a five heat race which he won. He was a wonderfully fast pacer, having shown a half in 1:01½. His breeding was superb. His sire was a three-year-old champion trotter, his dam had a record of 2:09 and was by the champion sire McKinney 2:11½, his grandam, Leonor 2:24 was the dam of five in the list and his grandam a daughter of Echo, produced two standard performers. Silver Coin is the sire of the fast pacer Seigfried owned by a member of the Los Angeles Driving Club. Seigfried has paced miles in 2:10 several times. There are a number of very promising colts by Silver Coin owned in Southern California and his death will not only be a great loss to Mr. Loftus, but to the breeding interests as well.

A HOME OF TROTTERS NEAR SACRAMENTO.

We have read much lately about the passing of the large stock farm and the rise in importance of the small stock farm and the individual breeder. While the large farm had its advantages—usually having its own track, trainer, premier stallion, and band of choicely bred mares, there was always on account of the very magnitude of the enterprise a large amount of indifferent material produced, along with the choice, which ever added to the expense but returned no corresponding income. The small breeder on the contrary has a few—perhaps a dozen—race and proven brood mares, has no pet theory of breeding but keeps watch on what various stallions in the country have accomplished, notes how they best nick, and from these observations makes a choice for his mares, and makes few costly mistakes.

Of the latter class is L. H. Todhunter, whose farm is situated about a mile distant from Sacramento, across the river, in Yolo County. It is a beautiful tract of land—some five hundred acres—lying along the river and all fertile, garden soil. About one-fourth of it is rented to vegetable growers at a good profit. A dairy herd of about forty cows finds pasture on another portion; while the remainder is used for the production of hay and the support of a select circle of brood mares. A sketch of these with their present foals is the purpose of these notes.

Mr. Todhunter is an able horseman, partly so gifted by nature, partly as the result of study and observation. He intuitively knows a good mare as soon as he looks her over; his acquaintance with lines of trotting blood tells him just what she ought to be and do from her breeding. In selecting a stallion to mate with such mare, he has made it a practice to see the horse, size him up, note his performances, and the performances of his get, if any, study his blood lines, and decide on the "combination." How he has hit his mark may be seen from the pedigrees of the mares and their foals. It will be noted that Zombro and Bon Voyage are much in evidence. The Silver Bell (three-year-old trial, 2:27) is a large, finely finished brown mare, by Silver Bow out of Maud W. W. (record 2:22½) by Gen Reno. This is a great mare, the dam of eight foals, five already in the list, and the others ready to enter as soon as called upon. No foal of hers, by whatsoever sire, has failed to show speed as soon as well broken to harness. She has at foot an elegant colt by Bon Voyage. A notable future ought to lie before him.

Loma B is a young mare, but is already the dam of two in the list, and will be heard from still further. She is by Stam B, dam Italia by Sidney—in color a dark bay, rangy, and well formed at every point. At her side is a rugged, strong boned, but smoothly turned black filly by Bon Voyage. Tabulate her pedigree on back and you get "refined gold" throughout.

Florette is by Prince of Norfolk, dam Maude W. W. (dam of The Silver Bell). This mare shows a thoroughbred finish in her makeup, which imparts to her produce. Her foal of 1908 is a bay filly by Zelasco (by Zombro), marked by star and white hind feet and shows up properly.

Chestnut is a grand looking chestnut mare, by Auctioneer, dam Gold Bell Number 2, by Cannon Ball by Prompter. Auctioneer by Fallis, out of Bistella, by Prompter. Chestnut has a fine bay filly at her side by Zombro.

Jeanette B. is by Stam B., out of Chestnut, just mentioned. This is a model mare, and has a bay colt by Zombro at her side. It is a noticeable fact that Zombro gets foals with good limbs, and it is so with this one. And he is muscled up behind like a draft horse.

Zomaletta (record 2:29) is by Zombro, dam Italia by Sidney—the dam also of Loma B., previously described. She is a choice mare, and has for her foal of this season a typical Bon Voyage filly, bay, star, and off hind foot white.

Zombelle (three-year-old trial 2:28) is by Zombro, dam The Silver Bell, she is an attractive mare in every respect—was bred to Bon Voyage last season but missed.

Flash is a neat looking, symmetrical mare by Azmoor, out of Bistella by Prompter.

It is to be said of all these mares that they are large and substantial, yet blood-like, with extra good legs and feet.

With the exception of Flash, not bred, Zombelle, bred to Almaden, and Zomaletta, sister to Gerald G., they have all been bred this season to Gerald G.—a horse bred by Mr. Todhunter himself, and by Zombro out of Italia by Sidney. He is very fast, but injured a tendon as a three-year-old and on this account has not yet been raced. He will probably be worked this fall, and if he trains sound will be a race horse. It seems clear, too, that he will prove himself as a sire, for beside speed, he has breeding, size, beauty, action, and disposition.

A young mare on pasture here is worthy of mention. She is owned by a lady in Sacramento, and is by Owyhee, out of Inex (great brood mare) by Sweepstakes. She has a neatly turned bay filly at foot by that sire of Grand Circuit speed, Lynwood W. This filly looks to be "all right," and the men on the place say "she can move off some, too."

Other stock at Mr. Todhunter's, notably yearlings and two-year-olds, will furnish material for some future "notes."

V.

Over eighty mares have already been booked to Bingen 2:06¼.

LELAND ONWARD 2:04½.

Among the pacers entered up north his year in the 2:05 class is the eastern horse Leland Onward 2:04½, who will meet Sir John S. 2:04¼, Mona Wilkes 2:06½ Delilah 2:08 and others.

During the racing season of 1907 Leland Onward 2:04½ proved himself one of the most consistent pacing stallions that has ever raced down the Grand Circuit. In every race in which he started he was pitted against an extremely fast and classy lot of horses, but was always found trying hard, fighting it out to the end, and winning his share, and more, of the money, says the Horse Review.

Leland made his initial appearance on the turf in 1905, winning several races and taking a record of 2:17¼. In 1906 he started nine times, winning five races, three seconds and one third money, lowering his record to 2:13. His best performance was at Lexington, Ky., where he was second in 2:08½. At the same place he worked a mile in 2:06¼ and was purchased by that astute reinsman Tommy Murphy, for one of his patrons, that well known horseman, Mr. A. H. Gaffney, of Nansen, Pa.

From the outset his campaign of 1907 was strenuously itself. In his very first race, at Libertyville, Ill., starting in the 2:13 pace, worth \$5,000, he was required to meet Dan S. 2:05½, of the Geers stable, and Hidalgo 2:04¼, both of which had the advantage of southern training (Leland was in high flesh and short of work)—three others also started. The race went the limit, five heats, Dan S. winning the first two heats and Leland the third and fourth, in 2:09¼, 2:20½. Dan S. beat him back in the fifth in 2:14½, but the race being a grueling one, the gelding was practically put out of business by it, while the rugged stallion was improved.

In the Chamber of Commerce, at Detroit, he won third money only, but finished 2-2-4 in 2:07½, 2:06¼, 2:06¼, Reproachless being the winner. In the Thistle Doune stake, at Cleveland, Reproachless and Hidalgo, of the field of ten, alone beat him, but he finished 7-3-3 in 2:04½, 2:04¼, 2:06, being very close in the last two heats. In the \$10,000 Dominion of Canada stake, at Buffalo, he was out of form, having a fever, but won a piece of the money at that, finishing third in the final heat, which was paced in 2:06¼.

At Poughkeepsie, a week later, he won the \$1,500 Flower stake from a field of seven, time 2:07, 2:06¼. While unplaced in the Norfolk stake, at Readville, which was a three-heat affair, with two horses winning heats, he finished 4-4-4 in 2:04, 2:03¼, 2:06, pacing an excellent race. Reaching Providence he started in the 2:10 stake valued at \$1,000. Thornway won the initial heat and Leland the next two and the race in 2:07, 2:07½. At Syracuse, in the \$4,000 2:10 stake, he was defeated by Jennie W. 2:04½, but won the first heat in 2:05½ and was second in the final in 2:06½. His next start was in the \$4,000 stake for 2:14 pacers at Columbus, in which he took the first heat in 2:04½, lost the second to Hidalgo, and won the third heat and race in 2:06¼. At the same place, the next week, he met the great Hedgewood Boy 2:04¼ and seven others, in the 2:07 pace, beating them handily in straight heats, time 2:08¼, 2:05¼, 2:05½. In the Tennessee stake, at Lexington, in one of the hardest fought races of the year, R. F. D. 2:05¼ took the first two heats in 2:06¼, 2:07, Leland the next two in 2:05½, 2:07, and Hedgewood Boy, after winning the fifth by a short head, managed to land the subsequent heats with Leland always a fighting second. In his next start at Lexington he won fourth money in the Wilson stake, which went to William O., after a sensational race of seven heats, in two of which he finished 2-3 in 2:04¼, 2:04¼.

He closed the season at Baltimore, Md., where he won the free-for-all pace over the half-mile track in 2:11¼, 2:10, 2:09¼. Leland Onward stands third in the list of Grand Circuit pacing money-winners of 1907, having \$7,320 to his credit. Including his other winnings it brings his total up to \$8,820.

Leland Onward is a bay horse, eight years of age, sired by that good Illinois sire Game Onward 8105, dam by Leland Stanford 9749, son of Electioneer 125, and Lady Thorn, Jr. (dam of Santa Claus 2:17½, etc.), by Williams' Mambrino. He is a horse of tremendous substance and muscular development and, despite his hard campaign, carried a lot of flesh at the end of it. Tommy Murphy, who handled him so well, is recognized as a top-notch trainer and one of the leaders of the younger division of drivers.

Oakland, Cal., Aug. 24.
I had a horse with a very bad thoroughpin. I got a bottle of "Save-the-Horse" from Garret & Taggart, of Oakland; used the same according to directions, and when it was all used up the thoroughpin was still there. I thought of all the doctors told me that it could not be cured, and let the horse go. After this I saw the horse and his leg was improved so much that I got him back and bought another bottle of "Save-the-Horse" and two-thirds of that bottle cured him sound as ever. Since then I was working a colt for speed and it hit one knee and ruptured a blood vessel. Again the doctor said that was incurable, but I tried the balance of the bottle of "Save-the-Horse" and it has improved so much I believe it will cure that case also.

Please send me another bottle.
Both cases were given up as incurable by three or four of our best Veterinarians. The thoroughpin was treated by three expert veterinary surgeons without any result except terrible torture to the horse; the leg was so badly burned by such treatment that I was compelled to apply lard and sweet oil to stop the burn, and to this day the horse is badly scarred.
HARRY D. BROWN,
266 Second St., Oakland, Cal.

A brother to Joe Patchen 2:10¼, who goes on a trot is in training out in Oklahoma.

LOS ANGELES DRIVING CLUB.

The matinee held by the Los Angeles Driving Club last Saturday was a success in every way. The summaries follow:

Pacing, 2:30 Class:
Maxine (Lowe) 1 1
Grey Bess (Kent) 3 2
Bud B. (Bricker) 2 3
Rex (Moore) 4 4
Time—2:31, 2:31.

Trotting, 2:40 Class:
Drummer Boy (Glasscock) 1 1
Crisis (Pounder) 2 2
Bonnie Crocket (Pierce) 4 3
Impetuoso (Delorey) 3 4
Signet (Williams) 5 5
Time—2:36, 2:29.

Free-for-all, Trot:
Romeo (Garland) 1 1
Hazel Kinney (Reynolds) 2 2
Goldennut (Williams) 3 3
Time—2:16, 2:14.

Pacing, 2:15 Class:
Joe McGregor, b. h. (Williams) 1 1
Henry N., gr. g. (Delorey) 2 2
Time—2:17, 2:16.

Pacing, 2:20 Class:
Buck, b. g. (W. A. Clark, Jr.) 1 1
Isabella, s. m. (P. B. Lowe) 2 2
Time—2:18, 2:18.

Trotting, 2:20 Class:
Alesandra, b. h. (Miller) 1 1
Escoboda, b. h. (Williams) 2 2
Sadie McKinney, br. m. (Garland) 3 3
Time—2:19, 2:17.

AN AUSTRALIAN OPINION OF ZOLOCK PATCHEN

Our readers will remember that Mr. S. B. Wright, of Santa Rosa, Cal., the breeder of Sonoma Girl 2:05¼, Charley Belden 2:08¼ and other fast trotters, sold a few months since a yearling colt by Zolock 2:05¼, out of Maud Patchen 2:26, to Mr. F. W. Krempin, of Newcastle, Australia. The colt was named Zolock Patchen and arrived at his new home after the long voyage in good order. A Newcastle paper sent its representative to look the youngster over on his arrival and he described him as follows:

"He is well clad with power all over, and the good set of legs with which he is endowed should enable him to play his part well. A good service head sets him off nicely, and a well-sprung middle-piece gives to him an appearance that warrants the prediction of those who saw him in the yard that he will prove himself a worthy son of a worthy sire. His splendidly ribbed-up barrel is one point especially that stands out in his favor. He is a nicely set-up youngster, stands well, and is equipped with power in every way commensurate with his size. The manner in which he is let down could hardly be improved, and, judging from the manner in which he allowed Mr. Krempin to pull him about, he is endowed with an extremely good temper."

DAN PATCH'S OWNER FOR GOVERNOR.

At a mass meeting of Minneapolis Republicans, recently, the following resolutions were adopted:

Whereas, Marion W. Savage, who has been a resident of the city of Minneapolis for twenty-one years and of the eighth ward for twelve years, has been a consistent Republican, who has shown rare tact and ability in business affairs, and possesses all the qualifications necessary to make him a successful candidate.

Therefore, be it resolved, That we, his neighbors and residents of the eighth ward, do hereby most heartily and cheerfully endorse him as the most available candidate for governor of this state at the coming election—a man whose integrity is unquestioned and whose executive powers are of the highest order, while his social and business standing are unsurpassed throughout the entire state.

Resolver further, That the Republicans of the eighth ward in mass meeting assembled do hereby request the chairman to appoint a committee to consist of two members from each precinct (himself to be a member and ex-officio chairman) to wait upon Mr. Savage and inform him of our action and present to him a copy of these resolutions and request, in behalf of the Republicans of the eighth ward, that he become a candidate for governor of the state of Minnesota.

We suggest to Mr. Savage that, should he be honored with the nomination, he make his campaign tour in a buggy drawn by the champion harness horse of the world. Every man in the state would come out to see Dan Patch and then his owner could get a chance to launch the arguments as to why he should be elected governor.

The action of Amos Rathbun, the Syracuse trainer, against the New York Morning Telegraph to recover \$10,000 for an alleged libel, was put over the term in Supreme Court at Syracuse last week. The defendant moved to have the case go over until fall on the ground that an important witness is at Lexington and can not get away, and the motion was granted. Rathbun alleged in his complaint that the Telegraph's correspondent at Columbus accused him of pulling Ward M., in the Grand Circuit races there last fall.

ENTRIES TO THE \$50,000 HANDICAP.

The American Trotting Derby, a Handicap Dash Race, open to all trotters. \$50,000 divided: \$30,000 to first, \$10,000 to second, \$5,000 to third, \$2,500 to fourth, \$1,500 to fifth, \$1,000 to sixth.

Sweet Marie 2:02, b m, by McKinney—Lady Rivers, by Carr's Mambrino; Rhythmic Bel 2:15½, blk h, by Rhythmic—Cornelia Belle 2:10, by Onward; W. J. Andrews, Buffalo, N. Y.
Tiverton 2:04½, b g, by Galileo Rex—Folly, by Arragon; A. B. Gwathmey, New York, N. Y.

Owing to the large demand, a new edition of SPLAN'S BOOK, John Splan's book, "LIFE WITH THE TROTTER," has been published. There has never been a book written by a horse-trainer that ever made such a hit as SPLAN'S. It is replete with interest and valuable advice regarding training and racing of the harness horse; anecdotes and experiences in the life of one of the most noted American trainers.

Splan has a rare faculty of telling his experiences in a gossipy and chatty way, putting himself at once in sympathy with the reader, and in this book he is found at his very best. The book contains 450 pages, 6x9, and is handsomely bound in cloth. See advertisement.

NOTES AND NEWS

Several associations close entries next Monday. Look over the advertisements.

The 2:05 pace at Walla Walla received nine entries, but the list of names has not been received as yet.

Don't fail to enter your pacer in the \$1,500 handicap at the Chico meeting. Entries will close Monday next.

Gov. Hughes has won his point and the bill prohibiting betting on races has passed both houses of the New York Legislature.

On Sunday, June 14th, the Sacramento and Chico Driving Clubs will visit Stockton where a racing matinee will be given during the afternoon.

The opening meeting to be held at Santa Rosa by the Breeders' Association has caused many trainers to arrange for immediate transfer of their stables to the city of roses.

The Central California Circuit offers a fine program and entries will close Monday next, June 15th. Look over the list. The same purses are given by each of the four associations.

The 2:05 pace at Salem has four entries, viz., Sir John S. 2:04½, Leland Onward 2:04½, Zolock 2:05½ and Mona Wilkes 2:06½. The Fair Grounds track will be pretty hot when that race is finished.

Crown Prince 2:22¾, sorrel gelding by Dexter Prince out of Miss Valensin by Valensin 2:23, was sold at the down East sale at Boston last month for \$400. The gelding is now eleven years old.

Ted Hayes will campaign the eastern mare Moy 2:07¾ on the Pacific Coast this year. This daughter of Prodigal should win her share of the money in the 2:08 class pacing events this year where she has been entered.

Seven hackneys and seven standard bred trotters were shown to gigs in one class at the Philadelphia horse show last month and the blue ribbon was won by Guy Fortune 2:10¼, a standard bred trotter. He is by Guardsman 2:23½.

Note the program in our advertising columns of the Butchers' Day races to be held at Emeryville track on Wednesday, June 24th. Entries will close on June 20th and there are enough races to give every trotter and pacer a chance.

Manager Benjamin will have at least ten entries for his two-year-old trot, for which he hung up a purse of \$600. This race will give a line on some of the colts that will start in the two-year-old Breeders' Futurity the following week at Chico.

Jack Groom has removed from Alameda race track to Pleasanton with his string of eleven trotters and pacers. One of the most promising of the bunch is a four-year-old by Searchlight 2:03¾, out of a mare by Chas. Derby, that can pace like a race winner.

The Woodland Driving Club has both amateurs and professionals in membership, but the latter will not be permitted to drive in club races except in events that are specially made with that understanding. Saturday next is the date set for the first matinee of the new club.

Babe McKinney, one of the mares purchased by Andrew Robinson last winter for Messrs. Tye of the Allendale Stock Farm, Melbourne, Australia, foaled a fine bay filly by Bon Voyage last month. This is one of the best bred fillies in the antipodes and represents the Electioneer-Wilkes cross.

Thirty-one entries for the \$5,000 purse for 2:14 class trotters received by the Oregon State Fair Association shows the drawing power of money. It is a great field and should result in a great race. With a good day and track the heat winners will be in the 2:10 list when the race is over.

While the entries received for the Oakland races which closed on Tuesday of this week were not as numerous as expected, still nearly every race has filled and Manager Benjamin will have one of the best meetings on the circuit. The list will not be ready for publication earlier than Sunday.

Ben Walker, who drove Sherlock Holmes 2:06 to victory at Salem last year, and gave Jonesa Basler 2:05¾ his record at Woodland, will again be seen on the California circuit this year, having come up from Los Angeles this week with several horses and is now located at Pleasanton. Ben has engaged to drive a number of horses in the races this year that he is not training and his services will be in demand. He has not entirely recovered from the wrench he got in a railroad accident two years ago, but is able to train and drive, although his back gives him considerable trouble at times.

There has been quite a scramble going on among the road drivers and trainers to secure fast horses for the free-for-all events that are to be held Butchers' Day at the Oakland track. We hear of two or three 2:10 pacers that are likely starters and the race in which they start will be worth going to see.

The boys are all trying to figure out what pacer in the 2:20 class will make Charley D. stretch his neck to win this year. Among those that are expected to give him a pretty hot chase are Pilot, Alton, Silver Dick and a few more that are showing a lot of speed. Ben Walker has the last named in his string.

Arrangements are being made for a harness meeting on the San Bernardino track to take place July 3rd and 4th. Purses aggregating \$2,200 will be given and the program will be announced soon. Mr. Blanchard Miller of Rialto, is president of the organization and Robert T. Curtis of Redlands, is secretary-treasurer.

Iver Cornett of Salinas, recently purchased the mare Dictatta by Dictatus 2:17, from the Estate of M. J. Sweltzer, and now she has presented him with a fine colt by Star Pointer 1:59¼, this is a counterpart of the old champion in form and color. He does nothing but pace and cannot even walk at the diagonal gait.

The fastest heat in the \$2,000 race for 2:24 class trotters at the Breeders' meeting last year was 2:12½ made by the Zombro mare Era in the third heat. This year this race is for horses of the 2:20 class and will be one of the best races of the Chico meeting in all probability as there are a number of the entries that have worked miles around 2:15 already.

Corning Girl, a yearling filly owned by Herbert Samson of Red Bluff, paced a half mile last week, driven by F. Frary, in 1:17½, the last quarter in 37½ seconds, a 2:30 gait. Mr. Frary thinks she is one of the greatest yearlings in the country, as she has had but one month's training. He thinks she should be able to reduce Belle Acton's yearling record of 2:20½ by fall.

The fifteenth annual celebration of the San Francisco Butchers' Board of Trade will be held at Oakland race track on Wednesday, June 24th. A good program of harness racing is being advertised, and there is bound to be the largest crowd of the year at the Oakland track that day. The full program of trotting and pacing races is advertised in this issue of the Breeder and Sportsman.

Moy by Prodigal, the pacing mare that Ted Hayes will campaign on the coast this year won her record in the 2:10 pace at Lexington last year when she took the first heat in 2:07¾, and was a bang-up second to Lady Maud C. the second heat in 2:04¾. She is said to be doing nicely for Hayes and is expected to get her share of the money in the fast classes.

The Newman Fair Grounds Association advertises a good program for its meeting to be held on the 4th of July. Four races are on the card. A free-for-all pace or trot, half mile heats, best three in five, is for a purse of \$325, of which \$200 goes to first and \$100 to second. A 2:30 class pace or trot is for \$125 with entrance money added, purse to be divided 60, 25 and 15 per cent. The advertisement will be found in this issue.

The California bred horses that have been named in the \$50,000 trotting handicap are Sweet Marie 2:02, George G. 2:05¼, Sonoma Girl 2:05¼, Mack Mack 2:08, Aristo 2:08¾, Sterling McKinney 2:09¾, Del Coronado 2:09¾, Zomalta Queen, Admiral Togo 2:29¾, Ruth Dillon 2:15¼, Lady Seymour, The Angelus and San Francisco—thirteen in all. As there are 127 entries all told, the chances of a California horse to win the big prize are as 1 to 9.

An excursion train will leave Sacramento for Stockton to-morrow (Sunday) morning, carrying members of the Sacramento Driving Club and their friends who will attend the matinee racing at the Stockton track in the afternoon. The races will be between horses owned by members of the Stockton, Sacramento and Chico clubs. An express car carrying sixteen horses will be attached to the train. The excursionists are expected to number at least 150.

Naturalists assert that only four species of wild horses exist at present—two in Africa and two in Asia. The former are the zebra and African wild ass and the Prjevalski horse. The latter takes its name from a noted Russian traveler, who observed it a dozen years ago in the bleak deserts of central Asia. It is exceedingly rare. A few specimens have been captured, however, and a pair of them now exist in the New York zoo.

W. W. Mendenhall recently sold to Ezekiel Smith of Missouri, the bay mare four years old, Donna Bly by Zombro 2:11, dam Nellie Bly by Woolsey, and the four-year-old mare Brownlocks by Zombro, dam Mon-bay by Monterey 2:09¾. Also the bay yearling colt by Bon Voyage 2:12¾, dam Rosie Woodburn 2:16 by Easter W. These were shipped to Missouri with several other horses which Mr. Smith recently purchased here, mention of which has already been made in these columns.

At a regular meeting of the San Luis Driving Association held last week, the club decided to hold its first matinee on July 3rd next. The races will be held on the club's track, recently built, one mile from town. The track is a fast one and some good races will certainly be pulled off. The fastest horses of Santa Barbara and San Luis Obispo counties will be matched; handsome prizes are to be awarded, the winners. Some thirty horses are now in training. This will be the first race meet in that town for 12 years.

One fact not generally known that stands out prominently in favor of Los Angeles as an early training ground is that the average time made at the matinees so far this season is faster than that made at any other driving club in the country. Secretary Stewart has lately been in correspondence with many owners with a view to bringing some of the best eastern horses to Los Angeles in the fall, and has met with so much encouragement that he predicts Los Angeles will be the great winter center for the trotters and pacers next season.

The Tulare County Agricultural Association is about to inaugurate a series of annual live stock auction sales to be known as Blue Ribbon sales. The plan is to list first class stock of all kinds to be sold at the annual fair held each year at Tulare. This fair is on the Central California circuit and is attended by thousands of people. Those wishing to dispose of live stock at this sale should write W. F. Ingwerson, Tulare, Cal., for entry blanks and full particulars. A catalogue will be issued of all stock listed and will be widely distributed, and the sale well advertised. Read the advertisement in this issue.

H. S. Hogaboom of Woodland has sold to John B. Rupley of Placerville, a three-year-old stallion sired by Nushagak (sire of Aristo 2:08¾, etc.) dam a full sister to Chas Derby 2:20, sire of six in the 2:10 list. The colt is of good size, is handsome and will make a fast trotter. His breeding is hard to beat and he should improve the horse stock of Eldorado county if given an opportunity. Breeders can make no mistake in sending their mares to a young horse bred as this fellow is, as he comes from two of the most noted families that have descended from Hambletonian 10, viz., Wilkes and Strathmore.

It is the big purse that draws the big list of entries. The California associations offered from \$800 to \$1,000 for the 2:08 pacing class, and each received ten entries. The Oregon State Fair hung up \$5,000 for the 2:08 pace and has been rewarded for its liberality with twenty-three entries. As sixteen paid-up entries will make this purse cost the association nothing, and as there are eight horses that can win money, there being a consolation race provided, the chances are that the entrance money in this event will fully equal the amount of the purse. On the other hand, none of the California associations can possibly come out less than \$200 behind on this race.

From the following taken from the Salinas Index of June 3rd, it looks as if work was started toward holding a fair and race meeting at Salinas. "Yesterday afternoon Cheri Hebert, J. J. Kelly and Charles Whitehead, representing the District Agricultural Society, went before the Supervisors to ask for an appropriation for premiums to be given at an annual fair and race meeting that it is proposed to hold some time in July or August. The Supervisors took no official action, as the funds available this fiscal year for such a purpose are exhausted, but informally they gave these agriculturists and horse breeders encouragement that they would be helped when the time comes."

The wonderfully fast trotter Admiral Dewey 2:04¾ died suddenly from heart failure at the home of his owner Dr. J. C. McCoy Kirkwood, Delaware, May 28th. He was considered one of the most valuable stallions in America, both on account of his breeding and his great speed. He was by Bingen 2:06¾ out of the ex-queen Nancy Hanks 2:07, and but for a bad leg would have been a good race horse as he was game as well as fast. He started in but two races during his life time, both when he was a three-year-old, and won each, taking a record of 2:14¼ at Readville. His other starts were against the watch, and at Lexington in 1905, when he was seven years old he trotted a mile in 2:04¾.

Mr. T. J. Crowley of this city, one of the directors of the P. C. T. H. B. A., made a short business trip to Fresno county last week, and while there could not resist the chance to visit the track at Agricultural Park to see the horses at work. He says that Nogi, the three-year-old stake winner of last year, is trotting like a world beater and looks fit as a fiddle. A yearling brother to Athasham, also owned by Mr. Warlow, showed so well at the trot the other day when Mr. C. A. Canfield of Los Angeles was at the track that he asked Mr. Warlow for a price on him. \$1,000 was the figure set and Mr. Canfield had him shipped to his address at Los Angeles. A mare called Madera Girl is one of the best prospects at the track, showing great speed with but little work. Mr. Crowley says that J. W. Zibbell has a fine string this year and that the Fresno horses should make a good showing at the races.

The Alameda training track, which has afforded Oakland and Alameda horse owners an opportunity to train their trotters and pacers near home, is a thing of the past. The track was laid out years ago on made land owned by the Southern Pacific Company lying alongside the tidal canal, Alameda. This land was raised above tide water by pumping onto it the silt from the canal when the latter was dredged by the Government. Dredging is again being resorted to for the purpose of deepening the channel and the mud is being piped to the track and will soon cover it to a depth of a foot or more. In all probability another track will never be laid out, as the land will be used for factory purposes. The track has been kept in order for several years past by the Alameda Driving Club, and horse owners will miss it greatly.

Mr. H. Busing, who has been training his horses and standing his stallions at the Alameda race track this spring, must find a new location, as the track is being covered with silt from the dredger in the estuary. Mr. Busing will take his horses to Pleasanton, but desires to sell three of his Bonny McKinney yearlings before he leaves. There are two fillies and a colt, all black and out of choice dams. They can be seen for the next few weeks at Alameda track. They are all nicely broke to harness and are nice individuals. Bonny McKinney is being moved up once in a while and shows that he has great speed at the trot, and as he is a big stylish horse he attracts much attention. He has made a very successful season at Alameda this year, getting a large proportion of finely bred mares. See Mr. Busing's advertisement in regard to the sale of the three colts.

The sixth annual sale of the Suisun Stock Farm standard bred yearlings will be held at Suisun on Thursday, June 18th. There are just a dozen yearlings catalogued for this sale, all out of choice mares and anyone desiring a well bred prospect should be at Suisun next Thursday when the sale is held. These yearlings are all by Demonio 2:11½ own brother to Diablo 2:09¾. Demonio is the sire of Mona Wilkes 2:06½ and other fast ones and is destined to be one of the leading speed sires of the coast. The yearlings are out of such mares as Rosebud by Fallis, Mamie Airlie by Prince Airlie, Elorita by Alban, Nellie T. by Dawn, Eva by La Grande, Minerva by Guy Wilkes, Sistir by Nutwood Wilkes, Hanoro by Oro Wilkes, Olita by Bradtmoor, Portero Girl by Prince Airlie, etc. There will also be sold a two-year-old and a three-year-old. Remember this sale takes place at Suisun next Thursday.

Mr. Grove of Lawrence Stock Farm, who purchased the McKinney mare China Maid 2:05¾, pacing, and trained her some at the trot, has concluded to let her pace again, as she returned naturally to that gait when a high rate of speed was asked of her. It is thought she can beat her record with proper training. It is unfortunate that four or five good sized purses of at least \$1,500 each were not offered for the 2:05 pacers by the California associations early in the year, as there could have been a great field of side-wheelers brought out to race over our tracks this summer had there been an opportunity for them to race for decent purses. Among the entries that might have been obtained for such a race are Sir John S. 2:04½, Inferlotta 2:04¾, Leland Onward 2:04½, Tommy Grattan, 2:12½, China Maid 2:05¾, Mona Wilkes 2:06½, Sherlock Holmes 2:06, and Bonnie Steinway 2:06½, besides several others.

The Marysville race course will soon regain its prominence among the tracks of California. Since it has become the property of the City of Marysville it has been ridden of its ramshackle appearance through the persistent work of the new City Council. The old stables have been razed, and the lumber used in repairing the fence. On the west side next the main entrance a new fence has been built. Painters are now at work on the buildings and fences and a force of men is arranging new facilities for the insurance of plenty of water in the most convenient way at all times. To do this a new tank and tower is being erected close to the track, midway between the stables and the grand stand. The rickety fences that lined the course to the north and south of the judge's stand and grand stand have been dispensed with. The grove of trees set out two months ago in the south-eastern corner of the grounds is developing remarkably well. This will be a park for the accommodation of women and children looking for an outing close to the city. The authorities will conclude the work of remodeling the course by the end of the present month and will then be in a position to invite the owners and trainers of fast stock to locate at Marysville, where the climate is even and the track can be used nearly every day in the year. A small fee will be asked for the use of the stalls and track.

Trampfast (2) 2:12½ is in training for his three-year-old engagements and he will doubtless start in several of the important stakes this year.

FROM THE ORANGE BELT.

Porterville, June 9th, 1908.

Breeder and Sportsman,—I have just returned from Exeter where I accompanied Dr. O. C. Higgins of this place to see his yearling colt by Stoneway pace an eight of a mile in 18 seconds. The dam is by a son of Iris, second dam by Gen. Logan, third dam by Firetail, thoroughbred. Mr. D. B. Moshier has one the same age by Star Pointer 1:59¼ out of Rhoda Fay that is a very promising colt and can already step some, but he is going slowly with him. These colts are to pace as two-year-olds for \$500 and the money is already in the Pioneer Bank, the race to come off over the track giving the largest purse.

A race came off to-day between D. B. Mosier's 23-year-old bay "filly," Tobe, and Ralph Friend's yearling by Billy Dunlop, out of a mare by Robert Basler. The race went to three heats, Tobe getting the first heat and the yearling the next two. The heats were one-quarter mile, and the youngster paced the second and third each in 40 seconds flat. She is a whirlwind and wears nothing but harness. The race was for \$20 a side. Both are pacers. The old horse is by Rhoderick Dhu and is used as a sheep camp horse by Mr. Moshier, who owns a big band of finely bred ones.

There are a good many fine horses owned around here and Athamax 2:22½ has been bred to several of them, one a full sister to Miss Logan 2:06¾.

Dr. Higgins has a fine and well selected lot of broodmares and colts and takes great pleasure in driving his friends down to his ranch which the Tule river runs through and where grow all kinds of excellent grasses, and oaks and cottonwoods dot the fields. He expects to show some fine colts by Athamax in the near future.

Mr. George L. Warlow of Fresno, owns a fine young orange grove not far from here.

Mr. Hickman has sent his two by Stoneway to Mr. Moshier of Los Angeles. They are entered at Oakland, Sacramento and Chico.

There will be races here July 4th, mostly for runners.

F. W. PERKINS.

BLUE FRONT LIVERY.

L. F. Clapp, Prop.

Santa Ana, Cal., Dec. 30, 1907.

Tuttle's Elixir. Dear Sirs: I have used Tuttle's Elixir for some time and have found it the best liniment I have ever used. I have cured a bad case of bone spavin, also a hard case of shoulder lameness and skin disease. It's worth \$5 to any one who owns a horse. I wouldn't take \$10 for one of my bottles if I couldn't get any more. Your powders are as good as your liniment. I am yours, L. F. CLAPP.

Pacific Coast Trotting Horse Breeders Association

SUMMER RACE MEETING

Santa Rosa, July 29, 30, 31 and Aug. 1, 1908

Entries close Wednesday, July 1, 1908.

Santa Rosa has one of the fastest and best tracks in the State. It has always been a popular place with the horsemen, and many of the best race meetings ever given in California have been held at Santa Rosa.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock p. m. the day before the first day of the meeting at which the race is to take place.

PROGRAMME---Guaranteed Stakes.

WEDNESDAY, JULY 29th.

1—2:13 Class, Trotting, Grace Bros. Stakes	-	\$ 500
2—2:24 Class, Trotting, Sonoma Stakes	-	1000
3—2:12 Class, Pacing, Petaluma Stakes	-	500

THURSDAY, JULY 30th.

4—2:30 Class, Trotting, Three-Year-Olds, Sidney Dillon Stakes	\$400
5—2:15 Class, Pacing, Sebastopol Stakes	- - 500
6—Free For All Pacing Stakes	- - 750

Horses to be named with entry.

FRIDAY, JULY 31st.

7—2:25 Class, Pacing, Three-Year-Olds, Chamber of Commerce Stakes	. . . \$400
8—2:09 Class, Trotting, J. H. Gray Stakes	. . . 750
9—2:19 Class, Trotting, F. S. Turner Stakes	. . . 500

SATURDAY, AUGUST 1st.

10—2:16 Class, Trotting, Occidental Hotel Stakes	. . . \$ 500
11—2:20 Class, Pacing, Santa Rosa Stakes	. . . 1000
12—2:08 Class, Pacing, Overton Hotel Stakes	. . . 500

CONDITIONS:

Entries to close Wednesday, July 1st, 1908, when horses are to be named and eligible to the classes in which they are entered.

Entrance fee 5 per cent and 5 per cent of the amount of the stake will be deducted from each money won.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent. The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. on the day preceding the race

and must be worn upon the track in all races. Colors will be registered in the order in which they are received and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Hobbles barred in trotting races, but will be permitted in pacing races. All stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start at its meetings. Membership fee \$25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of National Trotting Association.

Address all communications to the Secretary.

E. P. HEALD, President.

F. W. KELLEY, Secretary.

P. O. Drawer 447, San Francisco, Cal.

Office 368 Pacific Building, Corner Market and Fourth Streets.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The California Wing Club live bird shoot for June drew a full attendance at Ingleside on the 7th inst. Cold wind and heavy mist, at times caused unpleasant weather conditions. The birds supplied were a fairly good lot. In the morning race at a dozen birds straight scores annexed the club added money purse. Turner, Prior, Shields, Ashlin and McRae, all killed straight. Feudner shooting at 33 yards lost his seventh bird, seven other shooters were in the eleven hole.

In the afternoon race at 12 birds, five shooters again scored straight and divided the club purse, they were: W. E. Greene of Salinas, M. O. Feudner, Nauman, Ashlin and Webb. Ashlin by the way lost but one bird, and that dead out, during the day.

After the club shoots were shot, a race at six birds gun held below the elbow was arranged. Dr. Barker grased all of his birds and won first money.

W. Moore of Wilmington, Del., who is connected with the Du Pont Powder Company, shot as a guest of the club in the afternoon match.

Club medal shoot, 12 pigeons, distance handicap, \$50 added, 5 moneys, high guns—

The Fresno Gun Club annual blue rock tourney came off Sunday, June 7th, with a fair attendance from Hanford, Modesto and other nearby points. The trade was represented by Clarence A. Haight, Dick Reed, W. H. Seaver, Fred Willett and D. W. King Jr., who made up the "pro" squad.

E. C. Ickes of Fresno, was amateur high gun with 188 out of 200. Dick Reed was high professional average with 191 out of 200.

It is interesting to note that the percentage of the four highest Fresno amateurs, E. C. Ickes, L. Holdscaw, George Stone and Fred Stone, was but slightly

below that of the professionals, the average for the latter being 180, while the local boys scored 179.

An unusually large crowd witnessed the shooting, which began at 9 o'clock, and ended at about 5 in the afternoon. Ladies were interested in the sport. There were ten events of twenty birds each. The booby prize of \$5 for the lowest average went to Fred Nelson of Fowler, with a score of 145.

Members of the gun club say that, had this been a day to shoot, a much larger number of outsiders would have attended. They did not think it worth while to leave distant homes for a shoot lasting only one day. On the other hand the Fresno shooters are too busy at this time to set aside a week day to the sport.

Next Sunday Hanford will give a similar shoot in which Fresno members will take part. Following is the score condensed:

Weather conditions were excellent and the Fresno shooters entertained the visitors royally.

Dick Reed	19	20	19	20	19	18	19	20	19	20	19	20	191
E. C. Ickes	17	19	19	18	19	20	19	20	19	18	18	18	188
Fred Willett	19	18	18	20	18	18	19	18	19	18	18	18	185
W. A. Seaver	19	18	18	18	18	16	19	20	19	18	18	18	183

The scores at the Colton Gun Club shoot on Memorial Day were: H. B. Smith 18, Howe 17, W. Mathews 11, Palmer 12, Bramhall 9, Herrick 13, Dotts 14, R. Mathews 8, Gallehue 14, in a 20 target race.

R. R. Cadwell and L. S. Chittenden are high guns, so far this season, at the Hanford Gun Club shoots. In two club races each man lost but one bird out of 50.

The Nampa Rod and Gun Club of Nampa, Ida., cut quite a figure at the recent Boise and Weiser blue rock tournaments. The Idaho State Association shoot took place at Boise, May 12th, 13th and 14th. The Nampa delegation, Messrs. Mankey, Joyner and Garber captured several of the feature events. Mr. Garber won the Idaho State Association trophy, consisting of a solid silver loving cup, valued at \$50.

The individual championship trophy was won by Mr. Mankey. It is a solid gold medal of beautiful design, valued at about \$50. It was a gift to the association by P. J. Hollahan, the crack shot who represents the Du Pont Powder Company.

Dr. Joyner tied for the Statesman trophy, a Colts' automatic revolver, and lost on the shoot-off by one bird.

The team trophy, another large handsome silver cup was also brought to Nampa by Mankey, Garber and Jennings.

May 16th a team from the Nampa club consisting of Mankey, Garber, Jennings, Graybill and Joyner went to Weiser and not only maintained the good reputation made at Boise but added thereto. They brought back the five man team prize, another fine silver cup, and Mr. Garber and Mr. Jennings each won prizes in the merchandise shoot.

A tournament is talked of for Hanford during the first week in October.

The Crescent Bay Gun Club is trying to select a date for the proposed trap-shooting tournament to be held in the athletic park at Venice in July. The desire is to choose dates that will not conflict with the Los Angeles, Redlands, Riverside or San Diego tournaments. It is planned to hold a three-day tournament, at which there will be offerings calculated to attract the crack shots of the State.

The Globe Gun Club held a shoot on the ball grounds at Globe, Ariz., on May 30th. J. G. Naquin making the high score in two out of three events, Murdock and Trakes tying for first honors in the

other event. It was a day of poor averages for the shooters, but as shoots will be held more frequently from now on the club members hope to improve their scores.

In the first event, Naquin got 18 birds out of a possible 25; Murdock 15, M. L. Naquin 15, McKinnon 14, McAlpine 13, Gibson 13, Hansen 11, Greer 8, Clayton 7, Fisk 1.

In one of the ten bird events Naquin scored 8, McAlpine 6, Hansen 6, and Trakes 2. In the other ten-bird event Murdock and Trakes each scored 6, Prochaska 3, Naquin 3, McAlpine 3 and Hansen 2.

At Williams, Ariz., on Memorial Day, at a blue rock shoot in the shooting park, members of the Williams Gun Club scored in a 20 target race as follows: Hudson 17, D. Raudebaugh 16, Melick 15, H. R. Ferguson 11, C. W. Ortt 10, Smith 10, R. C. Roy 8.

The Southern Washington Gun Club held a tournament at South Tacoma, Sunday, May 31st, there were ten 15 target races and a 25 target shoot for the championship of Southwestern Washington.

Captain George E. Bartlett and Mr. F. W. Cole representing the Peters Cartridge Company, are now in Southern California. Captain Bartlett has been doing a great deal of exhibition shooting and always has a large and interested audience to witness his remarkably skillful rifle shooting.

Added interest was given the blue rock shoot at the traps at Box Springs, Riverside, last Sunday morning by the presence of Captain George E. Bartlett. After an exhibition of rifle shooting, Captain Bartlett took a hand in the 100 bird shoot at the traps in which the following local shot gun experts took part: Dr. M. E. Taber, B. E. Taber, James Lockwood, Mr. Stephenson, Mr. Wilson, J. N. Thomas, E. L. Pequegnat, Owen Council, Claude Hancock, D. F. Velzy, W. C. Doyle, Frank A. Pequegnat, Floyd Jenkins, Purl Miller and C. A. Wheeler.

The San Luis Roat and Gun Club shoot May 24th embraced a 10, 20 and a 10 target shoot, the scores were: A. B. Van Scoy 9, 14, 17; C. T. Greenfield 8, 18, 13; E. Taylor 10, 19, 18, 8; H. A. Martin 9, 17, 20, 9; J. E. Van Schaick 6, 10, 14, 7; James Guthrie 5, 10, 9; F. W. Keller 9, 13, 13; J. C. Norton 17, 14; Mr. Varney 16; H. A. Martin 17, 18; A. B. Van Scoy 16, 17; J. E. Van Schaick 15, 15; Charles Maino 13; James Guthrie 16, 12.

Prizes for the handicap events were awarded as follows: First prize, James Guthrie. Second prize, J. E. Van Schaick. Third prize, A. B. Van Scoy. Fourth prize, H. A. Martin.

FORESTRY BOARD ISSUES WARNING.

The State Board of Forestry, through State Forester G. B. Lull, has issued its annual warning against the building of any fires which may result in forest fires. The official circular says:

The attention of all persons who inhabit or frequent the forest or bush-covered areas of California, is called to the following provisions of the State Forest Laws relating to forest fires.

Under Statutes, 1907, Chapter 536, it is a misdemeanor, punishable by a fine of not less than \$25 nor more than \$500, or imprisonment not less than fifteen days nor more than six months, or both, to commit any of the following acts:

1. To set fire on the lands of another, except camp fires, which may be built on unenclosed lands if the owner has not forbidden it any way, and provided the builder totally extinguishes the fire before leaving it.

2. To allow fires,

BLACK BASS SEASON.

Since the first of June it has been lawful in this State for the angler to enjoy the sport of black bass fishing. Reports from many sections are very favorable, fish are plentiful and not too modest to fight shy of the angler's lures. The following excerpts from our exchanges will give some hints that may be of interest to black bass fishermen.

The black bass season, which opened on the 1st inst. promises to provide more sport for the followers of Isaac Walton than any previous season on record, says the Sacramento Tribune. The water this year is much lower than usual for this time of the year. The result is that the fish are in a much smaller body of water and are correspondingly more plentiful.

A large number of fishing parties were out Monday to try their hand early in the game. The results in most cases were gratifying. Among others, Fred Brown, Fred Raymer and Jimmie Byrnes, of the Sacramento baseball team tried their luck at Washington Lake and came home with a string of black beauties which made the trio envied by their friends who were unable to go. Nearly every one who went out and went after bass properly had good luck.

Striped bass are also running well and are of good size. It is reported that one angler, more fortunate than the rest of his kin, caught one which weighed 21 pounds and landed him with rod and reel.

Success in bass fishing depends both on the location and the kind of bait used. Both varieties are said to be plentiful in the lakes and sloughs, with quite a number in the river. Shrimps and clams are used for bait for the striped variety, still fishing being used. Black bass are trolled for, different varieties of spoons being used.

In the vicinity of Marysville the sport has been excellent. Besides black and striped bass many shad have been caught in the Feather river.

The Stockton Record started the campaign thusly:

The black bass season was opened this morning before it was light enough to see to use a can opener. M. F. Branch opened it shortly after 3 o'clock, using a corkscrew. He caught an eight-pound carp. W. E. Cook, who with Yolland Johnson and D. W. Russell, were the other branches of the Branch black bass party (ltd.), used a Dowagiac artificial minnow and caught a four and a half pound bass. Mr. Russell caught two smaller black bass, and Mr. Johnson caught a streak of profanity. Mr. Cook's fish is just a half pound too light to get him the \$10 prize. Branch's is offering for the first five-pound black bass of the season. Up until noon Mr. Cook's fish was the largest brought to town.

H. T. Holmes, Southern Pacific ticket agent, and Mr. Orange, caught twelve fine black bass this morning and returned to town in time for breakfast.

Dr. Priestly and party caught eighteen. In fact, it was the finest day's black bass fishing that was ever enjoyed in this county. There are lots of big bass in local waters now, and big fish predominate. Many of the fishermen report poor luck with spoons and spinners, the water being so clear that the fish are able to detect the fraud at once, but live or artificial minnows are reported to bring a strike at almost every cast.

Comment by the Sacramento Union is also pleasing:

The black bass season opened on Monday last, and according to the reports brought back by the anglers who went after this game fish, there is fine sport in store for the nimrods. The catches in most instances far eclipsed the early season catches of previous years, particularly as to size.

Clearer water will greatly improve the black bass fishing, and it is believed that in another month conditions will be just right for the best sport. The catch on striped bass has also been good, many fish being landed in the vicinity of Sutterville.

Fred Raymer, Fred Brown and Jimmy Byrnes, of the Senators, have been testing their skill with the pole and line at Washington Lake, and on Monday returned home with a fine catch of black bass. Prior to the opening of the season these three practiced up in landing catfish.

Nine members of the Madera Rod and Gun Club returned on the first from their preserve and report bass fishing poor as the water in the river is still very high.

Louis Breer, with the Tufts-Lyons Company, Los Angeles, has a private black bass hole staked out somewhere in Ventura County. One day last week Breer, Adolph Schwarz, Major Klokke, Fred Flint, Jr., Fred Johnson, Fred Roe, Carl Klokke and Ed Tufts returned from the place.

Breer got 34 bass, Tufts 29 and the rest good sized messes. The fish ran from one and one-half to three pounds each.

Stockton anglers find good bass fishing in the Calaveras river.

Gustave Vurschang, a Stockton youth, exhibited a five-pound black bass at Branch's (Inc.) on the 2nd inst., and being the first person to catch such a large fish will be entitled to the \$10 worth of high class fishing tackle offered by Branch for the first bass exhibited at his store. The fish was caught in Walkers slough.

Amos Meginnis of Watsonville, caught a five-pound bass measuring twenty-one inches in length, while fishing in Kelly lake. With Vertner Maslin he had splendid success. They used minnows for bait and caught a number of the gamey big fish.

TROUT FISHING EXTRAORDINARY.

There are but few places in the northwest or any other subdivision of this country where two men can catch 1,000 trout in two hours. Yet that has been done at Granite lake, in the western part of Flathead county, Mont. This lake is located about 15 miles from the town of Libby, on the main line of the Great Northern railroad, and is reached from that place by wagon road and trail.

It is situated in the heart of the Cabinet mountains, conceded by all travelers to be the most magnificent of all the subsidiary mountain ranges embraced within the chain of ranges known as the Rocky mountains. This lake is approximately 5,000 feet above sea level and is about 3,000 feet above the town of Libby.

It is one of the most charming bodies of water to be found in any of the mountains in the great northwest. It is distinctly a mountain lake. Surrounded on all sides by towering cliffs and reefs of rock, it has a picturesqueness and grandeur to be found but seldom.

And at present Granite lake offers to those who go in for that sort of thing an opportunity which has seldom, in later years, been offered, and that is that up to this time it has been frequented by but few people. It is located at the head of Granite creek and in a section of the range which was almost impenetrable, and heretofore but few people had the ambition to make the necessary effort to get in there.

However, that has all been changed. Now from the town of Libby one rides more than half way over a good wagon road, while from the end of the wagon road up the canyon, which ends at the lake, there is a splendid trail, over which packhorses can carry good loads and over which the tourist may ride if desired.

For this trail the people are indebted to the forestry bureau. A crew of men under the direction of the supervisor of the Cabinet forest reserve put in a large part of last summer surveying and cutting and grading this trail. The result of this is that now one of the most beautiful spots in all Montana is within easy access for all who care to go.

And in connection with this feature of Granite lake it might be well to add that the forestry folks have inaugurated at this place the policy of leasing small parcels of land around the lake to individuals who care to obtain an outing headquarters in the mountains and the chance to do so at reasonable expense.

At the same time the one who gets the lease is assured of the protection of the government in his holdings and is also protected by the same agency from loss by fire. The forestry people intend keeping the necessary guards to give ample protection to all who take these leases and build cabins there.

Already quite a number of folks have made application for lands around the shore of the lake and before long, probably as soon as the great beauties of the lake become better known as the summer opens, practically all the desirable places will be taken up. However, enough land will be always open to the general public to the end that these leases may not operate to debar the public from camping around the lake regardless of the leasing system.

Lying in the midst of mountains of rock, which have been molded into all sorts of gigantic scenic effects by the great Master Builder, Granite lake affords a most splendid opportunity for a base for a summer's outing. In the lake is an abundance of mountain trout and up and down Granite creek are fishing grounds not excelled in any other place.

Bands of mountain sheep and goat are found throughout the district surrounding the lake and on the inhospitable and apparently impossible cliffs which surround the water and extend into the main range large numbers may be seen at any time. The Montana laws allow but one each of these animals to be taken by any one person in one year and this only during the open season. There is to be found nowhere else such a splendid opportunity to get one's quota of sheep or goat as at Granite lake.

Further down the creek from the lake, where the country is not so wild and broken as immediately surrounding the lake, is found a wonderful hunting ground for deer, both whitetail and blacktail. There are not only a lot of these animals in that section, but the country in which they make their home is an easy one in which to hunt. There are also some elk in that section and quite a number of bands of caribou have been reported from time to time.

It is entirely probable that Granite lake holds the palm for the best fish story. Bill Hillis, known all over the northwest as one of the crack shotgun artists and all-round sports, went in there some years ago when he lived at Libby. He was accompanied by a friend. For the purpose of seeing how long it would take them to catch a thousand trout they made the effort, and in exactly two hours the two of them had taken from their hooks the thousand trout, so the story goes. Of course, they were immediately thrown again into the water, as there was no means of getting them out of that country, if they wanted to.

The lake is literally alive with trout. It is the one place where a fisherman can get all the trout he wants. The water at many of the places where little streams come into the lake from the snows and glaciers surrounding it, is black with trout and they will bite at a fly or any other old thing which may be dropped among them. Beyond any question it is the greatest fishing grounds in the northwest to-day.

This will be the first season opened to the general

outing public so far as Granite lake is concerned, and the chances are good that many will avail themselves of the privilege of getting in there and taking advantage of the country while it is yet new. It is not hard to get in there now, and once there one is in the midst of as new and as wild a country as can possibly be found anywhere.

Libby is 158 miles east of Spokane. At Libby guides and pack outfits may be obtained at any time and everything necessary for the trip may be procured. Libby is also the headquarters for the supervisor of the reserve in which the lake is located, and before going there it would be well to call at the government headquarters and get permits or whatever may be necessary under the rules of the forestry department.

All in all Granite lake offers one of the greatest inducements to be found in any of the many and beautiful summer resorts which are so easily reached from Spokane.

The catching recently of a nineteen pound striped bass near Redondo has aroused the striped bass committee and officers of the Southern California Rod and Reel Club to action. The following letter, signed by President E. L. Hedderly and Recording Secretary Roy F. B. Shaver, has been sent to the United States Fish Commission at Washington and to the State Fish Commission.

"Dear Sirs,—In view of the fact that our requests for striped bass spawn and fry at various times in the past have been refused on the ground that these fish would not thrive in our southern waters and were not adapted to our local conditions, we take pleasure in enclosing you clippings from local papers relating to the capture of a nineteen-pound fish of this species by a local sportsman, the first this year, so far as known.

"It is not a very uncommon occurrence for striped bass to be taken by local anglers. Last year one was entered in the Southern California Rod and Reel Club tournament; the year before, one of seventeen pounds was taken near the same place by Charles H. Liddell. Last year seven were taken at Venice, and about the same number at Playa Del Rey, the weights being from three to seven pounds. Sunday, J. V. Parker caught one of a pound and a half weight, which he returned to the water in accordance with the State law requiring all striped bass under three pounds in weight to be released.

"These fish are, we believe, the outcome of the planting made by the State Fish Commission in Newport Bay some ten years ago, and we feel quite certain that with frequently repeated plantings of this species, another splendid game fish might be added to our Southern California supply. We stand ready to co-operate with the Commission in any way whatever that it may suggest, and renew our request for consideration in this matter. Over three hundred members of this club are interested in this matter."

A Los Angeles paper is in error in saying that a striped bass weighing five and three-fourths pounds is the largest fish of the species ever caught in Southern California waters. Last season, Charles Liddell caught one near Clifton-by-the-Sea, at Redondo, weighing seventeen pounds, an account of which appeared in the Los Angeles Examiner at the time. Several were caught at Playa del Rey that weighed over five pounds each. There does not seem to be any question that striped bass will thrive in Southern California waters.

The hunters' license tags for the coming year—July 1, 1908 to June 30, 1909, are now being supplied to the various county clerks of this State by the Fish Commission. The tags are larger than last year's, being round instead of an oval shape and somewhat larger than a silver dollar. They are of the same light material.

It is possible that Yolo County Supervisors may declare a close season on doves from July 15 to September 15, and on quail to November 1st.

Oregon sportsmen will endeavor to secure a close season on elk for five years.

FISH LINES.

The fishing season did not open very promising at Towle, but now the sport seems to be making amends for lost time, many fine catches having been secured recently.

The trout are now rising better in Canyon creek than they have for many seasons past and there are a larger proportion of fish being taken. The local fishermen are unable to account for this condition.

The fishing is also reported excellent on both the north and middle forks of the American river.

Several good catches have also been made in Blue Canyon in the vicinity of the Rawhide mine. The fishing in Bear river has not been anything extra as yet, but will probably improve a little later in the season.

A recent fishing trip to Pescadero Creek in San Mateo County resulted in a catch of 160 trout, fish from 5½ to 9 inches long. The water was low and evidently has been well fished so far this season. In the party were: C. H. Jensen, H. C. Schwinn, H. Duren and P. D. Frazer. There were 16 other rods along the banks of the stream the same day, June 1.

Mr. F. M. Haight of the Palace Hardware Company showed us a fly-rod last week which in days gone by was Honest John Butler's favorite rod. The rod is now owned by President Jack Lemmer, who prizes it highly. Mr. Haight overhauled the rod and put it in first class condition again. Among other things, he "silikalined" each joint, the wrapping being as neat a job in its line as an angler could desire.

Five thousand salmon trout fry will be turned out by the hatchery at Stehekin, Wash., at the head of Lake Chelan, northwest of Spokane, if the plans perfected by W. B. Hobart, recently appointed to take charge, are carried out. He will place traps in several of the mountain streams emptying into the Stehekin river for spawning purposes. Part of the hatch will be placed in the waters of the lake, where fishing is better this season than it has been in years. This hatchery is owned by the state and is the only one in Chelan county, the salmon plant at Chiwaukum being closed three years ago on account of the expense of maintaining it. Since the introduction of sawmills along the stream salmon do not run in abundance in the Wenatchee river. Plans are making to establish a salmon hatchery either near Leavenworth or Cashmere. It will be as large as the Chiwaukum plant, which had a capacity of 6,000,000 fry during the season.

Olive lake, a beautiful sheet of water near Sumpter, has earned the distinction of being one of the greatest trout habitations in Oregon. Thousands of fish are caught there each season by fishermen from all parts of the Northwest, and in the face of this each year shows a larger increase of the finny tribe. So numerous are trout that an ordinary angler will be kept steadily drawing them from the water with the only intermission at the time he spends taking the fish off the hook and baiting it.

The Bolsa Chica Gun Club has made application to the State Board of Fish Commissioners for 1,000 striped bass, the intention being to plant them in one of the salt-water sloughs of the club. If the fish are secured the club will then have both fresh and salt-water bass in their ponds.

Fly fishing at Reno in the Truckee river at the present time is excellent. This is being demonstrated daily by fishermen starting in the Truckee near the Virginia street bridge, engaged in casting their flies into the stream with much success. All day long one day last week a crowd of men and boys hung over the rails of the bridge and watched the anglers enjoying their sport and saw them land many fine shining trout and not a fisherman was seen to leave the stream in disgust.

At Castella last week the fishing was excellent during the good weather. When the wind blew results were nil. John Filmer and Carl Werner of this city enjoyed several days of good fishing, the best fish scaled 2½ pounds. The killing flies were mosquito, dark caddis, blue bottle, gray hackle and cow dun on No. 10 hooks.

A striped bass weighing 32½ pounds was caught one day last week by a Jap who was fishing in the Feather river near Gridley, Butte County. The Japanese employed in the orchards of that section pay scant attention to closed season regulations, and consider everything legal fish that comes to their nets or hooks. It is charged that of late many sturgeons have been caught by the Japanese from Feather river, which is prohibited at all seasons. Black bass and other fish are also captured out of season by these people, and song birds and doves fall victims at all times.

Fresno anglers state that bass fishing on the San Joaquin river is furnishing fine sport. At the Miller & Lux dam at Mendota hundreds of fishermen congregate every Sunday and make fine catches. The sportsmen come from as far as San Francisco and other towns. It is said that the fishing is good anywhere from Herndon westward.

SPORTSMEN ORGANIZING.

Twenty-five or thirty years ago Honey Lake Valley was quite a paradise for the sportsman. Feathered game was plentiful in the valley, and the streams afforded good fishing, says the Sacramento Bee. The gradual extension and increase in the number of private holdings has brought about a change in these respects, although at seasonable times duck hunting still offers fine sport.

It is somewhat difficult with regard to fishing. Although an occasional good catch is made, old residents bewail the days when a catch of fine trout was always to be made. Impassable dams and unscreened irrigating ditches have produced their legitimate—or illegitimate result. Notwithstanding several large plantings of smaller fry from the State hatcheries, and a few feeble efforts by weak-kneed Wardens, good trout fishing has become a sport of the past.

The State license law may be credited with awakening Honey Lake sportsmen to the value of the privileges slowly but certainly slipping away from them; particularly when people from abroad manage to infringe upon their territory without license, and with small risk to themselves.

So, recognizing in this day of special privilege, that without organization and concert of action they were liable to be deprived of their sport altogether, the sportsmen of the valley have formed a comprehensive plan by which they may not only protect the game and fish, but guarantee to themselves a share in the privileges of taking.

The Honey Lake Outing Club has been organized, to which all people of the valley are eligible, with a membership fee of \$5, and the annual dues fixed at the same figure. The membership is already large.

The following officers have been elected: President, J. A. Pardee; vice-president, W. E. Dozier; secretary and treasurer, W. D. Harrison. F. P. Cody, Charles Hallowell, G. E. Winchester, F. H. Shanks and B. F. Gibson were appointed an Executive Committee.

Owing to the wonderful success of Los Angeles duck hunters last winter, preparations have already been made this early in the year for the coming season, which opens October 1st. New ponds are being made and club houses overhauled, and already two new clubs have been organized.

The first one is an off-shoot of the Pasadena Gun Club and has been organized by Joe Welsh, president of the club. It is said he has taken about one-half of the members of the Pasadena club with him and they have bought sixty acres from the Westminster Club, which is located back from Bolsa Beach on the Bixby ranch. The name of the new club is the Caamal.

Even with this much land sliced off, the Westminster still has 160 acres of fine duck preserve and has let a contract for a new clubhouse, which will be large enough for each of the fifteen members to have a separate room.

The second new club to organize has purchased forty acres from the Christopher Gun Club, which is near Huntington Beach. The leading spirits in this new club are Byron L. Oliver, Bob Smith and ex-Mayor Owen McAleer, and as they have choice ground they are assured of good shooting the coming winter.

A game club, composed of Yerrington, Nev., sportsmen, is to be organized at once, and in the future it will not be well for pot hunters to shoot game out of season in that valley. If something is not done soon it will be but a few years before the quail, pheasants and other game will all be killed off. Ranchers in sympathy with the movement will be asked to join the club and it is thought that shooting out of season can be stopped.

The Miller Gun Club of Watsonville has renewed its lease of the Miller ranch near Castroville for use as a hunting preserve for the coming duck season. The grounds have been leased for three years and the club intends to make many improvements on the land before the coming season opens.

At considerable expense the members of the Corona Gun Club stocked Lee lake in Temescal, which they leased sometime ago, with fish and up to the present time have allowed Corona townspeople to enjoy the fascinating sport of angling at that picturesque spot free, but owing to the abuse of the privilege by certain parties who have stayed all night and have caught from fifty to a hundred fish, as well as monopolizing the boats, which were frequently left in a filthy condition, the club have decided to put a stop to this kind of work. The club has employed an experienced keeper and in future no one will be allowed to fish in the lake unless invited and accompanied by a member of the Corona Gun Club.

A number of Los Angeles sportsmen intend to have some real quail shooting the coming season, and to this end have purchased and rented several ranches in San Diego county between Oceanside and Del Mar, and this summer will erect clubhouses so they can enjoy the sport. The location is one of the best in that end of the State for quail, every hunter who went there last winter brought back the limit from a few hours' shooting.

Drink Jackson's Napa Soda.

DU PONT HEADQUARTERS UNDER ONE ROOF.

For two years past the vast volume of coast business transacted by the Du Pont Powder Company was directed from the temporary headquarters in Berkeley across the bay. Even in that location the officers of several departments were scattered—other departments were stationed in this city, etc. Prior to the April disturbance, 1906, the Du Pont system of offices was amalgamated in commodious quarters in San Francisco.

For some time past the management here had been on the qui vive for necessary and desirable quarters in this city where all branches of the business could be concentrated. Such a change was consummated recently and now the Du Pont offices are all segregated on the tenth floor of the old portion of the Chronicle building on the corner of Kearney, Geary and Market streets. This location is one of the most convenient and central in the city. Fifteen rooms (one in the new portion of the structure) in a modern office building, completely fitted with all the facilities necessary for the smooth running of a huge business system, is an acceptable change for not only the company's representatives and a large corps of employees but also for the multitudinous business connections of the leading powder manufacturing company of the United States.

DOINGS IN DOGDOM.

The recently organized Oregon Field Trial Club will start the club's initial trials September 25. The dogs will be put down on Mongolian pheasants, presumably at some favorable place in the Willamette Valley.

The northern trials will, it is reported have a strong California representation.

The Pacific Northwest trials will come off at La Conner Flats, Wash., starting September 30.

The San Mateo Kennel Club announces its annual Admission Day Show, September 9, will be held at the Crossways Polo Grounds of Mr. Francis J. Carolan, Burlingame. Even at this early date indications point to a stronger show than ever and a larger list of special cups and prizes.

Santa Cruz entries closed with about 180 entries, most of which were from San Francisco and vicinity, we are told. The show will run three days June 18th, 19th, and 20th. Under the circumstances not a very strong support of a judge who "is one of the recognized authorities on canines in this country."

Pasadena is billed for a two day show, June 26th and 27th. Venice by-the-Sea will probably show in August.

Arroyo Kennels of Pasadena lost Arroyo Acrobat last week through an attack of gastritis. Acrobat was the winner of a number of ribbons at various shows. Arroyo Flirt, a bitch, was killed in a kennel scrap two weeks ago and a valuable puppy went the automobile route a few days ago. Altogether it can be said that Mr. Ford has had a bit more than a good fancier's share of hard luck.

The Honolulu Kennel Club show will be held July 20th, 21st, 22nd and 23rd. Premium lists were out last week we are informed. The dogs will be under canvas and Spratts will bench.

Los Angeles has come to the front with what is said to be the largest and most complete "dog farm" in the West, if not in the entire country, states The Times, and doubtless it will take its proper place among all such institutions in the land. It contains no less than twenty-three acres of land and is admirably located for the purposes intended.

The place will be known as Dog Haven, the Dog Farm, and it is situated where the Pasadena boulevard crosses the Pacific Electric Railway tracks beyond Eastlake Park and just north of the yellow house known as the Eastside Athletic Club.

G. Fred Herr is president of the company which is conducting the farm and which already has expended about \$5,000 in improvements. Calvert Wilson is secretary, and Dr. Leon W. Young, treasurer.

This will not be a dog hospital in any sense of the word, for no sick animals will be received in any circumstances. It is the intention to board, breed and buy and sell all kinds of dogs and there will be no favorites played or no special breeds favored. The animals will be boarded, trained or put into condition for a show.

The main kennel is sixty-five feet long and has high ceilings and a cement floor. The ventilation is believed to be perfect. There are separate buildings for puppies, brood bitches and stud dogs and a batch room and a kitchen. Each dog will have a separate run and a separate sleeping-room, after the style of a box stall for a horse. E. E. Betts of Chicago has been selected as manager.

The place will doubtless prove a convenience to tourists who bring their dogs with them and have no place to keep them. A number of animals have already been received for boarding, among them being Major Phipps' well known English fox hounds. The Portland show closed Friday and dogs from there are expected down. Several have been sent from San Francisco.

THE FARM

We have a slumbering idea that beef prices will continue steady and strong for the next five or six years. Some of the cattlemen up in the north-west are spaying their heifers this spring which to us looks like the very thing not to do. We have fewer cattle per capita than for twenty years. There are no surplus cattle in the east or south and the supply is quite short here on the plains and throughout the cornbelt where the feeders were unable last fall to get the money to carry on their usual finishing operations. The high prices of corn and hay last fall caused the farmers in the corn belt to market all their stuff until to-day the females are commanding almost as much money as the steers and are hard to buy at any price. The day of cheap corn is gone forever and our range fellows are beginning to see the necessity of putting up their own feed stuff. It is the only way out and is simple enough when we consider the cheapness with which we can grow alfalfa, barley, peas and stock beets to say nothing of the thousands of tons of beet pulp turned out by the sugar factories every fall. All these things indicate a mighty evolution in our livestock industry and the man who does not get into the swim will have to be rated as a hind-end.—Denver Field and Farm.

What man knowing the average method of feeding calves can deny that the common procedure is rather primitive and often cruel. The average man selects two large pails and pours in skim milk until they are as full as they can be carried. He then takes a good sized club and tucking it under his arm, approaches the calf pen. The hungry calves charge for the open buckets, knowing that the first come are the first to be served. Two calves are allowed to drink at the same time from each bucket and with the club he beats the others away. After he thinks a calf has had enough milk it is forced out of the pail by a pull on the ear or a whack on the head and another calf is allowed a turn. The calf having finished its allowed proportion resorts to its favorite pastime of sucking and bunting. Thus are the calves fed, and thus starts the famous chain gang. If there are but two they double up and where there are many they form a continuous chain.

As warm weather comes on be sure that the poultry will be provided with a liberal supply of fresh, clean drinking water.

The most critical period in the chick's life seems to be the first two weeks and if he can be gotten through this period healthy and strong the chances for maturity are good.

Never keep chicks on a board floor.

NEWMAN FAIR GROUNDS ASSOCIATION

PROGRAM for Races, July 4th:

First Race—Free for all, pace or trot, half mile heats, best 3 in 5. Purse \$250 and \$75 entrance money added; three moneys, \$200, \$100 and \$25.

ADVERTISE IN THE

BREEDER AND SPORTSMAN

Ellis' Improved
Hutton Patent
Checking Device

Absolutely
the Greatest
Controller on
Earth for Road
or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.
Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

Turf Goods

Manufacturers

430 MAIN STREET

CINCINNATI
OHIO.

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

Eggs that are misshapen or have a rough shell should never be put in the incubator or given a hen for hatching. Such eggs seldom produce vigorous chicks.

Where pure breeds are crossed their value is destroyed for any purpose except the table, and cross-bred chickens are no better for the table than the parent stock.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of **Caustic Balm** sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

FOR SALE.

Juanita Skinner, dam of Charley Belden, 2:03½, and weanling filly by Guy Dillon: one yearling bay stud by Guy Dillon; one brown filly 2 yrs old by Guy Dillon; Juanita Skinner now in foal to Guy Dillon; Juanita Skinner is the dam of all the above colts. Can be seen at Santa Rosa Stock Farm, Santa Rosa, Cal. References: F. S. Turner, Santa Rosa, Cal. Address H. L. Morrow, 401 Golden Gate ave., S. F.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter; seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address S. H. HOY, Winters, Cal.

BONNY MCKINNEY YEARLINGS FOR SALE.

Three yearlings by Bonny McKinney 41383 are offered for sale. Two are fillies and one a stud colt. All are trotters, black in color, broke to harness, and from choice bred dams. Must be sold as I am compelled to vacate present location by July 15th. For price, breeding of dams, and other particulars, address H. BUSING, Alameda Race Track, Alameda, Cal.

"SAVE-THE-HORSE" SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

Such results as the following explain why this is the only remedy sold under a contract:

ALPHA, SASK., Canada, April 26th, 1908.

Troy Chemical Co., Binghamton, N. Y.: Dear Sirs: I wrote you from Indian Head, Sask., two years ago concerning Save The Horse Spavin Cure for my stallion Game Keeper, No. 39145, A. L. A., by Gamaleon. I tried your Save The Horse and it did all you claim for it and more. This horse was raised by Phillips Bros., Delevan, Wis., and in shipping to the horse sale at Chicago the winter of 1904 got his right hind leg through the car in some way and was badly hurt. A Vet. in Chicago advised his owners to take what they could get for him; that he never would be of any use. He was bought for \$50 at the sale. I bought him the next October for \$75. I tried a great many remedies on the leg, but to no purpose. I purchased Save The Horse and it did the job; to put it short, it made a \$75 horse well worth \$1000, and if I could afford to keep him I would not take \$1000 for him, for I am sure that he is one of the fastest absolutely untrained horses that lives. The first time I go to Indian Head I will mail you a photo of the horse and you will see what kind of a job Save The Horse made of a very large leg. I have used it on different horses without a single failure. Yours truly,

JOHN LYNCH.

A. F. POULSON, General Hardware Agent for Sampson Wind Mills.

CASTLEWOOD, South Dakota, May 11, 1908.

Troy Chemical Co., Binghamton, N. Y.: Gentlemen: I write this to inform you regarding a horse with a bone spavin upon which I have been using your "Save-the-Horse". Possibly you remember that I wrote to you several times. I bought and used it and to-day the horse is as sound as could be wished for, and he is doing well. It is certainly all right and does all it is recommended to do. If there is anyone in doubt refer them to me and I will speak a good word for it. Yours, etc., A. F. POULSON.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness without scar or loss of hair. Horse may work as usual. \$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12 $\frac{1}{4}$, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years to a surrey by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19 $\frac{1}{2}$, and :19, the other in :18 $\frac{1}{4}$, :18, :17 $\frac{1}{2}$, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08 $\frac{1}{2}$, Annie Rooney 2:17, Robizola 2:12 $\frac{1}{4}$, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for \$3.50 per month at owners' responsibility and risk.

Dexter Prince Stables

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park.
(Take Hayes, McAllister or Devisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stave cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.
W. B. Eddy & Co., Whitehall, N. Y.

New Edition of John Splan's Book

"Life With the Trotter"

Price, \$3.00, Postpaid.

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish.

State Fair Pacing Handicap

To be paced at the State Fair, Sept. 5, 1908

SACRAMENTO, CAL.

Stakes \$1000 Guaranteed

Entries close Wednesday, July 1, 1908

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed; but no horse to be handicapped slower than up to a mile in 2:15.

More than one horse from the same stable may start.
Records Will not Necessarily Govern

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168¾ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classed for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Entrance three per cent, due July 1, 1908. Two per cent additional to start.
Declarations must be made in writing, accompanied by the amount due when made, or nominator will be held for all payments except starting payment.
Money divided 50, 25, 15 and 10 per cent. Except as stated, conditions advertised for the meeting to govern.

High Grade Short-Horn Sale

About eighty head of the well-know Humboldt Herd of Short-horns will be sold at the Humboldt Ranch, one mile east of Suisun, Solano County, Cal., on June 17, by Auctioneer Col. Geo. P. Bellows, of Maryville, Mo. The owners of this herd, Messrs. B. F. Rush and William Pierce, are about dissolving partnership and all of their stock must be sold within the next few months. The sale of June 17th is therefore not a clearance but a dispersal sale, and the individual animals to be sold on this date are some of the best of their exceptionally fine collection.

Carriages will meet all trains at Suisun on the day of sale to convey visitors to and from the station.

For more detailed information, or for catalogue, address,

RUSH & PIERCE, Suisun, Cal. P. O. Box 69.

We Sell These.

You want the best. Are you ready for it this season?

We are prepared as never before to meet your wants in vehicles and harness. There's nothing superior to what we are showing, in taste, style and service. Absolute honesty in make and material. You will agree when we tell you

ENDORSED BY THE U. S. ORDNANCE BOARD!

The Winchester

**The Only Repeating
Shotgun so Honored**

There never was a time since its introduction when the Winchester Repeating Shotgun was more popular or in greater demand than it is to-day. The number of them being used in the field and at the trap is rapidly increasing and they are steadily supplanting double guns for all kinds of shooting. Some restless experimenters who are always following strange and unknown gods have from time to time laid aside their trusty Winchesters to try some new and loudly heralded contraption, but they have speedily and gladly come back to their first choice, convinced by comparison and experience that the "one best bet" in the repeating shotgun line is the Winchester. There are other makes of repeating shotguns, but the Winchester is the only one that has successfully stood every conceivable test that sportsmen could put it to, and also the rigid technical trials of the U. S. Ordnance Board, embracing strength, accuracy, penetration, endurance, excessive loads, defective shells, rust and dust. Its popularity with sportsmen and the official endorsement by the Government are all-sufficient proof of its reliability, and wearing and shooting qualities. Further, it is not necessary to become adept in the sinuous art of contortion in order to load it. Winchester Repeating Shotguns are made in four grades, listing at from \$27.00 to \$100.00, and are sold everywhere.

Pacific Coast Trotting Horse Breeders Association

SUMMER RACE MEETING

Santa Rosa, July 29, 30, 31 and Aug. 1, 1908

Entries close Wednesday, July 1, 1908.

Santa Rosa has one of the fastest and best tracks in the State. It has always been a popular place with the horsemen, and many of the best race meetings ever given in California have been held at Santa Rosa.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock p. m. the day before the first day of the meeting at which the race is to take place.

PROGRAMME---Guaranteed Stakes.

Horses to be named with entry.

WEDNESDAY, JULY 29th.

1—2:13 Class, Trotting, Grace Bros. Stakes	-	\$ 500
2—2:24 Class, Trotting, Sonoma Stakes	-	1000
3—2:12 Class, Pacing, Petaluma Stakes	-	500

THURSDAY, JULY 30th.

4—2:30 Class, Trotting, Three-Year-Olds, Sidney Dillon Stakes	-	\$400
5—2:15 Class, Pacing, Sebastopol Stakes	-	500
6—Free For All Pacing Stakes	-	750

FRIDAY, JULY 31st.

7—2:25 Class, Pacing, Three-Year-Olds, Chamber of Commerce Stakes	-	\$400
8—2:09 Class, Trotting, J. H. Gray Stakes	-	750
9—2:19 Class, Trotting, F. S. Turner Stakes	-	500

SATURDAY, AUGUST 1st.

10—2:16 Class, Trotting, Occidental Hotel Stakes	-	\$ 500
11—2:20 Class, Pacing, Santa Rosa Stakes	-	1000
12—2:08 Class, Pacing, Overton Hotel Stakes	-	500

CONDITIONS:

Entries to close Wednesday, July 1st, 1908, when horses are to be named and eligible to the classes in which they are entered.

Entrance fee 5 per cent and 5 per cent of the amount of the stake will be deducted from each money won.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. on the day preceding the race

and must be worn upon the track in all races. Colors will be registered in the order in which they are received and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Hobbles barred in trotting races, but will be permitted in pacing races.

All stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start at its meetings. Membership fee \$25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of National Trotting Association.

Address all communications to the Secretary.

Blue Ribbon Live Stock Sale

To be held by the

Tulare County Agricultural Association

DURING THE ANNUAL FAIR AT

Tulare, Sept. 21 to 26, Inclusive

STOCK BREEDERS

who desire buyers for their Horses, Cattle, etc., should send at once to the Secretary for Entry Blanks, and have stock listed for our

BLUE RIBBON SALE

which will take place each evening of the Fair, conducted by a first-class auctioneer.

REMEMBER, each evening under electric lights

W. F. INGWERSON, Sec'y.

H. WHALEY, Pres.

GEORGE E. ERLIN, Prop.

JAMES M. McGRATH, Mgr.

Dexter Prince Stables

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Divisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

Back East Cheap

Low-rate summer excursion tickets sold to Eastern points on these dates:

June 22, to 28, Inc.

July 6, 7, 8, 28, 29.

August 17, 18, 24, 25.

Here are some of the rates:

Omaha	-	\$ 60.00
Council Bluffs	-	60.00
Kansas City	-	60.00
Chicago	-	72.50
St. Louis	-	67.50
New Orleans	-	67.50
Washington	-	107.50
Philadelphia	-	108.50
New York	-	108.50

Tickets good for three months—some cases longer. Stopovers and choice of routes going and coming.

SOUTHERN PACIFIC

THE RACE TRACK WAR IN NEW YORK has ended as it has in every other State where the people opposed to continuous gambling have united in opposition to it. The new law against betting is in force and struggle as they may the racing associations that depend upon betting for their revenue will soon be compelled to close their places of business and bow to the will of the people. And it is this making business of a sport that has caused the laws prohibiting betting to be passed. Were the racing of thoroughbred horses conducted like the racing of trotters, the outcry against the running tracks would never have been raised. The longest trotting meetings in the United States last but two weeks, and the majority require but four or five days to complete the program of a meeting that is held but once a year. At very few trotting meetings are bookmakers permitted to handle the betting, auction and mutual pools being the only system allowed, and wagering money on the result of races is only an incident and not the chief end of the sport. Wherever bookmaking is permitted however, a loud demand immediately arises among the professional gamblers for continuous or long drawn out meetings, and this being granted them the sport soon degenerates into an ordinary gambling business, and the antagonism of the churches and even the business community is soon aroused. The fight once on, the death knell of the racing game soon ensues. In New Jersey, Massachusetts, New Hampshire, Ohio, Tennessee, Arkansas, Missouri and many other States, betting on races is prohibited by law and now New York has fallen into line. While the people of California have heretofore gone on record as opposed to sumptuary laws, except in a few local instances, we do not doubt for one moment that were the question of race track betting submitted to their decision at the present time by popular vote, they would put their seal of disapproval upon this class of gambling by a very large majority. And this would be done simply because the people of the State would see in such a law a means of stopping the long drawn out annual meetings at Emeryville and Los Angeles. The feeling that exists among the business men of San Fran-

cisco and vicinity against the race track is growing every day, and the mutterings of a storm that will soon sweep racing off the California map is plainly to be heard. The Anti-Race Track League has already been formed with headquarters at Berkeley, where the California State University is located, whose officials have found the close proximity of a race track which is open from November until June to be a serious menace to the morals of the two thousand students who attend the institution. In nearly every county in the State auxiliary leagues are forming, and when the question is finally submitted to the people who is there that has watched the signs of the times but can forecast the result. And when the blow falls, and all wagering on the results of speed contests is made punishable by fine or imprisonment, the owners of horse breeding farms and the thousands of persons who have heretofore enjoyed and legitimately profited by the breeding, training and racing of harness horses will suffer loss and be put to many inconveniences simply because a coterie of professional gamblers who have thrust themselves into the sport and taken control of it, have so managed horse racing on the running tracks as to make it obnoxious to a majority of the voters of the State. And these voters, failing to discriminate between professional gambling and legitimate sport will be willing to stop all racing entirely rather than permit the professionals to ply their vocation any longer. This condition of things in California is a matter worth the serious thought of thinking men who own farms and breed horses which are used for racing, that when the battle is really on they may know how to act for their best interests. There is not a particle of doubt but an effort will be made here, as it has been elsewhere to array the harness horse breeders and owners on the side of the gamblers under the plea that the fight is against all betting instead of against bookmaking and its attendant evils. The scheme has worked well in New York, Ohio and elsewhere and it will be worked in California unless the harness horse owners realize early in the fight that they have no cause in common with the professional gamblers. Laws that would limit meetings where betting is permitted on races to two or three weeks in a year on any one track should receive the endorsement of every horse breeder. A law that would prohibit bookmaking, but permit auction and mutual pools, should also be welcomed by every harness horse owner. The running associations will never agree to any such legislation and will attempt to enlist all harness horsemen in the fight against race track legislation that is bound to come, but if the breeders and owners of trotting horses are wise they will refuse to make any alliance with the faction that has brought racing into disrepute everywhere in America and made it a bad business instead of an honorable sport.

OREGON FUTURITY NO. 1 for foals of 1908, to trot and pace as two and three-year-olds, is advertised by the Oregon State Board of Agriculture with a guarantee value of \$5,000, to be divided as follows: \$2,000 for three-year-old trotters, \$1,500 for three-year-old pacers, \$900 for two-year-old trotters, \$600 for two-year-old pacers. Entries for this rich stake will close on July 1st this year when an entrance fee of \$5 will be due and payable on each foal entered. Now that a big racing circuit is held every year in the Northwest, and so many California stables are raced there, it behooves every owner of a foal of this year to have the youngster well engaged there as well as here. A colt that is engaged in the Pacific Breeders Futurity, should also be in the Oregon Futurity, so that it will have as large an earning capacity as possible. Colt stakes are the very life of the harness horse industry and deserve the support of every breeder of trotters and pacers. Read the advertisement of this Oregon Futurity in this issue of the Breeder and Sportsman and remember that the stake closes July 1st.

EVERY SIGN POINTS to some of the best and fastest harness racing ever seen on the Pacific Coast when the horses start in the different events now scheduled for the California Circuit. At Oakland, Chico and Sacramento the best horses on the coast have been entered, and the classification has resulted in an entry list that could hardly be improved upon by the most expert handicapper. There is hardly a race in which the winner can be forecast with enough certainty to make him a favorite, and

we expect to see nearly every winner from Santa Rosa to Chico, better than even money in the auction and mutual pools. It is true that there are one or two horses that are expected to outclass their fields in some of the events, but their reputations were made before some of the green ones they must meet this year, had ever been to the races. If the classes where record horses will compete, such as the 2:11 and 2:14 trotting races the contests will be particularly interesting, and we look for very few to be decided in straight heats. The interest in harness racing is increasing every year in California, the formation of many driving clubs during the last few months being a good indication of the truth of this statement. With proper advertising and judicious boosting the crowds that attend the harness races this year should be larger than ever.

The SANTA ROSA MEETING will open the California circuit this year and will be given by the Pacific Coast Trotting Horse Breeders' Association. Entries will close on July 1st, which is just one week from Wednesday next, and owners should begin studying the program that they may know in what classes they stand the best chance of winning. There are twelve races on the program, with purses ranging from \$500 to \$1,000. The meeting extends over four days, three races being scheduled for each day. Santa Rosa was a rather sorry looking town last year when the Breeders' meeting was held, but few of the buildings destroyed by the 1906 earthquake and fire having been replaced, but visitors to the shire town of Sonoma County this year will see a wonderful change. The new buildings which have been erected and finished during the past year are as fine as can be found in any interior town on the coast, while the hotels are equal to any. Sonoma County had a very prosperous season last year, and the harvest just begun promises to be fully as good. The Santa Rosa track is far famed. It is not only fast, but safe and is now in prime condition. The meeting will be well attended, the races well conducted and as the purses are large there will undoubtedly be many entries in each class. Don't miss making entries and racing your horses at this meeting, and remember that entries will close Wednesday, July 1st, with F. W. Kelley, Secretary, San Francisco. The full program of races, with conditions, etc., will be found on page 2 of this journal.

THE WOODLAND DRIVING CLUB, a recent organization, will give its first matinee this afternoon. The organization has started out on the right lines for a strictly amateur club and will permit no liquors to be sold on the grounds, nor betting on the result of its races. No money prizes will be given but trophies in the shape of medals, ribbons, etc., will be awarded the winners. Matinee racing of this description can be made very popular with the public and of much value to the breeders of the American trotting horse, as it will increase the interest taken in good roadsters and club racing. The Woodland Club will hold its races on the well appointed mile track at Woodland Stock Farm owned by Mr. Alex. Brown.

DAVIS DRIVING CLUB.

Quite a crowd witnessed the races of the Driving Club at Davis, Yolo County, on the 6th inst. The first contest of the day was between Elmo Montgomery's Seymow and Carey Montgomery's Chiquita. Seymow won in straight heats in 1:42, 1:44, a new record for the track which is a three-quarter mile oval. P. D. Q., driven by S. W. Lillard, and Sadie Hoy driven by J. P. Montgomery made the next race. Both wore hoppers. P. D. Q. was P. D. S. until his hoppers broke when he showed considerable speed, but Sadie beat him both times handily, best time 2:27. A race for two-year-olds brought out Warren Pugh's Athlete, a pacer, and M. Bracken's Forgery, a trotter. The pacer won both heats. Time 2:46, 2:36. The next meeting will be held June 21st.

"A report is being circulated to the effect that Lord Lovelace 2:10, the pacing stallion by Lovelace, is the fastest harness horse ever bred in Oregon. What about Klamath 2:07½?"—Horseman. The claim made for Lord Lovelace was that he is the fastest horse bred in the Northwest that was trained, raced and took his record there. There are several horses raised in Oregon and Washington that have faster records than Lord Lovelace, but the records were made elsewhere.

SOME OLD-TIME HORSES.

[Written for the Breeder and Sportsman by Geo. H. Tinkham.]

Although California may be behind the Eastern States in a great many respects, it is a notable fact, that in breeding and racing both saddle and harness horses she has ever kept pace with the Eastern breeders and turf events, and oftentimes excelled in blood and racing records the horses of the Eastern tracks.

If we look for the reason we find that as early as 1853 the crack harness and saddle horses of the East were moving to the far West, and in less than six years from the organization of the State, trotters such as Rhode Island, New York, Jim Barton, Glencoe Chief, George Morgan, Fred Kohler and Honest Ance, horses that could trot low in the 30's were speeding over the California tracks. Pacers also were not few in number and Fred Johnson, Pacific, Young America, Joe Wilson, Prince McGrath, and Daniel Webster were some of the "pioneers" that, pacing as low as 2:28, died and were buried in the soil of the new Eldorado.

With these racers, many of which were stallions with good records, came other stallions, and to-day in the veins of the swift speeders we find the blood of John Nelson, St. Clair, Signal, Rattler, General Taylor and Plumas, and later on General McClelland, Kentucky Hunter (Kenandoah), David Hill, Geo. M. Patchen Jr. and Chieftain.

Among the earliest of these pioneers was General Taylor, who at the age of nineteen, under the saddle, November 1, 1866, at Sacramento, defeated Alicia Mandeville, in 2:55, 2:54, Alicia pulling a wagon. It was a match for \$500, Charles Berry riding Taylor the first heat and his owner, A. J. Rhodes, fireman and politician, guiding the old horse the second heat.

The old campaigner, described as an iron gray, 15½ hands high and weighing 1,100 pounds, was sired by the Morse horse, dam the road mare Flora. Foaled in 1847 and named perhaps after the famous general of the Mexican war, he began moving west to Wisconsin in 1850 and landed in California in 1854. Great results were anticipated of him as a trotter, and three years later, February 21, 1857, he made the thirty-mile world's record, defeating Werner's Rattler in 1 hour, 47 minutes, 59 seconds.

He was a game horse of great endurance. Later in October he was beaten out ten miles by Honest John in 30:50. A week later Taylor took a ten mile race from New York in 29:30. The race appears very scaly, for New York later (December 16th) took the three last heats of a six-heat race in 2:35, 2:32, 2:35, and Taylor showed no mile to harness better than 2:48.

Taylor's greatest victory was the winning of the free-for-all stallion race at the State Fair of 1860. In this race five stallions were entered, Vermont, Signal, Stockbridge Chief (who had trotted against Eathan Allen), Werner's Rattler and General Taylor. It must have been a sickly contest, so slow that no time was reported. We only know that Taylor won the race, Rattler took second money and Signal and Stockbridge Chief were distanced in the third heat.

I will now write of this horse Rattler, "the costly failure," as a late writer calls him. Sired by Old Rattler, and he by the famous runner Sir Henry, the California Rattler was imported to this State by Fred Werner, then of Solano county, in 1858. He was a dark bay, 16 hands high, weighed 1,200 pounds, and was then eight years old. In the following year he was started at the State Fair at Stockton against the Pride of Stockton and Tom Maguire, and took the three straight heats in 3:11, 3:14, 3:08. This "wonderful burst of speed" seems to have raised his value greatly as a breeder of future trotters, and Jerome C. Davis, for many years a fair director, paid Werner \$6,000 for a half interest. Early in that year Rattler is said to have beaten Honest John in a two-mile heat race, he making the last mile of the second heat in 2:34. This was good enough for E. M. Skaggs, and in 1860 he bought Davis' interests. The horse was then used as a breeder, and in April, 1865, on the Davis ranch, he died.

General Taylor was advertised as the sire of Capt. Hanford (Paddy Magee), Eugene Casserly and Fannie Lent. None of them made much of a showing upon the turf except Hanford, and from 1863 until 1873 he was among the champion stallions of the Coast. Foaled in San Mateo county in 1858, he was like his sire and grandsire, an iron gray that turned to white as the horse aged. Unfortunately of medium size, Charley Shear, his owner throughout his life, did not start him in a race until he was six years old. He was, I believe, the second California-bred horse upon the race track, and entered at the State Fair of 1863 in the stallion race, Shear wisely withdrew him, for he would have had to compete with the old campaigner Glencoe Chief, who had a record of 2:34. Old Glencoe passed his last days in a livery stable at Stockton, and, entered in a race there, trotted in 2:54.

In the following year (1864) Hanford, Kentucky Hunter and Joe Murphy, just to fill the race, were entered at the Stockton Fair in a free-for-all citizens' stallion race, for a \$250 purse. Joe Murphy was driven by Charles S. Jenkins, previously a mule team driver and the man who trained and drove Defiance to his green colt record of 2:32½.

In the stallion race Murphy and Hanford were driven upon the track, ready to start, but when Hunter came on he was from some cause very lame, and was withdrawn. The condition of Hunter has

never been explained and many said that Dewey, wishing to stand his horse in San Joaquin county, was afraid to start against Hanford. I believe the supposition was correct, for although Hunter the previous year, both to wagon, had beaten the famous Patchen over the track in 2:38, as good time as he could make to harness, Hanford that year repeatedly trotted in 2:36½. In the "calling off" of the race Shear made a point, and from the stand his brother, John P. Shears, then of Mokelumne Hill, challenged any stallion in the State to trot Hanford best three in five at the State Fair for \$1,000 or less.

About that time we remember a couple of camels were hippodroming about the State, racing against trotting horses. One of them came to Stockton, a match was made, and Joe Murphy was the horse selected to beat the camel in a mile dash. The hump-back was on the track by the judges' stand as Jenkins drove Murphy with blinders upon the track. Jenkins kept his horse's head turned from the camel as he drove upon the course and stopped opposite, his driver remaining in the sulky. Just then the horse turned his head and saw his opponent, and with a snort, he reared up, and Jenkins, pulling Joe, made a half turn and landed midway upon the picket fence. This ended the race, but, said Jenkins, "I knew that if we got started that camel never would catch Joe."

From the fair at Stockton, Hanford was taken to Sacramento, and October 17th, at the State Fair, he started against Geo. M. Patchen Jr., handled by Barney Rice, and a big brown stallion called Latham, imported from Illinois and driven by Jim Eoff. Patchen was distanced in the first heat and Hanford beat out Latham, fighting every foot of the distance, in 2:36½, 2:37, 2:37½.

In the following year (1865) he met Bally Lewis driven by Eoff and General McClelland driven by James Daniels, and took straight heats with a second heat record of 2:34½. Two days later he again crossed swords with Latham, undoubtedly the best stallion of that time. It was a hotly contested race, Eoff again speeding Latham. Hanford took the first heat in 2:34, the second was a dead heat in 2:34 and the third in 2:34, Latham at Hanford's wheel. Eoff in this heat was distanced for foul driving. Hanford won the fourth heat and trotted out in 2:33½, making a Coast stallion record. Three years later, September 15th, he lowered this record a quarter of a second.

In 1867, for some reason, Hanford's name was changed to Paddy Magee, and September 10th he came in second in a two-mile heat race, contending against such great horses as Lady Jane (Coombs), Genoa Maid (Rice), Fillmore (Daniels), and Lowery Mathews (Eoff). Mathews took both heats in 5:28½, 5:27½. The next day Paddy started against Mathews in a three-mile heat race, and the first was a dead heat in 7:08, Mathews taking the following heats in 7:10, 7:14. Paddy smallness prevented his winning long-distance races, but no gamer horse ever lived, and although trotting five severe heats in two days he was started the third day in mile heats against Mathews and Sorrel Charley, and took straight heats in 2:41, 2:39, 2:39, Mathews not in the race.

Perhaps I have dwelt too long upon the performances of this horse, the sire of the game little mare May Howard, but as he was California's first stallion pride, the sons of the Golden West will surely pardon me.

Paddy Magee was an example of the old maxim "that honesty is the best policy," for, like Patchen, he was a square, honest performer. For this honesty he was in 1868 rewarded by taking the money of a race "won by the other fellow." It was at the Sacramento Jockey Club meeting, May 23d, the club only a few weeks organized. It was a free for all, three in five, for either trotters or pacers. One of the horses entered was named Unknown; he is still unknown. The other two were Paddy Magee and the sorrel pacer Longfellow, an Eastern horse that came on rapidly and finally paced in 2:19. Longfellow took every heat in 2:30 3-5, 2:34, 2:32 3-5, 2:36 4-5, 2:38 3-5, but the second heat was given to Paddy because of Longfellow's running, the fourth heat from the same cause, and the fifth heat because of very bad breaking on the pacer's part.

Paddy was frequently driven in double team trots, and in one of these races he was driven with Alicia Mandeville, also owned by Charley Shears. Alicia, named after the famous concert singer of that day, was California's first best native daughter, and, sired by Boston Boy, dam Peggy Magee, she started her first race as a three-year-old—State Fair of 1863—against D. C. Broderick and Young Chrysopolis, also three-year-olds. Alicia was second, Broderick taking the race. As a four-year-old Alicia beat Jersey Maid in 2:37½, 2:38, 2:43; she was then retired, but none of her colts were famous.

Paddy Magee seems to have sired only two performers of turf record, E. H. Miller, with a record of 2:32½, and May Howard, record 2:24. The little mare was not as successful as her sire, because she was compelled to trot against many more and much faster horses. Her first race within my knowledge was in 1871, she taking the fourth heat of a six-heat race in 2:32½, with Moscow, California Dexter, Black Swan and Geo. Treat in the race.

In 1873 (September 15th) she took the first heat from Sam Purdy in 2:24½, and this probably was her last performance, as later she was sold to George E. Jacobs, a breeder of Nevada.

FROM HUMBOLDT COUNTY.

Waddington, Cal., June 9, 1908.

Editor Breeder and Sportsman: I wish to report the death of the brood mare Danville Maid. This mare would have been numbered among America's greatest brood mares in a few years had nothing happened to shorten her life, as she was still quite young at the time of her death. She was the dam of Lady McKinney, matinee record 2:12½, and Rex McKinney, two of the bunch of great green trotters by Washington McKinney, and Dick 2:28½ by Saint Whips, now owned by Mr. F. J. Kilpatrick of San Francisco, Cal. Danville Maid only left one foal in Humboldt county, a filly now two years old.

What a great pity it is that Dr. Finlaw did not live to see his great horse become the equal of his sire, for Washington McKinney will surely become McKinney's equal in due time, and if all his foals are like the ones I own by him, he will also sire size, quality, and good looks, as well as extreme speed. I have two two-year-olds sired by Washington McKinney that weigh over 1,000 pounds each at this writing. The doctor surely used rare good judgment when he bred his great Daly-Steinway mares to him.

This reminds me of Bonnie Steinway 2:06¼, who made a season up here last year. The foals that are coming on here now sired by him are a grand looking lot and well worth going many a long mile to see.

So the world's champion five-mile stallion Waldstein 2:22½ is dead. Well, there are a large number of very fine mares and fillies sired by him in Humboldt county, California, that if bred to good stallions and their produce given a chance, would soon place Waldstein among America's leading brood mare sires, as nearly all the mares sired by him that have been bred so far have produced extreme speed, although some of them have been bred to stallions of a very low class. Quite a few of these fine mares can be bought for a very small amount of money, as they are owned by farmers who do not realize their real value and will not be likely to ever breed them.

Yours respectfully,

JOS. P. KELLY.

DIXIE ALTO WINS CHAMPIONSHIP.

Melbourne, Australia, May 7, 1908.

Breeder and Sportsman: At the Royal Show held at Sydney, Easter week, my Palo Alto bred stallion scored heavily and made good. In the open class for "trotting or pacing stallion led in the ring" there were thirty-two entries, thirty of which competed and Dixie Alto was awarded first prize, and later on secured the Championship Ribbon.

In the two-year-old colt class Winn Alto (a son of Dixie Alto and Winona by Daly, second dam Cygnet by Steinway, was awarded first prize in a class of sixteen high-class ones, and the judge said a better two-year-old never passed through his hands.

The day after judging Dixie Alto made good the judge's decision by winning in class for fastest trotting stallion in harness, and a few days afterwards added another victory to his list by winning in class for best trotting stallion, mare or gelding, judged for speed, style and conformation.

In addition to the above, a brood mare that I bought and sold to my friend, F. D. Brown, was awarded first and champion in a large class, so our total with the three as above mentioned was two champions and five first prizes—a record, I believe, for Australia.

Dixie Alto's stock are very promising, and I feel confident they will stand the test and make good. I regard him as the best horse to breed to in this country, for in addition to his royal breeding, he has the individuality and character that is required in a successful horse, and then he is Palo Alto bred.

I recently imported four brood mares, and am pleased to say they are doing well. They are as follows:

Santa Clara by Mendocino, dam Oro Rose by Oro Wilkes.

Bessie Boodle, sire Boodle Jr., dam Gabilan Girl.

Martha Arner by Arner, dam Martha Frazier.

Belle Wilkes by Hambletonian Wilkes, dam Anna Belle by Dawn.

Santa Clara has a beautiful filly foal at foot by Sir John, son of McKinney. Yours very truly,

W. B. VEIRS.

Dr. J. C. McCoy has leased the grand young stallion Barongale (4) 2:11¼ to take the place of Admiral Dewey 2:04½, whose death was recently announced. Barongale is by Baronmore 2:14¼ (son of Baron Wilkes 2:18 and May Wagner by Strathmore, second dam Mary S. 2:28 by Alcantara) dam Nightingale 2:10½, second dam Mabel, the dam of Cresceus 2:02¼, etc., by Mambrino Howard. Barongale is eight years old. He has but one foal that is over a year old.

A two-year-old colt by McKinney 2:11¼ and of Lady Ham, the dam of Hawthorne 2:06¼, is said to be about the handsomest thing of his age at Lexington.

Highball is already trotting close up to his last year's record. A mile in 2:07¼ was given him two weeks ago at Memphis.

Drink Jackson's Napa Soda.

CLASSIFICATION FOR AMERICAN CARRIAGE HORSES.

By George M. Rommell.

The movement started in 1907 by the Bureau of Animal Industry in co-operation with the American Association of Trotting Horse Breeders to provide a uniform system of classification for American carriage horses at the State fairs has met with a very cordial reception. As announced in the Bureau's original circular (No. 113) on this subject, the Fair in Iowa and the Blue Grass Fair in Kentucky started a similar movement in 1907 on their own initiative. In addition, the Kansas State Fair, held at Hutchinson, and the Interstate Fair, held at Kansas City, adopted the Department's classification complete, and exhibits were made at the 1907 fairs. A partial classification was adopted by the Kentucky State Fair, held at Louisville. The Department followed the exhibits closely at all of these fairs, and a Department representative acted as judge of the American carriage classes at the Blue Grass Fair at Lexington and at the Kansas State Fair. The character of the exhibits, while not entirely as satisfactory as could be desired in all cases, was as good as could be expected, and there is every reason to be pleased at the showing made.

The Department's movement was started too late in 1907 to have the classification very generally adopted for fairs held in that year, but work was begun early to have it adopted for the 1908 fairs. Eleven State fairs have provided the classification for 1908, either as a whole or in part, but in all cases the specifications are as recommended and given below, with one or two exceptions, where the premium lists were acted upon before certain revisions were received and last year's classification was adopted. The Blue Grass Fair has retained the same specifications and classifications as last year, on account of a special system of showing in vogue. However, the type desired there is the same as provided in the Department classification, and, although the Department feels that uniformity in specifications is desirable, breeders should find no serious confusion in showing horses entered at other fairs at the Blue Grass Fair as well. The latter fair is, therefore, included in the list below for the information of breeders.

Considerable interest has also been shown by county and district fairs.

As already announced, the Department's classification is the result of a co-operative arrangement between the Bureau of Animal Industry and the American Association of Trotting Horse Breeders, and is the work of the committee on heavy harness horses of the association. The committee is organized to represent the Department of Agriculture, the American Trotting Register Association, the American Saddle Horse Breeders' Association, and the American Morgan Register Association. The Animal Husbandman of the Bureau is chairman of the committee, the other members being Mr. Maxwell Evarts, New York, N. Y., a member of the American Morgan Register Association; Gen. John B. Castleman, Louisville, Ky., president of the American Saddle Horse Breeders' Association; Mr. A. T. Cole, Wheaton, Ill., a prominent breeder of Morgan horses of carriage type; Prof. Charles F. Curtiss, director of the Iowa Agricultural Experiment Station, Ames, Iowa, and a member of the horse purchasing board of this Department; and Mr. H. K. Devereux, Cleveland, Ohio, a well-known trotting-horse man and secretary of the American Association of Trotting Horse Breeders.

The State fairs which have adopted the classification, are those of Iowa, Minnesota, Ohio, Indiana, Wisconsin, Kansas, Tennessee, Illinois, Tennessee, Missouri and Kentucky.

The widespread adoption of this movement is of the greatest importance to farmers and breeders who own horses suitable to get American carriage horses, for the reasons that the fairs are in very close touch with farmers, the farmers are the breeders of most of the carriage horses sold on the American markets, and the value of the American horse for carriage purposes is rarely appreciated by the farmers who bred them. Hundreds of horses are sold annually by farmers at really insignificant prices which after some months of finishing and handling are sold as carriage horses at prices up into the thousands. Furthermore, there is a continual sale of stallions to supply this trade. These horses are usually of only moderate value as speed producers, but are of excellent carriage type. If kept entire and properly mated they could be of inestimable value as foundation sires of the American carriage horse, but as a rule they are castrated and lost so far as breeding value is concerned. With the powerful educational influence of the fairs and stock shows thrown into the solution of the carriage-horse problem, the farmer will not only be educated to appreciate the intrinsic value of the native light horse for carriage purposes, but will recognize the worth of the stallion with good conformation and quality but only moderate speed as a sire of carriage horses, and the problem of fixing the type will be one of early solution.

Horse owners are urged to study carefully the specifications of type and the conditions of showing set forth below, and to exhibit in the classes provided. By studying the descriptive matter, one can easily ascertain whether his horses come within the limits of the type and are properly bred. Before definitely deciding to exhibit, owners should obtain the premium list of the fair where they wish to show, so that they may exactly understand local conditions

and requirements. Correspondence should be direct with secretaries of fairs, and not with the Department.

It is earnestly hoped that the fairs which have adopted the classification will take all possible steps to secure creditable exhibits. By direct correspondence and by press and official notices owners of suitable horses should be urged to exhibit. The Department will assist in this work as far as it can properly do so.

The classification follows:

Type.

The type desired for the American carriage horse is as follows: Not under 15 hands for mature horses; smooth, compact, and symmetrical conformation; neck of good length, inclined naturally to arch; sloping shoulders; well-set legs of medium length; sloping pasterns and good feet; short, strong back; well-sprung well ribbed up to coupling; smooth loins; full flanks; straight croup, with well-set tail; full, round quarters.

Conditions Governing Entries.

Classes open only to horses of American blood.

Stallions in classes 1 to 5, inclusive, must be registered either in the American Trotting Register as standard, in the American Morgan Register, or in the American Saddle Horse Register, and certificate of such registry must be shown in the ring if required.

Entries in all classes for mares must be registered either in the American Trotting Register as standard or nonstandard, in the American Morgan Register, or in the American Saddle Horse Register, and certificate of such registry must be shown in the ring if required.

Entries as get of sire in Class 5 and produce of mare in Class 10, and entries in Class 11 must be sired by a stallion registered as above, out of mares registered as above.

No mare having any draft cross will be eligible.

Any exhibitor falsifying the breeding of entries will be barred.

Entries in all classes must be practically sound.

Judging.

Entries in all cases to be judged on conformation, style, action, and manners as a suitable type of carriage horse. Special attention will be given to truthfulness of action. Good knee and hock action are essential. Entries in all classes should trot and walk straight and true, and judges will especially avoid horses showing any tendency to pace, mix gaits, paddle in front, or sprawl behind.

The following percentages will govern judges in Classes, 1, 2, 3, 4, 5, 6, 7, 8, and 9: General conformation and all-round suitability as a carriage type, 60 per cent.; style, action, and manners, 40 per cent.

The following percentages will govern in Class 5: General conformation and all-round suitability of sire as a carriage type, 30 per cent.; style, action and manners of sire, 20 per cent.; general conformation and all-round suitability of get as a carriage type, taken as a whole, 30 per cent.; style, action, manners, and uniformity of type in get, 20 per cent.

The following percentages will govern in Class 10: General conformation of dam as a brood mare of the carriage type, 50 per cent.; general conformation, style, action, and manners of the foal, 50 per cent.

The following percentages will govern in Class 11: General conformation of entry as a carriage type, 70 per cent.; style, action, and manners, 30 per cent.

Manner of Showing.

Entries in Classes 1, 2, 6, and 7 to be shown in harness hitched to any suitable vehicle. Entries in all other classes to be shown in hand to bridle or halter.

Excessive weight in shoeing in any class is forbidden.

Classes.

- Class 1. Stallion 4 years old or over.
- Class 2. Stallion 3 years old and under 4.
- Class 3. Stallion 2 years old and under 3.
- Class 4. Stallion 1 year old and under 2.
- Class 5. Stallion with three of his get of either sex; get need not be owned by exhibitor.
- Class 6. Mare 4 years old or over.
- Class 7. Mare 3 years old and under 4.
- Class 8. Mare 2 years old and under 3.
- Class 9. Mare 1 year old and under 2.
- Class 10. Mare and foal of either sex.
- Class 11. Foal under 1 year old, either sex.

Approved:

JAMES WILSON,

Secretary of Agriculture.

Washington, D. C., May 12, 1908.

ANSWERS TO CORRESPONDENTS.

Geo. H. Tinkham, Stockton—The only horses in the list you send us that we can find credited with records are Plumas 2:40½, Kentucky Hunter 2:37½, John Nelson 3:08. There are several named Tecumseh with records, but we do not know which one you refer to. Controller's record of 58:57 for twenty miles, was made to wagon in San Francisco April 20, 1878. Wallace gives his sire as Gen. Taylor, Chester gives it as Mayboy. We do not think Happy Medium was ever in this State, although his dam, Princess, was here for a time. The horse at Sacramento in 1878 was a son of Happy Medium, according to the State Fair reports. Princess had a record of 2:30, made in San Francisco June 15, 1858.

Drink Jackson's Napa Soda.

INNER-CITY MATINEE AT STOCKTON.

Nearly one hundred and fifty members of the Sacramento Driving Club and their friends journeyed from the Capital City to Stockton by special train last Sunday and joined with the Stockton and Lodi clubs in a matinee that was one of the most successful and enjoyable ever held on the Coast. The Stocktonians gave the visitors a most hearty welcome and everything passed off pleasantly during the day. The racing was excellent, four of the six races resulting in split heats. The visitors won the majority of the events. The fastest heat of the afternoon was paced by Kelly Briggs, the old reliable, who won the second heat of his race in 2:13, after Cranky Thorne had taken the first in 2:13½. The summaries:

No. 1—Class D, trotting:
Flyaway, Frank Silva, Sacramento.....2 1 3 1
Billy George, George Vice, Sacramento...3 4 1 2
Lady Bird, H. Prole, Stockton.....1 2 4 3
Babe, A. L. Archambeault, Stockton.....4 3 2 4
Time—2:38, 2:39, 2:37½, 2:38¾.

No. 2—Class A, pacing:
Briarwood, I. Christie, Sacramento.....1 1
Lady Irene, J. Jones, Stockton.....2 2
Polka Dot, C. Silva, Sacramento.....3 3
Time—2:16, 2:16¾.

No. 3—Class B, pacing:
Gilt Edge Dick, G. F. Willie, Stockton.....3 1 1
Instructor, Ray Dittus, Sacramento.....1 3 2
Prince, A. B. Sherwood, Stockton.....2 2 3
The Judge, J. F. Heenan, Sacramento.....4 4 4
Capt. Cousins, Paul Sims, Sacramento.....6 5 5
Chappo, F. Donovan, Stockton.....5 6 6
Time—2:25, 2:25¼, 2:27¾.

No. 4—Special trot and pace:
Kelly Briggs, F. Wright, Sacramento.....1 1
Cranky Thorne, C. Helm, Stockton.....1 2 2
Wild Bell, F. Ruhstaller, Sacramento.....3 3 3
Time—2:13½, 2:13, 2:14.

No. 5—Class C, trotting:
Presto, M. F. Hunt, Sacramento.....1 1
Billy D., H. Todman, Stockton.....3 2
Bobby Dobbs, J. Wheeler, Sacramento.....2 3
Time—2:25½, 2:30½.

No. 6—Class C, pacing:
Wiggler, B. Acker, Lodi.....1 2
Alta Genoa Jr., G. Pierano, Lodi.....2 1
Dell Neff, J. Foley, Stockton.....3 3
Time—2:33, 2:33¾.

Through some misunderstanding race not finished.
No. 7—Three-quarter mile dash, running race:

Samar, G. Greening, Stockton.....1
Critical, W. J. Hersom, Stockton.....2
Bess, Hush and Tipwing also ran.
Time—1:17.

Notes on the Meeting.

Starter Young knows his business. Christie is a second "Wizard of the Sulky." Frank Silva, while a little overweight, is a Flyaway driver.

Ruhstaller's skill is elegance itself. Pierano is a good driver for bad actors.

Todman and Billy D., the "Alfalfa horse" got the cheers with great regularity.

Wheeler with Bobby Dobbs was popular. Bobby seems to desire the encouragement of his driver's eye, for he goes with his head drawn well over toward his near shoulder.

Presto was Presto on the spot.

Babe, A. L. Archambeault's mare, is a in-ce-gaited classy looking pacer.

The Judge made a good showing, but was not rigged to suit him in the first two heats. He will do better at Chico.

Briarwood promises to go in 2:13 at Chico. He is bred for it—sired by Diawood, dam by Direct Jr., second dam by Prompter.

It is said that Billy D. was up to ten days before the races used as a saddle horse herding cows. No matter, he's a pretty gaited trotter, and trots all the way.

Cranky Thorne is not cranky by nature. He is a model pacer, beautifully gaited, and wears no boots or rigging of any kind.

Kelly Briggs is a stand-by war horse.

The meeting proved that a new spirit is awakening among owners of light harness horses. The Stockton track has for years been overgrown with weeds. Now, owing to the Club's efforts a finer could hardly be found.

The next Inter City meeting will be held at Chico about July 4th.

THE POPULAR TOOMEY LOW SEAT RACER SULKY THE WINNER IN AUSTRIA.

The green trotter Hemp Hurd owned by Mr. Walter Winans of England, won the recent Tribune Handicap at Vienna, hitched to his Toomey Low Seat Racer Sulky.

Toomey Sulkies are universally acknowledged to be the best of any made for use over both American and foreign tracks.

Up to June 7th, Trilby Direct 2:08¾ held the track record for the spring at Glenville, with a mile in 2:15.

Schley Pointer 2:08¾, by Star Pointer 1:59¾, died recently while being shipped from Louisiana to Kentucky.

NOTES AND NEWS

The handicap pace failed to fill.

Only seven entries were received for it by Secretary Kelley.

Races are to be held on the Concord, Contra Costa County, track this afternoon.

Nearly all the programs for the California Circuit are complete with large entry lists.

It is not likely that there will be any running races provided at the California State Fair this year.

The prospects for fast time and close contests on the coast were never better than they are this year.

Entries close June 25th for the races to be held at Newman, July 4th. Look over the advertisement in this issue.

Expectation, the dam of Major Delmar 1:59¾, has a colt at foot by Barongale 2:11¼, whose grandam produced Cresceus 2:02¼.

Ebony Boy, entered in the \$50,000 race, is a dock-tail horse who took a record of 2:19 a few years back under the name of Crowshade.

Give your colt every opportunity possible to win good stakes. The Oregon Futurity for foals of 1908 will close July 1st. See advertisement.

The inter-city matinee at Chico on the 4th of July will draw a big crowd. Members of the Sacramento, Lodi, Stockton, Davis and Woodland Clubs will be in attendance.

The next meeting for which entries will close is the Breeders' meeting at Santa Rosa. The date of closing is July 1st. The program is a good one and provides for all classes.

Queen's Heiress, a seven-year-old trotting mare by Handspring 2:18½ out of the former champion Alix 2:03¾, is said to be one of the best green prospects in training at Lexington.

There will be seven harness races at the Emeryville track on Butchers' Day, and the contests will be very close in some of them. Entries close to-day with J. M. Gilbert, Secretary, 484 Haight street.

The Donna 2:07¾ was a starter in the free-for-all pace, purse \$300, at Kingston, Ontario, on May 26th. After dropping the opening heat she won the next three in 2:18, 2:17½ and 2:14¼. The track is a half-mile one.

Zolock 2:05¼ will be raced again this year and it is expected he will reduce his record at Phoenix, Arizona, when he starts there in November. The Phoenix track is one of the fastest tracks in the United States.

Juanita Skinner, the dam of that good trotter Charley Belden 2:08¾, is offered for sale by Mr. H. L. Morrow of 401 Golden Gate avenue, together with three of her foals, all by Guy Dillon—a two-year-old, a yearling and a suckling.

Sweet Marie got her first three-heat work-out this year on the 5th inst., and did her miles in 2:12½, 2:08¾ and 2:09¼. She could have trotted the last heat faster than the second, but was pulled up and finished the mile in a jog.

Entries for the Butchers' Day races will close to-day. An extra race has been added to the published program. This is a free-for-all trot or pace, \$75 to first horse, \$35 to second and \$20 to third. The race will be a dash of one mile.

Cresceus 2:02¼ started sixty-one times during the six years that he was raced and was never out of the money. He won 42 firsts, 14 seconds, was third four times and was once fourth. His total winnings for six years' racing was over \$102,000.

Willard Zibbell of Fresno owns a three-year-old filly by Lynwood W., dam Evangie by Shadeland Onward, that is showing remarkable speed over the Fresno track, where she is training. She is eligible to the Breeders' Futurity this year.

A match race between Mr. Braynard's Prince and Mr. Hoyle's Dan Fox came off at Anderson, Shasta county, on June 7th. The race was won by Prince in straight heats, the best time 2:34½, fair time for roadsters over a poor half-mile track.

Anyone wanting a good matinee horse, seven years old, and a trotter, should correspond with S. H. Hoy of Winters, Cal. This horse has been a mile in 2:18, has good manners and is a fine roadster. He is fast enough to win at the matinees in good fields.

The much talked about match race between the pacers Charley J. and Kitty D. came off at Pleasanton track last Sunday and was won by the former in straight heats in 2:15½, 2:17 and 2:18. The race was said to be for \$500 a side. Both are pacers and have shown faster in races than they did in this match.

C. A. Durfee visited Kenney's bike emporium this week and after being shown what was left of the old 85 pound sulky that McKinney drew when he made his record of 2:11¼, and which passed through the big fire of 1906, purchased Kenney's latest model of 1908 to drive a couple of three-year-olds to this summer.

The stadium track in Golden Gate Park has had a coating of four inches of clay put on it during the past two weeks and is now open again to the light harness brigade. A week's driving over it will make the track lightning fast and at the next matinee of the Park Amateur Club the track record should be broken.

Several San Francisco horsemen attended the inter-city matinee at Stockton last Sunday and are unanimous in their praise of the meeting and the way it was conducted. The racing was all good and several of the finishes were neck and neck, arousing great enthusiasm. A very large crowd of spectators was present.

Jack Vera of Reno, Nevada, owns the mare Proctina by Steinway, out of Proserpina by Diablo 2:09¼, second dam Algerdette, the dam of Thornway 2:05¼, Christobel 2:11¼, and two more in the list. F. Krahenberg is working the mare at Reno and she is showing a high rate of speed, having paced a quarter in 32 seconds after a very few weeks' work.

W. G. Durfee reached Wheaton, Illinois, with all his horses in good condition and they have come in for many favorable words of commendation from horsemen as to their looks and actions on the track there. The Illinois horsemen are particularly taken with Del Coronado 2:09¾, and well they may be, as a better individual with 2:10 speed never left California.

The three-year-old colt Dr. Lecco, owned by C. H. (Doc) Durfee is at Pleasanton and will be put in condition for the stakes in which he is entered. It is probable that C. A. Durfee will go to Pleasanton to drive the colt on workout days, and will at the same time give a few lessons to a three-year-old filly by Dexter Prince out of McKinney mare that he purchased at the last Aptos sale.

Fred H. Chase & Co., have been compelled to declare their combination sale, set for July 27th, off for want of entries. This is unfortunate for owners, as the demand is now better for road and light work horses than it has been for some time. It is always the case however, that when the demand is good owners will not sell and when it is poor, the market is flooded.

Buck 2:20¼, the bay gelding by McKinney out of Tuna 2:12¼ by Ethan Allen Jr., that took his record trotting in 1906 over at Butte, Montana, where Ted Hayes campaigned him for W. A. Clark Jr., is now a pacer and is entered all through the California circuit in the pacing events. Buck won a matinee race at Los Angeles the other day and paced both heats in 2:18 very handily. This was his maiden race at the lateral gait, and he showed every sign of being a good horse at this way of going. Buck is now owned by W. C. Morris of Montana.

C. A. Harrison of Seattle, has sent the standard and registered mare Lotte by Vice Regent, dam Lady Parks by Land Mark 350s, second dam Lady Larrabee by Jefferson Prince 6212, third dam Bobbie by Ethan Allen, to Nutwood Stock Farm to be bred to Nutwood Wilkes. Vice Regent, the sire of this mare is by Mambrino King out of the good brood mare Estabella by Alcantara, who has five standard performers to her credit including Heir-at-Law 2:05¾, etc. Estabella has three producing sons and four producing daughters. Lotte should produce something extra fast from her mating with Nutwood Wilkes.

The Zolocks are working fast for Homer Rutherford at Salem, Oregon, track. Last Friday Josephine, the four-year-old filly by Zolock, that took a three-year-old record of 2:20¼ last year, paced a mile in 2:11, and Saturday Delilah 2:08 worked a mile right at her record, and the trotter R. Ambush 2:11¼ stepped a mile in 2:13½ very handily. Rutherford will ship to California August 1st.

The Butchers' Board of Trade has selected W. J. Kenney, the well known bike maker and machinist as starter for the harness races to be held at Emeryville next Wednesday, Butchers' Day. Kenney has made quite a reputation as starter for the San Francisco Driving Club and has the confidence of all the horsemen as his motto has always been "a fair start and no favors." The races promise to be the best held by the Butchers in years, and the two free-for-all purses will doubtless have good fields of the fastest trotters and pacers in training in this vicinity. Bookmaker Coleman has the betting privilege, having given \$1,405 for it.

A pair of Shetland twins in Iowa weigh 18 and 23 pounds respectively, and are so small that they cannot reach high enough to suck. Their owner has to put them on a small platform or hold them on his knees while they get their meals from the maternal font, but both seem to be doing well. The dam weighs nearly six hundred pounds.

The Oregon Futurity is advertised by the Oregon State Agricultural Society. The guaranteed value of this stake, which is for foals of this year, is \$5,000. Send to M. D. Wisdom, Hamilton Building, Portland, Oregon, for entry blanks. Entries will close July 1st. A trotting or pacing colt that has no stake engagements is of little value compared to one that is well engaged.

The owner of the Rohnerville mile track in Humboldt County, offers it for sale and at the price and terms he is willing to make it should be a bargain for some live horseman. The track is an excellent one, is fenced, has two grand stands and two pavilions, 35 stalls, an abundance of water, and located right in one of the best towns in Humboldt County. If you are looking for a good investment, read the advertisement and correspond with the owner.

Secretary Cosgrove of Spokane Interstate Fair writes us that since sending out his list of entries to the trotting and pacing purses which closed May 25th, he has received two entries from far-away Saskatchewan, as follows: In the 2:24 trot S. J. Donaldson has named Si McGregor by Silent Brook, and in the 2:18 trot H. W. Hudson has entered Hugh Scott by Bryson. Both these entries were made in time, but were delayed in transmission.

Thomas Smith, the lessee of the Vallejo race track is arranging for a series of races at Vallejo on Saturday, July 4th. It is likely that other parties will give a barbecue and bronco busting exhibition at the track on that day. Mr. Smith has written to the horsemen of Napa and upper Solano County advising them of his intentions and inviting them to enter their animals. It is planned to give class races for Napa and Solano horses and also races for green horses.

If you want a stallion look over the list that Frank Turner of the Santa Rosa Stock Farm offers for sale. Sky Pointer Jr. is one of them. He is by Star Pointer's full brother, Sky Pointer, and is out of Juliet D. 2:13½, dam of Irish 2:08¾, by McKinney. Sky Pointer Jr. has paced a mile in 2:12¼. Another well-bred stallion he offers for sale is F. S. Turner 2:24, standard and registered. He also has a three-year-old by F. S. Turner and a two-year-old by Guy Dillon, besides seven yearling stallions by Major Dillon, Guy Dillon and Sky Pointer Jr.

On Saturday next forty head of good work horses weighing from 1200 to 1500 pounds each will be sold at auction at Suisun. These horses have been used by the construction department of the Pacific Portland Cement Company, and as the work is finished they will be sold without reserve. Here is a good opportunity to get good work horses at your own price. They are in good condition and ready to put to work. Buyers from San Francisco can go to Suisun attend the sale and reach home the same evening. W. G. Harris will be the auctioneer.

It looks very much as if Ray o' Light 2:13½ who was the champion two-year-old of last season, will be after championship honors again this year. Last Saturday at the Salinas track Charles Whitehead worked the Searchlight colt two heats in 2:10½ and 2:09¾, wonderful miles for a three-year-old in June. Ray o' Light paced the first quarter of the second heat in 30½ seconds, was eased up the next two quarters and then came the last one in 31 seconds flat. He can step the Salinas track in 2:08 or better right now, and it surely looks as if he will be able to show a mile in 2:05 this fall and thus earn the world's record that has stood for the last ten years at 2:05½. Ray o' Light has taken all his work this year under restraint, the above two fast miles included.

Iran Alto 2:12¼ is the subject of our illustration this week. This stallion was bred at the famous Palo Alto farm and bought from that farm when a colt by James W. Rea of San Jose, who still owns him. For the past three years Iran Alto has been in the stud at Woodland, Cal., in charge of H. S. Hogoboom, the well known trainer, and the colts that have come from the mares bred to him during that time are showing remarkable speed. Iran Alto is a powerfully muscled horse and was a very game race horse, a quality which his get have to a remarkable degree. He was sired by Palo Alto 2:08¾, the first 2:10 trotter to be produced by a thoroughbred mare, Palo Alto being by Electioneer out of Dame Winnie by Planet. The dam of Iran Alto was Elaine 2:20, champion three year-old of her day by Messenger Duroc, second dam the famous Green Mountain Maid dam of Electioneer. Iran Alto is beyond all doubt one of the best bred stallions now in California although he carries none of the fashionable Wilkes blood. For this reason however, he should be a particularly valuable horse to breed to mares carrying a large proportion of that blood in their veins.

ARMY HORSE REPULSES BEAR.

Our readers will remember a picture and short sketch which appeared in our issue of May 9th, of the troop horse "Nigger," now ridden by Dr. E. K. Johnstone, Surgeon 3rd Squadron of the 14th U. S. Cavalry stationed at Post Camp Yosemite in the famous valley of that name. On a recent visit to the valley the editor of this journal had the pleasure of meeting Dr. Johnstone and looking over his handsome black charger, which he found to be all that has been told about him. A fine big black fellow, with great strength and finish combined, a broad forehead and large eye that denote superior intelligence. "Nigger" is everything that a soldier's horse should be, and that he is loved by his rider and every member of the squadron is not surprising. He was the horse selected to carry President Roosevelt while on his visit to this coast, and now he has added another incident to his already famous career, as the following extract from a letter written under date of June 14th by Dr. Johnstone to the editor of this journal, will show:

"I want to tell you something that happened yesterday in regard to 'Nigger' that will really surprise you. He was loose, and Curran, who looks after him, had searched for quite an hour, as loose animals are an abomination to the Major. Finally he saddled that gray of mine and started into the woods. He hadn't gone thirty yards when he spotted 'Nigger' acting very queerly, with his nose almost to the ground, making little dashes or jumps forward. He was followed by a couple of loose mules. Curran rode quietly, so as to head the old fellow off, and when near enough to see through the underbrush (you know all this was happening just behind the stables in that dense wood) he came upon an immense brown bear which rose on his haunches and growled when he saw the gray. Of course Curran was startled and yelled out. One of the teamsters, a colored man, hurried to him, and was scared almost stiff. Meanwhile the bear moved leisurely on, 'Nigger' making short runs at him with ears back and looking very fierce, according to Curran, who said he had never seen him worked up so, and he was in a lather, too. The mules were intently watching the whole thing, well out of range of possible consequences, ears pricked up, like a couple of school boys. The calf corral was close by, and probably this accounted for the presence of the bear.

Really, it seemed as if 'Nigger' knew there was some danger, and objecting to Bruin's presence was actually running him off the premises. Is he not a chivalrous, brave old gentleman?"

He certainly is, and every one who has the least admiration for a horse will feel like clapping his hands in praise of the brave old fellow, when he reads this modestly written tale of his latest venture, while those who have enjoyed the privilege of knowing him "personally," as we may say, will consider that it has been a rare privilege to have looked into the speaking eye, and patted the glossy neck of an animal whose attributes are truly those of a noble and, as the Doctor aptly put it, "chivalrous, brave old gentleman."

NEWS FROM THE NORTH.

(Rural Spirit, June 10th.)

A. C. Lohmire has concluded to race Red Skin 2:16½ this year and has entered him in the \$1,000 stakes at Seattle, Portland and Salem.

Fred Brooker of North Yakima, who has built a fine residence in Rose City park and intends to move to Portland soon, has put his Zombro stallion Zomvert to pacing and he is working miles better than 2:25 very handy.

Homer Rutherford was down from the Fair Grounds this week and reports the horses all doing well. R. Ambush has worked a mile in 2:16½, halves in 1:04½, quarters in :31; Delilah has worked in 2:13, halves in 1:01, quarters in :28½; Josephine in 2:16, quarters in :30. Hi You, a three-year-old trotter by On Stanley, has worked in 2:28½, halves in 1:11; Easter, a two-year-old trotter by Monicrat, has worked in 2:25, back in 2:24. This is one of the greatest colt trotters ever seen on the track and is well entered in the California futurities. Another colt in Rutherford's stable that attracts much attention is the yearling filly Yu Yu by R. Ambush. This filly can sep a 2:40 clip barefooted and is as handsome as a peach. Rutherford will ship to California about the first of August, where he will open the fall campaign, returning here for the races.

Embryonic plans are under consideration for a big racing meet at Albany, Oregon, this summer. There are now forty-three horses working out at the S. S. Bailey track at that city, and these and other local horses would form the nucleus for a big meet. Mr. Bailey has thirty horses training at the track while Fred Woodcock has a string of ten and C. E. Barrows is handling three. Among the Bailey horses are: Tidal Wave 2:09, Oma A. 2:10½, Vinnie Mann 2:11½, Doc Munday, three-year-old record of 2:25, and Seattle, three-year-old record of 2:24½. Among the horses Woodcock is handling is Oregon Babe, owned by J. D. Isom of Albany.

The proposed race meet, if plans materialize, will be a big one. Prizes will be given to attract strings of horses from the Northwest circuit. As soon as Mr. Bailey gets the track in the shape that he desires it, and completes the buildings planned at the track, Albany will be placed on the regular Northwest circuit. This will probably be completed in time for next year's races.

OAKLAND GETS GOOD LIST.

The purses for the Oakland meeting which closed Tuesday last, June 9th, all filled with one exception, the 2:10 pace. While Manager Benjamin had prepared a list of good sized purses ranging from \$600 to \$1,050, and the entries in the 2:05 pace were but three in number, and those in the 2:09 and 2:11 trots but four in number, he declared them filled, as he knew they would make good contests and draw the crowd. The 2:05 pace, with Sir John S. 2:04½, Moy 2:07½ and Mona Wilkes 2:06½ as starters will be a contest worth seeing, and while the Marysville stallion is considered by many horsemen to be invincible, he will certainly have to pace to his record to b at the two mares if they are in shape when the word is given. Moy was just beaten a length by that great pacer of last year Lady Maud C. 2:04½, at Lexington, and one of California's most conservative horseman who has seen Mona Wilkes taking her work at Pleasanton this year tells us that she will step a heat better than 2:04 by August if nothing happens her.

By giving both a 2:09 and a 2:11 trot Manager Benjamin has provided two fine races and accommodated the owners, although he could very likely have received seven entries for one race had he advertised only a 2:09 class. His generosity in this matter is therefore to be commended.

The 2:30 trot, which was especially made to give horses a race whose owners considered them to have little chance in the \$2,000 2:20 trot, has received eight entries and it should provide a great contest.

The fact that the two-year-old trot has received ten entries is very satisfying to Mr. Benjamin and he expects a fine contest to result.

The list of entries received for the purses declared filled, follows:

Trotting, 2:09 Class, Purse \$1,050—4 Entries.

Athasham, b. s. by Athadon, dam Cora Wickersham by Junio; D. L. Bachant.

North Star, b. g. by Nutwood Wilkes, dam Ivoneer by Eugeneer; C. Whitehead.

Wild Bell, br. g. by Wildnut, dam Bell Bird by Electioneer; F. J. Ruhstaller.

John Caldwell, b. g. by Strathway, dam Annie; J. C. Kirkpatrick.

Trotting, 2:11 Class, Purse \$900—4 Entries.

Era, b. m. by Zombro, dam Nellie K. by Gen. Grant, Jr.; Frank Williams.

R. Ambush, br. h. by Zolock, dam May Kinney by Silkwood; Homer Rutherford.

Fresno Girl, br. m. by Seymour Wilkes, dam by Richard's Elector; J. W. Zibbell.

North Star, b. g. by Nutwood Wilkes, dam Ivoneer by Eugeneer; C. Whitehead.

Trotting, 2:30 Class, Purse \$700—8 Entries.

Princess W., bl. m. by George Washington, dam Urania by Ky. Prince; Dick Ables.

Dutch, b. h. by Athby; W. B. Snyder.

Hester, ch. m. by Diablo; J. A. Grove.

Alsandra, b. c. by Bonnie Direct, dam Alix B. by Nutwood Wilkes; Morris Bros.

Wilmar, b. g. by Wildnut, dam Sweet Water by Stamboul; William Michelsen.

Ramona S., b. m. by Zombro, dam by Antevolo; E. A. Swaby.

Wild Girl, br. m. by Wild Nutting; James Smith.

Princess Christina by Dexter Prince, dam Christina by Chris. Smith; E. Stone.

Trotting, Two-Year-Olds, Purse \$600—10 Entries.

Virginia Lee, b. f. by Iran Alto, dam Maggie Maline by Soudan; T. B. Gibson.

Parana, bl. c. by Stanford McKinney, dam Strathalie by Strathway; George L. Warlow.

Rautstrau, b. c. by Athadon, dam Bessie by Son of Yosemite; C. H. Warlow.

Silk Hal, br. h. by Hal B., dam Nettie Mag by Silkwood; D. B. Stewart.

Leta Dillon, ch. f. by Herbert Dillon, dam Lissette by Abdallah Wilkes; F. N. Frary.

Prince Lock, ch. g. by Zolock, dam Molocha by Nutford; George A. Pounder.

Easter, b. h. by Monicrat, dam Altarina by Atto Rex; Homer Rutherford.

Eddie G., b. c. by Tom Smith, dam Kate Lumry by Shadeland Onward; J. W. Zibbell.

Queen Alto, br. f. by Iran Alto, dam by Director; H. S. Hogoboom.

Ella M. R., b. f. by Lord Alwin, dam Excella by Monbells; Martin Carter.

Pacing, 2:05 Class, Purse \$1,050—3 Entries.

Sir John S., b. s. by Diablo, dam Elisa S. by Alcantara, Jr.; W. L. Vance.

Moy, b. m. by Prodigal, dam Minnie by Clay King; Morris Bros.

Mona Wilkes, b. m. by Demonio, dam Trix by Nutwood Wilkes; J. W. Marshall.

Adioo Dillon, the four-year-old mare by Sidney Dillon, from Adioo by Guy Wilkes, was bred to Todd this year and is thought to be certainly with foal to the new dead stallion. Adioo Dillon is owned by C. M. Buck of Fairbault, Minn.

Walter Jermyn of New York has sold Charley Beiden 2:08½ to John McGuire, a well-known horse dealer of that city.

It is considered very likely that Cresceus 2:02½ will be put in training when he reaches his new home in Russia, as a new sulky was ordered for him and shipped on the steamer with the champion.

STATE FAIR ENTRIES.

The California State Board of Agriculture has declared filled five of the six purses advertised to close June 1st. The only one not filling was the four-year-old trot. The lists in the remaining races are excellent and will bring together some of the best horses on the coast. In nearly every event the horses are very evenly matched in speed, thus making good contests almost certain to result. The outlook for a week of high class racing at the State Fair was never better. The list of entries received for the races which closed June 1st is as follows:

2:12 Class, Pacing, Purse \$800—11 Entries.

Pilot, ch. s. by Abbottsford Jr.-Belle Caples; J. V. Galindo. Highfly, b. g. by Nearest-Miss Gordon; J. W. Barstow. Memoria, b. m. by Demonio-May Norris; S. H. Hoy. Ramon o' Light, br. c. by Searchlight-Carrie B.; E. T. Train. McFadyen, ch. s. by Diablo-Bee Stirling; E. D. Dudley. Charley D., b. s. by McKinney-Flewey Flewey; J. C. Kirkpatrick. Buck, b. g. by McKinney-Tuna; Beulah, ch. m. by Nutwood Wilkes-Pattie D.; Reichel & Phillips. Rockaway, rn. by Stoneway-(untraced); G. A. Pounder. Monteo, b. s. by McNeer-by Washington; John Renatti. Fred W., b. g. by Robin-Lady Lloyd; C. H. Widemann. Explosion, b. m. by Steinway-Flash; F. E. Ward.

2:10 Class, Trotting, Purse \$1,000—8 Entries.

Lucretia, br. m. by Nazote-Lucyner; John C. Kirkpatrick. Thomas M., br. g. by McKinney-Guy Wilkes; H. Delaney. Berta Mac, br. m. by McKinney-Alberta; W. Parsons. Adam G., b. g. by McKinney-Nona Y.; Fresno Girl, br. m. by Seymour Wilkes by Richards Elector; J. W. Zibbell. Era, b. m. by Zombro-Nellie K.; Frank Williams. North Star, b. g. by Nutwood Wilkes-Ivoneer; C. W. Whitehead. Athasham, b. s. by Athadon-Cora Wickersham; D. L. Bachant. R. Ambush, br. h. by Zolock-May Kinney; Homer Rutherford.

2:17 Class, Trotting, Purse \$800—13 Entries.

Chestnut Tom, ch. s. by Nutwood Wilkes-Zeta Carter; Geo. T. Algeo. Hunky Dory, b. g. by Athadon-(unknown); George W. Butler. Prince H., b. g. by (unknown); H. H. Hellbush. Easter Bells, b. m. by Diablo-Elisa S.; W. L. Vance. Vallejo Girl, br. m. by McKinney-Daisy S.; F. H. Burke. Wilmar, b. g. by Wildnut-Sweet Water; William Michelsen. Princess W., blk. m. by Geo. Washington-Urania; Lady McKinney, b. m. by Washington McKinney-Danville Maid; F. J. Kilpatrick. Modicum, b. m. by Geo. Ayres-Aggie Ray; Alsandra, b. h. by Bonnie Direct-Alix B.; Ted Hayes. Wenja, br. h. by Zolock-Molacka; G. A. Pounder. Ramona S., b. m. by Zombro-Auntie; E. A. Swaby. Della Derby, blk. m. by Chas. Derby-Nora D.; C. Whitehead. Nogi, b. s. by Athadon-Cora Wickersham; Warlow & Walton. Emily W., b. m. by Jas. Madison-Camella Rose; F. E. Ward.

2:15 Class, Pacing, Purse \$700—12 Entries.

Boton De Oro, blk. s. by Zolock-Bell Pointer; Alfred Solano. Radium Way, blk. s. by Stoneway-Carrie; J. A. Kirkman. Alto Jr., blk. h. by Son of Dexter Prince-(thoroughbred); G. Peirano. Milton Gear, ch. s. by Harry Gear-Lulu N.; J. Depoister. Memoria, b. m. by Demonio-May Norris; S. H. Hoy. T. D. W., b. s. by Nutwood Wilkes-Abaca Callendine; T. D. Witherly. Wanderer, b. h. by Athby-(unknown); W. B. Snyder. McFadyen, ch. s. by Diablo-Bee Stirling; Truth, br. m. by Searchlight-Bee Stirling; E. D. Dudley. Buck, b. g. by McKinney-Tuna; Beulah, ch. m. by Nutwood Wilkes-Pattie D.; Ted Hayes. Rockaway, rn. by Stoneway-(untraced); G. A. Pounder. Monteo, b. s. by McNeer-by Washington; John Renatti. Fred W., b. g. by Robin-Lady Lloyd; C. H. Widemann.

2:14 Class, Trotting, Purse \$800—6 Entries.

Lucretia, br. m. by Nazote-Lucyner; John C. Kirkpatrick. Berta Mac, br. m. by McKinney-Alberta; W. Parsons. Kinney Al, b. s. by McKinney-Mary A.; T. H. Ramsey. Yolanda, b. m. by McKinney-Moscovita; F. H. Burke. Queer Knight, b. g. by Knight-Messenger Almont; Frank Williams. Kenneth C., br. s. by McKinney-Mountain Maid; S. K. Trefry.

RED BLUFF HORSES MOVE TO WOODLAND.

Last week the veteran trainer Lou Rowley, and the well-known horseman T. N. Frary, moved their horses in training from Berendos Park, Red Bluff, to the Woodland Stock Farm, to take advantage of the fine track there to train their horses over. Mr. Rowley took the stallion Kinney Al by McKinney, that C. C. Crippen gave a winning race record of 2:14½ at Phoenix, Arizona, last year. Kinney Al is entered at Oakland, Chico and Sacramento, and through the Central California Circuit. He is said to be in fine order and should make a good showing in his races this year.

Mr. Frary has the five-year-old stallion Herbert Dillon by Sidney Dillon, a two-year-old filly by him, and a yearling phenom called Corning Girl that is by Loring 45,142, son of Nazote. Herbert Dillon has already worked miles below 2:20 and his first start will probably be in the 2:20 trot at the Oakland meeting. The filly Lata Dillon is also entered at Oakland, being one of the entries secured by Manager Benjamin for the two-year-old trot. The yearling Corning Girl is a pacer, and is only taken along for educational purposes. She has paced a half in 1:17½, but has never been sent that far at her best speed and she acts as if a mile equal to the 2:20½ of Belle Acton in 1892, and Paul D. Kelly in 1904, might be within her reach this fall. Corning Girl is owned by Supervisor Herbert Samson of Corning, California.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

RIFLE SHOOTING GROWING IN POPULARITY.

American military riflemen are to secure a new target practice should the new board on revision of the firing regulations for small arms adopt the skirmish system which has been so successfully tested at the school of musketry at Monterey, Cal., and in the Philippines, or the Australian skirmish system.

Capt. R. H. Allen of the Twenty-seventh Infantry, who is stationed in the Philippines, is one of the officers ordered to America to compete for a place on the army teams to shoot in the great national matches to be held at Camp Perry, O., in August, says the Los Angeles Times. Last year the navy carried off the national trophy, so this year the War Department called on the Philippines to send their most expert marksmen to the United States to try for places on the infantry and cavalry and two officers and three enlisted men were sent from the cavalry and six officers and one enlisted man from the infantry. The trip will take from six to eight months and all to compete for places on terms which will meet the teams from the navy and marine corps and forty States and Territories in the greatest rifle match America has yet seen.

Capt. Allen holds the records for shooting under the Australian skirmish system. Beginning at 600 yards he fired forty shots at the silhouette target, stopping at 200 yards. Out of these forty shots he made thirty hits. The total exposure of the silhouette was sixty seconds, but allowance must be made for the time it takes a bullet to cover the distance. This allowance is eight-tenths of a second at 600 yards and for the five halts amounts to about ten seconds. Therefore, Capt. Allen fired a shot every second and a quarter that the target was exposed and firing was possible and three out of every four shots found their lodgment in the head and shoulders of an "enemy" peering over an embankment.

In the Australian skirmish unlimited ammunition is allowed. The firing is at unknown distances and the "enemy" appears only long enough to fire a shot and exposes nothing but the head and shoulders, as would probably be the case in actual warfare. He is dressed in olive drab or khaki and his clothes mingle with the landscape and background so as to make him almost invisible at 600 yards. The men fire and he "ducks." They advance and the same maneuver takes place. By the time they have reached 200 yards it is safe to say that every man of the enemy who has poked his head above the embankment has been killed or disabled and the subsequent charge is attended with little danger. When the Philippine sharpshooters started this practice a total of fifteen shots on a figure was a big record. After several weeks of practice the team averaged twenty-five hits per man. No enemy could expose themselves over breast-works long enough to fire shots and live in the face of an attack by such sharpshooters.

The team also tried the "moving targets" in the Philippines, both in the division competition, where it was made a special feature, and in the practice for the international match. The moving targets are placed on a track and run back and forth across the range. The track undulates and by means of a drum-head and an engine the targets move at various rates of speed at the will of the officer in charge. They were colored black, khaki and green olive drab down to a dark green, the color of the grass. At the division competition they were the dark green, but olive drab was used on the skirmish run because of the difficulty in seeing the khaki figures at 600 yards. The moving targets are the head and shoulders as in the Australian skirmish, but are slightly enlarged. The kneeling figure of the ordinary silhouette is omitted.

When the team first began firing at the moving targets two hits in ten shots was considered good, but at the end from 50 to 75 per cent of the shots told.

They also use the disappearing targets on a system slightly different from the Australian skirmish. They are mounted on gas pipe with a handle at the end turned by a man with a stop watch in his hand. Starting at 600 yards the team advances on the double-quick until the targets flash up. Then the men drop, wherever they may be, and fire as fast as they can. Suddenly the targets drop and the men make another advance. Altogether there are seven halts, the targets being exposed forty seconds at 500 and 600 yards and thirty seconds at the other stops. They come up at unknown times and the men have to load while advancing at double time instead of quick time, as in the ordinary skirmish.

There is no question that for service the above or the Australian system is preferable to the American system of firing at fixed silhouettes of a group of two figures, one kneeling and the other prone. England sets aside about 60 per cent of its practice ammunition for this kind of work. It might not do for matches or for record firing, experts say, but for training it can scarcely be surpassed.

RIFLE PRACTICE IN THE SCHOOLS.

If the plans of the National Board for the Promotion of Rifle Practice and the National Rifle Association meet with the approval of Congress, a great impetus will be given to schoolboy rifle practice in the United States.

A tournament recently held in New York City met with such conspicuous success that when the board of directors of the National Rifle Association assembled in Washington it was unanimously agreed that Congress should be asked for an appropriation to further the work among the school children.

The marvelous shooting of the Annapolis cadets and the navy team, which was composed almost exclusively of young men, at Annapolis, coupled with that of the schoolboys at Creedmoor and Sea Girt and on the miniature range at the recent Sportsman's show, has demonstrated that lads from 16 years old upward can be taught to handle the military rifle with precision.

At that age boys are enthusiastic about guns and outdoor sport and it is proposed to turn their attention toward the use of the military rifle with the idea that as they grow older their fondness for this sport will increase and that on leaving the schools, colleges or universities they will join the National Guard or civilian rifle clubs and thus continue the work.

The national board has recommended to the Secretary of War that an item be inserted in the army appropriation bill setting aside \$100,000 for the promotion of rifle practice in public schools, colleges, universities and civilian rifle practice, including the cost of arms, ammunition, prizes and the necessary material and appliances therefor and for the expenses of indoor and outdoor competition among the students, and members attending or belonging to the same and the traveling expenses and pay of persons designated by the Secretary of War to superintend such instructions and competition. These are to be conducted in accordance with regulations to be prescribed by the Secretary of War.

Gen. Robert Shaw Oliver, Assistant Secretary of War, and president of the national board; Gen. James A. Drain, and Gen. George W. Wingate of New York, "the father of rifle practice," have been named as a committee to present the matter to Congress.

The National Board for the Promotion of Rifle Practice has made some important changes in regard to the national matches which will be held at Camp Perry, O., beginning Monday, August 24, 1908. Monday was fixed as the opening day instead of Wednesday, as last year, in order that the teams and range officials might have Sunday to rest and prepare for the strenuous days to follow. The preceding Friday and Saturday, August 21 and 22, will be set aside for preliminary practice, the use of the range being free to the teams.

To avoid controversies the naval militia has been included so that its members will be clearly eligible for places on the team. In the army matches members of the medical corps are forbidden to compete, as under the Red Cross regulations they are not supposed to bear arms or to be combatants, but for the purpose of the national match the term "organized militia" will be held to include the several arms, corps and departments which constitute it.

Model 1903 rifles, otherwise known as the "New Springfield," will be used, and this means the new rifles will be issued in time for spring practice. The ammunition will be confined to the service cartridge as manufactured and issued by the ordnance department, U. S. A. Teams will be permitted to bring ammunition to the match in original sealed packages.

Before the beginning of the match all ammunition will be turned over to the ordnance officer for issue to the teams at firing points as needed during the progress of the match. Each team will be issued the ammunition brought by it. This enables the team to order their ammunition from the government for the spring practice and the match at the same time, thus providing that the same ammunition will be shot in the match as in practice and preventing any teams from using superior ammunition. One reason for the change was that it is scarcely likely that private manufacturers will be able to supply ammunition for the 1903 rifles in time for spring practice.

The order of fire has been changed again. The skirmish run, which was first on the program last year, has been placed between the 800-yard and the 1,000-yard stages. The order of fire will be 200-low, 200-rapid, 600-slow, 800-slow, one skirmish run and 1,000 yards slow fire. Under the rules one-third of the members of a prize-winning team are disqualified for the next three competitions, and these four men must be those who have participated in the greatest number of national matches.

This rule has been qualified so that a person eliminated under it and who has been out three years and thus become eligible again, shall be considered as a new member. This means should the team again be a winning team his participation in former national contests will not count against him. For the benefit

of weaker States the rule requiring 75 per cent of military duty for members of the team is modified to permit States not heretofore competing to send teams whose members shall have 75 per cent of military duty for the preceding six months instead of one year, to their credit.

The board has also increased the number of medals for the individual match and will give twelve medals each of gold, silver and bronze, so that thirty-six competitors will receive medals instead of twelve as heretofore. The cash prizes remain the same.

In the pistol match, target A 1 will be used for slow, timed, and rapid-fire. At 200 yards it is more than probable target A will be used instead of target F. An important change has been made in the matter of skirmish targets. The silhouettes will be placed on a B target so that the base of the figures shall be one foot above the crest of the bank when the target is in place. The skirmish targets at Camp Perry last year were considered ideal, but as comparatively few ranges admit of such targets and all can be equipped with silhouettes on the B targets, the change was made for the benefit of all.

SHALL QUAIL BECOME EXTINCT?

I. H. McKim.

That noble game-bird, former furnisher of sport most royal—the mountain quail—is surely and swiftly passing from our midst, and unless strenuous measures are quickly and forcibly advanced, the time is very near when it will become an extinct bird.

The rapid decrease in the past four years is startling to anyone cognizant of it.

Where a few years ago one might go almost any day in autumn and secure the game limit in a few hours, last fall he could wander over the same ground all day without seeing so much as a trace of a bird.

The cause of their rapid extinction is attributable to several causes—first and foremost of which is the incessant war so mercilessly waged upon the young quail by that great mischief-maker, the bluejay.

Many nests are destroyed yearly by being trampled by sheep, but this seems rather unavoidable. It is seemingly impractical to attempt legislation upon that issue.

Many young and old birds perish in the vast forest fires which sweep through the wooded regions at intervals; but this is being in a great measure alleviated by the enforcement of the State fire laws.

The bluejay, however, over which we could exercise some control, is allowed to go on in his abominable work of rapine unchecked.

A few years ago the Kimball-Upson Company, being aware of the havoc wrought to the quail by jays, offered prizes for their scalps.

Many of the pests were slain, and there was a noticeable increase in the number of flocks in the hills that fall.

Now, this is a serious proposition to all lovers of field sports, and we should wake up and do something before the quail is entirely exterminated.

What will take their place to the busy man whose only recreation for the entire year is the few days he annually spends afield with dog and gun?

When any difference in the number of birds could be observed as results of the feeble efforts of a single corporation, how much greater results would be obtained were we to go at it with some system and with united energy?

We could right away eradicate the bluejay; the State Forester and his corps of co-workers will minimize the yearly reduction of fire, and later we may do something about the sheep.

There are several minor causes of destruction, but they are of much less magnitude and can be easily lessened.

Let the gun clubs and all others interested in the wild sports of the State arouse themselves and see what can be done to protect our king of game birds.

Considerable complaint is being made by the disciples of Isaak Walton in that vicinity regarding the Miller & Lux dam at Mendota, which is so constructed as to prevent salmon from coming up the river to spawn. Salmon when they leave the salt water go as far up the rivers as possible, depositing their spawn above the regions where bass abound so that the young fish will not fall prey to the bass. The law provides that all dams across streams frequented by salmon shall be provided with ladders so constructed that the fish can get over the dam. It is a well known fact that salmon will jump eight and nine feet over an obstruction to get up a river.

There is a ladder at the Miller & Lux dam near Fresno, but it is said to be inefficient, and fish are congregating there by thousands, unable to get over. The result is bound to be disastrous. The spawn can not be deposited in proper places and the hatch as a result will be diminished. Moreover, salmon fishing up the river is out of the question, as there are no salmon to be speared.

George R. Andrews of Fresno, who is interested in the matter, stated that the Miller & Lux people had been asked several times to install a proper fish ladder, but so far nothing of the sort has been done. Unless action is taken soon, it is claimed, the State Fish Commission will be asked to interfere.

Prominent Olympia sportsmen are taking active steps to organize a rifle and revolver club, which will be affiliated with the National Rifle Association. Capt. Liggett, inspector of rifle practice of the militia, is giving the project every encouragement, as is Adj. Gen. Hamilton.

A MOUNTAIN SHEEP HUNT IN TEXAS.

In the current number of Sports Afield appears a graphic description of a mountain sheep hunt in the Diablo mountains beyond Van Horn, written by James R. Harper, Judge of the Thirty-fourth District Court. The story loses none of its piquancy by the long deferred publication. Such a hunt would be impossible at the present time, as the game laws of Texas protect these fast disappearing denizens of the mountains. The story follows:

On the night of September 28, 1902, the Western Union messenger boy handed me a telegram from Van Horn, El Paso county, Texas, which read, "Come to-morrow. Am all ready for the trip. Beach."

I arrived promptly at noon and at the depot met my friend. He, being a man of few words, said: "Eat your dinner and the ponies will be ready." Before I had fairly finished dinner, the Mexican boy announced that all was ready. I had to delay the game for a few minutes while I changed my rig for a hunting costume and strapped my 30-30 Winchester on the saddle; then off we went at an easy canter, such as the Texas pony alone knows how to assume when there is hard riding to be done. After two hours we came to a range of high precipitous mountains, apparently rising right out of the level plain and undoubtedly the work of volcanic eruption, from which the other half had been broken and thrown into space or sunk to fill the crevice, leaving as rough looking a cluster of granite-capped peaks as one would care to see, much less to climb. After tying our ponies with long lariats, so they could graze on the grass so abundant in all that part of the country, we began the ascent—peering into and searching with eye and field glass every cap-rock, overhanging cliff and crevice for the wary animal. Up and up we climbed, often on hands and knees, and then up a precipitous wall, shoving our rifles ahead of us when a foothold and a handhold at the same time were at a premium. Though we hunted until sundown, not a sheep was seen nor a sign less than two weeks old. This was repeated the next morning, with the result that old signs showed plainly that they had not been in that section for many days—not since the last rain a month before. This demanded a conference, the minutes of which would show the following resolution:

"Whereas, The sheep aforesaid have gone out of this section, up the range, it is unanimously decided that we will follow them and camp on their trail until we get blood."

A wagon was now hooked up and a Mexican driver secured and directed to go to a point ten miles on and strike camp for the night. And away we went again on the trail—for "meat" this time, as we expressed it—but in fact with slight hope in the heart of either of us of ever getting it. Tuesday, Wednesday and Thursday passed with the same story—Gone out, but where? This was becoming serious; so Thursday night, when the usual auspicious moment arrived, I refused refreshment and stood pat on it. The old veteran almost dropped dead—a thing unheard of, said he. "No, sir," says I—"not another drop until we get fresh meat in the frying pan; and neither will I wash my face, for there is something wrong here. Luck is against us. No sir! not another drop until the venison steak is in the pan!" Then the old fellow entered into the spirit of the occasion; his bright old eyes began to dance; a hearty handshake followed; the bottle was put back in the grub box with a lingering look; we gritted our teeth and all that part was ended. I had good reason to believe that he "renigged" on me later but not one word was uttered by me to indicate that I knew or suspected; for the blood was not so warm and free in the veins of the old veteran as in my own and a little "for the stomach's sake" was good for him. Luck comes to all who faithfully and conscientiously observe the signs and labor diligently; but the old dame came nearly waiting too long in this case, for on Friday, after a hard morning's riding and climbing and the usual disappointment, we were caught on top of the highest peak in a hard storm of sleet and cold rain. Wet through to the skin, and after trying many different shelters in vain for protection, we finally faced the storm and went back to our horses, got the saddle-blankets and spread them over a pinon bush, and, getting under this rudely improvised tent, started a fire, before which we dried our clothes and got the chill out of our bones. Then once more we mounted our horses—only to return to camp with the same old story, completely dejected. That night after we had rolled up in our blankets we laid out the route for the next two days, Saturday and Sunday—agreeing that if we did not find them by Sunday night we would give it up and go home and wait until near Christmas before trying it again. Saturday morning we rolled out of our blankets at the first sign of day, the signal coming from the old man. "Get up, Judge—we get sheep to-day." And his words, carelessly uttered, were indeed a prophecy.

We were soon in the saddle. The Mexican was directed to camp at the windmill fifteen miles on for the night and was further instructed to closely watch the mountain side as he drove along for a smoke—"For if we kill a deer, we will set fire to a dagger plant and the smoke will indicate the point to you." Sure enough, while riding toward the canyon where we had planned to put in the day, we suddenly rode up to within fifty yards of three blacktail bucks. We were out of our saddles in a jiffy and both opened fire. My first bullet brought down a fine fellow with five points. We soon had him behind the saddle and

went on our way, singing "Johnnie, fill up the bowl!" We were soon at the highest point to which our ponies could climb with safety. We tied one, hobbled the other and fired several dagger plants as a signal to our Mexican, and then on up the side to the most precipitous peak we had yet hunted—namely, Victory peak of the Diablo mountains (named after the famous Apache chief Victoria, who with his band of warriors was at one time surrounded by a company of U. S. soldiers upon this very peak.) It was thought that the red men could not escape; and after waiting five days the captain sent up a scouting party to ascertain their exact whereabouts. But the signs plainly showed that the whole band had rested a few days and then gone on across the canyon—horses and all—where it seemed impossible for white men to go, even with scaling ladders. This mountain peak juts out prominently for about a mile into the level plain, being connected to the main range by a very narrow neck which separates the two canyons lying on either side. The side of the mountain below the cap-rock is almost entirely barren of vegetation—nothing growing there save an occasional Spanish dagger and now and then an evergreen bush, called the desert evergreen. Up the side of this vast granite peak is one solid rock shelf after another, extending the entire distance around its face. These shelves are some 200 yards apart, being cut in two by arroyos or draws starting from the top of the peak and running to the bed of the canyon far below. By noon we had climbed onto sure footing in the first saddle of the ridge and turned to look back out onto the plains below for the wagon—wondering if our Mexican would see our signal and come for the deer. While standing there, my friend said, "Judge, what would it be worth if I should show you a bunch of sheep on this mountain side?—a dollar?" I said, "Yes—a quart of the best in El Paso." While saying this, we both turned and looked up. It was yet a full mile to the top of the peak, almost straight up. Almost with the same breath that had offered the quart, I said, "There they are now!"—my eyes having rested upon them almost instantly upon turning around. And truly they were in all their grandeur, about 1,000 yards away, on a level with and looking directly at us, eleven in all, as we found on bringing the glasses to bear upon them—five big horns and six does and fawns. It was plain to be seen that they had sighted us and that all they now required was to make up their minds that we were enemies, when they would be off like the wind. Down we slowly went out of sight behind the dagger plants, flat on our faces, to there remain in the hot sun for a full hour, until the least weary watchman had ceased to be suspicious and had grazed quietly out of sight over the range in the draw beyond. While watching, we had many boyish wrangles as to who should have the glass. My friend wanted it because I could see better and I wanted it because I had never seen one before and he had seen and killed many. One of us would look while the other stuffed down crackers, cheese, etc., and poured water on top of it from the only canteen we had brought along. After they had passed out of sight, hurried plans were devised for getting a shot. Should we go over the mountain and come over above them? Or go down the side into the canyon below and then up, so as to get them when they tried to run up the steep mountain side? But we found serious disadvantages in all these plans and finally decided to stay on the bench that ran on a level around the mountain to them—thus enabling us to have a good chance at them either way they might run, as well as saving us the hard work of climbing up and down the steep mountain side, which we would have to do if we undertook to stalk them by any other route. We then began to slowly creep around the mountain toward the spot where we had last seen them.

After we had proceeded a short distance the old gentleman decided that the canteen we were carrying (which contained all the water we had with us and all we could hope to get until we reached camp that night) was making too much noise, as it was dangling from the neck, hitting a rock now and then or his gun; and so, instead of leaving it where we then were and returning for it later, the old gentleman in his excitement impulsively poured all the water out and the next thing I noticed he was dangling an empty canteen along and making more noise than before; but he tightened it around his waist as we scrambled on around the mountain side over loose rock, prickly pear and Spanish daggers, carefully testing every footing before we placed our weight upon it, for nearly an hour before we came to the spot where we had last seen them. Nowhere could they be seen. Almost out of breath, yet scarcely daring to breathe, we sat down, feeling that they had heard us and had scampered away—I especially feeling that we had done very badly to act so blunderingly, after finding such a fine bunch of sheep. I whispered to him that I wished I had taken a shot from where we had first seen them. We sat there, whispering our different impressions as to where they could be and searching the mountain side and canyon with the field glass, when suddenly the old veteran reached over in an excited way, yet slowly, and took the glass from my hand. As soon as he sighted, my eyes took in at once, some 350 yards away across the draw, the head and horns of one of the old bucks, peering as cautiously as a mouse over the sharp backbone directly at us. Passing the whispered word, "Don't move—not even a hand!" he sat there and directed his glass at the wary peeper. What was to be done? Would he come over or would it be best to try a shot at him

where he was? We sat there nearly an hour, as still as it was possible to be under the circumstances, scarcely daring to straighten a cramped leg or remove an aching arm or muscle, while that bighorn gradually edged over on top of the ridge in sight to his shoulders. Then came an old doe and then the head of a this year's fawn—peeping as slyly as its bright and intelligent little face apparently could—and then the whole herd followed one after the other, until the last one of them stood all huddled up together on top of the ridge—the biggest and oldest buck being the last to join the band. Age and experience had undoubtedly taught him to be extremely cautious. All were standing with rigid muscles as stiff as statues, with necks gracefully bowed and eyes distended, bright and piercing, as could be seen with the glass—all eyes being focused on us in a strenuous effort to penetrate the mystery of the strange two-legged creatures who had come within their domain without invitation. We were undecided what to do. We knew that it was all on a shot and a very doubtful one, because of its being across the arroyo and so far that the glasses were necessary to make them appear of normal size. After several minutes of whispered conference, they became restless and apparently were making ready to run off up the backbone toward the highest point of the mountain. Then it was that I said, "Let's shoot and then make a run across the arroyo to the ridge where they stand and try to get in a parting shot before they get out of range."

At the word "Shoot!" we both fired. The rifles cracked so near together that we could not tell whether more than one had fired. Over the ridge—out of sight in the twinkling of an eye—went the whole bunch; and down the side of that arroyo the old man jumped as nimble as a boy of 16—forgetting his age, his broken hip of only one year before, and evidently intending to make a new 400-yard sprinting record. I was not so quick to act, for I was undecided whether to go with him or up the mountain side toward the top to an elevated spot whence I might see them more clearly. Whilst still standing there, undecided as to which course I should pursue, there came back from the high mountain peak after peal of echo, which seemed to roll and reverberate from the monster mouth of that great canyon to the utmost confines of its granite-capped peaks and back again, as if the very vitals of the earth had been jarred loose, and with it the whole band whipped back on our side of the ridge—apparently straining every nerve to escape from the awful monster coming from the other direction. Then began the quick, accurate firing that laid low four out of five of those big bucks, one of which had horns measuring over 17 inches in circumference and 38 inches in length, outside measurement. As we stood there watching the balance of the band clambering away, some up and some down the canyon, I gave the old-time rebel yell again and again, to relieve the pent-up feeling of elation so seriously threatening to choke me, and my friend dryly remarked, "That sure calls for refreshments, Judge."

WILD BEARS.

A fact known to some people is that bears—wild bears—are to be found within a few miles of Los Angeles. According to data furnished to the passenger department of the Santa Fe by Professor Charles F. Holder of Pasadena, who is an authority on game and fishing in Southern California, there are bears in the mountains a few miles to the northeast of Mount Lowe.

No other large city of the country is so close to the haunts of wild game, large and small, and to game fishing as is Los Angeles. This fact is emphasized by a map and some literature just issued by the Santa Fe for the guidance of sportsmen who come to this region.

The map, which is prepared from data furnished by Professor Holder, shows the exact locality where all kinds of game and wild fowl may be found, as well as the best fishing grounds, from Santa Barbara to Lower California.

Besides, to the northeast of Mount Lowe, bears are to be found in the vicinity of San Antonio Peak, and south of Banning in the San Jacinto region. They are more numerous in the northwest part of Los Angeles County, along San Francisco creek, and out in Santa Barbara County, in the San Rafael mountains.

Mountain lions and wildcats are numerous in some localities on the northern slope of the San Bernardino and San Gabriel ranges, in both Los Angeles and San Bernardino counties, while deer are found in the San Jacinto region, east of Cajon Pass, on the north side of the Sierra Madre, in Los Angeles county, in the Santa Monica mountains, and at a number of places in Ventura and Santa Barbara counties.

A few antelope also are found in the Sierra Pelona, in the northern part of Los Angeles county, and over the line in Kern county.

Eagles and California condors are found in a few places, and such game as quail, doves, coyotes and foxes are very numerous along the foothills and in the mountains of this entire region.

Mountain sheep, which are becoming rare, are found across the international line in the mountains between the Pacific and the Gulf of California, south of San Diego.

PHEASANTS, GROUSE AND WILD TURKEYS.

A few years ago a large number of Mongolian pheasants were liberated in the vicinity of Chico in the creek bottoms and several private groves. The birds thrived, enough so, that now, so report has it, they are plentiful enough to tempt the attention of unscrupulous individuals who have recently been killing the birds ruthlessly and in violation of the law for the protection of pheasants and other imported birds turned out for propagation.

"Don't kill Hungarian grouse or wild turkey," is the legend printed in large black letters across the new copy of the county game laws just issued by County Clerk Charles Post, of San Bernardino, and it has sent more than one visiting huntsman back to the County Clerk to inquire specifically where the wild turkey may be found in that county, the questioner being usually amazed on reading the notice contained in the legend referred to.

There are no wild turkeys in the county so far, but the day is not far distant when the mountains will probably offer these birds to the huntsman's gun, though latest reports from W. E. Van Slyke are not of the most encouraging character. Van Slyke is now at Rosena, Mexico, under commission from the State to secure wild turkeys.

It seems that he has struck the turkey grounds in the midst of the hatching season, just when the young birds are too small to bear confinement or shipment, and when the old birds are doubly cautious, and the Indians are not enthusiastic in the hunt.

It will probably be two months more before the capture of the birds can be undertaken or those now hatching be shipped safely, but the last word received from Mr. Van Slyke was to the effect that he had started off to secure help with a view of getting together a consignment of 50 old birds to ship at once.

In the meantime he is keeping the State Fish Commissioners informed as to the situation. Though this development is somewhat disappointing in some quarters, those who understand the wild turkey declare that there is no reason to take the failure of the trip to heart, as with the passing of the hatching season the birds shipped will be more healthy and strong than if taken at this time.

The Hungarian grouse recently liberated in San Bernardino county, are reported as having set up housekeeping in the Yucaipah valley and down by Etiwanda. With good luck the grouse will be plentiful in five years more, it is hoped.

That the Federal Government is trying hard to prevent the utter annihilation of the big horn, or Rocky Mountain, sheep, is evidenced by the fact that it has placed the penalty for the killing of one at \$500. Will Folfe, a former San Bernardino boy, who for some time has been employed as superintendent of the Brooklyn mine at Dale, recently came in from the desert. While in Highland Thursday he stated that one morning a band of five passed between the buildings of the company at Dale. The big horn is one of the big game species that in days gone by, before the advent of smokeless powder and high velocity firearms, was wont to roam the hills and vales of the inter-mountain country in comparative safety. That day is passed; witness the extinction of the vast herds of buffalo, slaughtered for their hides; the passing of the gazelle-like antelope, the practical wiping out of the grizzly. Guns that kill or wound at a mile have proved their undoing, and the only specimens to survive are found among the inaccessible peaks and crags of the mountain fastnesses of the desert. That the prohibitive laws thrown about them by the Federal Government result in making them less suspicious of their mortal enemy—who should be their best friends—is proven by the passing of this band of big sheep within a stone's throw of a mining camp. They are among the most wary of all the so-called big game.

Although it is early in the season the county has already paid out this year \$125 as bounty on sparrow eggs. The price paid is five cents a dozen, and this means that the youngsters have brought in 30,000 eggs, since the beginning of the season, says the Salt Lake Herald. According to Frank Higginbotham, county auditor, the county paid out \$500 last year as bounty for sparrow eggs, and he expects this year that the amount will be considerably more. The opinion prevails that the bounty has been the cause of a notable decrease of the number of sparrows in this section, and that if kept in force long enough the little birds will be gradually exterminated.

Spokane sportsmen returning from southern Montana bring stories of wild animals which are somewhat out of the ordinary. They tell of a big mountain lion which has given the stockmen in the vicinity of the Ruby range no end of worry. The animal has been seen several times and men with heavy rifles have shot at it, but without success. The country is rugged, in many places totally inaccessible, thus affording the lion ample protection. A sawmill operative from the head of the creek reported fresh work of the lion. A horse had been killed and dragged through the snow a distance of eighty rods. The lion's ability to drag a full-grown horse, weighing upward of a thousand pounds, bespeaks its size and strength. As soon as the roads are passable an organized effort will be made to kill or trap the lion.

CATALINA TOURNAMENT PROGRAM.

The Tuna Club of Santa Catalina has issued the announcement of its tenth annual angling tournament from May 1 to October 1, inclusive. The weighing committee this year will consist of T. S. Manning, chairman; T. McD. Potter, L. P. Streeter, E. H. Brewster and Gilmore Sharp.

For tuna there will be five cups, one medal and two prizes, as follows: Montgomery cup, presented by Montgomery Bros.; Tuna Club cup, presented by the Banning Company; Burn' tuna cup, presented by Colonel Dan M. Burns; Potter cup, presented by Thomas McD. Potter; Tuna Club gold medal, presented by the Tuna Club; Morehouse tuna cup, presented by Colonel C. P. Morehouse; Vom Hofe prize, rod and reel, presented by E. vom Hofe, New York City; Pfueger prize, reel, presented by J. E. Pfueger.

For largest swordfish of season, silver loving cup, presented by Professor Charles F. Holder.

For exceeding the club black sea bass record, silver loving cup, presented by the Tufts-Lyon Company.

For the largest black sea bass of season, gold medal presented by Rider & Macomber, Pasadena.

For largest yellowtail of season, gold medal, presented by the late John F. Francis.

For largest yellowtail of season, silver loving cup, presented by Arthur J. Eddy, Chicago.

For largest yellowtail caught by lady, silver loving cup, presented by S. Nordlinger & Son.

For exceeding club white sea-bass record, gold medal, presented by C. H. Harding, Philadelphia.

For largest albacore of season, weighing over forty pounds, silver medal, presented by L. P. Harding, Philadelphia.

The Three-Six Club tournament will be held under the auspices of the Tuna Club. Thomas McD. Potter, the founder, will present the club with a cup on which the names of the anglers catching the three largest fish of the season will be engraved each season. Roy F. B. Shaver will present a Three-Six split bamboo rod to the angler catching the largest yellowtail of the season. Fish, yellowtail; three degrees, 18, 24 and 30 pounds; rods, six feet; weight, six ounces; six thread line.

The tuna tackle specifications are as follows:

Blue Button Class—Rod to be of wood, consisting of a butt and tip, and to be not shorter than 6 feet 9 inches over all. Tip not less than 5 feet in length, and to weigh not more than 16 ounces. Line not to exceed standard 24 thread.

Red Button Class—Rod to be of wood, consisting of a butt and tip, and to be not shorter than 6 feet over all. Butt to be not over 14 inches in length. Tip not less than 5 feet in length and to weigh not more than 6 ounces. Line not to exceed standard 9 thread.

The Potter tuna cup, the John F. Francis medal, the Eddy yellowtail cup, the Nordlinger ladies' cup, the Streeter albacore medal and the Harding bonita cup will be competed for under tackle specification of the red button class.

The largest leaping tuna was caught by Colonel Morehouse in 1900; weight 251 pounds.

The largest yellowfin tuna, sixty pounds, by A. J. Eddy, in 1906.

The largest black sea bass, 436 pounds, by L. G. Murphy, Converse, Ind., in 1905.

The largest yellowtail, forty-eight pounds, by R. F. Stocking, Los Angeles, in 1900.

The largest white sea bass, sixty pounds, by C. H. Harding, Philadelphia, in 1904.

The largest swordfish, 125 pounds, by Edward Lleyellyn, Los Angeles, in 1903.

The largest albacore, 41¾ pounds, by A. B. Cass, Los Angeles, in 1907.

The albacore and the yellowfin tuna were caught under red button specifications.

Peters Points.

The tournament at Dallas, Texas, May 19th-21st, proved to be almost a clean sweep for Peters factory loaded shells. Mr. L. I. Wade won high professional and high general average, 560 out of 590, and Mr. H. E. Poston was fourth professional with 537. Mr. J. S. Day won high amateur average the first day, 197 out of 200; Mr. E. D. Chadick high amateur the second day, 178 out of 190. Mr. Day won the Battleship cup, breaking 50 straight in the race, and 25 straight in the shoot-off.

In the Southland Hotel handicap Mr. Fowler tied for first, with 49 out of 50. During the tournament Mr. H. E. Poston made a run of 121, and Mr. L. I. Wade a run of 102. All these gentlemen shot Peters factory loaded shells.

High amateur average at Thornville, Ohio, May 13th-14th, was captured by Mr. Lon Fisher, who broke 283 out of 400. Mr. Grubb tied for second amateur with 380. Both gentlemen shot Peters factory loads.

Mr. Louis T. Spinks won high average at the following three shoots, during the week May 11th-16th: Lufkin, Tex., 120 out of 125; Nacagdoches, Tex., 72 out of 75; Houston, Tex., 95 out of 100; all shooting Peters factory loaded shells.

At Watertown, Mass., May 9th, Mr. E. C. Griffith tied for first amateur and first general average, with 173 out of 180, winning in the shoot-off with 24 out of 25. Mr. Griffith was also high man in the team race, 96 out of 100. Third amateur average was won by Mr. R. D. Hodson, 166 out of 180. Mr. Sim Glover was first professional, 169 out of 180; Mr. W. B. Darton tied for second, 168 out of 180.

HUNTING BEARS IN ALASKA.

"There is good bear hunting on the Alaskan peninsula. I got seven grizzlies one afternoon, all of them within a quarter of a mile and not over half an hour's time," writes Black Jack Lemm. "The smallest of them was a three-year-old, and I should say they averaged 2,000 pounds. It took thirteen cartridges to bring the seven down."

Grant G. Chase, hunter and prospector, who for eleven years has spent most of his time in the Alaskan wilds, crossed his knees in reminiscent fashion at the Sherman House that morning and told a few bear stories on the eve of returning to his favorite haunts.

Then for corroboration there is the testimony of Mrs. Chase, who for several years has shared her husband's life and who has kept a diary wherein is faithfully recorded the number of bear, caribou, sea otter and other fur-bearers brought down daily and careful measurements of the biggest skins.

"I suppose I have killed 500 or 600 bears altogether," continued Mr. Chase. "Of course a good deal of my time has been given to some copper properties I am interested in or the number might have been much larger. At one time and another I have hunted bear pretty much all through the Rockies, but there isn't another place to equal the Alaskan peninsula."

"Big? Well, I'll tell you. Those bears up there are the largest in the world. A full-grown male weighs from 2,000 to 2,500 pounds. The skin of the largest fellow I ever killed measured thirteen feet four inches long and thirteen feet three inches spread from toenail to toenail. I can lift as much as the average man, but I'm telling it straight when I say that with Mrs. Chase to help me I couldn't turn that fellow over on his back to skin him."

"Twenty feet is the nearest a bear, bent on mischief, ever got to me. An old female, whose cub I had brought down, came for me one day and she was mad. She was sixty or seventy yards distant and in a bunch of alder when I took my first shot at her. She got up and came out in the clearing and then she saw me and came for me in earnest. I worked my gun pretty rapidly and the shots took effect. She was about six paces away when she dropped."

"Mrs. Chase and I got a scare once, though, in rather a ludicrous way. I had three camps in a lonely region where for three years Mrs. Chase never saw a white woman. I had put up 'bavrais,' or houses, of drift wood, the only kind available. We were going from one camp to another when I brought down a bear."

"We were in no hurry, so we stopped, built a fire and had some lunch. After lunch—about an hour after the shooting—we went down into the gulch where the bear was lying. Mrs. Chase was carrying an aluminum teapot. I got her to help me turn the bear over, and I was about to remove his hide when the big fellow suddenly came to life."

"You should have seen Mrs. Chase go up that hillside. The best of it was, in spite of her haste, she took time to rescue her teapot. I believe I jumped about twenty feet myself. If that bear had been in shape to do damage there might have been some trouble—but he wasn't. As a general thing there isn't much adventure—it's too easy."

While Senator W. J. Bell was in Carson City recently he made arrangements with Fish Commissioner Mills to send a supply of young bass and trout to be planted in the Humboldt river near Winnemucca. This is good news for local fishermen, as the river should be restocked with fry every year. Fishing in the river this spring has been better than for many years past and some good catches of trout have been reported.

More Winchester Landslides.

As usual, the shooters of Winchester products, the Red "W" kind, carried off the premier honors at the Walla Walla, Washington, Sacramento and Vallejo, California, inanimate target tournaments. At Walla Walla the high professional average was made by Mr. John S. Boa shooting a Winchester repeating shotgun and Winchester "Leader" shells, his score being 557 out of 600. The first, second and third high amateur averages were also captured by shooters using the time tried and reliable "Leader" shells. Mr. S. L. Becker, first. Score 564 out of 600. Mr. A. P. Bigelow, second. Score 558 out of 600. Mr. E. J. Chingreen, third. Score 557 out of 600. Of the eight trophies competed for at this tournament, six were won by shooters using "Leader" shells, as follows: Multnomah Medal, won by Mr. A. Bayhouse, Anaconda Du Pont Cup, won by Mr. L. A. Lehrbas, Globe Trophy, won by Mr. A. Bayhouse, Walla Walla Brownlee Diamond Medal, won by Mr. A. P. Bigelow, Individual Championship Diamond Medal, won by E. J. Chingreen. Three Man Team Trophy: Won by Messrs. Becker, Bigelow and Sheen, all shooting the "Leader" shells. It is needless to state that the majority of the shooters at this tournament shot "Leader's", and a great number used Winchester repeating shotguns.

Of the twenty-eight shooters that participated in the Vallejo tournament, twenty-six used Winchester "Leader" shells, and a large number Winchester shotguns. The following trophies were shot for at this tournament and captured by shooters using "Leader" shells. Ballistite Trophy: Won by Mr. D. S. Hirschel. Senate Trophy, 20 yards rise, Won by Mr. Walter Roney with a Winchester "pump" gun and "Leader" shells with the splendid score of 70 out of 75.

THE FARM

THE WOOL OUTLOOK.

A livestock paper has the following to say about wool prospects:

Wool isn't doing well. The fact cannot be concealed. It is a buyers' market, and, seemingly, they are not anxious to buy.

Woolen mills are all running at small capacity. The world is not producing an over-supply of the staple, shelves are bare and future markets are likely to show animation, but the fact is now patent that the wool grower, whose circumstances force him to realize at an early date, must be prepared to make concessions.

Speculators lost heavily on last year's crop; this time they are going to make a strenuous effort to recoup their losses. In other words, if they buy the 1908 clip promptly it will be at prices justifying expectation of a profit.

The logic of the situation is plain. Immediate sale means sacrifice. The market will be on bottom for several months to come. Ultimate revival is certain, and the grower who can afford to wait will be money in pocket.

All signs point to a complete reversal of last year's market results. This season the low spot will be reached early. After the presidential election trade must revive and wool will benefit.

Turpentine is sometimes advised for coughing pigs. Dr. Hartwig says the proper dose is one teaspoonful for each eighty pounds live weight, and it should be given in slop three mornings in succession, and again the following week, where worms are known to be present. It is a fairly effective remedy for worms, but copperas (sulphate of iron) seems even more effective if given in a dose of from half to one dram daily in slop. If the cough is due to lung worms

FOR SALE.

Young bay horse; sound, not afraid of anything. Lady can drive him. By Seymour Wilkes. Reason for selling, owner going away. See him.

Burton's Casino Training Stables,
24th Ave., near Fulton. Take Chute cars.

Dividend Notice.

THE GERMAN SAVINGS AND LOAN SOCIETY, 526 California street.—For the half year ending June 30, 1908, a dividend has been declared at the rate of four (4) per cent per annum on all deposits, free of taxes, payable on and after Wednesday, July 1, 1908. Dividends not called for are added to and bear the same rate of interest as the principal from July 1, 1908.

GEORGE TOURNEY, Secretary.

(strongylus paradoxus), turpentine will be of most use, but nothing is specific in this trouble. General feeding is most important.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For — It is penetrating, cooling and healing, and for all Old Sores, Bruises or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Perfectly Safe and Reliable Remedy for

BEST FOR LEAST MONEY

JOHN MIDDLING'S

High Grade

Sulkies

and Carts

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. today, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Earth for Road
or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

INTERNATIONAL STOCK FOOD CO., Minneapolis, Minn.
CASH CAPITAL \$2,000,000 ——— LARGEST IN THE WORLD

M. W. Savage, sole owner of "International Stock Food," and also of "International Stock Food Farm," positively guarantees that His World Famous Champion Stallions, Dan Patch 1:55, Cresceus 2:02 1/2, Directum 2:05 1/4 and Arion 2:07 1/4, and his brood mares and colts eat it every day. You are specially invited to visit this Great Harness Horse Breeding Farm ten miles from Minneapolis, and see the practical results of the every day use of the greatest purely vegetable animal tonic ever used on a farm. It is constantly used and strongly endorsed by over two million of the most up-to-date Stockmen and Horse Breeders of the world.

Dan Patch 2:05 1/4, the fastest and fastest green Pacer racing in 1907, has eaten International Stock Food every day for over two years. This remarkable pacer was sired by Dan Patch 1:55, has paced in 2:03 1/4 and promises to be the Next Two Minute Pacer. Dan Patch 1:55, the champion pacer and fastest Harness Horse the world has ever seen is proving to be a Wonderful Sire of uniform speed. Watch his list as proof that he is one of the Greatest Sires in all horse history. If you raise a Dan Patch colt you have an Absolutely Sure Winner. **Dana Patch just sold for \$10,000.00.** From a Good Mare you may raise a Dan Patch colt that will bring you from \$10,000.00 to \$20,000.00.

THE GREAT ANIMAL TONIC
The Kind That Dan Patch Has Eaten Every Day since 1902 and during this time Dan has broken the world's record 12 times and Astonished The Entire World with his wonderful condition, endurance and speed. Try It For Your Horses. Up to the close of 1907 Dan Patch has paced 10 miles averaging 1:56 2-5 and 20 miles averaging 1:57 2-5 and 31 miles averaging 1:58 1-10 and 62 miles averaging 1:59 68-100. These miles were paced over all kinds of tracks and in all kinds of weather. Dan is faster than ever. **Look Out For A Mile in 1:54 during 1908.** The combined records of all pacers and trotters that have ever lived do not equal Dan's record. **International Stock Food** tones up the system, purifies the blood, greatly aids digestion and assimilation and causes animals to obtain more nutrition from all grain eaten. It tones up and permanently strengthens the entire system, keeps stock healthy and saves grain by aiding digestion. It gives more "nerve force" which imparts more speed for horses. **It Will Make Your Horse Two To Five Seconds Faster.** We guarantee 250,000 Dealers to Refund Purchasers' Money if It Ever Fails. **NAME THIS PAPER** and we will ALSO MAIL YOU FREE A Large Colored Lithograph showing Farm, Stable and Fine Pictures of the Four Stallions named above. These Beautiful Pictures are made from life. **YOU WILL BE PLEASED WITH BOTH PICTURES.**

According to Professor E. Kohn-Ahrest, heat is the only agent of preservation of milk allowable from a hygienic standpoint. Milk obtained from healthy cows under sanitary conditions, if pasteurized immediately, will keep for at least 24 hours at ordinary temperature and longer at lower temperature. If the milk is to be preserved for a considerable period it must be sterilized. Milk from tuberculous cows contains products of secretion from the tubercle bacillus that are not destroyed by heat. It is not definitely known at present whether these products are innocuous or not, and consequently it is impossible to state whether the milk from tuberculous cows is harmless or not, even if it has been pasteurized or sterilized.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best individuals on the Coast. Write for particulars. Address—

3-IN-ONE REEL REASONS

3-in-One keeps all fishing tackle in perfect order. Reels oiled with 3-in-One won't stick or hang at critical moments. They always work easily and surely. 3-in-One will not gum, turn black or sticky.

3-in-One prevents rust on steel rods, keeps joints and connections clean and smooth, preserves wooden rods, too, making them tough and pliable.

Draw your line, silk or linen, through rag moistened with 3-in-One. Makes it stronger and last longer. Will not rot, twist or tangle, preserves, lines, nets and traps in either fresh or salt water.

FREE Try 3-in-One at our expense. Write for liberal free sample and booklet. **3-IN-ONE OIL COMPANY,** New York

"SAVE-THE-HORSE" SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

The National Bank of Port Deposit

PORT DEPOSIT, MD.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: As a lover of the horse I want to tell you my experience with "Save-the-Horse" Spavin Cure.

Last August I purchased of you a bottle of "Save-the-Horse" which I used on a horse twenty-four years old and so lame that he could not go twenty feet without resting the spavined leg. He was useless, as he could not trot one step and could not keep up in team work.

After using one-half a bottle of "Save-the-Horse" I consider the horse absolutely sound. Since last October the horse has been used constantly on my farm and as a driver, and no one could tell that he had ever been lame. The remainder of the bottle cured several cases of scratches and took two large bumps off another horse.

I now have a very fine five-year-old horse that by hitting his head on a low beam, just back of the ear, and about three inches from it, has caused a large lump to appear. Have you any remedy or treatment that you could advise? If so please let me know as I am anxious to have the animal.

I never hesitate to recommend your spavin cure as I know from actual experience what it will do.

Yours very truly, *C. W. Beckwith*

A. W. MCKAY TRAINING STABLES.

Fayetteville, Tenn., May 20, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: I used a bottle of "Save-the-Horse" last season on my mare, record 2:18 $\frac{1}{4}$, for bowed tendons. Made the treatment while racing and was well pleased with the results. I now have another case and you may send me a bottle same as before.

Very truly,

ALEX W. MCKAY.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

\$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

SUPERIOR TO COPAIBA & INJECTIONS
SANTAL MIDY
RELIEVES IN 24 HOURS

Washington McKinney 35751

Lady McKinney by Washington McKinney trotted a mile in a race on March 21st at Pleasanton in 2:12½, the fastest mile ever trotted on that historic track in a race. McKinney Belle, four-year-old, trotted a mile in 2:26 a few days later. Ray McKinney a mile in 2:24, Fabia McKinney in 2:25. Wednesday, April 29th, Belle of Washington trotted a mile on the Stadium track in 2:23. Reed McKinney and Rex McKinney a six-year-old team, driven for the past two years by a lady in Santa Rosa, which has been turned out for six months, was taken up last Friday and driven one-eighth at the Rosedale Stock Farm track, one trotted in :19, :19½, and :19, the other in :18¼, :18, :17½, and :18. Neither of these horses ever had a single workout in their lives. They will get the best of training from now on. John Quinn has a five-year-old son of Washington McKinney at Sacramento which has trotted in 2:22. Dolly McKinney, owned in Oregon, the owner writes can trot in 2:10. This is the complete list of the get of Washington McKinney that have had any work. If you breed your good mare to him you are certain to get a fast trotter and a beautiful horse. There is no handsomer trotter in the world, and from now on he will have a chance—something he has never had before—Hulda 2:08½, Annie Rooney 2:17, Robizola 2:12¼, have been booked to him this season. A foal by this horse will be worth something next year. He will surely have ten new ones "in the list" this year.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: \$35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed, but no horse to be handicapped slower than up to a mile in 2:15.

More than one horse from the same stable may start.

Records Will not Necessarily Govern

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168 $\frac{3}{4}$ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classed for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Entrance three per cent, due July 1, 1908. Two per cent additional to start. Declarations must be made in writing, accompanied by the amount due when made, or nominator will be held for all payments except starting payment. Money divided 50, 25, 15 and 10 per cent. Except as stated, conditions advertised for the meeting to govern.

MEMBER NATIONAL TROTTING ASSOCIATION.

B. F. RUSH, President.

J. A. FILCHER, Secretary.

OREGON FUTURITY No. 1---\$5,000

For Foals of 1908. Guaranteed by the Oregon State Board of Agriculture.
To be raced for in their 2 and 3-year-old form at the

OREGON STATE FAIR

ENTRIES CLOSE JULY 1, 1908.

Three-Year-Old Trotters	-	\$2000	Three-Year-Old Pacers	-	\$1500
Two-Year-Old Trotters	-	900	Two-Year-Old Pacers	-	600

Entrance \$5 to nominate foal on or before July 1, 1908, when breeding of foal must be given; \$10 January 1, 1909, when color, name and sex of foal must be given; \$10 January 1, 1910; \$10 January 1, 1911.

Starting payments—\$10 to start in two-year-old pace; \$25 to start in two-year-old trot; \$35 to start in three-year-old pace; \$50 to start in three-year-old trot. All starting payments due September 1, year of race.

Nominators must state when making payments to start whether the colt entered is a trotter or pacer. Colts that start as two-year-olds are not barred from starting in the three-year-old division. All entries must be accompanied by the entrance fee. In case of death or accident prior to January 1, 1909, nominator can substitute another foal eligible to enter, but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. Failure to make any payment forfeits all previous payments. Right reserved to declare off or reopen race stake in case the number of entries received is not satisfactory. Each race will be mile heats, two in three. Hobbles not barred on pacers. Money divided in each race 50, 25, 15 and 10 per cent. There will be no more money than there are starters. A colt distancing the field will be entitled to first and fourth moneys only, and in no other case will they be entitled to more than one money. Other than specified, rules of the National Trotting Association to govern.

The Winchester

**The Only Repeating
Shotgun so Honored**

There never was a time since its introduction when the Winchester Repeating Shotgun was more popular or in greater demand than it is to-day. The number of them being used in the field and at the trap is rapidly increasing and they are steadily supplanting double guns for all kinds of shooting. Some restless experimenters who are always following strange and unknown gods have from time to time laid aside their trusty Winchesters to try some new and loudly heralded contraption, but they have speedily and gladly come back to their first choice, convinced by comparison and experience that the "one best bet" in the repeating shotgun line is the Winchester. There are other makes of repeating shotguns, but the Winchester is the only one that has successfully stood every conceivable test that sportsmen could put it to, and also the rigid technical trials of the U. S. Ordnance Board, embracing strength, accuracy, penetration, endurance, excessive loads, defective shells, rust and dust. Its popularity with sportsmen and the official endorsement by the Government are all sufficient proof of its reliability, and wearing and shooting qualities. Further, it is not necessary to become adept in the sinuous art of contortion in order to load it. Winchester Repeating Shotguns are made in four grades, listing at from \$27.00 to \$100.00, and are sold everywhere.

Pacific Coast Trotting Horse Breeders Association

SUMMER RACE MEETING

Santa Rosa, July 29, 30, 31 and Aug. 1, 1908

Entries close Wednesday, July 1, 1908.

Santa Rosa has one of the fastest and best tracks in the State. It has always been a popular place with the horsemen, and many of the best race meetings ever given in California have been held at Santa Rosa.

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock p. m. the day before the first day of the meeting at which the race is to take place.

PROGRAMME---Guaranteed Stakes.

WEDNESDAY, JULY 29th.

1—2:13 Class, Trotting, Grace Bros. Stakes	-	\$ 500
2—2:24 Class, Trotting, Sonoma Stakes	-	1000
3—2:12 Class, Pacing, Petaluma Stakes	-	500

THURSDAY, JULY 30th.

4—2:30 Class, Trotting, Three-Year-Olds, Sidney Dillon Stakes		\$400
5—2:15 Class, Pacing, Sebastopol Stakes	-	500
6—Free For All Pacing Stakes	-	750

Horses to be named with entry.

FRIDAY, JULY 31st.

7—2:25 Class, Pacing, Three-Year-Olds, Chamber of Commerce Stakes		\$400
8—2:09 Class, Trotting, J. H. Gray Stakes		750
9—2:19 Class, Trotting, F. S. Turner Stakes		500

SATURDAY, AUGUST 1st.

10—2:16 Class, Trotting, Occidental Hotel Stakes		\$ 500
11—2:20 Class, Pacing, Santa Rosa Stakes		1000
12—2:08 Class, Pacing, Overton Hotel Stakes		500

CONDITIONS:

Entries to close Wednesday, July 1st, 1908, when horses are to be named and eligible to the classes in which they are entered.

Entrance fee 5 per cent and 5 per cent of the amount of the stake will be deducted from each money won.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. on the day preceding the race

and must be worn upon the track in all races. Colors will be registered in the order in which they are received and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Hobbles barred in trotting races, but will be permitted in pacing races.

All stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start at its meetings. Membership fee \$25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of National Trotting Association.

THAT the Oakland Track can be made fast and safe for trotters and pacers to race over was proven by its condition on Wednesday of this week when, in spite of its dusty condition, good time was made in nearly every event on the program arranged as the chief feature of the annual celebration of "Butchers' Day." With plenty of water the dust can be entirely overcome and with plenty of work a footing can be made that will insure fast time when the Alameda Fair Association holds its meeting in August. The tremendous crowd that gathered early and remained until long after sundown filling every available seat in the grand stand and crowding the lawns, testified to the popularity of the harness horse as there were no running events on the program this year, except one for vaquero horses.

AFTER A LONG ILLNESS, Dr. Alfred McLaughlin of this city, passed away at Pleasanton on Tuesday last. Dr. McLaughlin was a native of California, having been born in Sonoma County thirty-seven years ago. He acquired an extended and excellent reputation as a physician and surgeon, having a large practice, to which he devoted himself so closely as to undermine his health. He was a great admirer of a good horse and owned several fast ones that he used as roadsters in his practice and entered in matinee races occasionally. His pair of gray trotters, O'Brien and Kelly, were known to all horsemen in this section of the country. Dr. McLaughlin was a true gentleman, and his death will be sincerely regretted by every person who knew him.

SOMETHING SENSATIONAL is to be provided at the North Yakima fair this year in a race for previously unriden horses. The animals fresh from the range, will be led out in front of the grand stand, saddled, mounted and ridden once round the track. The first man to saddle, mount and make the circuit will be the winner. It will make no difference which direction on the track the rider takes but he must complete the circuit in the direction he starts. This race should lead to some excitement. Saddling and

mounting an unbroken horse can develop a few exciting minutes as well for spectators as for riders.

ENTRIES CLOSE WEDNESDAY NEXT for the Pacific Coast Trotting Horse Breeders' meeting at Santa Rosa which is billed to open one month later. This will be the first important race meeting of the year, and as it is to be held in one of the most thriving and beautiful towns in California, on a track that is about as near perfect as a track can be made for harness racing, it should attract a very large entry list. The program provides for four days racing with three races each day. Don't fail to enter at Santa Rosa. It will be one of the best meetings of the year.

Charley De Ryder made his first start of the season at Casselton, North Dakota on June 4th. He started the chestnut mare Nutwood Princess by Prince Nutwood in a \$350 purse for trotters and pacers and got third money with her. In the third heat of this race Nutwood Princess finished second. The time was 2:24. He also started Charley T. by Zombro in a mixed race for 2:15 pacers and 2:10 trotters. Although Charley T. was second twice he only got fourth money as the race went to five heats. The best time was 2:20. A muddy track and a heavy wind accounted for the slow time, and a continuation of the storm caused the meeting to end the first day.

THREE MORE WASHINGTON MCKINNEYS.

Richard Ables has two new ones in his string by Mr. F. J. Kilpatrick's great stallion Washington McKinney and with no previous training whatever they both beat 2:30 with three weeks' work. One is a big bay gelding owned by Mr. Zund of Santa Rosa, who has used him as a family survey horse. He is out of a good mare, Bertha R. 2:22¾ by Daly. Ables worked him three weeks and drove him a mile at the trot last week in 2:28 and then repeated him in 2:28¾, with the last half in 1:12¾.

The other is also a trotter and is a six-year-old stallion, an own brother to Mr. Kilpatrick's Belle of Washington. The stud was given the same amount of work, three weeks, and with no previous training was able to trot a mile in 2:29 with the last half in 1:13.

Sam Norris, not to be behind with the Washington McKinneys, drove Mr. Guerin's black pacer by him out of a Secretary mare a quarter in 32 seconds last week, and can beat 2:20 with him any day.

Here are three Washington McKinneys that are green but fast enough to take standard records. It is a wonderful family.

A STATE FAIR FEATURE.

Secretary J. A. Filcher of the State Board of Agriculture has entered into a contract with George C. Johnson and S. Woods of Kansas City, Mo., for an exhibition to be given at the fair grounds Sunday afternoon, September 6th. This is to be a collision of locomotives running at full speed and crashing together, showing the exciting spectacle of how two massive railroad engines are hurled to destruction when they attempt to pass each other on a single track. In the contract the agricultural society is to receive 30 per cent of the proceeds while the promoters will take 70 per cent. The society is to attend to the advertising in newspapers and look after bill posting; but the promoters will furnish 500 stands of 24 sheet posters. The society will also furnish the ties and rails and look after the policing of the grounds.

Messrs. Johnson and Woods agree to lay the track, provide engineers and firemen and give the exhibition along the lines such as have been in vogue in the East. The collision will take place the day after the closing of the state fair, and railroads will make special rates for the crowds that will come to witness the great sight.

DRIVING CLUB ELECTS OFFICERS.

The Park Amateur Driving Club of San Francisco held its annual meeting for the election of officers last Wednesday evening at the Fairmont Hotel, with the following results:

President, J. C. Kirkpatrick; vice-presidents, E. P. Heald, F. J. Kilpatrick and E. H. Aigeltinger; treasurer, T. F. Bannan; secretary, F. W. Thompson; historian, H. M. Ladd; directors, N. Franklin, George R. Gay, A. Mellett, J. A. McKerron, E. F. Aigeltinger, F. H. Burke, E. Stock, I. L. Borden, L. Christensen, I. B. Dalzell, H. M. Ladd, M. W. Herzog, G. Wempe, George D. Mackey and Captain W. Olsen.

Secretary Thompson reported that the membership of the club was now 71, with a good prospect of it reaching one hundred before the end of the year.

As so many of the club's members are absent from the city at the present time it was decided to postpone the matinee set for this afternoon until Saturday, July 11th, when a good program will be assured.

SOME NOTED SONS OF ELECTIONEER.

Among the sons of Electioneer that have gained distinction both as performers upon the track and as sires are Advertiser (2:15¼), foaled in 1888; Arion (2:07¾), foaled in 1889. As these

stallions are by the same sire, nearly of the same age, and were all developed and raced, it is interesting to students of the trotting breeding problem to compare their standing as progenitors of speed, and also compare the inheritance of trotting instinct and speed ability that each derived from his dam.

The value of a stallion as a stock horse depends upon his ability to transmit his good qualities to his offspring, and also to impart to his sons and daughters the power to transmit speed qualities to their offspring; in other words to perpetuate speed ability. The table published in the Breeder of the 5th inst., shows that Advertiser (2:15¼), foaled in 1888, is now credited with 57 descendants in the first and second generations, that have made records in standard time; Arion (2:07¾), foaled in 1889, with 54; and Expedition (2:15¾), foaled in 1889, with 89.

It is probable that at the close of the present season, when Arion (2:07¾) will be the same age as was Advertiser (2:15¼) last fall, Arion's number of standard performers may outnumber those of Advertiser, for the latter at the close of the season of 1906 was credited with only 47, while Arion at the same age had 54 to his credit. Expedition's descendants that have made standard records number about 68 per cent more than Arion's, and 90 per cent more than Advertiser had at Expedition's age.

The marked superiority of Expedition (2:15¾) to either Advertiser (2:15¼), or Arion (2:07¾), as a perpetuator of trotting speed, will undoubtedly surprise those writers who condemn near infusions of thoroughbred blood in the trotter, and strongly advise breeders to use nothing but "orthodox trotting blood." Neither is it calculated to inspire faith in the development theory, for not only are the records of Advertiser and Arion faster than that of Expedition, but the record ancestors of each outnumber the record ancestors of Expedition.

The dam of Advertiser (2:15¼) was Lulu Wilkes. Her sire was the noted George Wilkes (2:22), by far the most successful son of Rysdyk's Hambletonian, as a perpetuator of speed. The second dam of Advertiser was the noted trotter Lulu that made a record of 2:15, which, when made, was only one second slower than the world's champion trotting record, then held by Goldsmith Maid (2:14). Lulu was campaigned some for six seasons and won in all eight races against other horses. She was started several times to beat 2:14, and on one occasion was timed a mile by the race judges in 2:14¾. Her sire was Alexander's Norman, a son of the developed Morse Horse. The dam of the latter was by Harris' Hambletonian 2, and his second dam was by a son of imported Messenger. The third dam of Advertiser (2:15¼) was by the thoroughbred imported Hooton.

The dam of Arion (2:07¾) was Manette, by Nutwood (2:18¾). The latter was by Belmont 64; dam Miss Russell (dam of Maud S. 2:08¾, etc.), by Pilot Jr. 12; and second dam Sally Russell, a thoroughbred daughter of Boston. Belmont 64 was by Alexander's Abdallah 15, son of Rysdyk's Hambletonian 10. The dam of Belmont 64 was by Mambrino Chief 11, and his second dam by Brown's Bellfounder, he by imported Bellfounder, and from a mare that was intensely inbred to imported Messenger. The second dam of Arion was by Tattler (2:26), a developed son of Pilot Jr. 12, and his third dam was Young Portia (dam of Voltaire 2:20¾, etc.), by Mambrino Chief 11.

The dam of Expedition (2:15¾) was by Harold 413 son of Rysdyk's Hambletonian 10; second dam, Miss Russell (dam of Maud S. 2:08¾, Nutwood 2:18¾, etc.), by Pilot Jr. 12; third dam Sally Russell, a thoroughbred daughter of Boston. There is not an animal among the maternal ancestors of Expedition that was developed enough to make a standard record, either trotting or pacing, and his dam as will be seen by the above was not nearly as strongly bred in standard lines as was the dam of either Advertiser or Arion.

This fact may not of itself have any significance to some, but when it is taken in connection with the fact that Norval (2:14¾), which now outranks any other son of Electioneer, judged by the number of descendants in first and second generations that have made records in standard time, had for a dam an undeveloped daughter of the same Alexander's Norman 25, that got Lulu (2:15) (the second dam of Advertiser, 2:15¼); also that the second dam of Norval was by the running-bred Todhunter's Sir Wallace, and from the thoroughbred Eagletta, by Grey Eagle, it suggests the thought that the Alexander's Norman strain was a more potent and valuable factor of trotting speed than has heretofore been believed. The dam of the successful speed perpetuator May King (2:20), sire of Bingen (2:06¾), May Queen (2:20), was also by Alexander's Norman 25.

The success of Expedition also tends to confirm the belief that where a mare possesses a rich speed inheritance, she will transmit speed ability when given an opportunity, whether she is trained and raced or not. Norval (2:14¾), from a daughter of Alexander's Norman 25, her dam strictly thoroughbred, made a faster record than did Advertiser (2:15¼), whose dam, Lulu Wilkes, was by the highly developed George Wilkes (2:22), and from Lulu, trotting record 2:15, the most highly developed daughter of the same Alexander's Norman 25 that got the dam of Norval (2:14¾). To the development theorists and also to those who claim that the running cross should be at least three removes away it may not seem possible that this can be so, but the Year Book shows that it actually is so.—American Horse Breeder.

AT PLEASANTON TRACK.

Sutherland & Chadbourne have some good horses in their string this year as usual, and will be in the spot light all through the racing season. They were working out the Zombro stallion The Angelus last Saturday, Chadbourne having the mount behind him, and Sutherland piloting the old reliable pacer John R. Conway 2:09 as a teaser for the green trotter. The trotter stepped a mile in 2:16 very nicely and has the style and action of one that will go fast enough to pay his entrance fees during the summer, even though he does not win all the first moneys. A remarkable performance was the driving of Solano Boy a mile in 2:13 with the last half in 1:03, which was done by Chadbourne during the forenoon. Solano Boy does not look to be in condition. His coat is not in good order, and he has a rough way of going that causes the spectators to remark: "I don't like that fellow." But he seems to get there, and he may be a member of the 2:10 list before the season is over. When this firm first got him three weeks ago they did not like him very well, and wrote to the owner for permission to put the straps on him, and it is the general opinion now that the Indiana harness will make a 2:10er out of Solano Boy the first time he tries them on. Last week a new set of very light shoes were put on him, however, and it may be that he will not need the "panties" after all. His work on Saturday last gave evidence of a lot of speed that he has in reserve, as he paced a mile in 2:13, last half in 1:03. They have a pacer in their string however, that also comes from Solano county and about which there are no "ifs" as yet. We refer to McFadyen 2:15½, the Diablo-Bee Sterling pacer owned by Del Dudley of Dixon. McFadyen was a great two-year-old and a good three-year-old, although he was not entirely right during the last named year. He looks now like a free-for-all candidate, doing everything that is asked of him cheerfully and easily. He has been a half in 1:02½ and can pace a quarter in 29 seconds without getting into any trouble whatever. He is a good man's good horse, and every win he puts to his credit will be popular.

Henry Helman will not have a large string to campaign this year, but there is considerable class to it. He was working Berta Mac 2:13½ alongside a runner on Saturday and the daughter of McKinney impressed me as a faster mare than she was last year. She is a rather masculine looking mare (We were told by a horseman the other day that every good McKinney mare from Sweet Marie 2:02 down has a masculine look) and she makes considerable work of her speeding, but impresses one with the idea that she has tremendous power and stamina as well. She made one or two rushes in the stretch, seemingly to get ahead of the runner, and trotted a two-minute clip for a ways. Helman took her back while keeping her on her stride and undoubtedly has her under complete control. If no accident happens her she will be a member of her sire's 2:10 list before the racing season of 1908 is ended. The pacing stallion Lord Lovelace 2:10 that is now a member of Helman's string is a muscular fellow that looks the stallion all over and has a lot of class about him. We did not see him in motion, but his caretaker says he is rather sluggish when alone on the track, but a demon to pace when he is in company and alive to the situation. Lord Lovelace is the fastest native of the Northwest whose training and racing has been exclusively at home. He should reduce his record several seconds this year. The Searchlight filly in Helman's string, owned by Mr. W. T. McBride of Oregon, is developing into a very fast pacer. She worked a mile in 2:14 one day last week.

Jack Groom, who was compelled to move his string of trotters and pacers to Pleasanton because the track at Alameda was unfit to train on owing to the filling of the adjacent land by the dredgers engaged in deepening the Alameda estuary, has twelve head in training at Pleasanton track. One of the hand-somest and best of his string is Sophie Dillon, a young mare by Sidney Dillon, dam By Guy by Guy Wilkes, second dam the famous By By by Nutwood 600. Sophie Dillon is a bay filly and one of the best gaited natural trotters on the Pleasanton track. She has been a mile in 2:24 and a half in 1:09 and looks like one that will trot very fast. She is one of the best bred daughters of Sidney Dillon there is in this State. Sophie Dillon is owned by Mr. C. F. White of Cosmopolis, Washington. Groom owns a four-year-old pacer by Searchlight 2:03½ that he picked up at a low price a few months ago, that is very promising. This is a pacing gelding bred at Oakwood Stock Farm out of Derby Ash by Chas. Derby, second dam by Indianapolis. While the gelding has had very little work, he has shown a mile in 2:22 so handily that he is looked upon as a fair prospect. Among the other horses in Groom's stable are Golden Buck, a pacer by Diable, Teddy Rey by Monterey 2:09½, Durfee Mac by McKinney, a Stam B. three-year-old filly that has lots of speed, a gray mare by Nutwood Wilkes that is very handsome and speedy as well, and several others.

George Ramage will leave about the first of July for the North with his Sidney Dillon trotter Bert Arondale. Readers of the Breeder and Sportsman have heard of this trotter before, and if nothing goes amiss Ramage should be able to get a fair share of the money hung up for trotting on the North Pacific Circuit this year. Bert Arondale has not been trained

for two years until this spring and would have been entered on the California Circuit but for the fact that all the programs closed for entry here before he had been given any work. He will make his first start at Bellingham, Washington, during the last week in August, and race through the North Pacific Circuit.

Pat Davey, trainer for Mr. F. H. Burke's La Siesta stable, hasn't smiled since his favorite mare Wanda II by McKinney lost her foal by Bon Voyage, which Davey had set his heart on winning all the three-year-old stakes of 1911 with. However, Patsy has a string of trotters that are doing pretty well and will be heard from when the circuit starts. Yolanda 2:14½, Vallejo Girl 2:16½ and several youngsters are looking and acting well. Mr. Burke's string was unfortunate last season, but it was only the second season in thirty-five years of harness racing, in which the receipts were less than the expenditures. A pretty good record, that.

Jack Phippen's fifteen head are all looking fine. The Searchlight stallion owned by Capt. C. H. Williams, begins to act like a trotter. Nearly every trainer at Pleasanton has advised putting the straps on this fellow and converting him to the pace, but Phippen has persevered with him and had the satisfaction of driving him a mile at the trot the other day in 2:21. The colt seems to get fat on the work he gets and looks like a butter ball.

The pride of Phippen's string is the three-year-old filly Helen Stiles, by Sidney Dillon out of Silver Haw by Silver Bow 2:16, second dam by Hawthorne, son of Nutwood. She is owned by S. S. Stiles, the well-known commercial traveler who makes his home in Oakland. Helen Stiles is a trotter, one of the "four-cornered" kind, and Phippen says in all his experience he never handled as good a prospect. She has a perfect disposition, worries about nothing, can go to sleep trotting a 2:30 gait, but seems to have no limit to her speed when waked up. A mile in 2:19 is the best asked of her to date. She is in the Breeders' Futurity to be trotted at Chico.

It looked like old times to see C. A. Durfee jogging a colt around the track, and of course the youngster has McKinney blood in his veins. He is by Lecco 2:09½ out of a McKinney dam, and is called Dr. Lecco. He is a natural trotter, but looks like one that will not be fully developed until he is five or six years old, although he has size enough for any three-year-old. Dr. Lecco is entered in the Breeders' Futurity and the Stanford and Occident stakes this year. Had Will Durfee not gone East to race on the Grand Circuit this year, C. A. would not have had the fun of getting Dr. Lecco ready for his engagements.

Will De Ryder is handling quite a string of horses and has a new acquisition in a bay gelding by Knight that has most violent symptoms of the speed disease, as he showed a mile in 2:15 at the trot a few days ago and did it very nicely. De Ryder says he expects to work him a mile close to 2:10 before he stops on him and will not race him until next year.

James Thompson gave Col. Kirkpatrick's trotter John Caldwell 2:08½ his first stiff work since he arrived home from Memphis three weeks before. John trotted a mile in 2:15½ and showed his old-time speed for a spurt at the finish. Mr. Kirkpatrick thinks John Caldwell will make a fair showing this summer, but expects he will have to trot to his record to win. His pacer Charley D. is in the very pink of condition and the best acting horse in California. We don't see how they can beat him this year unless an Inferlotta or a Sir John S. come out of the green class.

We regret to learn that "Dad" Trefry's game trotter Kenneth C. 2:13½ is lame. The seat of the lameness has not been located, but the horse is out of training and walking and slow jogging constitute all his exercise. It is a pity, as this son of McKinney is a 2:10 trotter when in shape.

P. J. Williams was up behind his handsome big chestnut Yosemite by Monterey 2:09½ on Saturday. This horse has been gelded and while not going fully as well as Mr. Williams desires, is improving and may get to where he is capable by the time the races begin. Yosemite has a license to be a very fast trotter and if he meets with no accidents we expect to see his mark as low as that of his sire before another year.

Pilot, the pacer by Abbottsford Jr. that C. A. Walker campaigned for Mr. J. V. Galindo last year, having to meet such whirlwinds as Inferlotta 2:04½ and Charley D., thus only getting third money while beating 2:10 nearly every heat he raced, met with an accident recently, picking up a gravel which made him quite lame. Mr. Walker will probably be unable to start him before the Salem meeting, although Pilot is entered all through the early California meetings.

While watching the workouts on Saturday we noticed Martin Carter driving a fine big mare by Nutwood Wilkes alongside a two-year-old filly of his by Lord Alwin that was being driven by Jos. Twobig. Coming down the stretch the filly showed a tremendous burst of speed for a youngster and made the quarter in 34 seconds. A gentleman who has been

spending several weeks at Pleasanton watching the horses, told us that this filly is the best thing of its age he has seen this year. Mr. Carter calls her Ella M. R. She is by Lord Alwin, own brother to John A. McKerron 2:04½ and out of Excella by Monbells, second dam Expressive (3) 2:12½ by Electioneer. She will start in the two-year-old trot at Oakland if nothing happens to prevent. Mr. Carter says all of Lord Alwin's get show extreme speed from the start. Lord Alwin himself is a pacer and would have held a very fast record had he been raced.

Joe Cuicello was out on the track during the afternoon with several different horses, but the one the spectators all hold their watches on is the little bay mare Lady Inez by Nutwood Wilkes out of a mare by Ira, owned by James Smith of this city. Lady Inez has been referred to many times in these columns and is one of the kind that commands attention. Cuicello gave her five heats on Saturday, the fourth in 2:13½ and it actually looked like an easy mile for her. She is a beautifully gaited little mare, and there is not a better headed one on the Pleasanton track. Joe has taken great pains with her and if she don't make good then there are absolutely no signs or omens that are worth anything at all when picking out a trotter. Lady Inez is entered all through the California and North Pacific circuits in the big stakes for trotters.

GOOD SPORT AT SAN BERNARDINO.

San Bernardino, June 18.—People who failed to see the matinee races Wednesday at Association park track missed the best sport seen here in a long time, in fact it is doubtful if a better balanced racing program has ever been pulled off here at a matinee.

There was not a poor race in the list, and most of them proved to be highly exciting and the fair sized crowd got all that they had anticipated and more.

While the best time of the day was made in the free-for-all pace in which Velox was the winner by 2:15½, the 2:30 and 2:40 mixed probably proved to be the most exciting races of the day, as the fields were large and they were very evenly balanced, which made the competition very warm.

The sensation of the afternoon was probably the showing made by Izalco, by Zolock-Gypsie, in the 2:40 mixed event. The surprise lay in the fact that Izalco is practically an untrained colt, and was handled by Joseph Quinn, an inexperienced boy of 20 years who has been handling the horse during the breeding season. The animal came under the wire second in both heats that he entered, missing by a head each time. He traveled steady as a clock in both heats and all things considered the time, 2:31½ was really remarkable.

The horse was scratched after the second heat because it had not been worked out this spring and it was thought that if it was compelled to go the third heat it would become too tired. But the wonderful showing made created a lot of enthusiasm among the crowd.

In the 2:25 trot Dr. I. W. Hazelett's Early Bird was a winner, the second heat being a very fast one, the winner being crowded closely by J. H. Kelly's Bolock, who probably lost the heat by breaking at the critical moment.

The results of the events in full follow:

First Event, 2:40 Class, Mixed:		
Andy Carnegie (G. W. Bonnell)	3	1 1
Mark Twain (Mickens)	1	4 3
Prince Valentine (A. Nelson)	4	3 4
Lady Patrick (G. H. Parker)	5	5 2
Izalco (Jos. Quinn)	2	2 dr
Time—2:34, 2:31½, 2:37.		

Second Event, 2:25 Trot.		
Early Bird (Dr. Hazelett)	1	1
Bolock (J. H. Kelly)	3	2
Bonny June (C. E. Mickens)	2	3
Time—2:27½, 2:22.		

Third Event, Free-for-all, Pace.		
Velox (G. W. Bonnell)	1	1
Adalantha (C. E. Mickens)	2	2
On Bly (C. O. Thornquest)	3	3
Time—2:16, 2:15½.		

Fourth Event, 2:30 Class, Mixed.		
Emma Z. (G. H. Parker)	2	1 1
Tom McKinney (F. A. Ramsey)	1	2 3
Worth While (G. W. Bonnell)	3	2 2
Time—2:31, 2:31, 2:29.		

Fifth Event, 2:25 Pace.		
Emerald (A. Nelson)	1	1
Amado (C. E. Mickens)	2	2
Prize Oh So	3	3
Time—2:25, 2:25½.		

C. A. Harrison has purchased the hotel Washington Annex at Seattle and has finally settled down after about a year of relaxation from active business. About every horseman on the Pacific Coast knows Mr. Harrison as one of the most enthusiastic admirers of the light harness horse there is anywhere in the country and he knows how to keep hotel better than most men. We had hoped friend Harrison would make up his mind to buy a hotel here in San Francisco as he would have been a tower of strength to the harness horse industry here, but now that he has decided to locate permanently in Seattle we wish him all the success that can possibly come to him. When you go to Seattle check your baggage for the Washington Annex, which is one of the most modern, fire-proof hotels on the coast, operated on the American and European plans, with a cafe as good as can be found anywhere.

FIRST MATINEE OF WOODLAND CLUB.

Fully a thousand persons were at the Woodland Stock Farm track last Saturday to enjoy the excellent program of five races which had been provided by the Woodland Driving Club for its initial meeting. The club is a recent organization, but has nearly a hundred members, and as its meetings are all to be conducted strictly according to amateur rules it is destined to be a very popular organization and will doubtless do much to popularize the light harness horse in that section, as well as make harness racing a leading sport.

The only drawback to the club's initial meeting was a disagreeable wind that made fast time out of the question and undoubtedly kept many people at home as the dust was flying on many of the roads that led to the track. But in spite of this unlooked for feature, the program was carried out promptly and efficiently, reflecting great credit on the officials of the club who had the arrangements in charge. The Woodland Band furnished excellent music during the afternoon.

Every race proved a good contest, the Class B horses furnishing an especially close race requiring four heats to decide. The fastest heat of the day went to William Hashagen's McKinney stallion Kinney Rose who won the third heat of the Class A event in 2:20, a good mile when everything is taken into consideration.

Mr. A. C. Stevens filled the dual position of presiding and starting judge and did his work well. He got the horses off on their stride without unnecessary delay and all his decisions were impartial. He was ably assisted in the stand by President Henry Eakle and George Zimmerman. The timers were Lou Mativia of Dixon and John Martin and R. M. Brown of Woodland, all experienced men with the stop watch.

In every race the horses were driven by their owners with one exception, when Elmo Montgomery piloted George Fissell's Domingo in the Class B. event, winning the opening heat and landing the horse second in the others.

The summary of the afternoon's events follows:
Special, Quarter Mile, Yearlings:
La Reina (Charles Marley)1
Martha Dean (W. A. Hunter)2
Time—59½.

Class D:
Maywood (James Jacobs)1 1
Hike (A. B. Rodman)2 2
Time—2:51½, 2:52.

Class C:
Nusta (Charles Marley)1 1
Banker G. (O. H. Whitehouse)2 2
Time—2:52, 2:46.

Class B:
Dot (H. E. Coil)2 1 2 1
Domingo (George Fissell)1 2 3 2
Robin (Otho Marders)3 3 1 3
Time—2:33, 2:35, 2:32, 2:34½.

Class A:
Kinney Rose (W. Hashagen)2 1 1
Tubelina (A. B. Rodman)1 2 2
Herbert Dillon (F. N. Frary)3 3 3
Time—2:21½, 2:22, 2:20.

The officers of the club are: President, H. P. Eakle Jr.; vice-president, Chris. Sieber; secretary, W. A. Hunter; treasurer, M. C. Keefer; board of directors, H. P. Eakle Jr., Chris. Sieber, C. C. Brown, Dr. W. A. Joyce, D. J. O'Keefe, W. B. Black, Charles Johnson, George Zimmerman and A. C. Stevens.

The members of the various committees are:
Finance—H. P. Eakle Jr., C. C. Brown and A. C. Stevens.

Prizes—A. C. Stevens, Dr. W. A. Joyce and C. C. Brown.

Entertainment and Privileges—Dr. W. A. Joyce, Chris. Sieber and D. J. O'Keefe.

Speed—C. A. Spencer, C. B. Bigelow and H. S. Hogoboom.

The members of the club are: H. P. Eakle Jr., M. C. Keefer, A. C. Stevens, H. E. Harrison, W. L. Ely, Sam Montgomery, E. E. Gaddis, Charles R. Marley, George H. Hoppin, H. E. Coil, Wolgamott Bros., A. A. Powers, A. Kramer, C. H. Clements, J. A. Murray, O. H. Whitehouse, D. T. Herspring, Charles Johnson, C. B. Harlan, Chris Sieber, P. Fitzgerald, D. J. O'Keefe, T. H. Kitto, E. Ridley, H. S. Hogoboom, W. Hashagan, T. P. Schwartz, C. B. Bigelow, W. A. Hunter, C. A. Spencer, S. S. Puderbaugh, George Luck, A. B. Rodman, G. W. Hollingsworth, W. A. Joyce, T. B. Gibson, J. R. Jacobs, P. W. Lawson, J. V. Leithold, J. W. Duncan, B. Rehme, C. C. Brown, E. J. Dyas, A. T. Byrns, Richard Johnson, O. A. Lowe, F. von Johhussen, C. A. Osborne, W. F. Black, D. D. Harlan, C. E. Binning, G. D. Zimmerman, S. H. Grigsby, Johnstons Bros., Charles Nelson, B. D. Strong, George Hennigan, Roy Coil, F. M. Rahm, John Norton, Daniel Wooster, W. O. Marders, O. H. Whitehouse, Fred L. Mattei, T. J. Alexander, A. Alge, F. W. Blanchard, J. I. McConnell, George Fissell, F. A. Frary.

Tiverton 2:04½, who was entered in the \$50,000 handicap by A. B. Gwathmey, and was sent to John Howell to be prepared, if possible, for the race, went wrong in his bad hind leg several days ago and has been taken back to New York, probably never to face a starter again. His many brilliant races, however, will not soon be forgotten.

Drink Jackson's Napa Soda.

NORTH YAKIMA ENTRIES.

2:05 Pace—Purse \$1,000.

Moy, b. m., Morris Bros., Pony, Mont.; Mona Wilkes, b. m., J. W. Marshall, Dixon, Cal.; Leland Onward, b. h., J. W. Clark, Edmonton, Alberta; Delilah, b. m., Homer Rutherford, Salem, Ore.; Sir John S., b. s., W. L. Vance, Marysville, Cal.; Iowa Boy, ch. g. and Alta Norte, b. m., I. D. Chapelle, Hillsboro, Ore.

Three-Year-Old Trot—Purse, \$300.

Princess Direct, br. m., H. A. Gardner Walla Walla; Mary Mims, br. m., W. R. Clemmens, Moscow; G. N. King, b. s., J. W. Hollinshed, Ladner, B. C.; Don Regialdo, b. s., F. A. Ramsey, Los Angeles; Katalina, b. f., J. W. Zibbell & Sons, Fresno, Cal.; Dr. Ullman, b. s., I. D. Chapelle, Hillsboro, Ore.; Nusado, br. s. and Anjella, b. f., Woodland Stock Farm, Woodland, Cal.; Bonkin, br. g., George Kelly, Walla Walla; Hilgard, blk. g., N. K. West, La Grande.

2:09 Pace—Purse, \$2,500.

General Hurtis, b. s., Gene Kuntz, Council, Ida.; Magladi, br. m., Thomas H. Brents, Walla Walla; Vinnie Mann, b. m., S. S. Bailey, Albany, Ore.; Speed way and Highway, A. R. Gumaer, Florence, Ida.; Diabless, b. m., J. H. Kelly, Fresno, Cal.; Young Hal, b. s., A. E. Heller, Los Angeles; Little Joe, b. g., J. J. Breen, Woodland, Cal.; Lord Lovelace, ch. s., E. B. Tongue, Hillsboro, Ore.; Miss Idaho, ch. m., S. C. Walton, Fresno, Cal.; Merry Monarch, blk. s., J. Oakland, Spokane; Bonnie M., br. m., L. C. Shell, Walla Walla; Pilot, ch. g., Robert Galindo, Oakland, Cal.; Josephine, b. m., Homer Rutherford, Salem, Ore.; Welcome Mac, b. g., Thomas Hughes, The Palms, Cal.; Tommy Graton, b. g., J. F. McGuire, Denver, Colo.; Bushnell King, br. m., I. D. Chappell, Hillsboro; Tidal Wave, ch. s., S. S. Bailey, Albany, Ore.; Topsy T., blk. m., F. W. Schott, North Yakima, Wash.; Albert Direda, b. s., L. Y. Dollenmeyer, Hanford, Cal.; Highfly, blk. g., L. W. Barstow, San Jose, Cal.; Geraldine, br. m., C. W. Robinson, San Diego, Cal.; Lethe D., b. m., A. M. Davis, San Jose, Cal.; Cleopatra, b. m., Francis B. Allen, Walla Walla; Kermit, ch. g., F. E. George, Santa Cruz; Diabito, ch. g., W. Griswold, Salinas, Cal.; John R. Conway, ch. s., George Meese, Danville, Cal.; Charlie D., b. s., James Thompson, San Francisco; Freely Red, b. m., A. G. Dahl, San Diego, Cal.; Mac O. D., b. g., G. A. Pounder, Los Angeles, Cal.

Three-Year-Old Purse—Purse \$300.

The Countess, gr. m., Lillie Buckholtz, North Yakima, Wash.; Hazelgold, b. f., E. A. Gooch, Bozeman, Mont.; Cora, b. f., Wallace & Sebastian, San Diego, Cal.; Georgie, b. f., J. W. Zibbell & Sons, Fresno, Cal.; Stella A., b. m., Ed. Armitage, North Yakima; Grace Seal, b. f., E. C. Keyt, Perrydale, Ore.; On Bly, br. s., C. O. Thornquist, San Bernardino, Cal.; Tangerine, bl. m., Gose & Whitmore, Pomeroy, Wash.; Moortrix, b. c., James Sutherland, Pleasanton, Cal.

2:09 Trot—Purse \$1,000.

Irene, b. m., Robert Pryor, North Yakima; Prince Seattle, b. s., S. S. Bailey, Albany, Ore.; Doc Mundy, b. g., S. S. Bailey, Albany, Ore.; R. Ambush, br. h., Homer Rutherford, Salem, Ore.; Athasham, b. s., D. L. Bachant, Fresno, Cal.; Era, b. m., William Morgan, Pasadena, Cal.; Adam G., b. g., J. W. Zibbell & Sons, Fresno, Cal.; Fresno Girl, br. m., J. W. Zibbell & Son, Fresno, Cal.; North Star, b. g., C. Whitehead, Salinas, Cal.; John Caldwell, b. g., James Thompson, San Francisco; Satin Royal, ch. g., N. K. West, La Grande, Ore.; The Commonwealth, b. s., N. K. West, La Grande, Ore.

2:19 Trot—Purse \$1,000.

Irene, b. m., Robert Pryor, North Yakima; Prince Seattle, Dos Mundy, S. S. Bailey, Albany, Ore.; Emily W., b. m., Mrs. Emily Ward, Los Angeles, Cal.; Patsey Rice, gr. g., Albert Smith, Bozeman, Mont.; Princess Louise, b. m., L. J. H. Hastings Los Angeles, Cal.; The Angelus, br. s., P. W. Hodges, Pleasanton, Cal.; Daybreak, b. g., Joe F. McGuire, Denver, Colo.; Easter Bells and Tonopah, W. L. Vance, Marysville, Cal.; Wenje, br. m., E. R. Fraser, Spokane; Deception, b. g., W. W. Ashley, Spokane; General H., Parslow & Hoag, Calgary, Alberta; Golony, b. h., Ed. Gorch, Bozeman, Mont.; Lady Sunrise, br. m., C. E. Bower, Spokane; Princess W., blk. m., Frank J. Kilpatrick, San Francisco; Ohio Boy and Brantford Boy, E. D. Chappelle, Hillsboro, Ore.; Bull McKinney, br. h., E. J. Coyne, Spokane; Regal Baron, br. g., E. R. Fraser, Spokane; Hugh Scott, blk. h., H. W. Hudson, Prince, Albert.

2:14 Trot—Purse \$2,500.

Prince Seattle, b. s., S. S. Bailey, Albany, Ore.; Doc Mundy, b. g., S. S. Bailey, Albany, Ore.; Irene, br. m., Robert Pryor, North Yakima, Wash.; Richie Baron, br. g., Morris Bros., Pony, Mont.; Van Norte, b. g., A. Philipps, Spokane; Dr. Frazier, b. g., G. H. BELLE OF WABASH, DAM OF THE MOOR.

Writing of Belle of Wabash, dam of The Moor \$70, John Landrigan, of Albion, Ill., says: "You doubtless have frequently read that Belle of Wabash was a thoroughbred mare. It is convenient for some writers to call her a thoroughbred. Such a line of argument is sheer nonsense. I remember seeing Belle of Wabash at Montezuma, Ind., in October, 1857, at which time a very tall man, named Williams, was working her for speed in harness. She did not resemble a thoroughbred in any manner. At one time a Mr. Romine owned Belle of Wabash. At the time referred to I believe she was a three-year-old, and Mr. Romine went to considerable pains to learn her breeding, utterly failing in his effort. This party did learn, however, that Belle of Wabash was bred near Brazil, Ind., and that her breeder was then dead. These matters come back as fresh as though they referred to events of last season. I cannot believe that Belle of Wabash was a thoroughbred."—Western Horseman.

The "very tall man" referred to in the above paragraph is "Long John Williams" who trained and drove Belle of Wabash in many of her races and who always claimed that she was by Bassinger out of a mare by William the IV. So far as Belle of Wabash "not resembling a thoroughbred in any particular," we will take the statement of the late L. J. Rose, who owned The Moor, and who stated in his catalogue that for himself he would have preferred his dam to have a trotting pedigree rather than thoroughbred. Mr. Rose described Belle of Wabash as follows:

"She was a black mare, about 16 hands high, a long and might be termed a leggy mare. Her coat of hair was very short and fine, no hair about her fetlocks, her feet rather small for her size, and legs clean and rather deer-like, that is small and fine; her neck long and slim, and her head of peculiar fullness and roundness about the forehead and not very broad, tapering in from sides and back, almost making a dish profile; and a fineness of muzzle, lips and nostril that I can't imagine as ever belonging to a Morgan or Copper-bottom horse, at least I never saw such a type belonging to either family, or any trotting family pure and simple; but have ever seen such forms in thoroughbreds or their immediate part-bred descendants, and I have never seen it in any other breed of horses."

Add to the above the testimony of the American Stud Book, wherein on page 1077 of Vol. 6, Belle of Wabash is registered as by Bassinger out of William the IV mare, and the statements of John Landrigan of Albion, Ill., seems unworthy of serious consideration. Mr. Wissinger, who bred Belle of Wabash, also owned Bassinger, her claimed sire, another link in the chain of evidence that she was "by that horse."

EMELINE, BY SIR JOHN S. 2:04½.

The picture on page 1 is a fair representation of a 22-months-old filly, by Sir John S. 2:04½, the unbeaten pacer of the Pacific Coast, for the season of 1907. She is the property of George H. Magruder, Yuba City, Sutter county, California, and is the first of the get of her unbeaten sire to be put to training; she for the last seventy-five days willingly taking her first lessons at the Marysville track, where she has repeatedly paced full miles in 2:45, last quarter in 35 seconds, and fighting for her head to be allowed to go faster.

Her trainer has had his instructions, and under penalty, to not allow her to move at a faster gait this season, as she is to be turned out to pasture within a few days, but there are many visitors at the track who would be glad to know just how fast she can cover the magic circle, one venturing the assertion that she can do the trick in 2:25 and not hurt her.

She is a bright bay with black points, two white hind feet, an intelligent and beautiful head poised on a good neck, and with age is expected to develop into a beautiful animal.

If this filly is to be taken as a line on which to judge Sir John S.'s ability to sire speed, the people of Marysville and Yuba county have not as yet realized how valuable a horse they have stabled in their midst and at their services, for in this one he has surely imparted full measure of his gameness and bulldog tenacity, as well as some indication of speed.

The Hungarian Derby, worth to the winner \$15,075, was trotted at Budapest, Hungary, on June 1st, and was won by Louis Winan's four-year-old stallion Wilby son of Wilburn M. 2:27, by Wilton 2:19½, out of Rose Leyburn, p. 2:15½, by Onward. The winner was driven by A. C. Pennock, the American trainer, who during the past two years has been very successful with Mr. Winan's horses.

Charley Belden 2:08½, recently purchased from Walter M. Jermyn of New York, by John McGuire, has been resold to J. D. Callery of Pittsburgh, Pa., who will race him in the matinees this summer.

H. P. Eakle, the well known Yolo County cattle breeder, purchased a couple of yearlings by Demonio 2:11½ at the recent Suisun Stock Farm sale, and has turned them over to W. A. Hunter to break and train at the Woodland track.

NOTES AND NEWS

Santa Rosa entries close next Wednesday, July 1st.

A thoroughbred stallion is advertised for sale in this issue.

Several good harness races will be held on the track at Newman on the 4th of July.

Start in at Santa Rosa and race clear through the circuit. Entries close Wednesday next.

Entries to the \$5,000 Oregon Futurity close July 1st. Enter your foal of this year in this stake.

The report of the races at Concord reached us a little too late for insertion in this week's issue.

McKinney 2:11½, led all the sires of trotting speed again last year in the amount of money won by his get.

Teddy Ray 2:24 is a new one in the list for Monterey 2:09¼. Teddy is out of a mare by Diablo 2:09¼.

W. G. Durfee will probably make his first start this year at the Peoria, Illinois, meeting, which opens July 3d.

Princess Christina 2:18 is the first new trotter of the year to the credit of Dexter Prince. Her dam is by Chris. Smith.

The Ukiah Driving Club will hold a race meeting on the 3rd of July. Three or four races between local horses are already carded.

Chestnut Tom's new record of 2:15 is a reduction of 2¼ seconds from his former mark. It is also below that of his sire, Nutwood Wilkes 2:16½.

Nellie Gaines 2:16 full sister to Ben F. 2:07¾, makes her dam Carrolla by Steinway, a member of the great brood mare list.

No report has as yet been made public as to whether the Stanford Stake, which closed June 1st, received a large or small list of entries.

Every breeder of trotters and pacers should give his colts an opportunity to earn money in the stakes. The Oregon Futurity for foals of 1908 will close July 1st. See advertisement.

A. C. Stevens, who has started the horses so successfully at the Woodland meetings during recent years, has been engaged to do the starting at the California State Fair this year.

Jonest Basler 2:05¾ will start at the Hudnut half-mile track, Bakersfield, on the 4th of July, and is expected to knock a dozen seconds or so from the track record which is now 2:24.

M. C. Delano, who drove Stam B. 2:11¼ to his record, has a string of a half dozen trotters and pacers at Agricultural Park, Sacramento, and may be seen at the races with some of them.

The match race between Little Dick and Charley J. at the stadium last Sunday was won by the latter in straight heats. A return match was made and with different drivers the result was reversed.

Kinney Al 2:14¼ by McKinney got his first fast mile of the year at Woodland track last Friday, covering the distance in 2:20 so handily that it looked like a jog for him. Lou Rowley was up behind him.

The trotter Wilmar trotted a nice mile over the Santa Rosa track last week in 2:16 with the last half at the money winning gait of 1:04½. This horse looks like one that will do to start in almost any company this summer.

Sam Norris worked the stallion King Dingee a mile in 2:23 last week over the five-eighths track at Rose Dale farm near Santa Rosa, and the son of Zombro looks as if he will be a pretty fair trotter.

P. W. Hodges and "Farmer" Bunch shipped in the same car when they started East for the summer's racing. Mr. E. Smith of Marceline, Mo., also shipped with them, taking several mares he had purchased here for his stock farm.

The Secretaries of the associations that comprise the Central California circuit have not yet sent out the lists of entries for the purses which closed June 15th, and we are unable to state whether any of them filled or not.

G. H. Parker of San Bernardino has removed to Riverside at the solicitation of the horsemen of that place. There is quite a bunch of horses there and the owners want them trained at home where they can enjoy seeing them put through their paces.

W. J. Kenney, the bike man, sold at least a half dozen carts and sulkies this week. One cart went to Mr. Norton of Marshfield, Oregon, another to H. D. Pike of Sacramento, another to Mr. Jones of Stockton and the others to horse owners in this city.

The San Luis Obispo Driving Club proposes to hold a meeting on the 4th of July for which several good races have been carded. The race for 2:24 class pacers is expected to be a very close contest, four sidewheelers having been entered that are very closely matched in speed.

Two days racing will be held at Eureka, Humboldt County, July 3rd and 4th. The horses in training for these races are: Tobasco, Jim Whitney, Ray Monte, Oakwood Derby, Belle Stock, Maud McAtee, Haidee, Guy D., Cruso W., Maid of California, May March, Vida Dillon, Cassiar, Casine, Gladys B. and Cyrus B.

All the stalls at the Hanford half mile track are filled. Trainers Liggett, Byrnes, Lipsom and Kirkham are working their horses there, besides several others. One day last week Moody Liggett broke the track record for a half mile by driving Harry Nelson's pacing mare Allie Glenn once round the track in 1:01½.

La Siesta Farm's favorite brood mare Wanda 2:14¾, dam of The Roman 2:09½, etc., has been bred to Thomas Ronan's roan stallion Birdman this year. Birdman is by Antrim out of Birdie by Jay Bird and while thus far he has had very limited opportunities in the stud, is reckoned by experienced horsemen as one of the coming speed sires of this coast. The Jay Bird cross on Wanda should produce excellent results.

If all the horses entered for the \$5,000 free-for-all trot at Readville on the 4th of July, start, it will be one of the greatest races of the year. Sweet Marie 2:02 is the favorite as she has the fastest record and is acting in a manner to defy criticism. George G. 2:05¼, Sonoma Girl 2:05¼, Wentworth 2:04½ and Wilkes Heart 2:06¼ will make up the field to score down for the word with Sweet Marie.

A. I. Stewart has resigned as Secretary of the Los Angeles Driving Club and Dr. J. A. Edmonds has been appointed temporary secretary to act until a new secretary is selected. The club is contemplating a three days' harness meeting next month, and if the necessary arrangements can be made, it will be put through. The prizes will be trophies, and the races will be open to all members of driving clubs in the southern end of the State.

Dick Ables divides his time now between Santa Rosa and San Francisco, spending four days of the week at the former place, working the horses to be raced on the circuit, and three days at the stadium track in this city with his matinee string. Out at the stadium track last week he drove Mr. I. L. Borden's stallion Barney Barnatto by Zombro, a mile in 2:21 with the last half in 1:09 and then he repeated him a slower mile but stepped the last half in 1:08¾. At Santa Rosa he drove Mr. Gay's trotter, Laddie G., by Zombro a mile in 2:19, and Mr. Matthews' pacer Opitsah 2:16¼ a half in 1:05 without hopples.

John Quinn, who is training his stable of trotters and pacers at Sacramento, has some excellent prospects among them. Wild Bell 2:08½ is the fastest of the lot by records and will make his first start in the regular events at the Oakland meeting. Mr. Ruhstaller, owner of this trotter, has started him a couple of times recently at the club matinees, but the horse has had to go up against such pacers as Kelly Briggs 2:08 and Cranky Thorne 2:13½ and has not been able to beat them. A two-year-old filly owned by Charles Paine the well known liveryman, and a Silver Bee filly owned by Dr. Gladding, are about as promising a pair of youngsters as can be found in the State. Two thousand dollars was recently offered for All Style a trotter owned by Dana Perkins that Quinn is training. Others in this string are Ed. Kavanaugh's Dora, Todhunter's Silver Hunter, Paul Sim's Capt. Gorges and a Searchlight colt that is being talked about. Greco B. the McKinney stallion is looking well.

Thomas Ronan, owner of the Pleasanton track wants to sell his fine mare Antoinette. This mare is one of the nicest trotters at Pleasanton, and it is only for the reason that Mr. Ronan has no use for her, as he does not race his horses, that she is offered for sale. She won a handsome silver cup at a Pleasanton matinee last year, trotting in 2:21 with her owner driving and has worked miles in 2:18. She can surely trot in 2:15 with a little training and is not only a handsome mare, but has perfect manners and can be driven by anyone. Antoinette is by Antrim 5918, sire of Anzella 2:06¾, while her dam is by Meredith and is the dam of that fast trotter Antrima 2:15½. In fact, Antoinette is a full sister to Antrima. Mr. Ronan will price this mare right to anyone who wants a good, sound, well bred and fast trotting mare that can win on the circuit or at matinees. Antoinette has no record. Write to Mr. Ronan at Pleasanton if you want a nice trotter.

Drink Jackson's Napa Soda.

THE BIG FREE-FOR-ALL.

It now looks as though the big free-for-all trotting race which is scheduled for the Readville track July 4 will result in one of the greatest contests of the year. When it was announced that six of the star trotters of the year had entered in the event it was the remark of the horsemen that while the entry was a good one, and while the horses named were decidedly the highest class lot of trotters that had ever been entered in a race, the association would be lucky in bringing three of the six to the wire on race day, and this was the view taken by the association.

It was the object of the Readville association to give the lovers of the harness racing a chance to see some good sport early in the season. It would sharpen their appetites for the good things that the association has in store for them at the Grand Circuit meeting in August.

With the race scheduled to come off next Saturday it now looks as though there will surely be four horses to turn for the word. The Hubinger trotter Axeyell 2:06¼, who is in training at Readville, looks to be the most doubtful starter of the six that are entered. He has a bad leg at present, and trainer Fred Hyde is not at all sanguine that it will yield to treatment soon enough to get the speedy bay gelding in condition in time, and, indeed it is problematic if the trotter gets to the races this season. Of the other five the old campaigner, Wentworth, is the doubtful member; still the black gelding may surprise the critics by getting to another race.

Of the four that are considered to be sure starters in the event three, Sonoma Girl 2:05¼, Sweet Marie 2:02 and Wilkes Heart 2:06¼, are in training at the Poughkeepsie track.

Apparently Sweet Marie, the queen of race mares is the most advanced in her work. Billy Andrews has been a mile in 2:08½ with the big daughter of McKinney, and at the track they say that the mare was never in better condition. She will surely come to the wire fit to go the race of her life, which means that the winner of the race will have to step right around the trotting race record. Sweet Marie is a great favorite in this city where she has never failed to put up a good contest.

Sonoma girl is also in Billy Andrews' stable. She is not far advanced in her work as is Sweet Marie. She has, however, been a mile in 2:10, and Andrews says that she is working splendidly, and also that he will have her ready to race for a man's life by the time of the Readville race. As Andrews has Sweet Marie in the race, and the mare's owner, Mr. Bradley, has a prior claim to his services he will not be able to drive Sonoma Girl but he says the little brown mare will be in shape to deliver the goods. At last accounts it had not been decided who will race Sonoma Girl this season. It is quite evident that Andrews cannot drive her in either the free-for-all at Readville or in the \$50,000 race at the same track.

The admirers of the mare would like to see Myron McHenry up behind her, but as that trainer is racing a stable of horses for another man it is doubtful if his services could be secured. However, there are many good trainers that could be engaged to drive the mare in her two Readville engagements.

The third horse entered in the free-for-all that is being trained at the Poughkeepsie track is that good game gelding Wilkes Heart. It will be remembered that the gelding's trainer, Stelle, met with a bad accident some time ago. This has interfered with the gelding's preparation to a certain extent; but he is working nicely at present, and Stelle, who is now able to give him his work says that the bay gelding will be on hand when the bell rings, and that the others will have to be right on edge to beat him.

The fourth member of the lot is the big gelding George G. who went through last season without meeting defeat. The reports from Island Park, Albany, where Alta McDonald is getting the gelding ready for the race have all along stated that he was working finely, and those who know Alta are sure that he will have the trotter trained to the hour. With these four horses at the wire ready to do battle for the big purse a great contest will be assured. All of them are sufficiently well along in their work so that outside of accidents they should be ready to take the word for the first of the big races of the season. —Kentucky Stock Farm.

The expedition to the Antarctic regions which some time ago sailed from Australia took with it fifteen Manchurian ponies for sledge and pack work on the ice. This is the first time horseflesh has ever been used in such cold regions, and the experiment is being watched with interest. The ponies were purchased in China, and are thus described: "With hogged manes and exceptionally big heads they present rather a coarse appearance; they stand from 14 to 14½ hands, and were they in proper show-ring condition would take a lot of beating as a whole. They are particularly big-boned fellows, stout of quarters, very long underneath, heads full of character. In color they are white, dun, flea-bitten grey, brown and black. The white ponies are reckoned the best. These ponies are extremely hardy, and could beat the Australian ponies in China in point of endurance. They are quite at home in cold latitudes—in fact, they roll in the snow and bury themselves in it when at liberty. These Manchurian ponies are all bad tempered, and so troublesome to shoe that it is necessary to sling them whenever their feet require attention.

BUTCHERS' DAY RACES.

At least fifteen thousand people filled every available seat and all the standing room within a radius of two hundred yards from the judges stand at the Emeryville track on Wednesday last, the fifteenth anniversary of Butchers' Day which is the day on which the Butchers Board of Trade of San Francisco annually celebrate its organization. The entertainment that attracts this enormous attendance is harness racing between trotting and pacing horses, supplemented with fun making features in the shape of mule races, steer races and vaquero races. The horse races are all dashes, and there were no less than thirteen of them on the card and it took until dusk to finish them. The track was pretty fair next to the pole, but out further it was deep in dust, although it did not break away, and the horsemen all agreed that plenty of water would put it in good shape for the big trotting meeting in August.

W. J. Kenney, President of the San Francisco Driving Club acted as starter and did very well. The drivers who pilot the horses on Butchers' Day are made up of amateurs, professionals, and a few road drivers who know nothing of track rules and care less, but are out to win and to have a good time as well. Delays are numerous of course, and can't be helped, but the crowd is always good natured, taking just as much sport out of joshing the losers as cheering the winners.

In spite of the crudeness of the sport there are always some good races and contests that would arouse enthusiasm on the Grand Circuit are occasionally seen.

The features of the races Wednesday were the wins of Chestnut Tom in the free-for-all trot, Kitty D. in the free-for-all pace, Nelly Gaines in the 2:20 pace, and the winning of two firsts and a second by Princess Christina.

In winning the free-for-all trot, Chestnut Tom trotted the mile in 2:15 driven by his owner, George T. Algeo, and beat Princess Christina driven by Ben Walker about a neck. The mile was fully as good as 2:12 over a good track and shows that the son of Nutwood Wilkes is in rare form just now as the time is a reduction of more than two seconds from his former record made over the fast Salinas track two years ago. Chestnut Tom is now ten years old and it looks very much as if he might be equal to a mile in 2:10 under favorable conditions. Algeo had him in fine fettle and made a splendid drive.

In the free-for-all pace Kitty D. was driven perfectly by Jos. Ryan, and landed first at the wire by out pacing Charley J. and Little Dick through the stretch after they had raced one another into the ground by going to the half in 1:05½ a tremendous clip for a deep dusty track.

Princess Christina, the Dexter Prince mare, that has been trained a little this spring by Mose Hart covered herself with glory. She was driven by Ben Walker and started in three events. The first a mile dash for trotters and pacers, she won handily in 2:21. In the second race she was just beaten by Chestnut Tom in 2:15, and she then won her third race easily in 2:18. For an absolutely green mare this is a great showing and she will doubtless be heard from favorably in the circuit races later on.

The 2:20 pace furnished a nice contest and was won by the Walnut Creek mare Nellie Gaines, owned by J. H. Harlan. This mare is a full sister to the former sensational pacer Ben F. 2:07¾. She had but five workouts prior to this race, having been used as a road horse to buggy and to saddle during the past few months. Her mile in 2:16 was an excellent performance, especially as she had speed enough left to offhand the rush made by Joe Cuicello with Queen Derby in the stretch. Nellie Gaines wore not a strap or a boot of any kind, nothing but a light harness, and was shod with six ounce shoes all around. She looks as if she might reach her brother's record with training.

The first race won by Byron Lace was in slow time because he so far outclassed his competitors in speed that he was pulled almost to a walk at the finish, and simply jogged the last eighth. In the second race won by him he had a harder fight, but won out.

The first race of the day had a big field of starters and starter Kenney finally made them all turn about thirty feet from the wire and take what was pretty nearly a standing start. It worked all right and the send-off was a good one. Teddy Ray, a son of Monterey, won the race, beating out the old timer Durfee Mac 2:16. Teddy Ray is owned by P. Howard, the well known Alameda butcher and the win was a popular one.

The following gives the first three horses in each race as they caught the eyes of the judges, no attempt being made to place the others. The last three races were for horses owned by members of the San Francisco Driving Club.

First Race—Retail Butchers' Cart Race:	
Teddy Ray (P. Howard)	1
Durfee Mac (J. Nowlan)	2
Margaret (G. Tassi)	3
Second Race—Trotting and Pacing, mile dash:	
Princess Christina (A. Stone)	1
Cole Direct (Harry D. Brown)	2
Mike Donnelly (James Bonney)	3
Time—2:21.	
Third Race—Butchers' Trotting and Pacing race, mile dash:	
Belle (J. W. Danz)	1

Margaret (G. Tassi)	2
Presto (Consani & Guilani)	3
Time—2:23.	

Fourth Race—Trotting, mile dash, free-for-all:	
Chestnut Tom (George T. Algeo)	1
Princess Christina (A. Stone)	2
Walter Wilkes (C. L. Becker)	3
Time—2:15.	

Fifth Race—Butchers' Trotting and Pacing, mile dash:	
Byron Lace (Consani & Guilani)	1
Babe (J. W. Danz)	2
Dandy (F. Von Sootsen)	3
Time—2:31.	

Sixth Race—Free-for-all Trotting and Pacing, mile dash:	
Kitty D. (A. M. Hoffman)	1
Charley J. (Charles Lecari)	2
Little Dick (Luke Marisch)	3
Time—2:15.	

Seventh Race—Pacing, mile dash:	
Nellie Gaines (J. A. Harlan)	1
Queen Derby (J. G. Cuicello)	2
Cole Direct (Harry D. Brown)	3
Time—2:16.	

Eighth Race—Trotting, mile dash:	
Princess Christina (A. Stone)	1
Allie Derby (George W. Combs)	2
Charley B. (C. L. Becker)	3
Time—2:18.	

Ninth Race—Vaquero running, quarter mile:	
Montana Sal (Fritz Wright)	1
Constable (William Harney)	2
Tanforan (Ed. Sullivan)	3
No time.	

Tenth Race—Mule race to carts, mile dash:	
Pedro (H. H. Wilkins)	1
Butchertown Maud (J. Ladds)	2
Tessie W. (L. Garibaldi)	3
Time—4:13.	

Eleventh Race—Free-for-all, trotting and pacing, two mile dash:	
George Perry (G. J. Giannini)	1
Kitty D. (A. Hoffman)	2
Charles J. (Charles Lecari)	3
Time—4:45 2-5.	

Twelfth Race—Steer running race, one-eighth mile:	
Jumbo (Cames & Cassolet)	1
Rondo (Oakland Meat Company)	2
Butchertown Jeff (J. O'Connor)	3
No time.	

San Francisco Driving Club races:	
First Race—2:20 Class, final:	
Lady Falrose (T. H. Corcoran)	1
Deroll (G. Kitto)	2
Dynamite (H. Schottler)	3
Best time—2:17.	
Second Race—Free-for-all, one mile, final:	
Byron Lace (G. Nutting)	1
Queen Derby (J. Cuicello)	2
Major Cook (Dan Hoffman)	3
Best time—2:17.	
Third Race—2:25 Class, final:	
Monk (F. Clotere)	1
Lucero (J. F. Campodonico)	2
Hunky Dory (J. V. Galindo)	3
Best time—2:23.	

MARQUE SEES THE DURFEE HORSES.

In the last issue of the Chicago Horse Review Jos. Markey, who writes over the nom de plume of "Marque," has the following interesting gossip about Will Durfee's horses now at Wheaton, Illinois:

Last Saturday I visited Wheaton, Ill., and for the first time had the pleasure of seeing the horses brought over from California by Will Durfee, C. H. Hewitt and William Cecil. If I were to write as enthusiastically as I feel regarding the Durfee horses, I would be accused of slopping over, but should you have the pleasure of seeing four of his six stallions you will enthuse with me.

But first of all I must state that the Durfee horses, much to my surprise, are high in flesh. As a rule the horses brought from California in the past have had the appearance of "having been to the races." Monroe Salisbury's system was to key his horses up in March and April and then, about the time of shipping over, let up on them. As the result of this system they arrived in the East somewhat honed down. I recall the jokes passed around among the caretakers when asked about their charges. They would say: "Well, we raced the M. and M. in February and the Charter Oak in March, and but for a spell of rain in April we would have decided the Transylvania before coming over the mountains."

Of course, the horses filled up and took on flesh during the period of let-up which followed their Eastern advent. Durfee has evidently reversed the system and the result will be watched with great interest.

In speaking of their work, Durfee told me that it was his observation that his horses were only a little in advance of our local ones in the matter of preparation. He is going to try the plan of racing them into form at the Peoria, Terre Haute and Windsor meetings before tackling the Grand Circuit. This is not to say that they are short of work. On the contrary, they have had a lot of it, but not of the extremely fast sort.

But to return to the horses: I will have to account the stallion Coronado 2:09¾ the handsomest McKinney (2:11¼) I ever laid eyes on. By handsomest I do not mean mere beauty, but all the physical features that go with a stallion of the highest class. When he is led out you begin to realize that at last the horse is before you which you have long had pictured in your mind, but have seldom found in corporeal form. There is little or nothing in Coronado's make-up that you can find fault, and when you have looked him all over to apparent satisfaction, you want to go back for just another look at him. He is a masculine stallion, powerfully made throughout, but finished at every point. His legs are put on just right and are flat and wide; his back is short, his shoulders and quarters strong and his neck, curved and crested, fits the horse to a nicety. He has a stallion's head, just large enough and at the same time clean cut and full of intelligence. I didn't see him in harness, but the trainers at Wheaton tell me that he is a grandly gaited trotter with a forceful way of going. It's worth a visit to Wheaton to see Coronado, and I for one will chip in to give you back your money if you don't like him.

Coronado took his record in a third heat of a winning race in 1906, racing only one other time that year and winning. Last season he started in but one race, winning in slow time. Just at present the stallion is not being worked faster than 2:20. Durfee has bred him to four or five mares since coming East including Traitress, by Trevillian 2:08¾, owned by W. P. Cowan of Chicago. Traitress is the dam of Loyal, Mr. Geers' M. and M. candidate, who recently worked in 2:20.

The other three stallions I spoke of as being handsome are Copa de Oro, p. 2:07¾, and the trotters Murray M. 2:14 and Petigru 2:10½. Copa raced last season in California with marked success, about the only horse that had it on him being Sir John S. 2:04¾. He is a brown horse, by Nutwood Wilkes 2:16 (sire of John A. McKerron 2:04½, etc.), dam Atherine 2:16¾, by Patron. Murray M. took his record in 1904 as a three-year-old, but has not been raced since. He is seven years old, by Hambletonian Wilkes, and out of Anna Belle 2:27½ (dam of Robert I. 2:08¾), by Dawn 6407. Petigru is the only one of the Durfee horses that is not a native Californian. He was purchased at the end of his Eastern campaign in 1903 and proved a good winner for Durfee for several seasons in the coast races. He is a large horse, with a lot of good looks and quality. Durfee tells me that he is farther along than his other horses and can beat 2:10 now, having been worked in 2:11¼.

Of course, I was anxious to see the famous "Pig," the Los Angeles pacer, of which so much has been said and written during the past three years. They have had him going miles in 2:00 and few horses that have never raced have had so much publicity. The fact is that he has been many miles around 2:05 and one in 2:03½. Why they should dub him "The Pig" I cannot fathom, for he is not built on the pudgy lines the sobriquet would imply. In fact, he is a little horse all over, not round, full made, and fat as they would have us believe. He is not a pony-made horse either, just a little 14¾ hands black horse. Of his speed there can be no doubt, but as Durfee had to hang the hobbles on him, it is not likely that they were resorted to for purely ornamental purposes. I figure it out this way: Phoenix, as the horse is now called, was worked for three years alone, and this did not tend to educate him for service on the firing line, so Durfee wanted to make sure of matters. Phoenix was worked around 2:08 early this spring. It seems to me that his diminutive proportions would militate against his chances when meeting the real cracks, but one can never tell. Another stallion in the string is Carlok in 2:13¾, a brown seven-year-old, by McKinney 2:11¼, dam Carlotta Wilkes (dam of Inferlotta, p. 2:04¾), by Charley Wilkes 3563; second dam by Alcantara. Carlok in is more of a pig than "The Pig." That is to say, he is a real full made little horse, short of leg and big of body. In eight races last season he lost but one, and that, I am told, through an accident. This certainly looks like a capable trotter. The only gelding in the bunch is Dredge 2:14¾, by James Madison 2:17¾, sire of Tuna 2:08¾ and Brilliant Girl 2:08¾ two well-known Grand Circuit trotters. Last to name of the stable is Zomalta, a green trotting mare by Zombro 2:11, dam by Joe Hamilton. She has been in 2:17½ and is charged with miles around 2:10 last year. She is a picture mare, and, were it not for having said so much about Coronado, I would have to hand a bunch of spinach to her. The fact that she is entered in the \$50,000 handicap would indicate that Durfee thinks pretty well of her. Aside from his racing stable Durfee shipped with him the trotting mare Belmont 2:09¾, owned by Bob Smith, who gave Sweet Marie 2:02 her Grand Circuit debut. Belmont will be sent to General C. C. Watts' farm to be bred to General Watts (3) 2:06¾.

The entries in the 2:05 pace at Walla Walla are Sir John S. 2:04¾, Leland Onward 2:04¾, Mona Wilkes 2:06¾, Moy 2:07¾, Delilah 2:08, Alta Norte 2:16¾ and Iowa Boy 2:19¾. Iowa Boy took his record nine years ago and is now fourteen years old. He must have been acting rather coltish lately to induce his owners to enter him against such a bunch of fast pacers as he will have to meet in this race.

The statement that Early Reaper 2:09¾ was sold to the Russians turns out to have been an error.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The ninth annual Grand American Handicap of the Interstate Association started at Columbus, Ohio, on Tuesday the 23rd inst., on the grounds of the Columbus Gun Club and wound up yesterday afternoon with the Professional Championship—for professionals only, 200 targets, 18 yards rise.

Last Monday was devoted to preliminary practice, six races at 20 targets, sweepstakes open to amateurs only. On Tuesday the card was six 20 target events (Event No. 3, use of two shots, 19 yards rise). Wednesday's schedule opened with the Preliminary Handicap, 100 targets. Event No. 2 was for 10 double rises at 16 yards. The special feature for the day was the State five man team race, 100 targets per man. The Grand American Handicap was billed for Thursday, 100 targets, unknown angles. Entries closed on June 13th with 316 shooters listed, this number was augmented by post entries. The opening event of the program for the closing day was the Amateur Championship at 100 targets.

Local trap-shooting for the 21st inst shows somewhat of an impetus for the sport for two club shoots were held, counting a total of 50 guns on the firing lines. This fact is a practical refutation of statements in the daily press that the sport is on the wane in this city. This number of shooters out on a day when numerous other attractions, to say nothing of the trout streams and black bass waters, invited the sportsman away from the city is rather a strong argument that trap shooting has a healthy following in this city. For many years not a large city on the coast has had that number of trap shots out on a Sunday at regular club shoots.

The Golden Gate Gun Club regular monthly shoot came off at Ingleside on the 21st inst. Otto Feudner shined as high gun for the day, he lost but five targets out of 75 singles and 7 out of 20 shooting at doubles. The Du Pont trophy race was the opening event, a distance handicap at 25 targets. Feudner at 20 yards broke 23. This was his first win in the race, he had previously scored two ties. He lost on shoot-offs with Iverson and Price.

The club match at 50 targets brought Feudner to the front with 47 breaks.

The closing event was the "new" Du Pont trophy race. Feudner and Ashcroft were high guns with 13 out of 20 (10 double rises). A summary of scores follows:

Du Pont trophy, 25 targets, distance handicap: Feudner 20 yards, broke 23, Iverson 18-20, Price 16-20, Thomas 16-19, Haight 20-18, Hoelle 18-17, Cuthbert 16-16, Ashcroft 16-13, Lemon 14-6.

Club race, 50 targets, distance handicap, \$50 added purse—Champion class: Feudner 18 yards, broke 47, Forster 18-44, Haight 18-42.

First class: Iverson, 18 yards, broke 43, Murdock 18-38, Hoelle 16-37, Klevesahl 18-36.

Second class: Taylor 16 yards, broke 39, Price 16-36, Ashcroft 16-36, Thomas 16-36, Patrick 18-32.

Third class: Valencia 18 yards, broke 39, Biller 18-26, Sinkey 16-35, Herring 16-25, Noonan 18-24, Lemon 18-16.

New Du Pont trophy, 20 targets, 10 double rises: Feudner 20 yards, broke 13, Ashcroft 16-13, Haight 20-12, Sinkey 14-11, Valencia 14-11, Hoelle 18-8.

The Carnation Gun Club's second monthly shoot took place on the Guadalupe Valley ranch grounds, South San Francisco, last Sunday. Three blue rock races comprised the card. G. and A. Sylvester and Kerrison were high guns in the 15 target warm up. R. Finnocchio, P. Finnocchio, Schnipper and Ferrier were the leaders in the second event, the Du Pont trophy race. H. Klevesahl and G. Thomas broke 22 and 21 respectively, shooting as guests for birds only. These two events seemed to be a fraternal cinch for the S and F brotherhood. Ferrier, Burns, Pisani and P. Finnocchio were the purse winners in the club race at 25 targets. Score summaries follow:

Warm up, 15 targets—G. Sylvester 14, A. Sylvester 14, Kerrison 14, G. Ferrier 13, M. Perpoli 13, Barber 12, Pisani 12, Y. Rose 12, J. Burns 11, Z. Sylvester 11, G. Flick 11, O. Eggers 11, Share 11, P. Finnocchio 11, Schnipper 10, Fontberg 8, Howard 7, G. Axley 5, R. Burns 4, Morris 3, G. Freudenberg 3, A. Rose 2, Salter 1.

Du Pont trophy, 25 targets—R. Finnocchio 21, P. Finnocchio 20, Ferrier 19, G. Sylvester 19, Pisani 17, Perpoli 17, Sullivan 17, Barber 17, Axley 17, Share 16, Dickman 16, Eggers 16, J. Burns 15, Kerrison 15, J. Rose 14, Schnipper 14, Howard 13, Morris 11, A. Sylvester 9, A. Rose 9, R. Burns 8. Guests: H. Klevesahl 22, G. Thomas 21, M. J. Iverson 20, H. Biller 18.

Club match, 25 targets—Ferrier 23, J. Burns 21, Pisani 20, P. Finnocchio 20, G. Sylvester 20, J. Rose 18, Howard 18, R. Finnocchio 18, A. Sylvester 17, Share 17, Schnipper 16, Perpoli 16, Morris 16, Dickman 16, Sullivan 15, Kerrison 15, "Pats" 14, Flick 14, Eggers 14, Barber 13, R. Burns 11, J. Farthing 11, Axley 10, C. Wideman 8, Sultor 7, A. Rose 7, Friend-

enberg 4. Guests: Kleversahi 22, Iverson 20, Thomas 18, Biller 18.

Among the Carnation Gun Club shooters are a number of new men at the local traps. They are nearly all good shots however, having acquired their skill on the hills and bay shore marshes of San Mateo County.

Lemon, who usually runs up a good score, handed himself one last Sunday.

Are you a Booster? The Western Booster Trap Shooting Association now numbers over 300 members including a number of California shooters, and is growing stronger every week.

A meeting of trap enthusiasts was recently held at Livingston, Mont., and discussed the trap shooting situation for the purpose of getting at the "best way to boost" the sport in the northwestern states. The result was the organization of the W. B. T. S. A.; annual dues \$1.00.

Program immediately following organization arranges for a tournament once a year in some city in either Montana, Utah, Nevada, Oregon, Washington, Idaho or California. Anaconda, Mont., was selected as the initial starting point of what is designed to become a long series of successful annual tournaments. Added moneys amounting to \$3,100 in gold will be a strong inducement for an expected attendance of 300 shooters—the management states that double this number of shooters can be accommodated.

Anaconda has the reputation of being the best tournament city in Montana. The local gun club has an active membership of 35. For the tournament the traps will be located in front of the finest grandstand in the West. The grounds are only five minutes from the principal hotel by electric street railway. Hotel accommodations are reported excellent and prices reasonable.

The tournament features are: All prizes in cash, —medals and trophies will not be shot for. Ten 20 target events each day, \$100 added money for each event. No handicaps, money divided, 20 per cent to first place, ditto to second to fifth places inclusive, 10 yards rise, birds two cents each. Interstate Association rules to govern. This tournament is registered. Three high averages to divide \$100—50, 30, 20.

It is announced this shoot is not confined to Westerners, an invitation is extended to Easterners to be present and note "what can be done under Western management and Western conditions."

The officers of the association are: P. J. Holohan, Twin Falls, Idaho, president; C. H. Smith, Butte, Mont., vice-president; J. S. Boa, Salt Lake City, Utah, secretary-manager; Eugene F. Confarr, Livingston, Mont., custodian; E. P. Mathewson, Anaconda, Mont., local manager; James H. Cochran, Anaconda, Mont., local secretary; J. L. D. Morrison, St. Paul, Minn., will be ground manager.

For further information and program address James H. Cochran, Anaconda, Mont.

W. E. Greene and A. E. Pearson shot a tie, 84 out of 100 blue rocks at the Salinas Gun Club medal shoot on the 15th inst. Fifteen guns contested. Rather than shoot off the tie, the sportsmen decided to call it a case of "one tie, all tie," and another shoot at 100 targets will be held, "just to give everybody a chance."

Dick Reed of the Union Metallic Cartridge Company showed the Hanford Gun Club boys the possibilities of the new Remington repeating shotgun at the club grounds on June 14th.

The Globe Gun Club of Globe, Ariz., hold regular weekly shoots in the ball park.

Captain George E. Bartlett is drawing large audiences at his shooting exhibitions at various towns and cities in southern California. He represents the Peters Cartridge Company.

The El Paso Gun Club propose to hold a fall rifle tournament under the auspices of the Arizona Sportsmen's Association. G. L. Hitt was recently elected vice-president of the club.

The Hercules Gun Club has arranged a series of blue rock shoots to take place at the Pinole trap grounds. These grounds are well arranged and easy of access, the club shoots should draw a good attendance of east bay shore and visiting shooters. The Contra Costa sportsmen are all excellent wing shots.

The San Luis Boat and Gun Club members on June 14th contested in the initial shoot of the new series of three meets for the Du Pont and Empire trophies. F. Soto scored straight in the first event, 10 target. Soto, E. Taylor, W. Keller, P. J. McCaffrey and C. T. Greenfield tied in the second race at 20 birds. Taylor and Greenfield scored 17 out

of 20 in the third and the latter was high with 17 out of 20 in the fourth race.

There were five events—at 10, 20, 20, 20 and 10 targets respectively. The scores summarized were:

E. Taylor 6, 14, 11, 15, —; F. Soto 7, 16, 17, 12, 8; J. Guthrie 10, 13, 14, 13, 9; F. W. Keller 5, 16, 12, 15, 9; P. J. McCaffrey 6, 16, 12, 13, 7; C. T. Greenfield 8, 16, 17, 17, —; J. B. Van Scoy 6, 13, 12, 13, 7; J. E. Van Schaick 7, 13, 14, 13, 9; J. H. Norton —, —, 13, 10, 9; J. A. Renetzky 5, —, —, —, —; Mandersheid —, 11, —, —, —; Varney —, —, —, —, 11, 7.

The Vallejo Gun Club shoot on the 14th inst., had for the feature event the Du Pont trophy race. J. V. O'Hara was high gun in this target handicap shoot. The scores were: O'Hara 26, Wisecarver 22, Grimes 22, Clark 21, Magistrini 21, Hirschle 21, Rose 19, King 19, Roney 15.

For the Senate cup 100 blue rocks will be shot at, fifty Sunday and fifty at the next shoot; every shooter handicapped from previous scores by bird allowance. Following are the scores on the first fifty birds: Grimes 46, O'Hara 44, Rose 42, Roney 40, Clark 39, Hirschle 37, Magistrini 36, King 34.

For the Ballistite medal, the following are the scores, distance handicap: Magistrini 23, Roney 19, King 18, Clark 15, Hirschle 14.

The Wheatland Gun Club will hold the second annual dove stew Sunday, July 15th. S. D. Hicks, L. T. Kimmerer, A. G. Oakley, M. F. Hollingshead and E. F. Enoch compose the committee of arrangements. It is the intention to make this particular sportsmen's outing a memorable affair, and if anyone can accomplish such a pleasing result, leave it to the upper valley sportsmen to do the proper thing in every respect.

Live bird and blue rock shooting, open to all, is on the program.

A live bird shoot will take place at Rio Vista on July 4th. M. L. Isham will be ground manager. He proposes to have 100 dozen strong birds on hand. There is a strong representation of trap and wing shots in that section and the tule boys generally make good when they turn out for a shoot. The celebration committee will hang up a \$100 purse to swell the pools.

There is quite a rivalry between Carson and Reno trap shooters. The Riverside Gun Club of Reno, Carson City and Gardnerville clubs met on the 14th inst. at Carson City. Three weeks ago the Gardnerville shooters beat the other two clubs decisively, Riverside selected ten of its best shots, two teams to redeem their lost prestige. Among the Reno shooters there is also an intense rivalry. The Class B team felt that they were entitled to place in the Class A team. To prove their title they challenged the Class A team.

The Sonora Gun Club shoot for June 7th shows the following scores in four 20 target events:

Event 1—Frank Otis 7, Carne 15, Ball 17, Carkeek 15, Chester Otis 13.

Event 2—Carne 14, Ball 18, Chester Otis 16, Carkeek 16, Frank Otis 10, Wonderly 10.

Event 3—Carne 9, Ball 12, Carkeek 11, Frank Otis 13, Wonderly 11.

Event 4—Scott 14, Carne 10, Wonderly 9, Ball 12, Otis 5, Carkeek 11.

The Auburn Gun Club has arranged a program of two trap shoots for a beautiful Du Pont 1908 trophy.

Auburn and Colfax shooters met at the Colfax traps on May 31st.

The Crescent Gun Club held its regular mid-week shoot at the club grounds at Venice June 10th. Many of the regulars were in attendance and several new faces were seen behind the traps.

The club was honored by the presence of Mrs. Nellie Bennett Stewart, (who for several years was representative of the Laffin and Rand Powder Company), and who can still take her place behind the traps and break as many blue rocks as her masculine competitors.

The winds which blow at the beach every afternoon now make good scores a difficult matter, particularly for those who have not shot at the Venice grounds a sufficient number of times to become accustomed to its slants and angles.

Several twenty-five bird matches were shot, resulting in the following scores: Mrs. Stewart 13, 14; Towne 18, 13; H. L. Bowlds 14, 19, 17, 19; W. A. Wright 15, 16, 23, 19; R. H. Bungay 21, 24, 25, 17; F. Bungay 12, 16, 12, 19; H. D. Becker 11, 10, 7, 13; F. Childs 15, 17, 15; Scoville 8; M. Wood 15, 20, 14, 18; Furenen 15.

On June 14th despite the high wind Bob Bungay of Ocean Park and Lane of Los Angeles scored percentages of 92 and 86 respectively. The results were: R. Bungay shot at 100, broke 92, F. M. Bungay 125-75, Pinney 75-52, Bingham 150-118, Gowland 100-52, Lane 100-86, Childs 125-84, Mitchell 125-80, Greenway 125-66, McCabe 25-17, Dr. Wool 75-54 Pettis 75-41.

At the regular mid-week shoot, June 17th, Bob Bungay scored 107 out of 125 targets, to Captain George Bartlett's 105 targets. The day was pleasant, very little wind blowing, making shooting conditions quite favorable. The following are the scores, in 25 target sections: W. A. Wright 15, 18, 20, 16, 19, 14; H. L. Bowlds 16, 17, 16, 19, 19, 13; H. D. Becker

11, 8, 12, 8; M. D. Towne 16, 21, 14; Capt. Bartlett 23, 20, 22, 21, 19; F. Bungay 7, 13, 15; Frank Childs 19, 14, 15; M. Wood 18, 24, 17, 20, 13; R. W. Armstronog 11, 10, 8, 11; E. B. Bronson 13, 17, 12, 16, 14; C. E. Grosbeck 14 15; H. L. Mitchell 14, 16, 15; C. B. Pettis 15, 10, 7; R. H. Bungay 23, 22, 23, 16.

The Crescent Gun Club will have extensive improvements made on the Venice grounds for the three day tournament August 7, 8, 9. There will be good purses, also side pools arranged and a consolation match on the last day for those who have shot under eighty per cent during the previous day's shooting and who have shot 200 or more targets, for which there will be an added purse of \$50. Those in charge of the tournament will spare no effort to make the affair an attractive one to the shot gun experts of the State, both in the way of conveniences and for the attractiveness of the stakes hung up for competition.

The Colton Gun Club scores in the club shoot at 20 targets, May 31st were: Smith 16, Boynton 15, Henrich 15, Howe 14, Gallehue 11, R. Mathews 6.

Tom Pickett of Reno, the Riverside Gun Club expert shot won three trophies at the club shoot June 6th—the Du Pont trophy 21 out of 25, the Le Deux medal 22 out of 25 and the Ballistite medal 23 out of 25.

The Multonomah Gun Club of Portland, Ore., is on record for a northwest five man team score, 235 targets out of 250. Moch Abraham with 49 out of 50 annexed the Inman medal. The other scores in this event were: Cullison 48, Wagner 47, Casion 47, Caldwell 44, Young 44, Dillon 42, Mrs. Young 40. Five men scored 90 per cent or over, the results in shooting at 100 targets were: Wagner 94, Abraham 94, Carter 93, Cullison 93, Lamson 90, E. Young 88, Caldwell 85, Morgan 85, Dillon 83, L. Young 82, Theban 76, Geiser 75, Mrs. Young 72, Stoddard 72, Mayhew 7., Lang 70, Edwards 70, Epworth 69, Buckley 60, East 54.

Local sportsmen had the pleasure and pride, last week, of examining two beautiful trophies on exhibition at Brittain & Co.'s store, Market and Mason streets. These valuable prizes were won by San Francisco trap shots at the recent Sacramento two day tournament.

The Hunter Arms trophy is a large vase, a most elegant and valuable ceramic art work, embellished with an upland hunting subject most appropriate in lifelike drawing and coloring and which appeals strongly to a sportsman's love of the gun and dog and its attendant recreation. This elegant trophy was won by A. J. Webb. The race was at 20 targets, four guns tied with 19 each. Webb shot off with C. D. Hass of Stockton, E. Holling of San Francisco and J. W. Gibling of Marysville. Webb won out with 19.

The Golden Gate Gun Club team, M. O. Feudner, Webb and Holling accounted for the other trophy, a large solid silver loving cup with buckhorn handles, beautiful in design and "gilt edge" in finish. This trophy is valued at \$100 and was put up by the Buffalo Brewing Co. Teams from Sacramento, Stockton and Folsom competed. Feudner scored 20 straight, Holling 19 and Webb 16—55 out of 60.

SPORTSMEN'S CONVENTION AT SANTA CRUZ.

The next annual convention of the California Game and Fish Protective Association will be held in Santa Cruz, August 13th to 16th inclusive.

The assembly will probably be in the beautiful Casino building on the beach. The Santa Cruz Entertainment Committee will arrange the program for the members and visiting sportsmen. Some of the features will be surf fishing, fishing out in Monterey bay, a trip to the famous Brookdale hatchery and a fish breakfast.

The association has a membership of ninety-five affiliated associations entitled to a representation of five delegates each, this with a membership of 250 in the State association. This presages an attendance of from 250 to 300 sportsmen.

Secretary E. A. Mocker has already arranged the preliminary details at Santa Cruz.

The Sisson hatchery operated by the California Fish Commission is now one of the largest, if not the largest, hatchery in the United States. The annual distribution of salmon and the various species of trout fry exceed that of any other State or Federal hatchery.

The Federal hatcheries are located at Baird on the McCloud river, Mill creek, Tehama and Battle creeks, near Anderson.

The salmon eggs taken at these stations are shipped to the Sisson hatchery, where they are hatched and liberated.

Of the various species of trout, the Sisson hatchery will have for this year's distribution the largest number ever hatched on the Pacific Coast.

Russell's lake in Ventura county, is a favorite resort for black bass fishing by Los Angeles anglers. The fish are plentiful and good fighters.

Drink Jackson's Napa Soda.

MEXICAN WILD TURKEYS BROUGHT TO CALIFORNIA.

The initial attempt to introduce wild turkeys in California, with the purpose in view to provide another game bird for the sportsmen of the State, bore rather attenuated results two weeks ago when the first consignment was landed in San Bernardino.

The round-up of wild turkeys brought to San Bernardino on June 13th (This date will probably give the oracles foundation for future comment as against the feasibility of the venture), consisted of twenty-six birds, representing at least three varieties of fowl, and costing over \$500, so much over that sum that a valuation of \$25 a bird is very much within the amount each turkey has cost the State. They were brought from Mexico, the result of a three months' absence of Commissioner W. E. Van Slyke to the wild regions of the Sinaloa mountains some 150 miles from Mazatlan. The birds, it is stated, are as domesticated as the ordinary barnyard fowl. They were turned loose in pens at the home of County Game Warden James A. Vale, and represent the first attempt of the State Fish Commissioners to stock the game preserves of this State with wild turkeys.

"I regard the trip as a failure," said W. E. Van Slyke, as he talked over the experiences through which he has passed during the three months which he spent in the country to the south, "but I do not feel that I am to blame. The country is far different from what I had imagined. It is as different from this country as the summits of our mountains are different from the level of our valleys, but it was a pioneer venture, and if the Commission wishes to profit by what I have learned, I see no reason why all the turkeys we need may not be obtained in that section, but one must go prepared to outfit in the proper way.

"The Commission gave me \$200 to prepare for the trip out from Rosina. I found the country quite different from what I had expected. The interior is cut with deep ravines. The whole region is overgrown with underbrush which is armored with hook-like spikes, and one cannot push his way through as you do in this country. You have to cut your way carefully, and machetes, which the Mexicans handle with much dexterity come handy.

"When I got to that section I found that I had to employ a man to scout the country for birds. He was off for about nine days, and \$50 was paid him for his services. I ran short of funds and wrote to the Commission. Thirty days later I received \$300. I had found that it would take at least \$1,000 to outfit properly, though much of the outfit could be sold when the hunt would be through, for almost as much as the original cost.

"But notwithstanding the discouragements I had faced, I had planned to remain longer. I had Indians engaged to bring in birds, and secured 36 from them. These I loaded on the steamer, expecting that a mining friend of mine, who had planned to come north, would accompany them. He failed to show up, and at the last minute I had to climb aboard and come with them. At Ensenada I wired the Commission, and expected instructions awaiting me at San Pedro. I found none, therefore shipped the birds to San Bernardino.

"My original agreement was that I should secure 500 turkeys. Of course the Commission at that time seemed to doubt that I could get any. I was to send 50 to San Francisco direct. I have no idea of what the future of the movement will be. The birds I have brought are all fine, and will make a good start. I really believe they will do well in our mountains if released. They will find much the same variety of food here as there, though in Mexico there are several varieties of wild plum which they feed on extensively.

"Among the birds are 7 bronze turkeys, 10 "canellas," 5 "pizons" and a number of "chachalacas." The bronze fellows are the fighters. They got to fighting coming north and reduced the number of birds to 26. They have cruel hooked bills, sharp as needles. The canellas are snow-white, and very beautiful."

Just how long it is intended to keep the birds shut up has not been decided. The canellas were bought from the Indians, who captured the mother bird on its nest, and when the eggs hatched the little birds were allowed to run, while the mother bird was kept staked out, and in this way all have become domesticated.

Of the turkeys an expert who has seen them declares that there are only ten that are genuine wild Mexican birds. These are of a blackish color. Five are "chachalacas" a species of grouse and the king of fast flyers among Mexican game birds.

The "pizons" are black and tufted and said to be wild and gamey. The "chachalacas" are whitish flecked with drab. All of the birds were in excellent condition.

Down south among the sportsmen interested there is much disappointment felt over the meagre pioneer showing of Mr. Van Slyke's mission, although he is not blamed.

One of the grouse which were turned loose among the foothills around the valley, appeared in a San Bernardino chicken yard four weeks ago and made itself at home among the chickens for two days when it died suddenly.

The nearest point to the yard where the grouse were set free is at least ten miles and how the fowl strayed so far away from the other birds is a mystery.

HUNTING LICENSES ARE READY.

The Fish Commissioners are preparing to distribute to the different County Clerks of the State 120,000 residence licenses, of the \$1 class, and several hundred each of the non-resident and alien licenses at \$10 and \$25, respectively. The application blanks will be distributed throughout the State to every Justice of the Peace and each postal and express money order office. The hunters' license issued last year will expire June 30th. The shape of the tag this year is round instead of oval as it was for 1907-8, the material is the same however.

A great many demands are coming to the Fish Commission office every day for hunting licenses for the ensuing year. Many sportsmen who are getting ready for their summer vacations have procured licenses, so that when they reach the mountains they will have a legal right to shoot protected game. Inquiries have come regarding a license for fishing. Many persons are under the impression that a license for angling is also necessary. The Fish Commissioners report that in every quarter of the State there is a growing sentiment that the angling fraternity should also pay a license. The Fish Commissioners are of the opinion that one license—made good for hunting and angling—will be sufficient. It would entail no more work on the county clerks, require only one system of accounts, and be much more economically handled than the double system which has been advocated by some. No change, however, can be made until the Legislature again convenes, when it is probable that the law may be amended to include angling, which would add a good many thousand dollars to the funds of the Fish Commission and permit of still further expansion, a better patrol of the streams and increased hatchery output.

The number of hunting licenses sold last year in this State was approximately 115,000. Considerable inconvenience was experienced in getting material fast enough to meet this extraordinary demand. A great deal of unexpected work was thrust upon the County Clerks, who were obliged to issue receipts until licenses could be procured, which involved double correspondence and postage. All this is avoided this year.

From practically every County Clerk in the State, with but three or four exceptions, the Commission has received letters of encouragement and offers of assistance, which indicates the popularity of the present license law.

The hunting-license application blank was devised by the Fish Commissioners to enable people living at a distance from the county seat to procure their licenses without loss of time and expense. While the license law is in existence in thirty-five States of the Union, California was the first one to devise the application blank, and it is to that and the improved public sentiment that the Fish Commissioners attribute the great interest that has been taken in the entire license scheme.

For the benefit of those who have doubts as to the constitutionality of the law, requiring aliens to pay a larger hunting license fee than citizens of the State, a decision of the Supreme Court of Alabama in the case of Lake vs. Calhoun County on the right of the State to impose different license fees, the language used by the court is clean-cut and decisive. It says: "It is a legal and political axiom that protection and allegiance are reciprocal. Aliens, resident or sojourning here, do not owe the full measure of allegiance exacted from the citizen nor can they enjoy the rights, privileges and immunities of citizenship."

BIRDS SAVE THE FORESTS.

The work of the Audubon Societies throughout the United States for the preservation of bird life is conducted on scientific and enthusiastic lines and much good has already been accomplished. One method, practical and of common sense, is the spreading of the gospel of fact information about birds, their ways and economic value, that is bound to be of benefit, in time, to the commonwealth. The Pasadena News gives briefly through the medium, we suspect, of Scott Way Key, the following information that is worth considering by many who believe the uses of rifle and shot gun are only for the destruction of every animate creature, particularly the small feathered habitants of the wildwood:

Crops flourish and forests stand to conserve land and water largely through the activities of the existing bird guard that ceaselessly fights their natural destroyers, the investigators of the government point out. With a known loss of over \$800,000,000 to the crops of the country last year due to killing off their guardian flocks, the corresponding effect on woods and waters may be reckoned in the billions of dollars, the Audubon workers declare. Uniform laws for bird protection, if adopted by the states, would go far to ward off these growing inroads of insects and other pests, they say, and this might well be the first step to be taken following the deliberations of the house of governors.

While the value of the birds to the farmer, orchardist and planter has for years been recognized, it is believed by the authorities that their importance in preserving the forests is not generally known. According to a recent report of the government, insects alone cause an annual loss to the trees of the country estimated at over \$100,000,000. On the oak alone 400 species of insects which are sought and consumed by the birds of the forest prey constantly, the experts of the Biological Survey have discovered. On

the willow 186 such species constantly attempt its destruction; on the pine 165, on the hickory 170, on the birch 106, and on the elm eighty. Careful analysis of the stomachs of thousands of woodpeckers, titmice, creepers, kinglets, wood warblers, wrens, flycatchers, swallows, nuthatches and other birds of the woods show that their constant labor is to consume just these devastating insects.

Ranked next to the insect, which is the chief enemy of the forests, are destructive vegetable growths and the attacks of mice, wood rats, rabbits and other small animals. Careful analysis of their food shows that many species of wood birds make away with the unwholesome vegetable matter. Hawks owls and other larger birds of prey are constantly on the watch to check the inroads of the harmful animal life about the trees. Robins and other feathered races have been shown to be the greatest natural agency in distributing seed far and wide and causing the forests to thicken and expand ornithologists assert.

FISH COMMISSION DISTRIBUTING CAR.

An important branch of the work of the State Fish Commissioners is the distribution of fish fry for restocking the various streams and waters of this State. Heretofore this work has been carried on systematically each year, but, under the circumstances handicapped to a material extent by inadequate facilities. This state of affairs, through the increasing demand every season placed the Commission, at times, in a position where they were practically unable to meet properly the exigencies of the situation, particularly so, when the endeavor was made to reach distant waters which it was desirable to stock or plant different varieties of fish in. Nevertheless with the comparatively limited resources at hand much good work has been accomplished.

The need, however, when more extensive arrangements, in the saving of time, the carrying of larger quantities and different species of young fish, the proper handling of and attention to the fry in transit, the planting of the same with a minimum of loss and all the other accessory work that goes with it, has been felt for several seasons past.

Provision was made for this contingency some time ago with the result that a sum of money, \$7,500 was set aside at the last session of the Legislature for the construction of a "fish-distributing" car which was to be placed at the disposal of the Fish Commissioners. This ardently wished for and needed aid to the good cause has now been carried out, with the result that a properly designed and constructed car fully equipped is now, or will be in a few days, in the service of the Commission. What has been done in this respect is stated by the Sacramento Union as follows, and will, no doubt, be hailed by the angling fraternity, for one interested body, as most pleasing and welcome information:

"The fifth fish-carrying car especially remodeled for the use of a Fish Commission, in the country for the use of a State, was last week completed in the Sacramento Southern Pacific shops and will shortly begin the distribution of trout and salmon from the Sisson station, in Siskiyou county. R. W. Regua, formerly of the Federal fish distributing service, who has been in the business for twelve years, will have charge of the California Fish Commission car as supervising distributor. He will have two men to aid him in the work.

"It is declared that the car as turned out in the Sacramento shops under the personal direction of Mr. Regua is one of the most convenient in the country for the work, and one of the most inexpensive. It cost a little over \$7,000, which was appropriated by the last legislature for the purpose.

"The car to be put on the road by the California Commission will reduce the expenses of distributing the fish to a minimum, besides placing the work in California on a basis higher than that in eight-ninths of the other States in the Union. It will also accomplish results which were impossible under the old system of shipping cans of fish as baggage.

"The California Fish Commission car is a remodeled baggage car painted yellow, like the Southern Pacific coaches were formerly. It is labeled "Distributing Car; California Fish Commission."

"The interior is fitted up, besides for carrying fish, with sleeping and eating accommodations for four men and an office for the superintendent. The office is at one end of the car and a culinary department in connection with a steam engine at the other. In the center are placed the cans in which 500,000 fry or from 100,000 to 150,000 yearling fish, can be accommodated. The bunks are folded in the center of the car after the Pullman fashion. Here a table and several chairs are also folded against the wall ready for use in a moment.

"Instead of changing the water for the fish, an oxygen-supplying arrangement has been supplied, so that air can be placed in the water. At one end of the car is a steam engine and two Westinghouse air pumps, which send compressed air through a series of pipes and tubes to the various cans. Before the air reaches the cans, however, it is sent through an ice coil, where it is chilled to the proper temperature. The air is forced through a half-inch block of wood into the water, the block being placed at the mouth of the tube. Thus the proper volume is allowed to enter the water."

The car will start for Sisson in two weeks and begin to stock California streams with trout and salmon. When it is necessary to import some fish from

Eastern states, it can be sent over the mountains and the fish brought to this State conveniently.

Already foreign countries in Europe, Germany, for instance—are sending to California for fish and it is expected that when the car goes into commission the demand from the outside will increase.

Much credit is due W. E. Gerber of Sacramento, who was formerly on the State Fish Commission, for his part in having an appropriation made for the purchase of the car. He is still interested in the work, though not on the Commission.

FISH LINES.

Recent reports from many mountain streams and resorts state that trout fishing is improving. The cold weather prevailing in the Sierra Nevadas on the 1st of the month was closely followed by a warm spell that has changed conditions to a most favorable degree.

Anglers who have recently whipped the Truckee report that the stone fly, red ant, red spinner and cow dun are the killing lures.

Few trout fishermen take the trip into the San Pedro Martyr mountains, in Lower California, but reports from the Vala La Trinidad ranch, near Alamo, state that some of the best fishing within several hundred miles is to be found in these mountains, which have a high elevation and abound in game.

Fishing expeditions up the Kings and Kern rivers will be popular in a few weeks, as the water from the melting snow recedes. In the Kings River district fishing is particularly good in Sequoia lake. Lake Roeder, Lake Charlotte and Bryanithus and Bullfrog lakes. Trout are taken in Kern river from Kernville to the headwaters at Mt. Whitney.

The first shipment of young trout from the Northwestern Pacific Railroad fish hatchery was sent to the northern part of Sonoma county this week and planted in the streams around the Geysers by Deputy Game Warden A. F. Lea and Walter Sink of Cloverdale. There were 50,000 trout in the shipment, and it is expected that about 40,000 more will be received in a few days.

Superintendent Oldenberg of the Nevada State fish hatcheries, has been distributing black bass to the streams and lakes of the eastern part of the State recently, and will shortly begin distributing trout to all portions of the State, there being many applications on file.

R. H. Kuhn, a Stockton angler, last week caught 46 black bass in Whiskey slough. Artificial lures were used.

While they admit its correctness, some of the Santa Cruz anglers are not sure that Game Warden Welch's low-water theory, as exploited in The News recently, entirely accounts for the lack of fishing this spring.

One enthusiastic fisherman is here quoted:

"The Brookdale hatchery has done fine work for this county, but I would like to see it produce more brook and rainbow trout. The brook trout never leave the streams in which they are born, while the young steelhead make for the salt water as soon as they have grown sufficiently to stand the journey and the older ones leave as soon as they have spawned.

"The anglers have a real grievance, however, in the closing of a large portion of the streams to the public. One by one they are closing the creeks and soon we won't have any place to fish at all.

"The Waddell is practically closed; Scotts creek has been closed by the State Fish Commission, and the San Vincente is now too muddy for fully seven miles up the creek to do any fishing. I was at Laguna one Sunday last month, and saw two men deliberately turn the water out of the lagoon at the mouth of Laguna creek and let thousands of steelheads go out to sea. This was done so as to be sure of catching a mess for themselves. I caught one of the last to go out and it measured 22 inches in length."

And so the story goes. There is one thing sure, and that is that there were very few steelhead in the Santa Cruz creeks this spring.

Game Warden Walter R. Welch of Santa Cruz county is practical and thorough in more ways than one. Some years ago he advocated teaching the young the principles of game and fish protection and the economic value of bird life. He argued that if a youth was started on the right lines, he would, when arrived at man's estate, be a valuable unit in carrying on the good work, by force of example if by nothing else. With the nucleus acquired thus early, in future years it would be plain sailing and the work of conversion be easier and more effective. The value of his field work in Santa Cruz county is recognized and appreciated. Notwithstanding the amount of application and time this requires he has organized a boy's sportsmen's annex to the State association with an enrollment of 300 active, intelligent and enthusiastic members. This conscientious and laudable devotion in a chosen field reflects honor and credit upon Walter Welch and is without doubt the initiative of a movement that we believe ere long will reach further than the limits of Santa Cruz county.

STATE FISH COMMISSIONER.

Governor Gillett has appointed Michael J. Connolly of Los Angeles as a member of the Board of State Fish Commissioners vice Mr. John Birmingham Jr., who has been waiting to have his resignation from the office accepted for some time past. Mr. Birmingham's business affairs require his full attention leaving scant opportunity for devotion to the growing time demands in the many interests of the Fish Commission's work.

DOINGS IN DOGDOM.

The Santa Cruz list of awards was received too late this week for publication, but will appear in the next issue.

At a meeting held last week the name Ladies' Kennel Association of California was the title adopted at the last meeting of the recently organized lady fanciers' association. By-laws were submitted and approved. There will be an effort made to hold a show in San Francisco this fall, depending upon favorable action of the San Francisco Kennel Club. Failing to secure the desired permission a show will be held in Oakland. The ladies are firm in their intention to give a show and with the will they'll find a way.

Venice of America Kennel Club third annual show dates are July 23d, 24th and 25th. Entries will close July 15th. James Ewins will judge all breeds and this means there will be a good entry. "Jim" owns the best Bulldog on the Coast, is a thorough sportsman, fancier and a breeder of experience. William Ballantyne, a well known Irish Terrier breeder, of Belfast Kennels renown, will superintend the show. Under this good start the show is promising for quality and a large entry.

The club officers for 1908 are: W. J. Doran, president; Mrs. M. S. Severance, vice-president; O. L. Givernaud, secretary; G. F. Herr, treasurer; bench show committee, R. T. Cochran, Freeman A. Ford, Kingsley Stevens.

Santa Cruz actual number of dogs entered, we are informed, was 131. There were many absentees from the benches. Nine English Setters were entered only 5 were taken in the ring.

Pasadena entries closed on the 19th, mostly local dogs were entered.

Mrs. Murphy's good English Setter puppy Dash Montez went to the canine majority last week. Gabilan Kennels is the loser of a grandly bred and promising youngster, more's the pity.

Wonderland Kennels lost the good brood bitch Venus whelping a litter to Ch. Dick Dazzler.

Endcliffe Onyx recently whelped six puppies to Frisco Cinders. Onyx is a Viking bitch and a fairly good one. The puppies are a good looking litter, four or them with the best of tails.

Endcliffe Statesman will serve Little Mother next week. Statesman has improved greatly since the Frisco show.

Irish Water Spaniels are steadily growing in favor here and elsewhere on the Coast. This breed is essentially a duck hunting sportsman's fancy. Time was when anything having the semblance of this variety was acceptable. Sportsmen are getting particular now and paying attention to blood lines and breeding—thanks to Ch. Dennis C., and Ch. Dan Maloney, Ch. Our Chance and a number of good brood bitches. A cross bred will not fill the bill any longer, withal they are excellent workers, the real thing does the trick just as good and looks far better and is now in demand.

Charles Luhr's Bell L. whelped two puppies to The Gosoon (a winning and producing son of Ch. Dennis C.) four months ago. The young dogs are well developed for their age and more than promising. Luhrs thinks so well of these future Alvarado duck pond retrievers that he refuses to part with either. Bell L. won a ribbon at the last Frisco show and is an excellent type of the breed. The promising puppies he now owns has augmented the Irish Water Spaniel following by one more good sportsman and enthusiastic breeder.

Honolulu dates are July 20th to 23d inclusive.

Denver will hold a three day show in October.

The State Controller last week at Sacramento paid claims for thirty-four scalps of California lions killed in Mendocino county, the sum aggregating \$680, or \$20 apiece. He also paid bills incurred by the State Fish Commission, one for 415 Hungarian partridges imported from Pennsylvania and amounting to \$1073.80. The claim of W. E. Van Slyke, who was sent to Mexico to catch and ship to this State a number of wild turkeys, was a second bill liquidated, this amounting to \$300.

A rumor is current down San Bernardino way that a great many of the Hungarian grouse which were secured at, it is reported, the cost of \$5 a pair, have died, and that in this way many dollars of the hunters' license money has been wasted.

THE FARM

PLOWING THE ORCHARD.

The manner in which some men plow their orchards, when they plow them at all, accounts largely for their large fruit failures, and unsatisfactory growth of trees. It were better not to plow the orchard, particularly if the trees have not reached full bearing age, than recklessly go through it in the spring with a deep-set plow and tear out the roots by the wholesale. Don't do it and don't allow your hired man to do it; watch these things; it pays. There would not be so much damage done if the plow were not run so close to the roots.

The effect of such careless treatment of fruit trees is to check the growth of the wood and encourage the abnormal production of fruit. When the reaction comes you cannot get the trees to produce fruit or develop wood.

The orchard, the same as a garden, should not be allowed to be smothered out by weeds and they will and do come very near it in some people's orchards. Disking early in the spring and followed by harrowing the orchard regularly until time for sowing a crop of clover or vetch will be found the best method of defeating the weeds.—Exchange.

One hundred dollars in gold will be offered in prizes in the stock judging contests for students at the Spokane Interstate Fair. The competition will take place October 6, under the direction of John L. Smith. It is open to any man or agricultural student under 25 years of age. Each contestant will be required to place the three best animals in each ring in the order of merit and write his reasons for so placing them. This must be done in twenty minutes. Eighty points, maximum, are allowed for correct placing and twenty for reasons.

HOW THE PRICE OF MILK IS DETERMINED WHEN SHIPPED TO NEW YORK.

Three ways are in vogue for determining the price to be paid the producers. The first is by the New York Milk Exchange. This is an organization, nominally of representative producers and dealers, for the purpose of studying the situation from the standpoint of each and fixing a price, after a canvass of the supply, demand, and cost of production. The exchange has 17 directors, who determine the price of milk when conditions seem to warrant a change from the prevailing price. Sometimes the price is changed three times a month, although so frequent changes are not common. No definite advance contracts or prices are made by the exchange. The price fixed upon to-day is the price until another is determined upon. Of the seventeen directors, the secretary reports that more than one-third are producers. One of the largest dealers stated that two of the directors were farmers, while others are both producers and shippers. But the mass of the producers resent the claim that they have any representation in fixing the price. About three-fourths of the New York milk is bought on the exchange basis. The net price to the farmers is the exchange price, less three items—the zone freight rate, 5 cents per can as a ferriage charge on such milk as is landed in New Jersey, and a "station charge" of 10 cents per can. The exchange price in February, 1905, was \$1.61 per can. In the second zone there would be deducted 26 cents freight, 5 cents ferriage, and 10 cents station charge. This would make the net price to the farmer \$1.20 or 3 cents per quart. The station charge varies somewhat with the competition between different shippers when their creameries are located near each other.

Much milk which is paid for on the

exchange basis is actually bought by the 100 pounds. The milk is weighed when delivered by the farmer at the shipping station and then reduced to cans at 86 pounds to the can. In handling milk in large quantities the use of the words "can" and "quart" as units in price making seems to be decreasing and the system of paying by the 100 pounds is increasing.

The second way of paying for milk is that adopted by the largest purchasers, who buy for condensing as well as for direct sale and who condense much of their surplus in seasons when there is an abundant production. These purchasers buy by the 100 pounds, but make a price for a period of six months in advance. It is claimed that the exchange price is influential as a basis in fixing this scale of prices, although the two do not always agree. The price paid per 100 lbs. is a net price at the shipping station, "condensary" or creamery.

The third way of buying is by the 100 pounds on the basis of the fat in the milk. Samples are taken daily and tested. The agreed price is for milk testing 42 per cent and two cents additional is paid for each one-tenth of 1 per cent of fat.—From Bulletin 81 Bureau of Animal Industry.

DEDUCTIONS MADE FROM SHEEP BREEDING EXPERIMENTS.

The University of Wisconsin Agricultural Experiment Station has recently completed a five years' record of its flock of sheep undertaken to furnish reliable information pertaining to sheep husbandry. These records were compiled from a flock of 240 ewes, and at the conclusion of the five years' experiment, the conclusions following were arrived at:

The normal period of gestation, or the time from which a normal ewe is bred to the time of lambing, ranges from 145 to 151 days, and the greatest per cent of ewes will lamb 147 days after service. The gestation period appears to be somewhat longer for the male than for the female lambs. The per cent of males born is practically the same as that of females. The larger per cent of lambs born on or before the 147th day of pregnancy is strong, and after this time the number of weak and dead lambs is greatly increased. The number of days a lamb is carried by the ewe does not seem to have any effect on its size.

The largest per cent of increase is due to twin lambs, and there is no appreciable difference in the per cent of twins of the different breeds. The production of twin and triplet lambs is detrimental to the strength and vitality of lambs at birth. Shropshire ewes appear to be more prolific than any other breed. Ewes six years old produce the greatest per cent of increase, while young ewes have the greater per cent of single lambs. The per cent of ram lambs increases and the per cent of ewe lambs decreases as the age of the

ewe advances.

A ram is at his best at two and three years of age. The age of the ram does not have any effect on the sex of the offspring. Ram lambs average about one-half pound heavier at birth than ewe lambs. The larger the ewe the greater the per cent of increase, while the ram has no effect on the lambs in this respect. The size of the ewe, and not the size of the ram, determines the size of the lamb.

In one sense sheep might be considered valuable on every farm as much as poultry is. They are not in the way, it costs little to keep them, they are great weed cleaners, they benefit the soil more than any other stock and they practically pay for themselves each year. Many of our side hill pastures that are now almost barren or are simply big weed patches could be returned to profitable grass in a short time if sheep were placed on them.

Sheep are at once the poor man's income and the wealthy man's bank. No family having a home in the country is so humble but they can keep a sheep. No man of capital has ever invested in sheep and cared for them intelligently but has found them profitable. For quick returns they are next to the cows and the hens, and in proportion to labor involved and profits returned will outstrip them both. Then join with those who are trying to multiply the sheep and abate the dogs.

One herd may produce from three to five times as much profit per cow as another herd in the same community. In the same herd one good cow not infrequently produces as much profit to the dairy farmer above the cost of feed and care as eight or ten poor cows.

The dairy department of the Agricultural College at Lincoln, Neb., has a cow whose former owner regarded as a good, fair cow, and she was purchased at a price that confirmed this opinion. This cow gave enough milk last year (which was sold at 6 cents a quart) to bring nearly \$500.

The clean milker uses clean hands and is sure before he begins that the cow's udder is clean and that no falling dirt can get into the milk. Using lard on the hands to make milking easy will aid in making hard milkers. It will also help to keep the cow's teats very tender. Dampening the teats with milk also has the same effect.

The calf is often a fine market for milk. One Pennsylvania dairyman reports that he kept a record of 80 calves which consumed 12,000 quarts of milk for which he received \$481, or over 4 cents per quart, and the calves did the milking. He estimates that it takes 146 quarts of milk to make a calf four weeks old, which will weigh 160 pounds if they have Holstein blood.

OREGON FUTURITY No. 1---\$5,000

For Foals of 1908. Guaranteed by the Oregon State Board of Agriculture.

To be raced for in their 2 and 3-year-old form at the

OREGON STATE FAIR

ENTRIES CLOSE JULY 1, 1908.

Three-Year-Old Trotters	\$2000	Three-Year-Old Pacers	\$1500
Two-Year-Old Trotters	500	Two-Year-Old Pacers	600

Entrance \$5 to nominate foal on or before July 1, 1908, when breeding of foal must be given; \$10 January 1, 1909, when color, name and sex of foal must be given; \$10 January 1, 1910; \$10 January 1, 1911.

Starting payments—\$10 to start in two-year-old pace; \$25 to start in two-year-old trot; \$35 to start in three-year-old pace; \$50 to start in three-year-old trot. All starting payments due September 1, year of race.

Nominators must state when making payments to start whether the colt entered is a trotter or pacer. Colts that start as two-year-olds are not barred from starting in the three-year-old division. All entries must be accompanied by the entrance fee. In case of death or accident prior to January 1, 1909, nominator can substitute another foal eligible to enter, but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. Failure to make any payment forfeits all previous payments. Right reserved to declare off or reopen race stake in case the number of entries received is not satisfactory. Each race will be mile heats, two in three. Hobbles not barred on pacers. Money divided in each race 50, 25, 15 and 10 per cent. There will be no more money than there are starters. A colt distancing the field will be entitled to first and fourth moneys only, and in no other case will they be entitled to more than one money. Other than specified, rules of the National Trotting Association to govern.

For entry blanks address,

M. D. WISDOM, Hamilton Building, Portland, Oregon

Ellis' Improved
Hutton Patent
Checking Device

**Absolutely
the Greatest
Controller on
Earth for Road
or Track Use.**

Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan direct from us to the consumer to \$5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

G. S. ELLIS & SON
Harness and
Turf Goods
Manufacturers
430 MAIN STREET
CINCINNATI
OHIO.

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

THE HORSE SELLS

LARGELY ON LOOKS.

"Butter fat and satin smooth" would be an excellent ideal for the man who is raising a horse for sale. The gist of all the teaching of those who are trying to advise others how to fit their horses for market is "have them fat." Of course, it is presumed the horses are essentially good ones—that is, properly formed, sound and kind according to at least the average standard in horseflesh. Some young farmers who have been led to raising horses by the exceeding tempting prices of which so much has been heard for awhile past now complain that, having raised the animals, they cannot get the prices, but are compelled to sell for much less than they expected to receive.

The man on the farm sometimes fails to realize that in the raising of horses for sale he has now to compete with the "horse feeder," who is just as genuine if not so extensive a proposition as the "beef feeder" and the "swine feeder." If a farmer wants to get the notable prices that are obtained by the men who make a business of putting horses into attractive condition for market he must give his animals the same exact, painstaking care and scientific and liberal feeding that the latter do. He should try to get on to the little wrinkles of management that aid in improving the appearance of a horse and putting a finish on him.

In short, remember there is no animal that "sells more upon 'looks'" than a horse and act accordingly.

And, although "fat" is called for, it must be the fat that goes with strong muscle, firm flesh and flexible skin, and perhaps "well fleshed" would be a better term.

If you are producing any sort of horses for market and long prices, feed and fit to perfection with these in view. If for quick and easy local sale or to provide the professional finisher with material in the rough, that is another story, and there may be money in it too. On the whole, pretty nearly everything in the horse line brings generous value nowadays, and extraordinary quality means corresponding price.

ANTOINETTE FOR SALE.

The handsome bay mare Antoinette, sound and all right, kind and gentle, and a fast trotter, is offered for sale. She has won at matinees, trotting in 2:21 with very little work. Has worked out in 2:18 and can go faster. A lady can drive her and she is bred well enough to be a great brood mare. Has no record. Her sire is Antrim, sire of Anzella, 2:08 3/4, and her dam produced Antrim 2:15 1/2, a full sister to Antoinette. She can be seen at the Pleasanton at any time. For any further particulars, write to the owner,

THOS. RONAN, Pleasanton, Cal.

"SAVE-THE-HORSE" Registered Trade Mark SPAVIN CURE

As they sometimes are As "Save-the-Horse" can make them

The National Bank of Port Deposit

PORT DEPOSIT, MD.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: As a lover of the horse I want to tell you my experience with "Save-the-Horse" Spavin Cure.

Last August I purchased of you a bottle of "Save-the-Horse" which I used on a horse twenty-four years old and so lame that he could not go twenty feet without resting the spavined leg. He was useless, as he could not trot one step and could not keep up in team work.

After using one-half a bottle of "Save-the-Horse" I consider the horse absolutely sound. Since last October the horse has been used constantly on my farm and as a driver, and no one could tell that he had ever been lame. The remainder of the bottle cured several cases of scratches and took two large bumps off another horse.

I now have a very fine five-year-old horse that by hitting his head on a low beam, just back of the ear, and about three inches from it, has caused a large lump to appear. Have you any remedy or treatment that you could advise? If so please let me know as I am anxious to help the animal.

I never hesitate to recommend your spavin cure, as I know from actual experience what it will do.

Yours very truly, C. W. Reckeffs

A. W. MCKAY TRAINING STABLES.

Fayetteville, Tenn., May 20, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: I used a bottle of "Save-the-Horse" last season on my mare, record 2:13 1/4, for bowed tendons. Made the treatment while racing and was well pleased with the results. I now have another case and you may send me a bottle same as before.

Very truly, ALEX W. MCKAY.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

\$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. At Druggists and Dealers or Express Paid.

INBREEDING SMALL BIRDS.

Successful inbreeding with any breed of fowls is a difficult proposition, but especially so with the small breeds. Inbreeding always has a tendency to produce smaller fowls, and tests have shown that with some breeds the utility feature has been entirely destroyed.

Leghorns, for instance, up until a few years since were so small that they were practically useless except for the eggs they laid. Breeders of Leghorns, seeing their mistake, are now producing large fowls that make very good table fowls and still retain the position as leaders of layers.

The same is equally true of many other breeds. Many breeds are still being inbred at a sacrifice of usefulness, which in a few years will mean that such breeds will be almost unknown among those who raise poultry for profit.

Inbreeding is successful when scientifically done, but with amateurs it is almost always a failure. It is not so difficult to reach results with the larger breeds, and those who care for special points can perhaps get results, but we should advise them not to make experiments with small breeds.

Australian methods of sheep farming are being introduced in Mexico. An English company just formed has purchased a tract of land fifty miles square in the State of Chihuahua, and operations will begin at once. Several Australian sheep experts will conduct the ranch. Up to this time no effort has been made to carry on the sheep business in Mexico on anything approaching a scientific basis. Sheep are allowed to run at large, the rams and the ewes together, with no effort to keep the breed up. The English company proposes to import its first stock of sheep from Australia and build up from them. The ranch will be divided into different parts in which sheep of different years will be kept separate. The finest rams that can be procured in Australia will be imported. Some of the best native sheep will be retained and by breeding and interbreeding with the imported rams they expect to create a great transformation.

We are often asked how much grain a dairy cow should be fed for best results. This is a difficult question to answer. The size of the cow, the kind of roughage fed, breed and age all have a bearing on the quality and quantity of the ration and last but not means least, is the amount of milk she gives. Some cows give little milk and will keep in good condition correspondingly easy. One of our most practical operators says he gets best results by feeding two pounds of grain for every five pounds of milk. A cow giving twenty pounds of milk daily gets eight pounds of grain and one giving thirty pounds of milk twelve pounds and so on up or down as the milk product may indicate. A careful feeder will soon discern the use a cow makes of her feed for the pail is ever there to tell the story of what is being done.

The scheme of co-operative scouring plants is perfectly feasible and they ought to be established all over the range country but probably never will be. They could be established at convenient points in each western State and the growers could have their wool prepared for shipment in such condition that they might net four or five cents a pound more than they could get for wool in the grease, at corral or shipping point. Is there any more favorable time for establishing such plants than the present when wool is low and possibly will continue so through the ensuing year? The advantage which must result is obvious to growers.

3,000,000 SHEEP IN CALIFORNIA.

Who would have thought that there are 3,000,000 sheep in the State of California?

Nobody ever dreamed it—not even State Veterinarian Charles Keane, who is pretty well up on the vital statistics of the State. Dr. Keane's assistant, Dr. Blair, found it out only after conning over a mountain of figures and achieving after a long process of multiplication, addition and subtraction the approximate number, the Sacramento Bee says:

The State Veterinarian was enabled to get at the total through the records of the number of sheep dipped under the requirements of the State law. Up to date 2,500,000 sheep have been dipped to get the parasite off them and there are still three northern counties to be heard from that will add 500,000 to the grand total.

The work was done under the supervision of 110 inspectors, indicating that the State's employes worked hard and gave the people their money's worth. When it is considered that in many cases the sheep were dipped two or three times, the work of the State Veterinarian's department looms up big in the State's activities.—Sacramento Bee.

STOCK CATTLE IN DEMAND.

RED BLUFF, June 22.—Secretary W. A. Hoy, of the Tehama Stockmen's Association, states that one-half cent more per pound is being offered for stock cattle than is offered by the butchers for beef cattle. This, he says, is something entirely new. Good stock cattle are selling readily at 6 cents, while only 5½ cents is being paid for beef cattle, with a quiet demand.

This condition is attributed to the fact that the severe weather during the winter had a worse effect than was realized, and the spring rodeo has shown a loss of from 25 to 50 per cent, due to the hard winter and short feed.

Pigs should not be weaned until they are at least eight weeks old and if the sow is not to have a second litter, or if there is time enough in case she is it is better to let the pigs suckle until they are ten to twelve weeks old. Farmers often get in a hurry and wean pigs when six weeks old but unless there is an abundant supply of milk and especially good care is given, the pigs are likely to become stunted, sometimes so severely that they never recover. The cheapest way to put gains on young pigs is through the sow. She has strong digestion and can turn coarse grains and alfalfa pasture into easily digested milk. Careful experiments show that a pound of weight taken from the sow will make more than one pound of gain on the pigs, the flesh of the young animals containing more water. The sow should be fed to produce a high grade of milk and the pigs should be kept with her until they are eating a full feed of both grain and alfalfa.

D. E. Salmon for many years chief of the bureau of animal industry of the United States department of agriculture, writing from Uruguay, South America, says: There is a very favorable sentiment here towards live stock from the United States, and if there were facilities for getting stock here without ruinous expenses a good business could be done. Perhaps some time the people of our country will realize the importance of proper transportation facilities between their ports and the South American countries.

FOR SALE OR TRADE.

Thoroughbred stallion, 16 hands high, weight about 1200 pounds; 5 years old; imp. Brutus, out of a St. Carlo mare, and is a Double No. 3 according to the Bruce Lowe Breeding System. For information, call or write to GUS HANSEN, 635 Stevenson street, San Francisco, Cal.

State Fair Pacing Handicap

To be paced at the State Fair, Sept. 5, 1908

SACRAMENTO, CAL.

Stakes \$1000 Guaranteed

Entries close Wednesday, July 1, 1908

Dash Open to all Pacers.

Horses with records of 2:15, or slower, to go a distance of one and one-quarter miles and be allowed 50 feet start by faster horses for each second's difference in speed; but no horse to be handicapped slower than up to a mile in 2:15.

More than one horse from the same stable may start.

Records Will not Necessarily Govern

in the handicapping. Horses known not to be up to their records will be treated accordingly, and green horses, or horses with records slower than 2:15, will not necessarily start from scratch.

The start will be a standing one, but it is understood that a horse may be moving when the word is given, providing he is back of his own starting line and ahead of the line in the rear, but any horse ahead of his starting line when the word is given will be disqualified from winning any part of the purse.

This handicap is based on the supposition that the slowest horses to start in it will pace 6,600 feet (one mile and a quarter) in 168½ seconds, that is five-quarters of a mile at the rate of 2:15 to the mile, and that the various classes in the rear will be able to pace the distance at the rate they are classed for one mile. While the faster horses travel farther in this race than slower ones, they are making their effort during no longer period of time, and it is believed, for instance, that a 2:05 horse can pace at the rate of 42.24 feet per second as long as a 2:15 pacer can move at the rate of 39.1 feet. Under the rules of this race a 2:05 pacer has 28 feet the best of it in distance covered, to offset the disadvantage of starting in the rear.

The handicapping being close and efficient, the speed allowances are believed to equalize the chances of all starters. The scratch horse has as good but no better chance than the fastest starter. It is a class for all pacers from 2:15 down to the fastest, and no horse entered will be out of his class.

The handicaps, or speed allowances, will be announced on the first day of the meeting at which the race is to take place.

The handicapping will be done by experts to be selected by the Board of Directors.

Entrance three per cent, due July 1, 1908. Two per cent additional to start. Declarations must be made in writing, accompanied by the amount due when made, or nominator will be held for all payments except starting payment.

Money divided 50, 25, 15 and 10 per cent. Except as stated, conditions advertised for the meeting to govern.

MEMBER NATIONAL TROTTING ASSOCIATION.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.
